NOW! SAVE MORE AND GET THE BEST!

Master Kennel Plan

exclusive to registered kennel owners

You save 15% on dry dog food!
You save 10% on canned food!

Simplest — Most Complete Kennel Plan Yet!

Master Dog Foods, both canned and dry, are known as the quality leaders in the field. Now, thanks to the new "Master Kennel Plan", they are available exclusively to kennel owners, at really worthwhile savings.

The beauty of the new "Master Kennel Plan" is that it is so simple. You mail in your proof of purchase (a sales slip from any store selling Master Pet Foods) at the regular retail price anywhere in Canada. We will mail you a cheque for 15% of the face amount of the invoice on Dry Dog Food and 10% of the invoice on Canned Dog Food and return your sales slip to you for your records.

It's as simple as that. No application form to fill in. No coupons to mail. No weight circles to clip out. Just mail us your proof of purchase and we'll return it with your savings!

Take advantage of this offer now. Get the best and save dollars as you do it. Order from your regular dealer today.

DOGS IN CANADA

JULY 63 VOL. 53 NO. 10 APEX PUBLISHERS AND PUBLICITY LIMITED

cover story

VOL. 2 KERRYCROFT STORY
CH. KERRYCROFT'S ALEXANDER R.O.C. #9

Owners Dennis and Catherine Gardiner, Kerrycroft Kennels, R.R. #2, Orono, Ontario.

Alex was born October 11, 1960, sired by Am. Ch. Truli-Blu's Jiminy Cricket out of Ch. Kerrycroft's Kathleen. He is now being shown from time to time in the States, taking a Major his first time out.

The graph shows his balanced measurements, which produce this type of gait, which gives him approximately a 15 to 16" reach in front action. His rear angulation, and long lower thigh (rarely seen in Kerries today) allows the long forward drive, to place his rear paw in spot vacated by his front paw, following through with equal drive back.

His progeny carry many of these characteristics, including angulation and long lower thigh, producing the same smooth, excellent gait and are showing promise in the Show ring. At Chicago, a six month old female from Fidges Feres Kennel, owned by Tom and Pinky Fidge, Garden City, Mich. was second in the Sweepstakes and Regular Classes.

letters
TO THE EDITOR

If you have any suggestions, any comments or constructive criticism to make concerning articles in this magazine, or with regard to shows, your opinion of what is happening to various breeds with regard to size, colour, coat, etc., write a brief letter to the Editor. We must reserve the right, however, to edit same.

support is pledged

. . . The Upper Canada KC would like to heartily commend the editors of *Dogs in Canada* for presenting the excellent articles of Mr. Tom Hughes, General Manager, Ontario Humane.

Individually, all our members are most deeply concerned with the problems now facing *all* Humane societies, such as the lack of more stringent legislation for the protection of all animals from any form of inhumane treatment. As a group, we would like to pledge our support to further this cause, in any way which is of assistance.

We sincerely hope that Mr. Hughes' column will remain a regular feature in *Dogs*.

F. C. PATTERSON

President,
Upper Canada KC, Toronto, Ont.

Many more thought-provoking articles are scheduled. Letters like this are most encouraging — where encouragement is needed.—Ed.

the sheep are in their palace

. . . As one of the many happy exhibitors at this year's Sportsmen's Shows, enjoying the new clean, spacious air-conditioned building, I am shocked to hear this building is not to be available for us at the Exhibition. We are to swelter along with our dogs in the old building as usual.

Every year at the "Ex" there are numerous exhibits never on their bench from the first day to the last. They are kept in the handlers' section, cool and relaxed in their crates, fans going. The only time they see the shows are during their short appearances in the ring, then back they go again. However, the dogs with owners who do obey the show rules of benching sit and pant their lives out in 90 degrees of heat.

Two years ago my champion Boxer bitch took a heat stroke. I asked the show superintendent for permission to put her in a crate to cool off, but was refused on the grounds "if she wasn't benched she would be reported absent and lose her winnings. Had it not been for the first aid promptly given by Mr. T. Joel, she could not have gone into the ring later in the evening.

In view of a suitable building being in existence and not utilized for our benefit, I intend keeping my Boxers in crates for the duration of the shows, the moment they show any distress from the heat . . .

JEAN GRANT

Richmond Hill, Ont.

CNE dog show officials would dearly love to hold the show in the same building, but as this is the "Sheep Palace", the lambs, rams and ewes have priority. —Ed.

y-not y-mar news?

. . . We are subscribers to *Dogs in Canada* and look forward to receiving our copy each month. However, since we have started raising Weimaraners during the past year and a half we are very disappointed that you do not have much in the way of "Y-Mar" news in your magazine. We raised seven beautiful puppies and have sold them all. We are interested only in top breeding.

Surely other people must be interested in some Y-Mar news . . . we could join the Y-Mar Club of America but would rather get our news through the Canadian magazine.

MRS. G. PETERS

Fergus, Ont.

Weimaraner owners — where are you? Let's hear from you.—Ed.

how fast is fast?

. . . I quite agree with Ed and Marge Halford that Mr. O'Brien is doing a wonderful piece of work for us who are interested in Obedience.

They have stated that Toy dog Obedience people are to be faulted for their "taking of pin steps". This may be, in part, true. I would, however, like them to prove to me that they can do the smart pacing they are able to with the larger breeds with a Toy, particularly a Chihuahua. I have joined the German Shepherd Classes at Fort York Armouries with my four Chihuahuas. No excuses are taken for lack of speed at which we train our dogs. By the end of one hour's training my little dogs are extremely tired.

We have yet to be faulted for adjusting *our* pace to our dogs, yet many people whom I have seen exhibiting, and now are Obedience Judges have criticized me for the size of step which I take. Try as I can, I find it difficult to cut my pace down. We do as good a job as is

memo
FROM THE EDITOR

"A Policeman's lot is not a happy one", so the song goes. When Gilbert and Sullivan composed it they could have had a dog show judge in mind for the description is equally apt.

Dale Carnegie would never recommend the profession as a way to "win friends and influence people" and even Mr. Carnegie would be hard pressed to solve the human dilemma confronting him at every show. When a judge accepts an assignment he must live with the knowledge that when he concludes his appraisals his popularity rating will have undergone considerable change.

The most common criticisms levied at judges impugn his competence or his honesty. The former is a matter of opinion and the latter has seldom been proved. The competence of a judge is testified to by his invitation to judge and his subsequent approval by The Canadian Kennel Club. When an exhibitor enters under a judge he pays his entry fee to purchase that judge's public opinion of his dog. Should that opinion be unfavorable the exhibitor, based on his own knowledge of his breed, is justified in doubting the competence of the judge. That point can be subsequently verified or disproved by purchasing the opinion of other judges over a period of time. If his original premise is borne out it follows that other exhibitors have shared the same experience and the life of that judge in the show ring will be short-lived.

Variations in opinions of judges must, however, be expected, which explains why a dog can go up one day and down the next. If all saw alike, competition would be meaningless. Which brings to mind the man who remarked to his neighbor: "It's a good thing we don't share the same opinion of my wife, or we'd both want her". "On the contrary", replied his friend, "no one would want her".

Judges are constantly the object of various forms of insidious pressure by self-seeking exhibitors. It is a source of amazement that judges can remain honest. No doubt judges are tempted by outright bribes. Courting of judges has become an art with some exhibitors who hover over them as though they were gods. And through an overfed vanity, there are some judges who appear to believe they really are some sort of deity. The onus of responsibility for preserving the honesty of the judges rests with the exhibitor and breeder.

Judges have specific responsibilities in addition to their knowledge. They must extend the courtesy to exhibitors they themselves expect to receive and at

possible with our dogs. Boozer, for example, weighed 3½ pounds. How was he supposed to keep up with a person walking at the speed with which one uses in the street. Yet, when shown in Obedience, he never gaited slowly or as though going to a funeral. Few dogs, from Toys up, came any faster on recall than he did, and very few working on or off leash did any faster.

I claim it is a physical impossibility to make a dog taking a 3½" pace to work at the speed of a fast Doberman or Standard Poodle, just to mention two breeds, who do Obedience. We have to cut down our pace to suit the occasion. When exercising my dogs I go at the speed that is best suited to my dog, otherwise it is at full gallop, which no other dog has to work at!

Tiny Honey, who is somewhat larger than Boozer, has slowed down through Obedience work. For the show ring he moves much more slowly than I would wish. He still moves at a reasonably fast pace in Obedience but to state that he should work at the fast pace of even a Wire Haired Terrier is a pretty impossible request. Obedience I have always understood, was for obedience. Not to see how fast one can work. The ultimate, in my opinion, is that my dog shall do as requested on command and with reasonable promptness. I have seen Honey come in so fast to me on recall that he has skidded past me. Taken with a fairly fast shutter speed of a camera, both Boozer and Honey blurred the image. The photographer was so surprised that he had hardly time to take it. On retake, Boozer's tail is just blurring as can be seen in the original photo and cut which appeared in *Dogs in Canada*, July, 1962.

So I think it very unfair criticism of the Toy breeds. I would like to see either one of them work my Honey as fast as they say they can a large dog without taking shorter and somewhat slower paces. Any time they wish to take me up on this I will be grateful for a demonstration of how fast our Toy dogs should work!

gentle as a maiden

. . . Thank you for the articles on the various groups which recently appeared in *Dogs*.

On the whole they were enjoyable although I feel that references to individuals which are still actively engaged in showing are not called for in this context.

Regarding A. M. Fitzgerald's contribution I should like to voice some criticism. It has always been my understanding that one of the outstanding characteristics of a top show dog is his disciplined deportment in the ring. A dog bouncing around on one end of the lead betrays a poor handler or trainer on the other. A dog posing in disciplined fashion need not be lacking in temperament. On the contrary, only a very self-assured dog will ever show in this way. Scrapping and fighting have obviously no place in the toy ring. Mr. Fitzgerald should know this. He should further know that the AKC Book of Standards states specifically as follows: "it should be remembered that they are Spaniels, not Terriers" . . . Finally, since he seems to consider Maltese temperament sufficiently shaky to have to make specific reference to it, (which to me appears unwarranted) has he never read the beautiful little poem in which the Maltese is described as "gentler than a maiden"?

Is Mr. Fitzgerald merely trying to show lack of familiarity with his subject or is he by any chance grinding an axe?

advice on kennel naming

. . . One of the first things I read on receiving *Dogs in Canada* is the Application for Registration of Kennel Names. I notice that the minutes of the CKC are hardly ever without a rejection and always for a reason laid down in black and white in the By-laws.

The new breeder now seems to be up against a brain-searing chore. To find a name that doesn't closely resemble someone else's is no longer easy. To decide on a name that doesn't sound silly isn't easy either. When we look over the names of long-established kennels we find some very lovely ones; not only nice sounding but meaningful too. Thus it is hard to keep away from these, yet abide by the rules in choosing.

First of all the name must have meaning. A coined conglomeration of letters with no meaning never seems to make an impression. It must be easy to pronounce and not sound ridiculous to the untrained ear of the people who aren't in the dog business. It is hardly feasible to choose a name until you have chosen your breed and once you have done this, deciding on a name isn't so difficult. Most breeds, like people, have a racial origin and most of these have a language other than English so look to the mother tongue. If the language is entirely foreign to you there are always dictionaries available—if not in the book stores in the public libraries.

HOW TO IMPROVE YOUR DOG'S HEALTH, VIGOR, APPEARANCE

1. **Start today to protect your dog with VIONATE FOR PETS, Squibb's vitamin-mineral powder.**

   Vionate is a high potency, balanced dietary supplement that combines "essential" vitamins and the minerals dogs need most. Vionate is available in eight-ounce canisters; and 10-pound and 50-pound packs. Get it from your veterinary, drug store, or pet supply dealer.

