These tests assist breeders who strive to enhance breed improvement by selecting breeding stock that have strongly demonstrated these fundamental breed traits.

10 STANDARD OF PERFORMANCE

10.1 Field Dog Junior Test

- 10.1.1 A Field Dog Junior is a dog that has not reached the training level of a field dog. This is an entry level test for dogs of any age that have limited field experience. At this level, dogs can be expected to show some immaturity in range, pace, pattern and style.
- 10.1.2 Desire to Hunt. The Field Dog Junior must show a keen desire to hunt. A perfect score would be given to a dog that demonstrates natural ability; displays confidence and enthusiasm for its work; and searches the field without continual encouragement from the handler.
- 10.1.3 Style Running. Excessive pottering should be penalized. A dog must check objectives quickly and thoroughly and exhibit a type of movement consistent with its breed.
- 10.1.4 Pace. A perfect score would be given to a well conditioned dog which exhibits a consistent pace matched to terrain and weather conditions.
- 10.1.5 Range. The dog must hunt the course for its handler at all times at a range suitable for a handler on foot and show or check in front of its handler frequently. It must cover adequate ground, but never range out of sight or sound for a length of time that would detract from its usefulness as a practical gun dog. Similarly, a dog that is working too closely to the handler should be penalized. A perfect score would be given to a dog that adjusts its range to the cover in order to search objectives quickly and thoroughly.
- 10.1.6 Pattern. To earn a perfect score, a dog must hunt the field, search the objectives and use the wind and

terrain in a manner that shows it recognizes likely game bird cover.

- 10.1.7 Control. The Field Dog Junior should be under reasonable control by its handler at all times. The dog should handle well with a minimum of commands from the handler. Ideally, the dog should respond to commands and movements of the handler without excessive hacking or continuous repetition of commands.
- 10.1.8 Pointing. The Field Dog Junior dog must locate (31-09-18) game and establish point and hold point long enough to demonstrate its natural ability to point and without interference or command from the handler. A "flash point" or a commanded point are not acceptable. Intentional flushing after substantial point has been demonstrated will not be penalized in an FDJ dog. Blinking will result in automatic failure. Sitting or lying down while in the act of pointing will result in automatic failure.
- 10.1.9 An FDJ dog that has multiple game contacts may earn a passing score if it clearly demonstrates natural pointing ability on at least one bird.
- 10.1.10 Reaction to shot. A shot will be fired by the handler (99-06-16) of a caliber not less than .22 upon the flush of the bird on course to enable the judge to examine the dog for sensitivity to the gun. The shot is to be fired only when a bird is flushed. There must be a shot for every bird. A perfect score would be given to a dog that exhibits alertness and eagerness at the sound of gunfire. A passing grade will be awarded to the dog that softens but does not bolt. Gun shyness will be an automatic failure. If the opportunity does not present itself during the time on the course, a call-back may be set-up at the judge's discretion to complete the evaluation.
- 10.1.11 With the permission of the judge, collaring is allowed.
- 10.1.12 At least 20 and not more than 30 minutes shall be allowed for the dog to complete all aspects of the test. A dog that has not located game may be allowed at the discretion of the judge to continue after the course in order to complete all aspects of the test up to the maximum of 30 minutes.

10.2 Field Dog Test

10.2.1 Desire to Hunt. A Field Dog must show a keen desire to hunt. A perfect score should be awarded to a dog which exhibits continuous work by casting

to objectives independently and quickly, hunting without continual encouragement of the handler.

- 10.2.2 Style Running. A dog must check objectives quickly and thoroughly and exhibit a type of movement consistent with its breed. Pottering around objectives should be penalized.
- 10.2.3 Pace. A perfect score would be given to a well conditioned dog which exhibits a consistent pace matched to terrain and weather conditions.
- 10.2.4 Range. The dog must hunt the course for its handler at all times at a range suitable for a handler on foot, and should show or check in front of its handler frequently. It must cover adequate ground but never range out of sight or sound for a length of time that would detract from its usefulness as a practical gun dog. Similarly, a dog that is working too closely to the handler should be penalized. A perfect score would be given to a dog, which adjusts range to cover in order to search objectives quickly and thoroughly.
- 10.2.5 Pattern. Intelligent use of the wind and terrain in locating game is highly desirable. To earn a perfect score, a dog must hunt the field, search the objectives and use the wind and terrain in a manner that shows it recognizes likely game bird cover.
- 10.2.6 Control. The dog should be under the handler's control at all times. The Field Dog should handle well, responding to commands and movements of the handler without hacking or continuous repetition of commands. Continuous hacking indicates a lack of control.
- 10.2.7 Pointing. The dog must locate game. Accurate nose style and intensity on point are highly desirable. For a passing mark, the dog must locate game, must point staunchly, and must hold point until the bird flushes wild or is flushed by the handler. If the bird cannot be shot, a shot will be fired from a blank pistol or the judge may instruct an official gunner to fire in the air. Either intentional flushing or blinking will result in an automatic failure. Sitting or lying down on point while in the act of pointing will result in automatic failure. To earn a passing score, the FD dog that has multiple game contacts must point all of the birds it locates. There will be no averaging of scores.
- 10.2.8 The dog should relocate game that moves out only after the handler encourages it to do so.
- 10.2.9 With the permission of the judge, collaring is allowed.
- 10.2.10 Reaction to shot. A shot will be fired by the han-

- (99-06-16) dler or official gunner of a caliber not less than .22 upon the flush of the bird on the course to enable the judge to examine the dog for sensitivity to the gun. The shot is to be fired when a bird is flushed. There must be a shot for every bird. A perfect score would be given to a dog that exhibits alertness and eagerness at the sound of gunfire. A passing grade will be awarded to the dog that softens but does not bolt. Gun shyness will be an automatic failure. If the opportunity does not present itself during the time on the course, a call back may be set-up at the judge's discretion to complete the evaluation.
- 10.2.11 Retrieve on land. A Field Dog must retrieve a recognized game bird or pigeon on land quickly and tenderly to hand on command for full marks. The handler must remain at the point from which the retrieve was initiated unless permitted to move by the judge. A dog which retrieves tenderly within hand range in any manner will receive a passing score. Chewing or eating a bird will result in automatic failure. If the opportunity does not present itself during the time on the course, a call back may be set-up at the judge's discretion to complete the evaluation.
- 10.2.12 At least 20 and not more than 30 minutes shall be allowed for the dog to complete all aspects of the test. A dog that has not located game may be allowed at the discretion of the judge to continue after the course in order to complete all aspects of the test up to the maximum of 30 minutes.

