

## GROUP VI: NON-SPORTING DOGS

# BOSTON TERRIER

RECOGNIZED: 1889

Effective: January 2014

*The breed standard outlines the ideal characteristics, temperament and appearance of a breed, and ensures that a dog can carry out its original purpose. Breeders and judges should be mindful to prioritize dogs that are healthy and sound in both mind and body.*

### GENERAL APPEARANCE

The general appearance of the Boston Terrier should be that of a lively, highly intelligent, smooth-coated, short-headed, compactly built, short-tailed, well-balanced dog of medium station, of “acceptable colour” and evenly marked with white. The head should indicate a high degree of intelligence and should be in proportion to the size of the dog. The body rather short and well-knit, the limbs strong and neatly turned, tail short, and no feature be so prominent that the dog appears badly proportioned. The dog should convey an impression of determination, strength and activity, with a style of a high order; carriage easy and graceful.

A proportionate combination of “colour” and “ideal markings” is a particularly distinctive feature of a representative specimen, and a dog with a preponderance of white on body or without the proper proportion of “acceptable colour” and white on head, should possess sufficient merit otherwise to counteract its deficiencies in these respects.

The ideal “Boston Terrier expression” displays “a high degree of intelligence,” and is an important characteristic of the breed.

“Colour and markings” and “expression” should be given particular consideration in determining the relative value of “general appearance” to other points.

### SIZE

Not exceeding 11.25 kg (25 lb), divided by classes as follows: lightweight, under 6.75 kg (15 lb); middleweight, 6.75 kg (15 lb) and under 9 kg (20 lb); heavyweight, 9 kg (20 lb) and not exceeding 11.25 kg (25 lb).

### COAT

Coat short, smooth, bright and fine in texture.

### COLOUR

Black, seal, black brindle, brindle, all with white markings.

#### **Description of Colours:**

- Black: Self-explanatory. With white markings.
- Seal: Base colour is black with reddish brown cast over the top of the coat “only seen in bright light or sunlight.” With white markings.
- Black Brindle: Base colour being black with brown hairs distributed through the black. With white markings.
- Brindle: Base colour being brown with black hairs distributed through the brown. With white markings.

All other colours are to be disqualified including any solid colour

### **Description of White Markings:**

#### *Required Markings:*

- White muzzle band
- White blaze between the eyes
- White fore chest

#### *Desired Markings:*

- White muzzle band
- White blaze between the eyes and over the head
- White forechest
- Full or part white collar
- Part or all of front legs white
- White on the toes of rear feet

Preferably not more than one third of the entire body should be white

**Faults:** Long or coarse coat; coat lacking lustre. Preponderance of white on body; without the proper proportion of “accepted colour” and white on head; or any variation detracting from the general appearance.

### **HEAD**

**Skull:** Square, flat on top, free from wrinkles; cheeks flat; brow abrupt, stop well defined. **Muzzle:** Short, square, wide and deep, and in proportion to skull; free from wrinkles; shorter in length than in width and depth, not exceeding in length approximately one-third of length of skull; width and depth carried out well to end; the muzzle from stop to end of nose on a line parallel to the top of the skull. **Nose:** Black and wide, with well-defined line between nostrils. **Mouth:** The jaws broad and square, with short regular teeth. Bite even or sufficiently undershot to square muzzle. The chops of good depth but not pendulous, completely covering the teeth when mouth is closed. **Eyes:** Wide apart, large and round, dark in colour, expression alert, but kind and intelligent. The eyes should be set square in the skull, and the outside corners should be on a line with the cheeks as viewed from the front. **Ears:** Carried erect, either cropped to conform the shape of the head, or natural bat, situated as near the corners of skull as possible. **Faults:** Skull “domed” or inclined; furrowed by a medial line; skull too long for breadth, or vice versa; stop too shallow; brow and skull too slanting. Muzzle wedge-shaped or lacking depth; down-faced; too much cut out below the eyes; pinched or wide nostrils; butterfly nose; protruding teeth; weak lower jaw; showing turn-up, lay back; wrinkled. Eyes small or sunken; too prominent; light colour or walleye; showing too much white or haw. Ears poorly carried or in size out of proportion to head.

### **NECK**

Of fair length, slightly arched and carrying the head gracefully; setting neatly into shoulders. **Faults:** Ewe-necked; throatiness; short and thick.

### **FOREQUARTERS**

**Shoulders:** Sloping. **Elbows:** Standing neither in nor out. **Forelegs:** Set moderately wide apart and on a line with point of the shoulders; straight in bone and well muscled. Pasterns: Short and strong. **Faults:** Loose shoulders or elbows; long or weak pasterns.

### **BODY**

Deep with good width of chest. **Back:** Short. **Ribs:** Deep and well sprung, carried well back to loins. **Loins:** Short and muscular; rump curving slightly to set-on of tail; flank very slightly cut up. The **body** should appear short but not chunky. **Faults:** Flat sides; narrow chest; long or slack loins; roach back; sway back; too much cut-up in flank.

**HINDQUARTERS**

**Hind legs:** Set true; bent at stifles; short from hocks to feet. **Hocks:** Turning neither in nor out. **Thighs:** Strong and well muscled. **Feet:** Round, small, and compact and turned neither in nor out; toes well arched. **Faults:** Hind legs too straight at stifles; hocks too prominent; splay feet.

**TAIL**

Set-on low; short, fine and tapering; straight or screw; devoid of fringe or coarse hair, and not carried above horizontal. **Faults:** A long or gaily carried tail; extremely gnarled or curled against body.

**Note:** The preferred tail should not exceed in length approximately one-quarter the distance from set-on to hock.

**GAIT**

The gait of the Boston Terrier is that of a sure-footed straight-gaited dog, forelegs and hind legs moving straight ahead in line with perfect rhythm, each step indicating grace with power. **Faults:** There shall be no rolling, paddling or weaving when gaited, and any crossing movement, either front or rear, is a serious fault.

**FAULTS**

Any departure from the aforementioned ideals shall be considered faulty to the degree in which it interferes with the health and well-being of the dog and the breed’s traditional purpose.

**DISQUALIFICATIONS**

- Any solid colour, black and tan, red, mouse colours
- All white, absence of white markings
- Eyes blue in colour or any trace of blue
- Docked tail
- Dudley nose