2. **Send for Squibb's new literature on proper nutrition for your pet.**

   You'll learn about (a) balanced diets for all kinds of dogs, (b) what vitamins and minerals do for your dog, (c) suggested dosage of nutritional supplements for dogs, PLUS — sections on brood matrons, weaned puppies, older puppies, mature puppies, old dogs, show dogs, working dogs, city dogs and apartment shut-in dogs.

YOUR NAME _____

ADDRESS _____ PROVINCE _____

Here is how we decided on our kennel name. Our first thought was that the name had to be Norwegian and it couldn't be just Norwegian words that sounded nice but must mean something when translated. We bought a Norwegian-English dictionary and began our search. We wrote down names and looked at them and said them out loud until we finally came up with the combination that suited us both. What an accomplishment that was! In Norwegian, Vakker means beautiful and Lund means a grove of trees or park, a place, so, convinced that rather than applying to our back yard this applied to the beautiful district of Muskoka where we live, we settled on the name then and there.

When you go about settling on a name in this manner you can rest assured you won't need to enclose an aspirin with your application to the kennel names committee, for it will be accepted. Then, stick out your chest and go to a show and be ready and willing to tell, with pride, how you chose such a nice kennel name.

WIN TERELLY

Gravenhurst, Ont.

why penalize all unspayed females?

. . . I have given much thought to the "over production of pets" since reading the recent articles by Tom Hughes. I am sure all readers of *Dogs in Canada* are equally concerned.

I believe our local municipalities could do much to help in this respect. It appears to be the practice at this time to increase licence fees for unspayed females when the problem becomes significant. Why *all* unspayed females? Why will not municipalities discriminate between dogs which are well kept and those which are permitted to roam the neighbourhood? A difficult problem when their only concern is to raise enough money to recover the cost of control. With the present attempts at control the number of dogs continues to increase with a larger percentage neglected or turned loose.

I believe all crossbred females should be spayed and no licence issued without a certificate to this effect. This will help to eliminate "street breeding". It will also help to maintain a better type of dog for the pet market. This would still permit breeding of unregistered purebreds and first cross breedings. Therefore there will still be enough "pets" but a desirable decrease in the number.

Pet shops should not be permitted to trade in dogs and cats. How many can resist the "doggy in the window"? How many are prepared for the growing and grown dog? How many find the grown dog a type suitable for them and their household? Only a purebred can be so chosen. Even crossbreds almost ad infinitum are sold as being part of some particular breed, when any resemblance to such can be only accidental and any breed instinct a question. The resulting situation is described by Mr. Hughes.

If all readers of *Dogs in Canada* could agree how best to approach this problem and then together request the cooperation of their respective municipalities, we could perhaps make an impression.

MRS. C. OBERG

Wywanda Kennels, Reg'd., Langley, B.C.

is my dog good enough to show

. . . I was asked this question recently by a person who purchased a German Shepherd Dog from California and shipped to Edmonton by air, at some considerable expense.

With our present system of judging, it seems to be what the judge likes, not what he knows about the Standard for the breed. This is not applicable to all judges. Most breeders will not show a dog unless they know the judge has a knowledge of the standard for the breed.

The recent listing of judges in *Dogs in Canada*, showing what breeds the judges had bred and handled, is an asset to people in assessing a judge's knowledge of their breed.

We are at present proposing an amendment to Dog Show rules to apply to the German Shepherd Dog breed that "no German Shepherd Dog obtain a Championship unless a minimum of three of the ten points are obtained under a Specialty Judge for this breed." I see no reason why this could not apply to all breeds. Granted it would work a hardship in some cases, but it certainly would be a step in the right direction to stop these cheap Champions we are producing today. By padding a show it is possible to make a Champion out of some pretty poor specimens.

the old timer

The Old Timer was chuckling as I came into the kennel. He tossed me an English dog magazine that had been the cause of his chuckling.

"Read that," he said. "The man makes sense even though he admits that he's writing with his tongue in his cheek."

The article was by Leo C. Wilson, the well known British dog show judge and writer. He was dealing with the Best in Show win of a Shih Tzu at the Welks show in Gloucestershire in which 5,903 dogs had originally been entered for top honors.

The gist of Mr. Wilson's comments was that if an exhibitor wanted to improve his chances of taking a Best in Show he should select one of the rarer breeds where the standard was vague in regard to specific points.

"How lucky the breeds like the Shih Tzu where the standard is so delightfully vague that a wide variety of conformation can be said to be correct according to the whim of the judge officiating," Mr. Wilson wrote. "Thus a Shih Tzu can be perfection if its mouth is either level or undershot, if its front is straight, bowlegged, knockneed or a combination of all three.

"It is not necessary that the feet of a Shih Tzu should be any particular shape. They can be round, oval, hare or catfooted as long as they are firm and well padded. They need not even be big as long as they look big on account of the wealth of hair.

"Even the coat, on which great emphasis is placed in the standard, can be anything as long as it is not curly. The standard says 'long and dense' but does not say whether it should be harsh, silky or fluffy.

"If you must breed dogs why make life difficult for yourself?" Mr. Wilson asked. "Why not go in for a breed with a sketchy standard which fits almost any dog and let your dog's showmanship, eye appeal and personality, plus your own show presentation be the deciding factors? In an age where expertise and attention to detail are growing unfashionable, why be handicapped?"

"Maybe I should go into one of the rarer breeds," I suggested. "A Bouvier des Flandres for instance."

The Old Timer chuckled.

"Maybe you should," he said "but if you're looking for a vague standard I wouldn't suggest a Bouvier. It is one that is fairly specific on all major points. As a matter of fact, you're just as apt to find vagueness in the standards of even the most popular breeds.

"For instance?" I asked.

"Take a look at some of the terminology used in standards," said the Old Timer. "For instance how often do you see the term "comparatively" used. The standard may say the neck should be comparatively short. Short compared to what—to the neck of an Afghan or the neck of a Bulldog? If you're going to use the term comparative it should be comparative to something specific.

"And here's another one that says the neck should be "distinct from the shoulders." Now just what does that mean. The shoulders are one thing—the neck is another. Surely they are distinct in every dog but the writers of this standard must have had something special in mind. Why didn't they say it in terms that anybody could understand.

"Let's carry on with generalities. Here's a standard that says the hock should not be 'too near' the ground. Again what does 'too near' mean? In a Dachshund it could mean one thing—in a Great Dane another. And here's one that says "the leg below the hock being not quite vertical." Should the hock slope out away from the dog or in under it? There are dozens of such examples."

"What's your answer?" I asked.

"Not one I can pick out of the air," the Old Timer said. "Let's take a look at the purposes of the standard. I suppose many would say that it's there primarily as a guide to dog show judges. My own opinion is that the assistance to judges is a secondary purpose."

"Okay," I asked "if its use as a criteria for judging is the secondary purpose what is the primary one?"

"To educate the breeder. And in my opinion the majority of standards fall short of fulfilling this purpose. In saying this I'm thinking particularly of the novice—for I think the breeder who has been around a long time either knows what his breed should be or will never learn—and there are more than you would think of who would never learn.

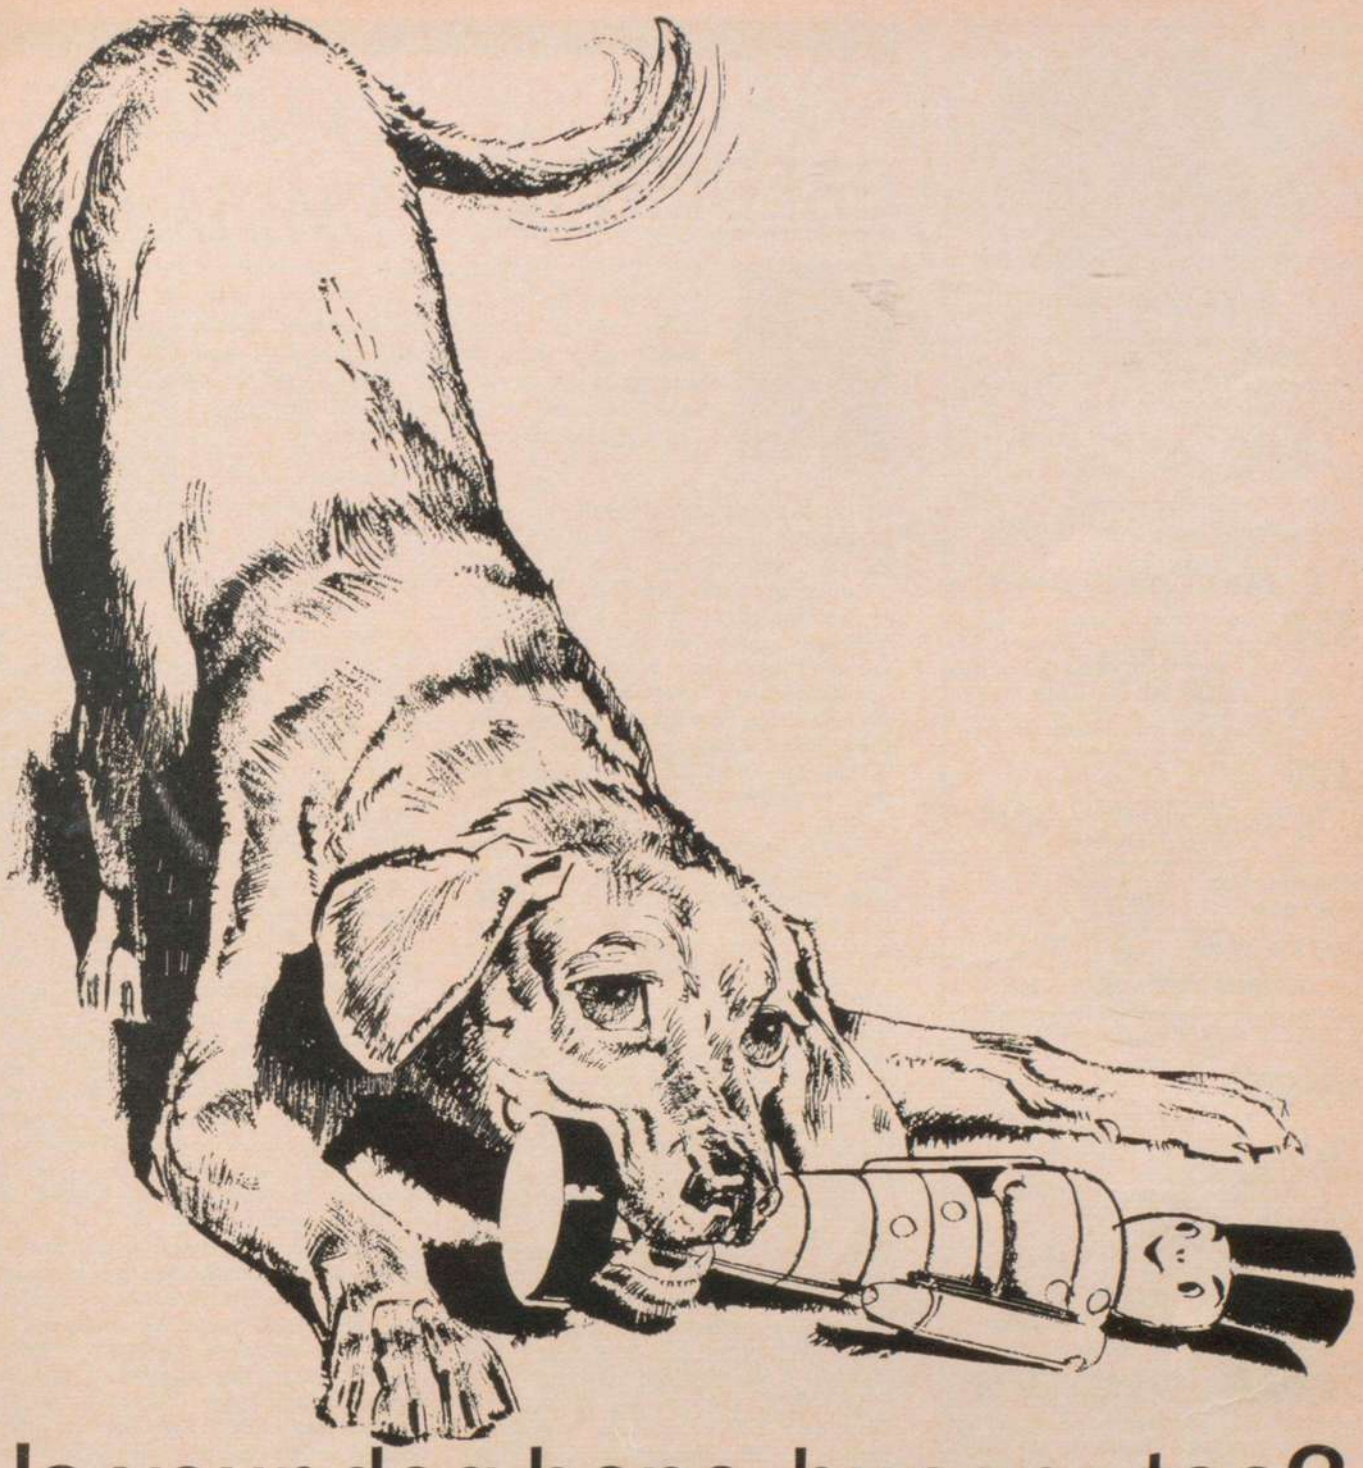

"So let's take a look at the standard from the point of view of the person just starting out in dogs. What, for instance, will the description 'the hock should be well let down' mean to him? What will the term 'second thigh' mean. Will he ever have heard of a calf bone? I could go on and on."