10.3 Field Dog Advanced Test

- 10.3.1 Field Dog Advanced dogs will be braced. If there is a bye dog, a dog with at least one qualifying score in FDA or FDX must be chosen by the test-giving club in order for the test dog to complete all aspects of the test. If a suitable dog cannot be found, a dog with a senior stake field trial placement may be chosen by the Field Dog Test Committee.
- 10.3.2 Desire to Hunt. An FDA dog must show a keen desire to hunt. A perfect score should be awarded to a dog which exhibits continuous work by casting to objectives independently and quickly, hunting without continual encouragement of the handler.
- 10.3.3 Style Running. A dog must check objectives quickly and thoroughly and exhibit a type of movement consistent with its breed. Pottering around objectives should be penalized.

- 10.3.4 Pace. A perfect score would be given to a well conditioned dog which exhibits a consistent pace matched to terrain and weather conditions.
- 10.3.5 Range. The dog must hunt the course for its handler at all times at a range suitable for a handler on foot, and should show or check in front of its handler frequently. It must cover adequate ground but never range out of sight or sound for a length of time that would detract from its usefulness as a practical gun dog. Similarly, a dog that is working too closely to the handler should be penalized. A perfect score would be given to a dog, which adjusts range to cover in order to search objectives quickly and thoroughly.
- 10.3.6 Pattern. Intelligent use of the wind and terrain in locating game is highly desirable. To earn a perfect score, a dog must hunt the field, search the objectives and use the wind and terrain in a manner that shows it recognizes likely game bird cover.
- 10.3.7 Control. The dog should be under the handler's control at all times. The FDA dog should handle well, responding to commands and movements of the handler with- out hacking or continuous repetition of commands. Continuous hacking indicates a lack of control.
- 10.3.8 Pointing. The dog should locate game. Accurate nose, style and intensity on point are highly desirable. For a passing mark, the dog must locate game, must point staunchly, must hold point and be steady until the shot is fired. If the bird cannot be shot, a shot will be fired from a blank pistol or the judge may instruct an official gunner to fire in the air, this will enable the judge to establish whether there is any sensitivity to the gun. Intentional flushing, blinking, sitting or lying down on point will result in automatic failure. To earn a passing score, the FDA dog that has multiple game contacts must point all of the birds it locates. There will be no averaging of scores.
- 10.3.9 The dog should relocate game that moves out only after the handler encourages it to do so.
- 10.3.10 With permission of the judge, collaring is allowed.
- 10.3.11 Retrieve on land. An FDA dog must retrieve a recognized game bird or pigeon on land quickly and tenderly to hand on command for full marks. The handler must remain at the point from which the retrieve was initiated unless permitted to move by

the judge. A dog which retrieves tenderly to within hand range will receive a passing score. Chewing or eating a bird will result in automatic failure. If the opportunity does not present itself during the time on the course, a call back may be set-up at the judge's discretion to complete the evaluation.

- 10.3.12 Backing. When a bracemate has established a point, the FDA dog must back. A back on command will receive a passing score. Once the dog has established its honour, the handler may collar the dog to prevent interference with the pointing dog when the bird is flushed. The dog must clearly demonstrate it is honouring before it can be collared. With approval of the judge, the backing dog may be excused and/or collared off if the flush or retrieve are taking an excessive length of time or if the pointing dog relocates. Stealing point or otherwise interfering with the pointing dog will result in automatic failure. If the opportunity to back does not occur, a dog should be provided by the club to point a bird in a setup situation to enable a back to be judged.
- 10.3.13 At least 30 and not more than 40 minutes shall be allowed for the dog to complete all aspects of the test. A dog that has not located game may be allowed at the discretion of the judge to continue after the course in order to complete all aspects of the test up to the maximum of 40 minutes.

10.4 Field Dog Excellent Test

- 10.4.1 Field Dog Excellent dogs must be braced. If there is a bye dog, a dog with at least one qualifying score in FDX must be chosen by the test-giving club in order for the test dog to complete all aspects of the test. If a suitable dog cannot be found, a dog with a senior stake field trial placement may be chosen by the Field Dog Test Committee.
- 10.4.2 Desire to hunt. An FDX dog must show a keen desire to hunt. A perfect score should be awarded to a dog which exhibits continuous work by casting to objectives independently and quickly.
- 10.4.3 Style Running & Pattern. An FDX dog shall run in a style distinctive of its breed and must have a bold and attractive style of running and demonstrate not only intelligence in quartering and seeking objectives, but also the ability to find game. Pottering around objectives should be penalized. To earn a perfect score, a dog must hunt the field, search the objectives and use the wind and terrain in a manner

that shows it recognizes likely game bird cover.

- 10.4.4 Range & Pace. The dog must hunt the course for its handler at all times, and at a range suitable for a handler on foot, and should show or check in front of its handler frequently. It must cover adequate ground but never range out of sight or sound for a length of time that would detract from its usefulness as a practical gun dog. Similarly, a dog that is working too closely to the handler should be penalized. For a perfect score, the dog must adjust its range to the cover in order to search objectives independently and thoroughly as well as demonstrating that it is a well conditioned dog which exhibits a consistent pace matched to terrain and weather conditions.
- 10.4.5 Control. The FDX dog should handle well, responding to commands and movement of the handler without hacking or continuous repetition of commands. Excessive hacking will result in failure. The dog must give a finished performance and must be under the handler's control at all times.
- 10.4.6 Pointing. The dog must locate game and must point staunchly. Staunchness and intensity must be exhibited to earn full marks. Either intentional flushing and/or blinking will result in an automatic failure. Sitting or lying down on point while in the act of pointing will result in automatic failure.
- 10.4.7 The dog should relocate game that moves out, only after the handler encourages it to do so.
- 10.4.8 Steady to wing and shot. A perfect score would be given to a dog which does not move when the bird (99-06-16) it is pointing is flushed and the shot is fired. For optimum performance, a slight movement by the dog to ensure location of the bird's drop is allowed. A chase or delayed chase will result in failure. Intentional flushing and/or lack of steadiness to wing and shot are serious faults and will result in automatic failure. If the bird cannot be safely shot, a shot must be fired from a blank pistol or the judge may instruct an official gunner to fire in the air. A shot will be fired by the handler or official gunner of a caliber not less than .22 upon the flush of the bird on course to enable the judge to examine the dog for sensitivity to the gun. If the opportunity does not present itself during the time on the course, a call back may be set up at the discretion of the judges to complete the evaluation.
- 10.4.9 When an FDX dog observes a bird flush in its vicin-

ity, it must stop and remain steady until the handler commands it to continue working. A shot must be fired before sending the dog on.

