Spaniel (Blue Picardy)

The breed standard outlines the ideal characteristics, temperament, and appearance of a breed, and ensures that a dog can carry out its original purpose. Breeders and judges should be mindful to prioritize dogs that are healthy and sound in both mind and body.

**General Appearance**
This dog is close to the ground, well built for work. General aspect much like that of the Picardy Spaniel.

**Size**
57-60 cm (22 ½ - 23 ½ in) at the withers for males, a little shorter for females.

**Coat and Colour**
Hair is flat, or slightly wavy, mottled grey black in colour giving it a bluish tinge with back spots. Good feathering on limbs and tail.

**Head and Skull**
- **Nose** large and well open.
- **Muzzle** long and sufficiently wide. Lips chops large and well let down, forming a square muzzle.
- **Stop** moderately accentuated but marked. Skull oval, relatively large without bulging parietal bones, occipital bone slightly apparent.
- **Eyes** calm expression, dark, large, well open.
- **Ears** must be set on a little above the line of the eye, rather thick, framing the face, covered with silky wavy hair; when stretched lengthwise, it must reach the tip of the nose. **Neck** well set into the shoulders. A very slight dewlap is allowed.

**Body**
Chest moderately deep. Ribs well sprung and descending to the elbows. Back and loin not too long, well held together. Croup slightly falling away.

**Forequarters**
Shoulders and arms slightly sloping. Upper arms strong and muscular. Feet round, a little large but not flat, well covered with hair between tight fingers.

**Hindquarters**
Thighs muscular. Lower shanks long and well feathered. Hocks angulated without exaggeration and well feathered from the hock joint to the foot. Feet round, a little large but not flat, well covered with hair between tight toes. Tail not much longer than the hock joint, never hooked.
Faults
Any departure from the aforementioned ideals shall be considered faulty to the degree in which it interferes with the health and well-being of the dog and the breed’s traditional purpose.
• Skull too narrow, not chiselled enough.
• Muzzle pointed.
• Eyes light, too small.
• Ears short, set on too high, too thin.
• Feet flat, splayed or too large.
• Chest ribs too flat or too round.
Note: Male subjects must have two apparently normal testicles fully descended into the scrotum.

Breed Name: Blue Picardy Spaniel
Year of Recognition: 1995
Effective Date: January 2004