"I'm still waiting for your answer?" I prodded.

The Old Timer pulled at his right ear —he pushed his hat to the back of his head.

"It isn't easy," he said. "But first of all, I'd say it would be useful if standards could be standardized—that is a format could be set up, outlining the points which should be covered – and if every standard covered these points in proper detail.

Is your dog bone-hungry, too?

MILK-BONE satisfies the bone hunger of your dog.

A dog needs to chew, and knows it. In the absence of a bone, even the best-trained dog will find something else to chew—often something he shouldn't. But there are few bones in today's kitchens. Many that *are* available are not safe or good for your dog. That's why the modern dog goes bone-hungry.

The answer is MILK-BONE—the biscuit with the real bone shape that makes wonderful chewing, without a real bone's tendency to splinter or upset the digestion. MILK-BONE also gives your dog all the important nourishment found in milk, meat, bone-meal and vegetables. Get MILK-BONE in the biscuit size that suits the size of your dog—regular or large.

OBEDIENCE

Ed. O'Brien, Canfield, Ont., is well-known as Canada's leading professional trainer of dogs in Obedience work. He is a licensed Judge, one of Canada's first. He began his career in the West, training dogs for herding and other farm work. Since moving to Ontario he has specialized in training dogs for police and guard work and for disabled people. Mr. O'Brien also breeds German Shepherds and Dobermans.

SOME THOUGHTS ON A SERVICE DOG DEGREE

On reading the minutes of the March 15 meeting of the Board of Directors of The Canadian Kennel Club, I note that the subject of the service dog was once again up for discussion. Considering that this matter has been kicked around for years with no success, Mr. Giacomelli has my sympathy in his endeavor to formulate the regulations and requirements for a service dog degree..

To the best of my knowledge, neither the Obedience Association nor any other group have been able to define just what is meant by the term "service dog." Is it the wish of the Obedience people that "Service Dog" should be just another title for perhaps slightly advanced Obedience Trial work, or do they feel that this degree should call for the training and ability on the part of the dog to be of practical service to the community in emergencies?

I understand that Mr. Giacomelli was instructed by the Board to work out a series of tests for this service degree that could be done by a dog of any breed and handled by a person of either sex, regardless of age or physical condition. If my information is correct, I would be interested in knowing just what kind of service the Board had in mind in making this request?

Should it not be the intention to have dogs able to perform a practical service for the community if necessity arises? If we are only interested in a higher Obedience degree than Utility, why not drop the word "service" altogether? On the other hand, if we are really interested in showing that our dogs can be of practical use when trouble strikes, then let us go at the thing in a more constructive manner. How about talking to those in authority in our communities, such as municipal councils, chiefs of police, civil defence workers, etc. to try to ascertain what needs might be met by trained dogs in time of trouble?

A few years ago, Mrs. Southcott and I were called to take a course in rescue work at the Civil Defence College in Arnprior, Ont. Our job was to study methods of rescuing people in disasters, such as floods, fires and explosions, which can happen in peace-time and definitely do happen in war. We learned that, particularly where building collapse was great, a large number of people died because they could not be located under the rubble. Many of them would be unconscious, while others would be in such a state of shock that they could not respond to the system of calling and answering used in civil defence work.

Here is one place where dogs could come into their own. After I returned home I was able to work my dogs around collapsed buildings at an old mine and I found that they could locate simulated casualities in less than one quarter of the time taken at the College by the old method, i.e. calling and answering by rescuer and victim.

I feel sure that a study of the matter would discover many places where dogs could be used in time of trouble. When disaster strikes, especially on a large scale, we have looters to contend with, and the trained guard dog is really needed in such cases. Floods bring drownings, some of which could be avoided by having dogs trained for water rescue.

Very few dogs excell in all lines of work of this kind. The army screens them for specialised training according to each one's particular make-up. In fact, the army is opposed to having a dog trained for more than one line of specialized work. For instance, if a dog is to be used for the finding of casualities, he is not trained for attack or guard work.

Following this line of thinking brings us to where in planning for a service degree we would have to consider whether the training would all follow one line or whether we should have in mind the different branches of service open to us. The interest now being shown in tracking is a move in the right direction. If we are to have dogs with a service degree let us be very sure they can perform a real service, thus bringing respect to themselves and their owners. ●

Mr. Jones, entering the kennel, surprised the kennel-maid with her face and hands unwashed. "Goodness, Elsie", he exclaimed, "you're pretty dirty, aren't you?" "Thank you, Mr. Jones," she smirked. "And I'm even prettier clean!"

HUMANELY "SPEAKING"

The General Manager of the Ontario Humane discusses the "wholesaler".

by tom hughes

If you happen to feel sick or in any other way require the professional services of a doctor, I don't suppose that you would hesitate to consult your physician. You trust him or her as the case may be. Actually you have to. If you don't, it's of little use consulting him.

Naturally then you wouldn't question his advice or reject the prescription recommended for your particular ailment.

From our earliest childhood we are taught to think of the "Doc" as some sort of miracle worker; if you'll only be good he'll fix everything and anything!

As a result, it's a little difficult for the average person to question the wisdom of the ethics of any activity even remotely connected with medicine. Especially when the activity produces benefits for ourselves and our children. And yet that is exactly what we should be doing in this day and age.

I refer to the use of animals for research in the scientific fields, including medicine.

I am not an "Anti-Vivisectionist" in the limited and commonly accepted sense of that over-used and much abused phrase. Nor am I a hypocrite. No one can be a complete "Anti-Vivisectionist" and still accept medical treatment and advice without being a fraud. The consensus of opinion of all the medical associations, medical schools and universities is that the use of animals in medical research is essential for the continued progress of medicine. Unless you happen to be a qualified medical doctor or possess some similar scientific training and degree, it is difficult to challenge this belief on any grounds other than instinct and emotion. Any doctor knows the strength of these two powerful forces but he will always reject them when they are opposed by reason and logic. If it were any other way he would still be treating his patients as a witch doctor.

However, there are certain aspects of the use of animals for research that a layman can legitimately concern himself with, particularly if the layman happens to be an experienced kennel operator or breeder. I refer to the way in which animals are housed and cared for from the moment the animal is "obtained" to the time when it is finally killed and disposed of.

Any citizen has also the perfect right and, I believe, the duty to concern himself with the way in which animals are obtained for research purposes.

If research is valid and necessary, then it is equally necessary that the animals used for this purpose should only be obtained from legitimate sources. It is equally necessary that they should be given the very best housing, feeding and veterinary care. Anything less lays the ultimate use of animals open to question. It is very disturbing to think that many thousands of animals required for research, should be obtained by highly dubious methods and then subjected to every degree of neglect and abuse.

And yet this is the actual situation in many parts of Canada today. Certainly it is true in Ontario.

Dogs, and to a lesser degree cats, present the main problem. Other animals such as rats, mice, guinea pigs, rabbits, etc., can be bred in "farms" under colony conditions. The economics of their breeding allow the breeder to provide proper conditions and to supply these small animals to the laboratory at a reasonable price and show a profit.

How then are dogs and cats obtained for research purposes? Some are bought at livestock auctions. Many of them are purchased from so-called "dealers" or "wholesalers". These men are, in turn, supplied by hundreds of small operators who obtain the animals from any source open to them. Many of them are "dog catchers" or "Pound keepers". These men are generally not paid a proper salary by the Township which employs them. Instead they are encouraged to pick up as many dogs as possible and they are allowed to keep any fees they can obtain from the dog owners. This doesn't apply in the larger communities or where the Pound service is provided by a Humane Society. It is the actual situation in hundreds of smaller communities.

These individuals do not keep records, or, if they do, they are useless for the purpose of determining the identity of a dog and tracing its ultimate disposal.

The main wholesalers are well known. Every dog catcher knows about them and where he can contact them. In many cases the "wholesaler" will approach the "dog catcher" with a simple request. "Sell me any dog or cat you get instead of killing them." The dog catcher, underpaid and working without any supervision, quickly sees an opportunity to obtain a regular additional income. He probably thinks it doesn't matter anyway. No one seems to care sufficiently to either supervise him, or to provide a proper pound for the dogs, or to pay him a living wage. And so he joins the "network"!

The "wholesale dealer" is a different story. This man will handle thousands of dogs every year. He is not subject to any form of government regulation; he doesn't need a licence; he doesn't have to comply with any formal requirement of kennelling, feeding or care. Nor does he keep records. He simply accepts any animal that comes to him, in any condition, no questions asked.

The dealer in turn unloads large numbers of these unfortunate animals on to laboratories, universities and medical schools or hospitals.

In some establishments a veterinarian examines the animals and purchases the number and type he needs for the coming week. The remainder are then offered to the next potential purchaser, perhaps a local hospital or some similar establishment. In this case the animals are offered to a "purchasing agent" or even to an "animal technician" authorized to buy animals. Either way the person concerned will not have the same ability as a veterinarian to recognize a sick animal and will probably be more willing to accept any animal offered.

Eventually the "dealer" either sells all he has to offer or he is left with a number of sick animals.

What happens to these unfortunate animals? In at least one case they are returned to the dealers' farms and placed in the common holding pen. There they live or die. If they survive until the next "market day" they go back into a truck for another trip to town.

The conditions that exist in the "farms" operated by these dealers vary. In one of two cases known to me personally, the dealer has attempted to provide reasonably good kennelling and average care. He does at least feed and water the dogs. However, he is the best of a bad bunch. At the other end of the scale the conditions under which the animals live, endure and die are beyond description. Such adjectives as "appalling" "revolting" could be used without danger of exaggeration.

Animals are herded into small enclosures or cages; excreta is never removed; food and water is not provided except on rare occasions. There is no bedding. Opportunity for exercise is not provided.

I suppose most Canadians feel that "Belsen" and "Dachau" could never have occurred in Canada. It's a comforting thought but rather naive and quite untrue. The sort of person who runs the "animal concentration camp" described above would be quite capable of any degree of neglect or atrocity. Such a person has a "contempt for life"; all life; any life.

The final act of the tragedy is that none of these conditions need exist; no "ring" of suppliers need operate; unscrupulous dealers could be put out of business if the purchasers, i.e. the hospitals and universities would refuse to purchase an animal except from a reputable, bonded and approved dealer.