- 10.4.10 Retrieve on land. An FDX dog, when retrieving on land, must remain steady to wing and shot until commanded by the handler to retrieve. The handler must remain at the point which the retrieve was initiated unless permitted to move by the judge. To receive full marks, an FDX dog must retrieve quickly a recognized game bird or pigeon and tenderly to (hand) the handler without any further commands. A dog which retrieves tenderly within hand range will receive a passing score. Chewing or eating a bird will result in automatic failure. If the opportunity does not present itself during the time on the course, a call-back may be set-up at the judge's discretion to complete the evaluation.
- 10.4.11 Backing. If applicable, when a bracemate has established a point, the FDX dog must back. For full marks, the dog should back (or "honour") upon viewing the dog on point without a handler command. A back on command will receive at least a passing score. Stealing point will result in failure. If the opportunity to back does not occur, a dog should be provided by the club to point a bird in a set-up situation to enable a back to be judged. In either case, the backing dog may not be touched and must remain steady until the shot is fired and the retrieve (if game is shot). If birds are not shot in the test, the dog must honour with a retrieved dead bird. The backing dog may be excused by the judge providing that an excessive amount of time has been spent on the retrieve, or flushing of the bird in front of the pointing dog. At the discretion of the judges, the dog should not have to remain on point for an unreasonable amount of time in order to bring the other dog into a backing situation. All backing dogs must hold until all actions of the pointing dog are completed. If a backing situation does not occur during the running of the dog on the course, a call-back must be set-up (for the backing dog to honour through a full retrieve of a dead bird in a passing situation).
- 10.4.12 Retrieve from water. When retrieving from water, the FDX dog must remain steady to flush (if applicable) and shot until commanded by the handler to retrieve. The handler must remain at the point from which the retrieve was initiated unless permitted to move by the judge. To achieve a perfect score

a dog should, on command, retrieve a recognized bird or pigeon quickly and tenderly to hand and should enter the water boldly using the most direct route both to the bird and to return to the handler. A dog which retrieves tenderly within hand range, in any manner will receive at least a passing score. Chewing or eating the bird will result in automatic failure. The location chosen for the water retrieves must provide water of suitable depth to demonstrate the dog's ability to swim, simulating an actual hunting situation. If the opportunity does not present itself during the time on the course, a call-back may be set-up at the judge's discretion to complete the evaluation.

- 10.4.13 Unless approved or directed by the judges, a handler may not have physical contact with his dog other than to tap for release, to retrieve, to relocate, to water and to remove feathers from the mouth. Collaring is allowed only with the judge's permission.
- 10.4.14 The FDX dog that has multiple game contacts must handle all of them properly to earn a passing score.
- 10.4.15 At least 30 minutes, and not more than 45 minutes shall be allowed for the completion of all aspects of the test. A dog that has not located game may be allowed at the discretion of the judge to continue after the course in order to complete all aspects of the test up to the maximum of 45 minutes.

- 11.2 Call-backs should be used in a pass/fail situation if there is doubt. They should be used at the judge's discretion to clarify their opinion on a particular dog if its performance is questionable in one area.
- 11.3 Field Test Committees may make such regulations or additional rules for the government of their field test as shall be considered necessary, provided such regulations or additional rules do not conflict with any rule of the CKC.
- 11.4 Such regulations or additional rules shall be printed in the premium list or entry form and violations thereof shall be considered the same as violations of

the rules and regulations of the CKC.

- 11.5 The use of belly protectors shall be allowed. The belly protector shall be subject to inspection and approval of the judges.
- 11.6 Bell Collars
 - (a) Bell Collars ae allowed in field dog tests.
- (77-03-22) (b) Any tracking collar that is legal for use in Canada and is listed online at: https://www.akc. org/sports/pointing-breeds/tracking-devices/will be permissible for use in CKC tests
- 11.7 Chewing or eating a bird at any time during a test (33-09-18) will result in automatic failure in any Field Dog Test level.

12 DRAWING & BRACING

- 12.1 In FDJ, FD, FDA and FDX the running order shall be determined by a draw. If, during the drawing for running order any handler is drawn to handle in more than 2 consecutive places in the same test, and if there is a latter dog to be drawn which he is not handling, the latter dog may be moved up to run following the second dog so the handler would not be required to run more than 2 consecutive dogs. However, this shall not apply if an alternate handler has been named.
- 12.2 In Field Dog Junior and Field Dog Tests, dogs will be tested one at a time by one judge.
- 12.3 In Field Dog Advanced and Field Dog Excellent Tests dogs shall be run in braces and each dog must have a separate handler. The dogs will be judged by two judges.
- 12.4 If 2 dogs with the same handler are entered in a Field Dog Advanced and Field Dog Excellent Test at an approved field test, such entries shall be segregated for the drawing or for bracing so that no 2 dogs handled by the same person could be drawn for the same brace. The running order for all completed braces shall then be determined.
- 12.5 The bracing and running order established by either method shall not be changed under any circum-

stances, except that:

- (a) In case of a scratch or absentee, the brace mate of the absent dog shall be run with the dog from the next incomplete brace or with the bye dog
- (b) If the foregoing procedure would result in bracing together of 2 dogs handled by the same person, the 2 odd dogs shall be rebraced consecutively with the 2 dogs in the last brace in the test in which that handler has no dog

13 COURSES & BIRDS

- 13.1 Approved field tests may be run on any of the following type courses, all of which must include sufficient acreage and adequate cover for birds and suitable objectives to represent local hunting conditions.
 - (a) Single course with bird field consisting of a back course and a bird field which has sufficient cover to hold birds and is of adequate size to permit a dog to hunt naturally without excessive hacking
 - (b) Single course without a bird field consisting entirely of a course without any specific bird field on which birds are released in suitable places around the course
 - (c) Multiple course consisting of a series of courses on which each dog or brace starts where the last dog or brace was picked up. On such a course, it is assumed that there is adequate natural or released game
- 13.2 Birds used in field tests must be identified in the premium list and may be any combination of recognized game birds or pigeons.
- 13.3 Birds should, if possible, be released in natural cover rather than in artificially created cover. They must not be placed in holes or in such cover as will impede their ability to fly or run. Birds may be rocked or dizzied but not to such an extent as to affect their ability to fly. Game stewards should wear gloves. Successive birds should not be released in or near the same spot.
- 13.4 In a field test, no fewer than 3 birds should be released for the first dog and 2 birds per dog thereafter.

