

**Border Collie**

**General Appearance**
Well proportioned, smooth outline showing quality, gracefulness and perfect balance, combined with sufficient substance to give impression of endurance. Any tendency to coarseness or weediness undesirable.

Characteristic: Tenacious, hardworking sheepdog, or great tractability.

**Temperament**
Keen, alert, responsive and intelligent. Neither nervous nor aggressive

**Size**
Ideal Height
Dogs – 21 inches (53 cm)
Bitches – slightly less

**Coat & Colour**
**Coat:** Two varieties: 1) Moderately long. 2) Smooth. In both, topcoat dense and medium textured, undercoat soft and dense giving good weather resistance. In moderately long coated variety, abundant coat forms mane, breeching and brush. On face, ears, forelegs (except for feather), hindlegs from hock to ground, hair should be short and smooth.

**Colour:** Variety of colours permissible. White should never predominate.

**Head**
**Skull:** fairly broad, occiput not pronounced. **Cheeks** not full or rounded. **Muzzle** tapering to nose, moderately short and strong. Skull and foreface approximately equal in length. **Stop** very distinct. **Nose** black, except in brown or chocolate colour when it may be brown. In blues, nose should be slate colour. Nostrils well developed. **Eyes:** Set wide apart, oval shaped, or moderate size, brown in colour except in merles where one or both or part of one or both may be blue. Expression mild, keen alert and intelligent. **Ears:** Medium sized and texture, well set apart. Carried erect or semi-erect and sensitive in use. **Mouth:** Teeth and jaws strong with a perfect, regular complete scissor bite, (i.e. upper teeth closely overlapping lower teeth and set square to the jaws).
Neck
Of good length, strong and muscular, slightly arched and broadening to shoulders.

Forequarters
Front legs parallel when viewed from front, pasterns slightly sloping when viewed from side. Bone strong, but not heavy. Shoulders well laid back, elbows close to body.

Body
Athletic in appearance, ribs well sprung, chest deep and rather broad, loins deep and muscular, but not tucked up. Body slightly longer than height at shoulder.

Hindquarters
Broad, muscular, in profile sloping gracefully to set on of tail. Thighs long, deep and muscular with well turned stifles and string, well let down hocks. From hock to ground, hindlegs well boned and parallel when viewed from rear. Feet: oval in shape, pads deep, strong and sound, toes arched and close together. Nails short and strong.

Tail
Moderately long, the bone reaching at least to hock, set on low, well furnished and with an upward swirl towards the end, completing graceful contour and balance of dog. Tail may be raised in excitement, never carried over back.

Gait
Free, smooth and tireless, with minimum lift of feet, conveying impression of ability to move with great stealth and speed.

Faults
Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded be in exact proportion to its degree.

Note:
Male animals should have two apparently normal testicles fully descended into the scrotum.
Finnish Lapphund

Origin & Purpose
The Finnish Lapphund traces its origin back to the dogs kept by the Lapp people used as reindeer herders and watchdogs in Finnish Scandinavia and in the northern parts of Russia. Over the years, as reindeer herding subsided, the dogs were effectively used on Sheep and Cattle. The breed name was changed from Lapponian Herder to Lapphund in 1967 and again changed in 1993 to Finnish Lapphund. Today the breed is very popular in the whole of Finland, mainly as a house and hobby dog.

General Appearance
Smaller than medium sized, its conformation is strong for its size, slightly longer than the height at the withers. Long and thick coated with pricked ears.

Important Proportions – The depth of the body is slightly less than half of the height at the withers. The muzzle is slightly shorter than the skull. The skull is slightly longer than broad, the depth is the same as the breadth.

Temperament
Keen, calm and willing to learn. Friendly and Faithful.

Size
Ideal height for males at the withers – 49 cm (19 inches
Ideal height for females at the withers – 44 cm (17 inches)

With a tolerance of +/- 3 cm (just over 1 inch)
Type is more important than size

Coat & Colour
Coat
Skin – Tight overall without wrinkles. Hair – Profuse, the males especially have an abundant mane. The outer coat is long, straight and harsh. On the head and on the front of the legs, the coat is shorter. There must be a soft and dense undercoat.
Colour
All colours are permitted. The basic colour must be dominant. Colours other than the basic colour can occur on head, neck, chest, underside of the body, on legs and tail.

Head

Neck
Medium in length, strong and covered with profuse hair.

Forequarters

Body
Withers: Muscular and broad, only slightly marked (not prominent). Back: Strong and straight. Loins: Short and muscular. Croup: Of medium length, well developed, sloping only slightly. Chest: Deep, rather long, reaching almost to the elbows, not very broad. The ribs are slightly arched; the forechest clearly visible but not too pronounced. Underline: Slightly tucked up.

Hindquarters
Strong boned, powerful. Viewed from behind, straight and parallel. The angulation is clearly marked but not too strongly. Upper Thigh: Of medium length, rather broad with well developed muscles. Stifles: Pointed forward, the angulation is clearly marked (well angulated).
Hock Joint: Moderately low set; the angulation is clearly marked but not too strongly. (Moderate angulation). Metatarsus (Rear Pastern): Rather short, strong and vertical. Feet: Well arched, oval rather than round, covered with dense hair. The pads are elastic with the sides covered with dense hair.

Tail
Set rather high, medium in length, covered with profuse and long hair. In movement the tail in curved over the back or side; at rest it may hang down.

Gait
Effortless. Changes easily from trot to gallop, which is the most natural style of movement. The legs move parallel. Agile and fast when working.

Faults
Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree

- Males not masculine and females not feminine
- Light head, insufficient stop
- Dropped ears
- Tail carriage continuously lower than the topline
- Over angulated or too straight rear angulation
- Lack of under coat. Flat coat. Curly outer coat
- Basic colour indistinct

Disqualification
- Over or undershot mouth
- Kinky tail

Note:
Male animals should have two apparently normal testicles fully descended into the scrotum.