It is the attitude of the purchaser that

APPLICATION FOR REGISTRATION OF KENNEL NAMES

(NOTE: The following names MAY NOT be accepted as registered kennel names:
(1) any name which is registered as a kennel name with The Canadian Kennel Club;
(2) any name which is registered as a kennel name with any other kennel club with which The Canadian Kennel Club has working arrangements with regard to mutual protection of kennel names;
(3) any name which is phonetically identical to a name registered as a kennel name with The Canadian Kennel Club;
(4) the word 'Royal' either as a whole or as part of a name;
(5) a colour, by itself.)

The following applications for registration of kennel names have been received by The Canadian Kennel Club. Any objections to same must set forth details of the objection and must be received by the Secretary, 1173 Bay Street, Toronto 5, Ontario on or before August 10, 1963.

1. Adda; 2. Heron.
1. Aniger; 2. Barsand; 3. Valroma.
1. Ardvreck; 2. Bar-Hon.
1. Benbaruch; 2. Shomer; 3. Yaffah.
1. Bill-Haven; 2. Harview; 3. Villy-Gran.
1. Bob-A-Lee; 2. Miyold Buddy.
1. Bowspringer; 2. Bowriver.
1. Brunerdale; 2. Brunerlea; 3. Brunero.
1. Buena Vista; 2. Framica.
1. Car-Lyn's; 2. Bob-A-Lyn.
1. Char-Lyn's; 2. Hi-Six Acres; 3. Cloud Six.
1. Cherod; 2. Ambo; 3. Geema.
1. Chien d'Isle; 2. Raymar; 3. Marto.
1. Donnaleigh; 2. Kilbernie; 3. Kumreigh.
1. Edlyn.
1. Fiesta-Glow; 2. Chevron; 3. Candy-Blue.
1. Gun Pal; 2. Hi-Cry; 3. Hi-Bawl.
1. Kilandigi; 2. Kilgary; 3. Kilandrew.
1. Kit-Way; 2. Kit-Lane; 3. Fairy-Bel.
1. Larkspur; 2. Coronation; 3. Chateau.
1. Lylalyn; 2. Silver Sachem; 3. Silvopal.
1. Mayfred; 2. Shirl-Crest.
1. Medolark; 2. Liana.
1. Misty; 2. Honeysuckle; 3. Mimosa.
1. Mon Chateau; 2. Lachevretiere.
1. Nordking; 2. Petchora; 3. Kara.
1. Pepper Pot; 2. Tomlyn; 3. Whozure.
1. Pinetree; 2. Arron.
1. Pinetuck; 2. Wiltuck; 3. Tuckmac.
1. Roxanne; 2. Rose-A-Lee.
1. Scharamousch; 2. Penwin; 3. Kingpen.
1. Spring Fever; 2. De Venus.
1. Strathrobin; 2. Tanna Hall; 3. Heatherted.
1. Tawnyside; 2. Happygait; 3. Peppertone.
1. Thirlestane; 2. Cynton.
1. Valez Eldo; 2. Cor-Du-Ci; 3. Eldo Lupe.
1. Waidwerk; 2. Forsthaus.

FLASH: The Westminster Kennel Club has been advised by The American Kennel Club that it will have to cease accepting entries of dogs based on Canadian Kennel Club blue ribbon wins. Further, it has been advised that it can no longer offer a Miscellaneous Class.

Westminster restricts its entries to qualified dogs in accordance with Section 2 of Chapter 4 of "Rules Applying to Registration and Dog Shows." This section states in part "Only dogs that have been placed first . . . in a regular official class, at a show . . . at which championship points were awarded . . . shall be eligible."

American Kennel Club rules apply only to shows held under its own jurisdiction. A win at a show held under The Canadian Kennel Club jurisdiction therefore cannot be considered to qualify a dog. As the Miscellaneous Class is not a "regular official class" at any dog show, it is not possible to qualify from that class for entry at Westminster.

These changes will be in effect at the next Westminster Kennel Club Show, to be held at Madison Square Garden, New York, on February 10 and 11, 1964.

ONTARIO MAN CONVICTED FOR SUPPLYING FALSE INFORMATION

In Magistrate's Court at St. Catharines, Ontario, on January 25, 1963, William Lachanse of St. Catharines was convicted of the charge that he "unlawfully and knowingly presented to the Recording Officer of an association, to wit, The Canadian Kennel Club, an application for registration containing false information respecting REX OF BRITTHAVEN, a pedigree dog, he well knowing that the application for registration contained a material false statement, contrary to Section 17(1)(a) Livestock Pedigree Act, Revised Statutes of Canada, 1962."

Magistrate Norman R. H. Young sentenced Mr. Lachanse to a fine of $75.00 and costs amounting to $65.50, or to imprisonment at hard labour for a term of thirty days unless the fine and costs were paid by February 22, 1963.

Upon receipt of certification of this conviction the Board of Directors of The Canadian Kennel Club subsequently deprived Mr. Lachanse of all of the privileges of the Club.

RECENT WINNERS

This 13" daughter of Ch. (Can. Am.) Poodhall Gus is shown winning the Group at Oakland Co. K.C. at Detroit, Mich., under Judge Louis Murr. She is the thirteenth Champion sired by "Gus" and now has a total of 1 BIS, 2 BCB in show and 8 Group placings. Owned by Poodhall Poodles, R.R. 2, Caistor Centre, Ont., handled by H. Brunotte.

This two year old Old English Sheepdog, Am. Ch. Tarawood's Blue Baron, took BB at White Plains, N.Y., under Judge J. J. Duncan. Owner is Mr. and Mrs. Roy Isakson, Bridgewater, Conn. Breeder, Tarawood Kennels, Alta. Sire, Ch. Tarawood's Flannel Pants C.D.; dam, Ch. Tarawood's Rags N'Tatters.

Phuph the Charmer a brown female Miniature Poodle shown with Judge Joan Railton after taking winners for four points at the B.C. Ladies Kennel Club Show. Owner is Albert E. Sylvester, 5287 Earls Rd., Vancouver, B.C. Handler is Ford Flechar.

Ch. Tarawood's Flannel Pants C.D., an Old English Sheepdog, adds another two groups to his impressive record. Judges Chris Shuttleworth and Stan Whitmore both placed him first in Calgary and Edmonton respectively. He is owned by Tarawood Kennels, 993 Juniper Ave., Sherwood Park, Alta.

SHOULD WE STANDARDIZE THE STANDARDS? ASKS DR. KENNETH BOURNS, PROFESSOR OF ZOOLOGY

WHAT IS A BREED STANDARD?

Although some eyebrows may be raised at the title of this article, the writer believes that it is a legitimate question. Also pertinent is consideration of what it does or should do. To begin, we may define the term simply as a word picture of an ideal specimen of a kind of dog. Functionally, it serves as the goal to which breeders strive and as the image of perfection visualized by judges.

There appears to be some unfamiliarity both with the origin of standards and with procedures governing their amendments. In order to understand these fully, we in Canada must recall our historical connection with The American Kennel Club and must appreciate the fact that for many breeds no Canadian specialty club exists and that Canadian fanciers hold membership in American clubs. It is not surprising, therefore, that our CKC by-laws state that: "The standard of breeds as recognized by The American Kennel Club shall be the standards of breeds recognized by The Club except for such changes or additions as may be endorsed by the Board."

By and large, North American breed standards are the products of groups of fanciers who have formed specialty clubs. Within these organizations committees were formed for the purpose of either drafting a standard of perfection or of ratifying an existing standard recognized by a European kennel club. Having passed committee and having been approved by the specialty club, the standard was then submitted to AKC. Readers will appreciate that individuals cannot be members of AKC as we are of CKC, but that clubs are members, each member club being privileged to elect one delegate. In the early days, then, pioneer specialty club members had to campaign vigorously to gain membership for their club in AKC, win eligibility to registration for their breed, and gain official approval and acceptance of the proposed standard. Once accepted by AKC, the standard became official in the USA and, in most cases, in Canada too. The point that must be emphasized is that standards have been drawn up by breed fanciers, not by the national kennel clubs.

Similarly, proposed revisions come from the ranks of the breed clubs, in some cases international organizations submitting recommendations to AKC and thence to CKC, or, where Canadian specialty clubs exist, being presented to CKC alone. In either case, the proposed changes are published in *Dogs in Canada* with an invitation to interested people to submit comment or suggestions. After a lapse of several months, allowing plenty of time for expression of opinion, The Committee on New Breed and Standards studies the proposal and such suggestions as have been received frequently taking the initiative in making enquiries, and finally submits a report with recommendations to the Board. With the approval of the Board, the revised standard becomes official.

If standards are produced by the people who know the most about the breeds, why is there so much complaining about them and why must they be revised from time to time? The answer could be threefold, including the following facts. Standards are often poorly written, they sometimes contain items which are fundamentally wrong, and even the best is limited by the state of knowledge at the time of writing.

We recall our definition of a standard as a word picture to be used by many people. It follows that this picture must produce an imprint which is similar in the minds of all who interpret it if it is to be of real use. Words, symbols of human communication, are, like other tools, only as good as their users make them, and they must be carefully selected, appropriately used, and well defined in order to be efficient. Let us look at some of our standards that are riddled with adjectives like "moderate", "slightly", "strong", etc., applied to characteristics which could and should be reduced to measurable terms. As well as this, the component parts themselves, i.e. the anatomical structures that we are striving to describe, need uniform labelling. For example, one finds the word "back" used where "top-line" is intended, and "foot" used where "paw" is intended. Words such as "haws" and "withers" apparently have a variety of meanings. I believe that our CKC could set the stage for great improvement by preparing an illustrated glossary or atlas wherein anatomical nomenclature to be used eventually in all Canadian standards would be presented each term being defined with precision.

For examples of errors in standards, the reader is referred to Lloyd Brackett's series "The Dog in Motion" appearing in *Dog World*, Herm David's articles on breed standards in the March and April issues of the same magazine, and C.D. Goizueta's letter appearing on page 16 of *Popular Dogs*' Visualizations of the Dog Standards.

The modification of standards so that they will not convey misinformation and so that they will mean essentially the same thing to all who read them can be undertaken now. But what of the basic correctness of our concepts of perfection in the various breeds? Pretence that we really know what is ideal is fallacious, and it is healthy to realize that there is no good fairy, no fountain of knowledge, no great fat book which will provide us with the information that we seek. The fact is that we who work and play and live with dogs must uncover *new* knowledge. As suggested in a previous article (May, *Dogs in Canada*), only those of us who are willing to be students of our animals stand any serious chance of becoming usefully knowledgable or of making worthwhile contributions.

It seems to the writer that breed characteristics fall into two major categories. There are those such as colour and markings which may be important as distinctive features of a breed or as having esthetic value, but which may play no role in the functional efficiency of the dog. With such characteristics, selection of the ideal is, of necessity, arbitrary. On the other hand, there exists an array of features which ordains the mechanical, physiological, and psychological well-being of the animal. It is with these that we must stop regarding evaluation of quality as an art and make it a science. We must measure and record, we must observe the dog in action and record, and we must produce from these two areas of investigation a symphony of understanding.

In writing the foregoing, the author has been haunted by thoughts of certain breeds which are, in effect, collections of things that no dog should ever be. After asking if there are good, bad, and indifferent monsters, the writer has decided in the affirmative. Given, as we are, the most bizarre proportions imaginable, there do exist measurable features which will, so to speak, make the best of a bad situation. So it is that while Dame Nature belly-laughs at us for loving creatures which she wouldn't have in her house, exactly the same job of study awaits the breeder whose dog's very homeliness is a measure of uniqueness and a source of pleasure, as that which awaits the fanciers of dogs which are more similar to Mother Nature's own.