13.5 Back-course birds may be planted by planters on foot, horse or ATV. If ATV's are used, birds may not be released from the vehicle. ATV's and/or horses are not allowed in the bird field for bird planting.

14 FIELD TEST MARSHALS

14.1 The Field Test Committee may appoint one or more Field Test Marshals. It shall be the duty of one Marshal to assist the judge and to carry out instructions, including regulating and controlling the gallery, and making sure that the gallery is kept separate from and behind the judges, and that no one in the gallery talks to the judges while the dogs are down. Other Marshals may see to it that dogs and handlers are ready when called and assist the Field Test Committee in all other matters necessary for the smooth and expeditious running of the test.

15 HANDLING

15.1 All dogs must be handled by a handler on foot. The responsibility of having the dog ready in place when required for judging rests solely with its handler or owner. The dog is under judgment from the time the judge tells the handlers to break away. If a dog is not present at its starting place within 5 minutes after it is called for by the judges to run, it must be disqualified. The judges are responsible for keeping the time. In a test on a single course with a bird field, the time in the bird field shall be no more than 8 minutes and the remainder of the time must be spent on the back course. No dog shall be picked up during the test except with permission from the judge. There shall be no training of dogs anywhere on the course during the test. The handler must wait to flush a bird until directed by the judge.

16 OFFICIAL GUNNERS & GUNNING (98-05-19)

- 16.1 The use of firearms is subject to federal and provincial laws.
- 16.2 It is mandatory that judges, gunners, handlers of the working dogs and marshals wear a blaze orange outer garment (vest or jacket) and blaze orange head gear in any tests where shotguns are used. This requirement will also apply to any gallery members on the course.
- 16.3 All shooting at any test shall be done by Official Gunners only.
- 16.4 An Official Gunner shall be at least 19 years of age.
- 16.5 Judges shall have complete authority over all shooting.
- 16.6 The official gunner must always keep himself in the correct position for safety of dogs and persons.
- 16.7 The judge may require a change of official guns at any time and they may bar from further shooting in that test any official gunner who does not abide strictly by safe gunning rules.
- 16.8 At least one Official Gunner is required for each Field Dog, and a minimum of two Official Gunners are required for each brace in FDA and FDX Tests (one to accompany each handler).
- 16.9 Provision must also be made for alternate or standby gunners in case they should be required.
- 16.10 Game should be flushed by the handler and shot cleanly, in a sportsmanlike manner, in full flight and at a distance that will give the dog a reasonable retrieve. Subject to any direction from the judge, the official gunner must not interfere with the work of the handler nor direct the work of the dog.
- 16.11 Game flushed by a free running dog or birds that flush wild shall not be shot except on instructions from a judge.

17 PROTESTS

- 17.1 A protest against a dog may be made by an exhib-(21-03-16) itor, entrant, or any member of the CKC, or a member of the club or association holding the event in the following manner:
 - (a) A protest should be lodged with the Event Superintendent before the closing of the event and must be in writing, on a form provided by the CKC (or facsimile thereof). A hearing shall be held prior to the departure of all parties. No protest will be entertained unless accompanied by a deposit. This deposit shall be returned if the protest is sustained. If the protest is not sustained, the deposit will be forwarded to the CKC with the Event Committee's report.
- (21-03-16) (b) If the protest cannot be filed at the event because of circumstances requiring medical and/or veterinary attention, or if the dog has been removed from the grounds, or if the owner and the dog leave the grounds immediately following the incident, the protest may be submitted directly to the CKC within 10 days of the event. All such protests shall constitute complaints under the CKC's By-laws and the provisions of same shall apply.
- (21-03-16) (c) If the Protest is filed directly with the CKC, reasons should be provided as to why the Protest could not be filed with the Field Test Committee.
- 17.2 Where the Field Test Committee consists of more than 5 persons, the president of the test-giving club shall name 5 members of the Field Test Committee to act on any protest received by the test-giving club.
- 17.3 Written copies of all decisions on protests must be forwarded immediately to the Discipline Committee of the CKC. The Discipline Committee may take such action as it deems fit in connection with such protest, provided no appeal is submitted to the CKC within 10 days of the date on which the decision of the Field Test Committee was rendered. Such action may include barring the dog from future CKC approved events, imposition of an administrative fee, and/or cancellation of awards. The fact that the Field Test Committee did not sustain a protest in no way inhibits the right of the Discipline Committee to take such action as it

deems advisable.

- 17.4 An appeal to the Discipline Committee of the CKC from the decision of the Field Test Committee where a dog has been protested must be forwarded to the CKC within 10 days of the date on which the decision was rendered, together with a deposit.
- 17.5 If a test-giving club fails to hear a protest as prescribed above, or in the opinion of the Discipline Committee improperly handles a protest, the Discipline Committee shall have the authority to take such action as it deems fit and necessary, and it may at the same time take disciplinary action against the officials of the test-giving club concerned.

18 COMPLAINTS

- 18.1 A complaint against a person respecting a violation of the rules and regulations relating to field tests must be in writing on a form issued by the CKC (or facsimile thereof) and must be accompanied by a deposit. A deposit is not required on a complaint alleging that a judge officiating at a field test held under these rules and regulations has been subject to indignities of any kind during the progress of the test.
- 18.2 A complaint should be lodged with the Field Test Committee Chair no later than 15 minutes after the completion of the test or should the complainant choose to do so, a complaint may be submitted directly to the CKC within 10 days after the test. All such complaints shall constitute complaints under the CKC By-laws and the provisions of same shall apply.