With the realization that we should expect standards to be overhauled from time to time, consideration of the form in which they are written is relevant. Should we, in other words, standardize the standards? In a short article such as this it is not possible to consider fully the advantages which would accrue as a result of bringing about uniformity in the construction of standards. However, mention of new possibilities relative to methods of judging, of the possibility of using common printed forms for records on all breeds, and of the easy transfer of new information learned in one breed to other breeds, etc., leaves no doubt concerning the desirability of such standardization. It would seem that such an ideal could be attained with relative ease if sponsored by our CKC on, let us say a five-year-plan, at the end

DO YOU HAVE A KEEN EYE FOR A DOG? PERHAPS YOU COULD BECOME A MUCH-WANTED JUDGE

HOW YOU BECOME ELIGIBLE TO JUDGE

Always a problem, the need for judges is greater than ever, with approximately 160 dog shows being held each year across Canada. Many of the shows draw less than 200 dogs and therefore need only one "all-rounder" as judge. Larger shows require two or three judges while others have numerous group or breed specialty judges with only one "all-breed" judge.

For many years anyone could judge providing they received an invitation to judge from a show-giving club and if they were in good standing with The Canadian Kennel Club. Everyone was presumed to be "in good standing" as long as he or she had not been suspended by any recognized national kennel club. No one would be approved to judge two shows within a zone unless three months had elapsed between the two shows.

This was changed in 1957 when the CKC Board made new recommendations which were in turn approved by a majority vote of members in a referendum ballot.

Today, a person wishing to become a judge of one or more breeds (if he has not judged previously), must make application to The Canadian Kennel Club. Questions appearing on the application form must be answered fully. If the application is accepted, the applicant is notified as to when and where he will write an examination. It must be written in the presence of a Committee appointed by the CKC. This examination includes questions on dog show rules, ring procedure and on the Standard for the breed or breeds concerned. An applicant may take the examination for only one Group at a sitting and the questions may be on all breeds in the Group. 75% of the total marks must be gained to pass this test.

Next comes an oral examination conducted by the examining committee appointed in the applicant's province. This committee may require that the tyro judge apprentice at one, two or three shows. When these stipulations have been met satisfactorily and the recommendation of the examining committee is favorable, the applicant is approved to judge at one show. Here is the real test, for at this show a different examination committee will observe his work.

The applicant must submit to the CKC within 48 hours after the show, a written critique on the dogs he placed Winners, BB and BOS. The final decision is given after the report of the examining committee and the critiques have been assessed by The Canadian Kennel Club.

The very act of having passed the hazards of written, oral and ring tests does not miraculously turn the applicant into a good judge. Knowledge and experience are but two of the requisites. Most essential is the gift of "a good eye for a dog" — still a necessity even if every word in the book of Standards could be quoted verbatim.

The Board has recently removed the ruling regarding the time interval between assignments. This matter is now at the discretion of the clubs and the judges themselves as to a proper time lapse. The change makes it possible for a judge to accept every invitation regardless of zone or dates.

Certainly enforcement of Chapter 7 of the Dog Show Rules will, in time, give Canadian judges the honor and respect such well-qualified authorities deserve.

•

PLANNING TO SHOW IN THE STATES? KNOWLEDGE OF THESE VARIATIONS WILL EASE YOUR MIND.

DOG SHOW RULES — CANADA, U.S.A.

Dog Show Rules and procedures vary only slightly in the United States and Canada. Both countries use the point system and judges place dogs by comparing each one with their imaginary picture of the perfect dog of the breed according to their interpretation of the recognized standard.

American and Canadian standards are the same in the majority of the breeds. The Canadian standard for the breeds that differ, generally do so in minor points.

The big difference in acquiring a championship is in the awarding of the points. In the USA a dog must accumulate 15 points and in the process of doing so must have gone "Winners" at two shows where the entry of the breed is large enough for a major (three-point) win. In Canada, no majors are required and the total points needed are ten; although a dog may win the necessary number of points at one point shows he must defeat at least one dog of the same breed or place in the group before being declared a Champion. These ten points must also have been awarded by at least three different judges. For the Group placing to count there must have been at least five breeds represented in the group.

In both countries the dog winning the Group (if it comes from the classes) can acquire the largest number of points represented in the Group. For example, if a Basset wins the Group and receives two points by going Winners in the breed and there are three points for the Winners Beagle, the Basset would be credited with three points.

If the Winners Bitch goes Best of Winners in a breed that carries one point in bitches and two points in dogs, the bitch would be credited with two points in both Canada and the States.

When the Best of Winners dog goes Best of Breed, over Specials, in Canada, those Specials, regardless of sex, are counted as dogs defeated for points. When a dog wins Best Opposite Sex, over Specials, the Specials dogs of the same sex are counted as defeated for points.

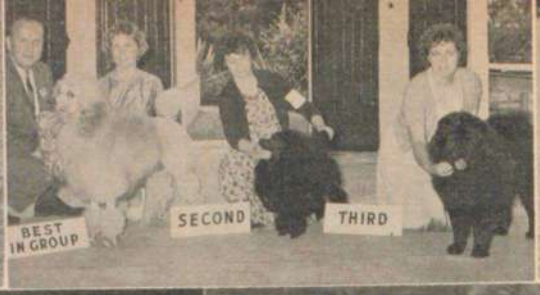

Classes are the same in each country except that in Canada any dog may be entered in the Specials Only class, whereas in the United States only Champions of record can be entered in this class.

Some of the Best of Breed awards are different. Beagles, for example, have two varieties in the United States (under 13 inches and over 13 inches but not exceeding 15 inches). Both Best of Varieties appear in the Group. In Canada, they are judged separately up to and including Best of Winners. Both Best of Winners compete with all Specials, regardless of height, for Best of Breed and only the one Beagle goes in the Group.

American Cockers are much the same. In the United States they have only the three varieties (the Black and Tan appears with the ASCOB) and each variety is judged to the end and each

Show Talk

For the first time, *Dogs in Canada* had the pleasure of attending the eleven shows on the Saskatchewan circuit. In comparison to the Eastern shows, these are small shows with entries ranging from 70 to 100 dogs.

The Show Secretary works from the Judge's table and the Ring Steward sits at the microphone outside the ring. The Show Superintendent doubles as the clean up man and general errand boy. With the small entry, only one ring and one judge is required. The buildings in which the shows are held would make most eastern clubs envious. All shows were unbenched, some for the first time. Western exhibitors are to be commended for their patience for we can well imagine the clamour that would arise at shows in Ontario and Quebec if judging commenced at 10.00 a.m.. Two hours, at least, were taken for lunch and judging resumed for about two hours in the afternoon. Either a supper break of three to four hours was called or the intermission at the supper hour permitted the judging of an obedience trial of from seven to twelve dogs. BIS was scheduled for 8.00 p.m. at each show. At the close of the last show in each city, handlers and exhibitors packed up and travelled the 110-170 miles for the next show which commenced at 10.00 a.m. the following morning.

The majority of the entries are from Saskatchewan or from the United States, the latter brought up by two or three American handlers. It was surprising to see so few entries from Alberta and Manitoba. Perhaps this is understandable as there were three shows in Manitoba at the same time and Alberta has an average of one show each month.

Exhibitors from B.C. and Ontario would be wise to plan their summer vacation and take in the Saskatchewan circuit. The trip is well worthwhile and can be made from the Toronto area in three days of easy driving.

The circuit, this year, commenced at Moose Jaw with H. P. Saunders, Calgary, judging. Robert Cross did the breed judging at the second show and the local CKC Director, Wm. Dawson, judged the Obedience Trial with nine dogs entered. George Donaldson, Victoria, judged breed and Obedience at the third show. The building, a curling rink, could comfortably bench 500 dogs at one end (which was not used at all) and still have room to erect numerous, large rings in the portion that was used. Excellent food was prepared and served by the staff and students of the technical school. Mary Miller was the Show Secretary, J. J. Flynn Show Superintendent and Verona Walker Ring Steward.

After a drive of approximately 110 miles, the shows opened in Saskatoon the following morning with George Kynoch, Vancouver, substituting for the advertised judge Elsie Murray. Entries were up a little and again the building was large enough to handle an entry many times larger than they had. The following day Mark Gordon, Winnipeg, judged the breed show and Gay Rimmer Obedience. The third show was judged by John Devlin, Toronto, with no obedience trial being held. Ernest Pettingale was Show Secretary, Reg. Lewis Show Superintendent and Thelma Hawes Ring Steward.

Then off to Prince Albert, 170 miles away. Show venue was the recreation room in the Indian school where 300 Indian children live in dormatories while obtaining their public school education while many more come in from the nearby reservations by school bus. Throughout the day, at different intervals, classes attended the show in a body with their teachers. All were extremely well behaved and interested. The entry for Tom Quilley, Edmonton was down to about the same as Moose Jaw. Tuesday had Bill Nixon, Winnipeg, as breed judge with Eleanor Pawson, Regina, judging the Obedience. Ena Stewart, Vancouver, took over for the third show. Once again the food served was delicious. Home cooked, hot dinners were prepared and served by the Women's Auxilliary of the Army and Navy Veterans. Miss Pat Harman served as Show Secretary with R. Dunning Superintendent and Director Bill Dawson Ring Steward.

Thursday was left open for the 275 mile drive to Regina. The Regina club's two shows were held on Friday and Saturday, with two Ontario judges, Reg. Sparkes and Stan Whitmore, officiating. The two obedience trials were judged by Larry Wach, Winnipeg, and Director Bill Dawson. The building was immense. So much so that exhibitors parked their cars and trailers in one end while the show progressed in the other. The canteen was manned by women members of the Regina K.C. and all food was home cooked. Such lemon and rhubarb pie! The Regina Club invited everyone to a 'get together' at the close of their shows to put the finishing touch on the twelve-day circuit. Show Secretary for the final two shows was Alice Lalonde, Superintendent was Elsie Duckworth and Eleanor Pawson was the Ring Steward.

To sum up this circuit: admiration is felt for the bravery of such small clubs with such small entries for attempting to put on shows for their exhibitors. We found the local people to be good sports who took their losses, and their wins, with smiling good grace. Easterners are urged to plan their holidays now for 1964 and go out and meet these hospitable people. Take your dog along, most motels welcome them. Thank you Saskatchewan, for your royal reception and pleasant memories.

THE FOREST CITY KENNEL CLUB

held their annual show at Lucan with a good entry in both breed and obedience. Something new for this club was tried when they had two of their own members, Rita Smith and Ed Summerfield, take part in the judging. Other breed judges were K. P. Rickman and W. H. Pym, from B.C., along with Mr. H. Story from the Maritimes. F. (Jake) Giacomelli judged the Obedience trial. Mr. and Mrs. Scott McNair, and their hard working committee, are to be congratulated on this well run show. The trophies were lovely and were displayed to the very best advantage.

THE BARRIE KENNEL CLUB

one of the few remaining clubs to hold benched shows, held its annual show in its usual efficient manner. Under the guidance of the Show Chairman, Vina Jones, the new committee did an excellent job. The club continued its practice, initiated some years ago, of having the dogs benched under a coloured banner, identical to the one over the ring where the respective Groups are being judged. Although not the largest show, this is one of Ontario's best. Each official endeavors to keep everything running smoothly and efficiently.