The report and all statements given by all parties will be forwarded to the Discipline Committee along with the deposit from the complainant. The Field Test Committee will not render a decision but will collect all pertinent information.
- 18.9 Notwithstanding any contrary provisions in these rules and regulations, the procedures specified herein for dealing with complaints shall govern.
- 18.10 Disciplinary action will be taken against any official and the test-giving club of which they are an official when it is established to the satisfaction of the CKC that an attempt was made to discourage the submission of a complaint.
- 18.11 Disciplinary action will be taken against a test-giving club which fails to properly deal with complaints as provided for in these rules and regulations.

19 DISCIPLINE

19.1 The Discipline Committee may take disciplinary

action against any club, member, person, partnership, company or organization of the CKC for any act of omission or commission which violates any section or sections of the rules and regulations for the CKC Field Dog Test. Such action will be taken as provided for in the By-laws of the CKC.

- 19.4 At its discretion and subject to the appeal process, the Discipline Committee may cancel any or all qualifying scores earned by a dog owned by a person debarred, deprived, suspended or expelled of all privileges of the CKC when such wins were earned following the date on which such act occurred that resulted in disciplinary action.
- 19.5 The administration to a dog competing at a Field Dog Test of a drug or any substance, in any form, which alters the nervous system by stimulation, sedation or tranquilization shall be considered as misleading the judge and will be considered misconduct. The person or persons responsible will be subject to disciplinary action in accordance with this section.

- 19.7 It shall be the duty and obligation of the event-giving club to see that a judge, club official, volunteer or competitor at a Field Dog Test is not subject to indignities. The Field Test Committee Chairman shall promptly report to the CKC any infringement of this regulation, and the CKC shall have the authority to take such action as it deems fit on receipt of a report indicating that this has occurred. A copy of this regulation shall be prominently placed in every premium list and catalogue.

Failure to take such reasonable steps may result in disciplinary action against such owner or authorized agent under the By-laws, which may result in the imposition of any of the penalties provided for in the By-laws.

11 STANDARD OF PERFORMANCE

11.1 Water Dog Junior (39-03-19)

11.1.1 Water Entry. For optimum performance, the dog shall exhibit no hesitation, requiring no encouragement or coaxing when entering the water to perform the retrieve.

- 11.1.2 Marking Ability. Marking or memory of falls is of paramount importance. Ability to mark does not necessarily imply pinpointing the fall, but a dog should proceed directly to the area of the fall and establish the retrieve. For optimum performance, the dog should swim in a direct straight line.
- 11.1.3 Retrieve. Dog should quickly do a straight out and straight back, taking the bird with a single grasp and do a 180° turn without any hesitation.
- 11.1.4 Delivery. As long as the bird is received by the handler who must remain in the circle, the dog can be outside the circle when delivering the bird. For full marks, the dog is required to enter the circle with the bird.
- 11.1.5 Control. For a perfect score, the dog requires no commands other than the send off and delivery.
- 11.1.6 Reaction to Shot. A perfect score would be given to a dog that exhibits alertness and eagerness at the sound of gunfire. A passing grade will be awarded to the dog that softens but does not bolt. Gun shyness will be an automatic failure.
- 11.1.7 5 minutes is a reasonable amount of time for the dog to perform the one bird retrieve required for the Water Dog Junior Test.

11.2 Water Dog (39-03-19)

- 11.2.1 Water Entry. For optimum performance, the dog shall exhibit no hesitation, requiring no encouragement or coaxing when entering the water to perform the 2 bird retrieves.
- 11.2.2 Marking Ability. Marking or memory of falls is of paramount importance. Ability to mark does not necessarily imply pinpointing the falls, but a dog should proceed directly to the area of the falls and establish the retrieves. For optimum performance the dog should swim in a direct straight line. Dog requires minimum or no direction for second bird.
- 11.2.3 Retrieve. Dog should quickly take the birds with a single grasp and do a 180 degree turn without any hesitation. Once the first bird is retrieved, the handler should send the dog off for the second retrieve.
- 11.2.4 Delivery. For a perfect score, dog quickly and tenderly delivers both birds to hand within the circle. A

dog that retrieves tenderly within hand range in any manner will receive a passing score, provided he has entered the circle.

- 11.2.5 Control. For a perfect score, the dog requires no commands other than the send off and delivery. No repetition of commands with either retrieve. Dog is steady to release on both birds.
- 11.2.6 Reaction to Shot. A perfect score would be given to a dog that exhibits alertness and eagerness at the sound of gunfire. A passing grade will be awarded to the dog that softens but does not bolt. Gun shyness will be an automatic failure.
- 11.2.7 10 minutes is a reasonable amount of time for the dog to perform the 2 bird retrieves required for the Water Dog Test.

11.3 Water Dog Excellent (39-03-19)

- 11.3.1 Water Entry. For optimum performance, the dog shall exhibit no hesitation, requiring no encouragement or coaxing when entering the water to perform the retrieves.
- 11.3.2 Marking Ability. Marking or memory of falls is of paramount importance. Ability to mark does not necessarily imply pinpointing the falls, but a dog should proceed directly to the area of the fall and establish the retrieves.
- 11.3.3 Retrieve. Dog should quickly take the birds with a single grasp and do a 180 degree turn without any hesitation. Once the first bird is retrieved, the handler should send the dog off for the second and third retrieves.
- 11.3.4 Delivery. For a perfect score, dog quickly and tenderly delivers all 3 birds to hand within the circle. Dog enters the circle and releases birds immediately on command. Handler stays in one spot.
- 11.3.5 Control. Dog requires no commands other than release and delivery. No repetition of commands with all retrieves. Dog is steady to release on all birds.
- 11.3.6 15 minutes is a reasonable amount of time for the dog to perform the 3 bird retrieves required for the first portion of the Water Dog Excellent Test, plus

5 minutes for the Blind Retrieve, for a total of 20 minutes for both tests.

11.4 Water Dog Elite (39-09-22)

- 11.4.1 Heeling. The dog is to heel on the right or left side beside the handler. The dog and handler should be relaxed and work as a team. The heeling represents the dog and handler moving into position to jump shoot or pursue game.
- 11.4.2 Water Entry. For optimum performance, the dog shall exhibit no hesitation, requiring no encouragement to enter the water to perform the retrieves.
- 11.4.3 Marking Ability. Marking or memory of falls is of paramount importance. Ability to mark does not necessarily imply pinpointing the falls, but a dog should proceed directly to the area of the fall and establish the retrieves. When it comes to marking ability on the blind retrieves, the dog must follow the hand signal from the handler, this hand signal will direct the dog to the birds in the water. The dog must concentrate and not become disoriented once it goes into the water to retrieve the bird.
- 11.4.4 Retrieve. Dog should quickly take the birds with a single grasp and do a 180 degree turn without any hesitation.
- 11.4.5 Delivery. Dog will be in a sitting or standing position. Soft mouthed grasp and hold while in water and at delivery, game must be tenderly delivered to hand, showing no teeth marks or blemishes from hard mouthing, birds must always be fit for the table.
- 11.4.6 Control. For a perfect score dog requires no commands other than release and delivery. No repetition of commands with all retrieves. Dog is steady to release on all birds.
- 11.4.7 Cooperation. The dog is quick to follow all commands from the handler. The handler and dog work as a team in the pursuit of game. The dog should demonstrate that it is always working for the handler.
- 11.4.8 Nose. The dog must demonstrate the quality of its nose but also that it is able to use its nose to the maximum advantage in tracking and finding game. The dog is quick to recognize water and ground scent and pursue the scent in order to find the duck. The dog demonstrates a sound understanding of how to use the wind to its advantage.

11.4.9 15 minutes is a reasonable amount of time for the dog to perform A (Double Blind Retrieve), 10 minutes for B (the Double Retrieve) and 15 minutes for C (Water Land Retrieve) for a total of 40 minutes for all three portions of the WDE test. Under exceptional circumstances, the overall timing can be adjusted at the judge's discretion."

12 RUNNING THE EVENT

- 12.1 It is extremely important that the judges inspect the (33-03-19) water test site with representatives of the Water Test Committee prior to the commencement of the tests (if possible, the day preceding the event) to confirm its suitability to run the different levels of tests.
- 12.2 A circle of rope, hose or other material is to be laid out with a radius of six feet (6') (12' diameter) clearly defining boundaries for start and finish of retrieve. Circle must be at least three feet (3') from water's edge.
- 12.3 The bird can be thrown by a person, however, it (34-03-19) is highly recommended that wingers (slingshot catapults that can control the distance a bird is projected) be used to insure that all dogs in the stake have similar distances to retrieve. These should be hidden behind blinds or natural vegetation cover so as not to stand out on the water's edge. A blind or tent should be made available for the dogs waiting their turn to be tested. The suggested distance between the holding blind and the circle should be about 20 yards (18.29 metres).
- 12.4 Handler must be directed to send dog by the judges. No dog may be sent to retrieve until the bird(s) has (have) hit the water and the shot has been fired.

12.5 No decoys will be used in Water Dog Junior test. (34-03-19) Eight (8) decoys will be used in the Water Dog, (40-09-22) Water Dog Excellent and Water Dog Elite tests.

12.6 If a bird flows outward away from the distance (35-03-19) stated on the Test Requirements, the judge can call the bird out of bounds which results on a re-do of the retrieve. There are many factors that can make the birds drift.

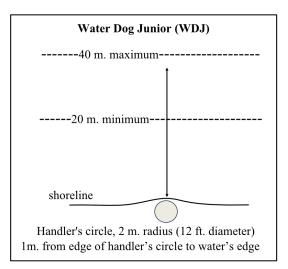

12.7 It is advantageous to have a designated pickup dog (35-03-19) available for birds not retrieved.

12.8 No training aids (i.e. food) may be allowed during (35-03-19) the test.

13 TEST REQUIREMENTS

13.1 Water Dog Junior-Single Water Retrieve

- 13.1.1 Dog is required to retrieve a single dead bird from (36-03-19) the water with a minimum swim of 20 yards each way. A shot will be fired as the bird is launched. A 22 caliber gun or larger must to be used. Note: Zinger Wingers come equipped to fire 209 shotgun primers.
- 13.1.2 Dog must deliver the bird into the circle. Handler must remain within the circle until the retrieve is complete.
- 13.1.3 If a dog reduces the time required to complete the retrieve by intelligent use of land, he shall not be penalized. Use of land for the purpose of avoiding water will be penalized.
- 13.1.4 If, at the judge's discretion, a bird is declared to be out of bounds, the dog should be passed over and another dog run before the former dog returns for judgment.
- 13.1.5 A bird drifting more than 40 yards will be declared out of bounds and re-thrown at the judge's discretion.
- 13.1.6 Handler to bring dog leashed into the circle.(36-03-19) Steadiness within the circle is not required, dog may be restrained by handler holding the dog by its collar or leashing the dog.
- 13.1.7 Handler will be directed to send the dog for the (36-03-19) retrieve by the judge. If after the bird hits the water and the shot is fired, the dog breaks before the judge directs the handler to send the dog on, it will not be rated as highly as the dog that is steady until the judge directs the handler to send the dog on.

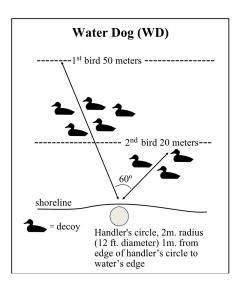

- 13.1.8 Reasons for failure:
- (36-03-19) (a) Hard-mouthing (judge must declare the bird unfit).
 - (b) A delay of over two (2) minutes to enter the water.
 - (c) Dog loses interest, wanders around aimlessly, or runs up and down water's edge.
- (36-03-19) (d) Dog refuses handler's commands more than six (6) times. The send command and a soft encouragement command upon pickup are not counted against the six (6) commands.

13.2 Water Dog - Double Water Retrieve

- 13.2.1 The dog is required to retrieve a wide-spaced (37-03-19) (approximately 60 degrees angle) double after swimming through 8 decoys, with the falls being at distances of approximately 50 yards on the first fall and 20 yards on the second fall.
- 13.2.2 Eight (8) Decoys to be placed in the water (as per (37-03-19) diagram)
- 13.2.3 A shot will be fired for each bird as it is launched.
 (38-03-19) A 22 caliber gun or larger must to be used. Note: Zinger Wingers come equipped to fire 209 shotgun primers.
- 13.2.4 There is no requirement as to which bird is to be retrieved first.
- 13.2.5 Dog must enter water promptly and must retrieve (37-03-19) birds to hand to the handler in the circle. Dog must be in the circle when delivering the birds.