THE ALL TERRIER CLUB OF CANADA

held its annual Specialty, for the breeds in Group four, at a new locale, taking over the roomy Don Mills Arena for

more on page 41

First Row, left to right: John Lundberg presents 1st in Group to Wynfield's Treasure, a Papillon owned by Mr. and Mrs. W. Ionson, Georgetown. Handler, Susan Radley. Ch. Pethmelys Tison of Bibelot CD (Am.Can.) receives 1st in Group from Dr. W. Shute. Susan Radley is handler-owner. Susan Radley and 'Tison' receive the certificate for high score from Judge George Taylor in the Obedience Trial. All three pictures are from the Bermuda K.C. Spring Show.
Second Row, left to right: Show officials of the Forest City K.C., Scott and Nora McNair and Mr. A. Gault, talk over some show problems. Elsie Betts and Elizabeth Golby, both Kerry Fanciers. Dobe exhibitors Norma King, Joey Purdy and Judy Huntley seem to be friends and they couldn't all have won.
Third Row: Handler Walter Martin makes his appearance after a serious illness, with Mrs. Martin and Mr. and Mrs. F. R. Dufton. Joyce and Stu Roberts with their usual pleasant smiles. Jack Haggerty, well known in the Lakehead area, visits the Saskatchewan Circuit. John Machalek (German Shepherds) and Lionel Ray (Dachshunds).
Fourth Row: Mrs. Hettie Bidewell (Nova Scotia Duck Tollers) with some of her family. Ring Steward Verona Walker and Show Secretary Mary Miller, both of the Moose Jaw K.C. Mrs. Driver and Aibert Busch, two of the 'oldtimers', talk over past, present and future. Joan Wiik with some of her Shelties.
Fifth Row: Well known to Eastern 'show folk' and now living in Brandon is Mary Hart and daughter Elizabeth. Two handlers, Lloyd Heimbecker of Saskatoon and Rex Kane from California. Another mother and daughter combination is Mrs. E. H. Hawes and Marcia. Jack Canham represents the Samoyed Club of Canada in the west.
Sixth Row: Regina K.C. President A. J. (Tony) Bast and Mrs. Bast look lovingly at their Boxers. Airedales and Poodles are discussed by Mrs. Lola Hoff and Rosamund Mabson. Faye Fitzgerald with Mrs. Hilda Murphy. Three judges, George Kynoch, Pat Randall and Bill Semple.
Seventh Row: Sporting dog enthusiast Bill Kemenes-Kettner and Elizabeth who favors Pulis; Moose Jaw K.C. President Pat Murphy. An example of Saskatchewan trophy tables.
Bottom Row: Back to the east: Bill Taylor showing one of his famous Pekes. Mrs. R. A. Hewitt with Harold Butler.

RECENT WINNERS

Pictured above is Judge, Mr. E. Williams, Unionville, Ont. awarding BIS to Am. Ch. Vardona Frosty's Tiara at the Kent K.C. Show, Chatham, Ont. April, 1963. Breeder, owner and handler Dr. Edward M. Vardon, 12897 Woodward Ave., Detroit 3, Mich.

Shown is the outstanding blue Doberman female, Kismet of Reidcroft, placing third in the Group at the Nanaimo K.C. Show on May 12. Judge is the well known President of the CKC Mr. Vic Williams. Kismet is the daughter of the top winning Doberman in the USA for 1962 and '63 to date, Singenwald's Prince Kuhio; dam, Singenwald's Albertine. She has eight points toward her Championship and already has three Group placements. Owned and handled by Pam Reid, Reidcroft Kennels Reg'd., Richmond, B.C.

Miss P. L. Curtiss, England, Judge for the Golden Gate Pembroke Welsh Corgi Fanciers Specialty held at Carmel, Calif., found her BB in Welcanis Adulation (left), owned by Mr. and Mrs. G. S. Wilkins, Winnipeg, Man., handled and now owned by Mr. A. Huggins, Corgana, West Vancouver, B.C. BOS went to Am. Ch. Bundocks Fife'n'Drum (right) owned by Mrs. E. Chastain, Sebastopol, Calif. and handled by Mrs. D. Bundock. The latter was sired by Ch. (Can. Eng. Am.) Crawleycrew Pint who is also the grandsire of the BB winner.

Whinbrae's Dolphinet, a nine and a half month old West Highland White Terrier, took three BB, two Group seconds, two BCB in Group, six BCBP in Group, and two BCBP in show completing her Championship with 12 points at shows held recently in B.C. Judges were S. Whitmore, R. Waters, G. Donaldson, V. Perry, T. Joel and Mrs. Ena Stewart, shown in picture. Sire, Humby's Metis; dam, Whinbrae's Aphrodite. Breeders-owners, Mr. and Mrs. Walter Stewart, Whinbrae Kennels, Reg'd., Island Highway, RR 2, Alberni, B.C. Handled by Mrs. Stewart.

Kill Kare Baron von Kirk, Miniature Pincher, won the Dog of the Year trophy offered by Harbor Motors Ltd. of Dartmouth to the Shearwater Kennel Club dog which has received the most recognition during the previous year. Breeders are Walker and Cloutman; owner, Agnes Misener, Dartmouth, N.S.

Shetland Sheepdog, Ch. Alford Tam-o-Shanter 2nd, finished his Championship at Montreal after winning four BB including Specialty at the Sportsmen's Show and two group placings. Sire, Ch. Willow Acres Golden Rocket; dam, Helensdale Lady Luck (imp). Owner-breeder is William Henderson, 392 Balliol St., Toronto, Ont. Lorna Jackson handled.

Ch. Mazelaine's Witch Doctor, a Boxer owned by Wild Rock Kennels, Tweed, Ont. finished its Championship at the Ottawa Shows by going BB and fourth in Group and BOS under Judges Stan Whitmore and A. Collins. Handler was Flora Hewitt.

Ch. Fireflys Buddy of Wesbrook, a male cream Toy Poodle, took BB under Judge Mark Gordon at the B.C. Ladies Kennel Club Show. Owned and handled by Ford Flechar, 2938 Mathers Ave., West Vancouver, B.C.

Miniature Poodle, Ch. Karas Bucaneer of Ma Griffe, shown taking winners Dog for a major at Ingram County Kennel Club show at Detroit, Mich. under Judge T. Becket. Owner-handler-breeder is Phyllis M. Laventhall, 3236 Yonge St., Toronto, Ont. Sire, Ch. (Can. Am.) Poodhall Gus; dam, Ch. Firebrave Honourine.

Ch. Alandale Sean Glyn, a rough Collie, won First in Group under Judge Tom Joel, making his fourth consecutive BB. Sire, Ch. Alandale Lord Buff; dam, Sunday O'Saxon. Owners are Margaret and Grace McDevitt, Crayster Collies Reg'd, 342 No. 7 Rd., Richmond, B.C. Handler, Christine Mullins.

Ch. Northern Echoes Kobold, a two year old Schipperke, won first in Group to finish his Championship at Edmonton under Judge John Lundberg, April 13. Sire, Ch. Ellen's Corky of Fairdale; dam Phoebe. Breeder was Miss Alma King. Owners are Mr. and Mrs. L. G. Hoye, Fairlaur Kennels, 2105 - 26 St. S., Lethbridge, Alta.

Miniature Poodle female, Ch. Drumaids English Rose, finished her Championship when she placed second in the Group under Judge Ena Stewart, coming up from the classes at the B.C. Ladies K.C. Show May 18. Sire, Eng. Ch. Braeval Blue Peter; dam, Eng. Ch. Drumaids White Sable. Owner-handler is Mrs. J. O'Brien, Bri'Canda Poodles, 4892 Smith Ave., South Burnaby, B.C.

Mr. George Donaldson awards BB and fourth in Group to the lovely imported blue Doberman female Kismet of Reidcroft. Owner-handler is Pam Reid, 727 No. 2 Road, Richmond, Vancouver, B.C. Kismet was purchased by the Reids at the Doberman Specialty of N.A. held at St. Louis where she was third in her class of 6-9 months old puppies over a considerable entry. Her sire is Ch. Singenwald's Prince Kuhio. This was Kismet's first Group placing and took place at the Vancouver Island Dog Fancier's Show, May 11.

Again on May 19, at the B.C. Ladies Kennel Club Show, Kismet of Reidcroft took BB over Specials and placed third in the Group under Judge T. Joel. This made her third Group placement and third BB win in six consecutive shows. The other three times she was BOS. She is 15 months of age and has just started on her show career. Owned and handled by Pam Reid, 727 No. 2 Road, Richmond, Vancouver, B.C.

The Standard Poodle, Manville's Figaro, took 3rd in Group under Judge A. Collins at the Peterborough Show and 2nd in Group under Judge Wm. Dawson at the Ottawa Show. He also took 2nd in Group and BCBG under Judge D. Fitzgerald at the Whitby show. Owner, Mrs. E. T. Driver. Sire, Ch. (Can. Eng.) Vulcan Lord Harry; dam, Sporty Sarah.

CLUB ROUNDUP

british columbia

JOAN RAILTON, c/o Sir Charles Tupper Secondary School, 419 East 24th St., Vancouver, B.C. Popular teacher, judge and Bulldog specialist.

The activities of the *Vancouver Island German Shepherd Dog Club* are reported by Publicity Chairman, *Mrs. Joan Smith*. The following officers were elected at a March meeting: President, *Mr. C. G. Smith;* 1st Vice-President, *Mr. R. Bird;* 2nd Vice-President, *Mr. H. C. Whiteoak;* Secretary - Treasurer, *Mrs. Gwen Deall;* Bench Show Chairman, *Mr. J. Waldron;* Obedience Chairman, *Mr. G. Iverson.*

The club's first All Breed Sanction Show was held on April 13 with an entry of 86 dogs. It proved to be a tremendous success and well worth all the hard work and organization. Breed judges were: *Miss V. Lyne,* Groups I and II; *Mrs. S. Roberts,* Groups III and V; *Mr. E. Moody,* Groups IV and VI; *Mr. Harry Dodds,* Best in Show and Best Canadian Bred Puppy in Show.

Results of the breed judging were: BIS and BCBPS, *Miss Linda McCoy's* Collie, Chris; Best in Sporting Group, *Mr. and Mrs. L. Beaman's* German Short Haired Pointer, Alf; Best Canadian Bred Puppy in Sporting Group, *Mr. and Mrs. S. Spence's* German Short Haired Pointer, Artus; Best in Hound Group, *Mrs. M. F. Allen's* Whippet, Belinda; Best Canadian Bred Puppy in Hound Group, *Mrs. M. Robertson's* Basenji, Favourite; Best in Working Group, *Miss Linda McCoy's* Collie, Chris; Best Canadian Bred Puppy in Working Group, *Miss Linda McCoy's* Collie, Chris; Best in Terrier Group, *Mrs. Freemantle's* West Highland White Terrier, Ordesia's Skeena; Best Canadian Bred Puppy in Terrier Group, *Miss Humby's* West Highland White Terrier, Mag; Best in Toy Group, *Mrs. J. McCoy's* Pug, Sam; Best Canadian Bred Puppy in Toy Group, *Snowbell's Kennels* Maltese, Trippence; Best in Non-Sporting Group, *Mrs. McMinn's* Standard Poodle, Calypso; Best Canadian Bred Puppy in Non-Sporting Group, *Mrs. V. McLaughlin's* Boston Terrier, Tiptoes.

A children's handling class was included in the show. *Mr. Ron Sless* judged the under-ten-years class and the winner was *Steven Iverson.* The ten to 15 years class, judged by *Mr. Iverson,* was won by *David Waldron.*

A parade of champions was also held.

The club is now planning for its second Specialty Championship Show. This will be held in conjunction with the *Vancouver Island Dog Fanciers' Association* All Breed Shows on September 6 and 7, 1963.

"Heroic Dog Finds Child in Bushland." This was a headline on the front page of the "Victoria Daily Times" on May 31. *Cindy Wagar,* six, of Ladysmith, was found asleep and unhurt in the bush after being missing overnight for 14 hours. Four hundred volunteer workers, under the leadership of the Fire Chief and the civil defence co-ordinator, combed the area the night before. Then the search was called off until daylight. In the morning, a German Shepherd, "Rebel", was brought from Chemainus, 15 miles distant, and soon found Cindy asleep in deep bush. "Lebern's Rebel," an all black German Shepherd, is owned by *Mr. Ivan Beggs,* president of the Mount Brenton D.O.T.C. He was trained for tracking with the Vancouver Island Tracking Club, under the direction of *Mrs. Alfred Best* and passed his T.D. test on September 10, 1961. Since then, *Mr. Beggs* has continued training him in advanced tracking.