- 13.2.6 Handler can bring his dog on leash to the circle. Must be off leash in the circle. Steadiness within the circle is required. Controlled break allowed. (Controlled break means "voice and/or hand signal may be used to stop dog, however, dog must have all four feet inside the circle to be defined as being under control). Touch to release permitted, but restraint not permitted.
- 13.2.7 Handler will be directed to send the dog for the retrieve by the judges. No dog may be sent to retrieve until the second bird has hit the water and the last shot has been fired.
- 13.2.8 Handler must remain within the circle until both retrieves are completed.
- 13.2.9 If a dog reduces the time required to complete the (37-03-19) retrieve by intelligent use of land, he shall not be penalized. Use of land for the purpose of avoiding water will be heavily penalized.

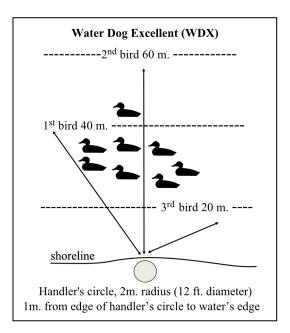

- 13.2.10 Reasons for failure:
- (37-03-19) (a) Hard-mouthing (judge must declare the bird unfit).
 - (b) Excessive delay of over two (2) minutes to enter or re-enter the water.
 - (c) Dog loses interest, wanders around aimlessly, or up and down water's edge.
- (37-03-19) (d) Dog refuses handler's commands more than five (5) times. The send command and a soft

encouragement command upon pickup are not counted against the five (5) commands.

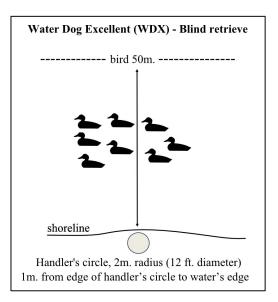

13.3 Water Dog Excellent - Triple Water Retrieve

- 13.3.1 Dog is required to retrieve three (3) birds to hand (38-03-19) (triple retrieve) after swimming through eight (8) decoys. First fall to be 40 yards to one side, second fall to be a minimum of 60 yards and third one to be 20 yards to the opposite side of the first fall.
- 13.3.2 Eight (8) Decoys to be placed in the water (as per (38-03-19) diagram).
- 13.3.3 A shot will be fired for each bird as it is launched.
- (38-03-19) A 22 caliber gun or larger must to be used. Note: Zinger Wingers come equipped to fire 209 shotgun primers.
- 13.3.4 Dog will be brought to and into the circle off leash and under control.
- 13.3.5 Handler may elect to have dog stand, sit or be downed, but the original position must be maintained for each individual series of retrieves.
- 13.3.6 A reasonable move of the dog to mark the fall of a bird is acceptable, but no other movement of the dog is allowed.
- 13.3.7 No dog may be sent to retrieve until the last bird has hit the water and handler has been directed to send the dog by the judge.
- 13.3.8 Dog must enter and re-enter water without hesitation. Delays to be penalized and excessive delays will mean disqualification. There is no special sequence in which dog has to retrieve the birds, as long as all three are retrieved.
- 13.3.9 Dog must enter the water immediately with eagerness.
- 13.3.10 If a dog reduces the time required to complete the (38-03-19) retrieve by intelligent use of land, he shall not be penalized. Use of land for the purpose of avoiding water will be heavily penalized.
- 13.3.11 Dog shall give a finished performance, showing (40-03-19) both class and style when entered for this title.

Blind Water Retrieve:

- 13.3.12 To be completed after the triple water retrieve.
- 13.3.13 Dog is to be brought into the circle without seeing the fall. Handler is to be advised of location of the bird.
- 13.3.14 Dog must retrieve a bird to hand after swimming through eight (8) decoys. The bird is to be launched approximately 50 yards from the shore.
- 13.3.15 No shot will be fired for this test.
- 13.3.16 Dog must enter water without hesitation. Delay is to be penalized and excessive delay will result in failure.
- 13.3.17 Handler cannot touch dog except to tap to release.
- 13.3.18 Handler must not move from the circle.

- 13.3.19 Reasons for failure:
 - (a) Lack of absolute steadiness on the line.
- (38-03-19) (b) Hard-mouthing (judge must declare the bird unfit).
 - (c) A delay of over two minutes entering or re-entering the water.
 - (d) Dog loses interest, wanders aimlessly, or runs up and down water's edge.
- (38-03-19) (e) Dog refuses handler's commands over four (4) times for the triple bird retrieve and two (2) times for the blind retrieve. The send command and a soft encouragement command upon pickup are not included in this count.

13.4 Water Dog Elite (41-09-22)

13.4.1 Introductory Note:

It is advisable that prior to the start of the WDE test, a dog that is not entered in the test be selected and be run to verify that the test is properly set up. This will help check distances and the wind direction offering the tested dogs the best chance at the optimum score. It is strongly recommended that at set-up of part A, the direction of the wind is taken into account so that at in this senior level the dog can work with the wind or with a crosswind making the blind retrieves a true blind test.

13.4.2 General Overview:

The test will consist of 3 parts, A (Double Blind Retrieve), B (Double Marked Retrieve) and C (Water and Land Retrieve).

- (a) New unmarked birds will be used for the WDE test.
- (b) Handler is encouraged to use only hand

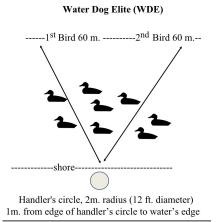

signals to direct the dog unless there are extenuating circumstances (i.e., disabilities) or as directed by the judge. Verbal commands beyond those used in the specific situations described below will result in points being deducted. There are a maximum of 4 extra verbal commands permitted for the entire WDE test (parts A, B and C). These 4 extra verbal commands can be used, for example, to correct the dog if they don't follow a hand signal. If the handler chooses to use some or all of these extra verbal commands, it is their choice which part(s) of the test in which to use them. Use of some or all of the 4 extra verbal commands will result in points being deducted.