Mrs. Henry MacHemer, secretary of the *Vancouver Island Gun Dog and Tracking Club,* sent in the above information about Rebel. She also appeals to people who need a tracking dog to call for one at the *start* of a search before the track is trampled.

The Coastal Canine Academy held its final graduation of the season on May 14 with a good attendance of handlers and spectators. *Mrs. Pat Powers* was the judge. Club trophies for degrees were presented at this time. The successful candidates were *Mrs. B. Riel* with Sheltie "Nicky"; *Mrs. D. Luke* and Min Pin "Louie"; *Mrs. B. Arthur* and Whippet "Pickles" and *Mr. B. Taylor* with Collie "Lance". All the above dogs won CD's *Mrs. Owen,* the retired caretaker for the hall, was surprised and thrilled by the presentation of a T.V. lamp as a small token of thanks.

On May 20, the *C.C.A.* team took first place with an average score of 194 at the trial held at the Marpole Curling Rink. *Mr. Holland* and Golden Retriever Rusty took both Open A. The following night *Mr. Taylor* gave the opening lecture of the tracking season. The lecture was well attended, but it became a night to remember when the local transformer blew and the meeting was carried on by candlelight after an hour of darkness.

Club members were very impressed by the lecture given by *Mr. Pfaffenberger* of the Guide Dogs School on May 22. His book, "New Knowledge on Dog Behaviour", should prove very helpful to both professional or novice.

Cash prizes were donated for the floats in the May Day parade at Bridgeview the club's meeting centre.

The regular meeting of the *B.C. Gun Dog Club* was held on May 9 at Sinser's Realty Ltd., Burnaby, B.C. The following new members were welcomed: *Mr. Bob Ellis, Mr. H. O. Smith, Mr. and Mrs. H. F. Caldwell.*

The club congratulates *Lloyd Love* on the success of "Love's Happy Sparky" in the Derby Stake at the licenced pointer club trial held at Nanton, Alberta by the Alberta Field Trial. In spite of unfamiliar country, this dog took second place and helped to arouse interest among the Albertians in the pointing breed in B.C. and in the proposed Vernon Licensed Trial which is scheduled for this fall.

The Fraser Valley Kennel Club held its annual meeting on May 29 and elected the following officers: President, *Mr. Leedham;* Vice-President, *Miss Utter;* Secretary, *Mr. Jose;* Treasurer, *Mrs. McCullum.*

It was decided to hold a sanction show this summer at the Municipal Hall in Pitt Meadows. A tentative date of August 4 was set.

The Alberni Valley Dog Obedience Club will be celebrating its 5th Anniversary this year in conjunction with the city of Alberni's Silver Anniversary. A float will be entered by the club in the July 1 parade and will feature a birthday cake surrounded by dogs with party hats and streamers.

Alberni city's new dog control by-law has made the Obedience Club extra busy this year. Many dogs were on leash for the first time of their lives and owners have asked for help in training.

A mock trial was held in order to give dogs and owners experience for the graduating trial.

Members have acquired two new dogs which are arousing considerable interest. One, a Standard Poodle, is owned by *Mrs. F. Harrison.* Xtra Felicity of Wycliff, familiarily known as "Topsy" comes from the Vulcan Kennels and was sired by Wycliff Thomas, well known in both show and obedience rings.

The second new dog is a Dalmatian owned by the *Bishops* of Totem Kennels. Besides a successful ring debut, he has

made public appearances as Sparky, the Fire Department Fire Prevention Dog, both on Television and in the Vancouver Province. The children of Lanzville, who had won their "Sparky Badges", were rewarded by a ride in the fire truck and by meeting Sparky in person. Imagine the amazement of drivers coming on a fire truck flying down the highway with lights flashing, siren screaming, and with Sparky, wearing his Chief's cap, perched on top of the cab and having the time of his life.

Congratulations to Ch. Nanook who has recovered from his serious injuries which were an aftermath of Typhoon Frieda. Congratulations also to his son, Mr. Silver Snowman of Totem, who won BIS at the age of three and a half months at a recent sanction show judged by *Mrs. E. Stuart*. He is following in the footsteps of his grandsire, Ziska's Buster, who was also a BIS dog.

Welsh Corgis on the West Coast set a couple of records last month when they topped the entry at the *B.C. Ladies K.C.* Show in Vancouver and also had the largest entry of Corgis ever seen in Canada, having an English Welsh Corgi specialist judge the breed for the first time! The entry drew a large crowd of spectators to see *Miss P. L. Curties* of the famous "Lees" Corgis of England judge the record entry of 37 Pembrokes and seven Cardigans. Several retired champions were brought out to honor Miss Curties and the occasion was further brightened by the lovely leis which the judge had brought with her from Hawaii, where she had judged the previous week, to present to the winners. *Miss Curties* chose the *Huggins'* "Welcanis Adonis of Corgana" WD and the *Wilkins'* "Welcanis Adulation" WB, with the dog going on to BW and BB. The judge found it extremely interesting later to find that her BOS "Ch. Corgana Animation Can. & Am. C.D." was the grandmother of the WD and WB!

Following the judging, exhibitors were able to enjoy a visit with the judge at "Corgana", during a very pleasant luncheon and afternoon.

Lethbridge. Best Brace in Show went to the Shetland Sheepdogs owned by *Mrs. Lucy Kerfoot* of Okotoks. Highest Scoring Dog in Obedience with 199½ points was a Pomeranian, "Kennlyn's Twinkle Toes", owned by club member *Mrs. Barbara Hillmer* of Lethbridge. Following the judging, spectators and exhibitors were treated to an Advanced Obedience display by the outstanding German Shepherd "Ch." Thor's Helios CD, CDX, owned and trained by *Natalie Maydanski.* Surprise visitor was Director *Robert MacKillop* who flew his own plane down from Edmonton for the show. Club activities adjourn for the summer months with a picnic for members, children and dogs on June 23.

The Lethbridge club expresses the same concern as an ever increasing number of the Prairie clubs. All members are needed as show officials and all members naturally want to enter their own dogs, so it is very difficult to fill the key positions for Championship shows. Shows in this area are still not so frequent that breeders can afford to miss even one.

Mrs. B. Morin of the *Northern Alberta Canine Association* reports the success of and the enthusiastic support by exhibitors to its annual Spring Championship shows in April, with an increase in entries over the previous year. The rest of her report, unfortunately, deals with show wins which are reported elsewhere in *Dogs in Canada,* and may not be reported here.

SASKATCHEWAN

At its May meeting just before its annual Championship shows, *the Regina Kennel and Obedience Club* put on a Mock Dog Show to impress upon members proper and improper ring procedure, proper and improper dress, manners, etc. *Frank Duckworth* played the part of the Judge, *Barbara Martin,* the Sexy Young Thing, *John Machalek,* the Drunk, *Mrs. Elsie Duckworth,* the Sophisticated Madame, *John Machalek,* the Beatnick, and *Mrs. Eleanor Pawson* played the part of Miss Proper. This turned out to be really hilarious, and I would say is a very novel way to impress upon exhibitors the dos and don'ts of exhibiting. *Tony Bast* then

gave a talk on preparing and showing your dog, and *Bill Semple*, an all breed judge, showed how to set up the various dogs brought by members. Dog Show Rule Books were given out at the meeting.

Congratulations to *Sylvia and John Machalek* on the arrival of a daughter and best wishes to *Barbara Martin* who is to be married on June 8.

Quite apart from the notes from the Regina club, I would like to mention that they have a very enthusiastic and faithful blind member with his constant companion, a German Shepherd Guide Dog. Unfortunately I did not get the name of this member and his dog, but I met him first at the 1962 Regina show when we "watched" the Obedience Trials together. To me it was amazing how much he "observed". He knew without fail when a German Shepherd was in the ring, he knew when a very small breed (in this case, a Chihuahua) was in the ring, he knew which dogs would score well and which dogs were not performing well enough to make a passing score. It was a pleasure to meet him at the show again this year and to find that he recognized my voice at once.

Mrs. Hilda Murphy of Moose Jaw and owner of the lovely Collie, "Ch. Clareton Copper Glow", told me at the Regina show that "Rusty" had completed his American Championship in Florida just several days before, winning one Major and Reserve WD at the Maryland Specialty with an entry of 82 Collies, 40 of them males, since previous State-side wins for this Collie reported in an earlier issue.

MANITOBA

First of all, congratulations to the new show officials of the *Fort Garry Kennel Club* for a very attractive show, blessed with two days of perfect weather. A very sudden change in weather brought a cold rainy day for the *Portage La Prairie Kennel Club* show, but this smoothly running unbenched show finished in record time, letting "cold" exhibitors away when their respective judging was over. This was a first Championship show for Portage and as one exhibitor expressed, it is to be hoped that it will be an annual event as, unless one can attend shows outside the province, your dog is likely to die of old age before becoming a Champion!

Two very nice BIS wins for two very new exhibitors, *Fred Campbell* and *Ellwood Smith* of Winnipeg. Some people must just live right! This was their very first show dog!

Gateway City Obedience Training Club is contributing its bit to an increase of shows in Manitoba with its first All Breed Show and Obedience Trial shortly. Obedience classes for the season finished with Graduation on June 3, and the following week, *Jack Carlton*, Dr. Ballard's representative, showed a film on "Puppy Trouble" at the final social evening for the year. (Yes, this is the same *Jack Carlton* that we knew at all the Eastern shows a few years ago, and believe me,

CONGRATULATIONS TO:

Mr. Lloyd Heimbecker of Saskatoon, owner of **CH. WUNDERBAR'S ARIEL,** on her outstanding show career for 1963. Ariel was shown at nine straight shows winning: NINE BEST OF BREED, THREE TIMES FIRST IN GROUP II, FIVE TIMES SECOND IN GROUP II, ONE THIRD IN GROUP II, EIGHT TIMES BEST CANADIAN BRED IN GROUP II, and last but not least **TWICE BEST CANADIAN BRED IN SHOW 'ALL BREEDS'.**

Mr. Albert Ellis, Springhill, N.S., owner of **WUNDERBAR'S RED DAEMON** (Junior Puppy Dog). Red was shown at three straight shows winning: THREE BEST OF BREED, ONE SECOND IN GROUP II, TWICE THIRD IN GROUP II, TWICE BEST CANADIAN BRED IN GROUP II, THREE TIMES BEST CANADIAN BRED PUPPY IN GROUP II and **BEST CANADIAN BRED PUPPY IN SHOW 'ALL BREEDS'.**

EASTERN BREEDERS: Mr. Ellis has shipped his WUNDERBAR'S FANTASY back to be bred to our CH. BRITTO V KIRSH. 'Tassy' is a GRANDDAUGHTER of CH. WUNDERBAR'S ADVANCER. 'Vance, is sired by BRITTO. Contact Mr. Ellis for your SHOW PUPPIES.

Our warmest congratulations to you both . . . . . we are extremely proud.

he's just as jolly and full of tricks as ever!)

Gateway newsletter asks the question, "How is it that when a dog bites a boy, it reaches the front page of a paper, but when a Collie saves a three year old child from drowning, the news is tucked away at the back of the newspaper under a small heading?" How true!

I have heard so many conflicting reports lately about the necessity of rabies certificates for dogs to enter any National Park in Canada that I checked with *Dr. Hugh Best* of Canada Department of Agriculture, Health of Animals Branch. *Dr. Best* tells me that rabies certificates for this purpose have not been necessary for the past two years. In the past year, Ontario had the highest number of cases of rabies in all animals, and Manitoba stood second. In Manitoba there has been a steady increase in rabies among skunks in the past year, but aside from Northern Manitoba — Flin Flon to Churchill — there have been no cases among dogs. It was during the time that Alberta was concerned about the number of rabies cases in that province that rabies certificates became necessary in all National Parks due to Alberta's concern about tourist traffic through Banff and Jasper National Parks. However Alberta and Saskatchewan have been free of rabies for several years now, so restrictions have been lifted, although a number of parks might prefer to continue the precaution. It is still very wise however, as *Gateway* Newsletter suggests, to give your dogs annual inoculation against rabies in the province of Manitoba. In many of the larger centres it is compulsory.