- (c) Verbal commands that are considered "free" and are not counted towards the 4 allowable extra verbal commands are:
 - (i) a command to send the dog on the retrieve
 - (ii) attention commands if the dog needs to be redirected with hand signals
 - (iii) soft encouragement upon pickup of the bird
 - (iv) a command for the dog to release the bird on delivery
 - (v) a few words of quiet praise at the end of each part (A, B, C) of the test
- (d) The handler may not touch his/her dog once the examination starts at the heeling point from the blind to the circle, unless directed to do so by the judge.

13.4.3 A – Double Blind Retrieve

Dog is required to retrieve two (2) birds after swimming through eight (8) decoys. This is a 50-yard retrieve on a double blind with at least a 60 degree spread between the two birds. Handler and dog will remain behind a suitable blind designated by the judge while the Double Blind Retrieve is prepared. No shots will be fired for this test.

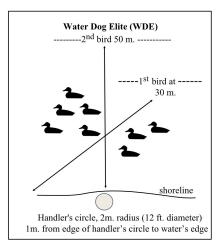

- (a) Handler will be called by the judge.
- (b) Handler will then heel the dog off leash to the circle (15 yards).
- (c) Handler will follow the judge's instructions to stand or sit the dog.
- (d) Handler will signal the judge when they are ready to start the test.
- (e) The judge will point in the general direction of where the birds have been dropped in the water and instruct the handler to send the dog.
- (f) Handler can direct the dog to either of the two birds. There is no special sequence in which the dog must retrieve the birds, as long as they are both retrieved. Dog must enter and re-enter the water without hesitation. Delays to be penalized and excessive delay will mean disqualification.
- (g) If a dog reduces the time required to complete the retrieves by intelligent use of land, he shall not be penalized. Use of land for the purpose of avoiding water will be heavily penalized.
- (h) The dog must return with the first retrieved bird, enter the circle, and deliver the bird in a sitting or standing presentation (either is acceptable).
- (i) Handler will then send the dog on to the second retrieve which is at least a 60 degree angle from the first retrieve.
- (j) Handler cannot touch dog except to tap to release

13.4.4 **B – Double Marked Retrieve**

Dog is required to retrieve two (2) birds to hand after swimming through eight (8) decoys. This is a 50 yard and a 30 yard retrieve. Handler and dog to remain hidden from view until called by the judge.

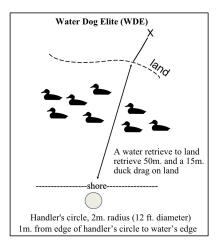

- (a) Handler will then heel the dog off leash to the circle (15 yards).
- (b) Handler will follow the judge's instructions to stand or sit the dog.
- (c) Handler will signal the judge when they are ready to start the test.
- (d) 50 and 30 yard birds will be launched, a duck call will precede the launch and a blank shot will be fired during the launch. 30 yard bird will be launched directly across in front of handler and dog, a blank will be fired as the bird is launched. 50 yard bird will be launched second, straight out from handler and dog, with a blank fired as well. A 22 caliber gun or larger must be used.
- (e) Judge will ask handler to send the dog on for the 30 yard retrieve. The 30 yard bird must be retrieved first. Should the dog take the 50 yard retrieve instead, it will result in failure.
- (f) The dog must return with the first retrieve, enter the circle, and deliver the bird in a sitting or standing presentation (either is acceptable). Once the 30 yard retrieve has been completed, the handler will send the dog on for the 50 yard retrieve.
- (g) Dog must enter and re-enter the water without hesitation. Delays to be penalized and excessive delay will mean disqualification.
- (h) If a dog reduces the time required to complete the retrieves by intelligent use of land, he shall not be penalized. Use of land for the purpose of avoiding water will be heavily penalized.
- (i) Handler cannot touch dog except to tap to release.

13.4.5 C - Water and Land Retrieve

In this portion of the test, a bird will be dragged from a point on the shoreline to a point 15 yards from the shoreline. The dog is expected to do a 50 yard swim through eight (8) decoys and a 15 yard land retrieve to locate the track on land, proceed to the bird, immediately pick it up, enter the water and return to the handler. For the maximum score, dog must take the most direct route out and back. Handler and dog to remain hidden from view until called by the judge.

- (a) Handler will heel dog off leash, at least 15 yards to the circle.
- (b) Handler will follow the judge's instructions to stand or sit the dog.
- (c) Handler will signal the judge when they are ready to start the test.
- (d) The handler will be shown the general direction of the swim from the circle to the shoreline to retrieve the bird where it has been dropped, then asked to signal when ready to proceed. Judge will direct the handler to send the dog.
- (e) The dog must enter the water promptly and proceed in the direction given by the handler.
- (f) The dog is expected to cover the 50 yard swim and locate the track on land and proceed to the bird. Immediately pick it up and return to the handler for the maximum score. If a dog reduces the time required to complete the retrieves by intelligent use of land, he shall not be penalized.

(g) Handler cannot touch dog except to tap to release.

- (h) Reasons for Failure
 - (i) Lack of absolute steadiness on the line.
 - (ii) Hard mouthing (judge must declare the bird unfit).
 - (iii) A delay of over two minutes entering or re-entering the water.
 - (iv) Dog loses interest, wanders aimlessly, or runs up and down water's edge.
 - (v) Dog cannot locate the bird or refuses to retrieve it.
 - (vi) Dog refuses handler's commands (hand signal or verbal) over two (2) times for the blind retrieves, over two (2) times for the double retrieves and a long delay (aimless search and loss of direction to the bird and failing to return with it) on the track retrieve. The send command and a soft encouragement command upon pickup are not included in this count.

14 BIRDS

14.1 Birds used in water tests must be identified in the premium list and may be any combination of recognized game birds. Subject to local provincial rules and regulations, it is highly advisable that ducks be used as these tests mimic a waterfowl hunting situation.

15 WATER TEST MARSHALS

15.1 The Water Test Committee may appoint one or (41-03-19) more Water Test Marshals. However, it is highly advisable that the hosting clubs ensure that there are sufficient marshals or help on hand.

16 SAFETY

- 16.1 As a safety precaution, it is advisable that dogs wear flat collars only or no collars. Lose collars may be hooked on the decoys or branches (if they are not visible) sticking out close to the water's edge.
- 16.2 A watercraft and personnel (i.e. special marshal) should be on site for setting out and picking up the decoys, or as possible rescue boat for a dog in distress.
- 16.3 Care should always be taken to ensure that there are no tree limbs or spikes sticking out of the water in the area where dogs will enter and exit the water.