The *Brandon Gun Dog Club* held a Golden Anniversary Picnic Trial recently to honour ex-president *A. F. Robins* who celebrated his 70th birthday and his Golden Wedding anniversary during the same week. "*Archie*" is Manitoba's Field

Trial Representative and has been in dogs for some 50 years.

During May, Winnipeg Pembroke Welsh Corgi breeders, *George and Trish Wilkins*, had the pleasure of seeing a litter of their breeding produce an outstanding performance for a single litter in a single week. At Carmel, Calif., at the Specialty Show of the Golden Gate Pembroke Welsh Corgi Fanciers, their Welcanis Adulation went BIS from the classes over 15 top Specials and an entry of 83 Pembrokes, under *Miss Pat Curties*, English Specialty judge for the breed. This in addition to the win of a litter brother, Welcanis Adonis of Corgana (owned by *Mr. and Mrs. A. Huggins* of Vancouver) at a similar Specialty Show in Canada also under *Miss Curties*, in an entry of 37; and the Group win of a litter sister, Welcanis Amber Mist, (owned by *Mr. and Mrs. J. Cobb* of Winnipeg) assures the *Wilkins* that they are applying correct breeding principles.

ontario

VINA JONES, R.R. #2, Minesing, Ont., Labrador breeder and exhibitor, valuable contributor to dog club, humane, first aid, other club work.

THE ALL TERRIER CLUB OF CANADA

The club's '63 Specialty was a great success, both in entries, 111 (this included The West Highland White Specialty), and in attendance, which in some small part must be attributed to the club's change of locale for this show. Don Mills Arena seemed like Buckingham Palace in comparison to its former site. With the possible addition, in years to come, of other Terrier Specialty Clubs, this show could well become the Canadian Montgomery County!

The club was pleased to have attracted the notice of two visiting judges from England. *Mr. and Mrs. John Hamilton*, Bolton, England, were over here for a short vacation and made the show one of their stops. *Mr. Hamilton* is an all Terrier judge and his next assignment is in Italy. The next guest was *Mrs. Watson McInnes*, who is now residing in Guelph with her husband, but has been invited back to the Old Country to judge Crufts in '64.

Mr. and Mrs. John Devlin were kind enough to have an Open House after the show for the judges as well as ATC members and WHW members. This proved to be a most enjoyable evening for all. Many thanks to the *Devlins*.

A handling class was held for members a few days preceding the show under the guidance of *Mrs. Weir*. Although the turnout was not large, it was agreed by all who attended that much was gleaned from it. These classes will continue, and any member interested should contact *Mrs. Pirrie*, HO 1-9619.

Presenting

"GAYMITZ DASH O'FIRE

"THE YOUNGSTER WITH THE "WINNING WAYS".
BEST PUPPY IN SHOW AT THE C.N. SPORTSMEN'S SHOW.

"DANDY" AT 11 MONTHS OF AGE

Selective Breeding

Congratulations of the club go to the *MacFarlane's*, Badenoch Cairns, who were runner's up for the *Eileen McEachren Memorial Trophy*, and to *Mrs. E. Betts*, who's Can. Am. Ch. Tregoad's Vicky's Cappy is in the news again, being cover dog on the April issue of the *English Dog World*.

Two new members were welcomed into the club last meeting — *Mr. D. De Garnier*, Toronto with Westies and *Mrs. M. Black*, Barrie with Welsh and Airedales.

There will be no meetings during the months of July and August and a new meeting place has been arranged commencing with the September 12 meeting. The new location will be the War Amps Building, 62 Wellesley Street. The new place will be an especial boon to the Education Committee, as here they will neither be limited by a set time nor by the restriction of dogs in the building.

BARRIE-HURONIA OBEDIENCE CLUB

The club held its monthly meeting at *Hilda Pugh's* with a good membership in attendance. There are now 13 dogs in training and they have two teenagers. The club's matinee show is to be held July 14 at *Rosalie Harvie's*. Good prizes, games for the kiddies and lots of room. The club urges everyone to turn out and practice their dogs as well as enjoy a picnic in the country.

BARRIE KENNEL CLUB

The club wishes to thank all exhibitors and visitors and workers who helped make its show such a success. Congratulations are due the committee for a good job well done. Following the show the members had a banquet at the home of the President, *Mrs. Fell*. The June meeting was held at *Mrs. Fell's*, with guest speaker *Mr. Hughes* of the Ontario Humane Society.

THE BASSET CLUB OF CANADA

The club is off to another successful year with *Mrs. Anne MacBeth* as President and *Mr. Richard Henderson* as Vice-President. *Mr. Fred Carter* will fill the office of Secretary and *Mrs. Betty Carter*, Treasurer. *Dorothea Engles*, new editor for the bulletin "All Ears", has drawn much favorable comment on her first issue, both from members and friends across the border.

Show Chairman, *Mike Knott*, is busy arranging the club's first outdoor Specialty to be held July 19 in conjunction with the *Oxford County Kennel Club* show to be held at Woodstock. *Mrs. King*, from Detroit, a well-known Basset fancier, will be the judge and the club is hoping for an entry of over 30 dogs.

The Booster show at the Sportsmen's Show had a much improved entry, both in quantity and quality. This is very gratifying as quality is what the Basset breeders are striving for.

The regular quarterly meetings have been held at Burlington and at the April meeting guest speaker was *Dr. Gilman* of the O.V.C. His talk on genetics as they apply to the inheritance of certain characteristics, particularly in Bassets, was very interesting and the use of pictures to illustrate the points *Dr. Gilman* was making added much to the evening. It is the intention of the club to have various topics of interest discussed at future meetings by such authorities as *Dr. Gilman*.

A scheme to encourage the exhibiting of the breed in provinces outside Ontario will be forwarded to the members very shortly.

BULLDOG CLUB OF CENTRAL CANADA

The club held its 15th Bulldog Specialty on June 2 at the home of *Mr. T. R. Dewsbury* in Locust Hill, Ont. Judge *Walter Brown*, a Bulldog breeder for over 40 years, passed his opinion on the 28 entrants which included eight dogs from across the border and two imports. The previous day a Booster was held in conjunction with the *Progressive K.C.* Show with 28 entries but not all the same dogs. The judge was *Mr. K. Branion* of Michigan. Points this time went to the States.

BULLMASTIFF FANCIERS OF CANADA

Following the club's Specialty Show held in conjunction with the *Barrie K.C.* show, the members held a buffet supper at the home of *Mr. and Mrs. Al Tate* at which they were happy to have their able Judge, *Mrs. Wm. Anderson* of Hoffman's, N.Y., as well as several American Bullmastiff exhibitors. Presentations were made to *Mr. Joe Sheppard* for his ring stewarding services and also a gift to the newly married *Mr. and Mrs. Donald Stainton* (formerly *Mrs. Foster Law*)

along with the club's best wishes for their future happiness.

The regular meeting was held at the *Dorsey's* in Clarkson on June 2 and it was decided to hold two Sanction Shows as usual during the winter, one in November and the other in February. The club has some new members and is looking forward to a busy year.

THE GERMAN SHEPHERD DOG CLUB OF WESTERN ONTARIO

The club held its May meeting in the London Labour Temple. Training classes were reported doing very well. The first matinee of the season was held April 28 at the home of *Mr. and Mrs. Bill Lamphrect*, at Mt. Bridges, when *Mrs. Rita Smith*, well known Boxer breeder, did a very good job at judging. The second matinee show was held at the home of *Mr. and Mrs. Rolf Beer*, Strathroy. *Mrs. Heather Logan* from Sarnia was the judge for conformation.

At the April meeting it was decided to start obedience classes for the public at the end of that month.

HAMILTON KENNEL CLUB

The club held its meeting in the Agriculture Hall with a very good turnout of members. *Mrs. J. Kennedy*, a Corgi breeder, was welcomed as a new member. Due to the illness of Secretary, *Mary Krawesky*, *Mrs. B. Cook* took over very ably with amusing sidelines added. The Spring rummage sale was a huge success and no doubt those who helped had fun and look forward to the next one. Preparations are well advanced for the club's breed show and it promises to be a good one. The club wishes all the members and friends a very happy summer and hope all will return with good ideas for the new season.

HAMILTON OBEDIENCE CLUB

At the time of receipt of the club's notes, the club was planning to have *Dr. H. C. Rowsell* of the O.V.C., Guelph, to speak on "haemophilia" at its June meeting. The club had received an enquiry from Bermuda in connection with its June Trial.

At the recent Obedience Fun Frolic the club won the Challenge Match, thanks to *Bill Finn* with his German Shepherd "Cindy" in Utility, *Reg Peters* with Welsh Corgi "Tammy" in Open and *Lil Firth* with her Sheltie "Lady" in Novice. There weren't as many spectators at the Frolic this year, but entries in the classes were up. Burlington drew a large Novice entry. Hamilton's Exchange Match drew more than anticipated, but the most fun was the Skyway's Obstacle course, which is sure to double the entry next year if fun counts for anything. The ladies of Tillsonburg held another cake sale which were works of art.

Gil Marcotte and his wife *Barbara* looked after the entire Exchange Match and the club's thanks go out to them for all their time and effort.

Pat Dobie was in attendance at the May meeting, also the Fun Frolic, coming from Kingston.

Ch. Kobi Von Steinernhof and Proceeds of His Record Breaking Two Shows at "A Weekend with the Saints".

about a saint— a pretty 15 year old miss, and a "New Record Win" for the breed under AKC or Canadian Rules.

Ch. Kobi von Steinernhof, owned by Charles M. Cawker of Foxboro, Ontario, made his first trip to New England, stayed through one week-end, and came home with two American Kennel Club five-point wins, a feat unprecedented in the modern history of the Saint Bernard on this continent.

The setting in which the ten points were won also made history. As host to the Saint Bernard Club of America, the New England club staged a three day week-end, including a Demonstration Day on May 31; the National Specialty, at Ladies' Dog Club all-breed show on June 1; and the New England Specialty, at Framingham Kennel Club on June 2.

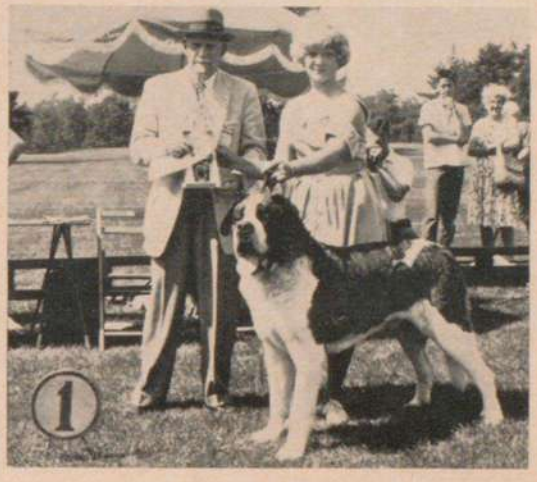

Official show entries totaled over two hundred Saints. Each of the two Specialties surpassed all previous Saint entries by a wide margin. A weight tally kept on each dog finally added up to eighteen and a half short tons, a total which may never be approached in any one breed gathering.

Show judges were A. Alfred LePine, all-rounder, for the National Specialty, and Dorothy Breyfogle, Saint judge, for New England. Both placed Kobi as Winners Dog, and Best of Winners.

Ch. Kobi, now six years old, was bred in Switzerland by H. Glauser, and brought to Canada by Mr. Cawker at six months. In his double win he was handled by Jessica Roberts, high school freshman from Groton, Massachusetts.

Fifteen-year-old Jessica, pictured opposite with Kobi, has done some record setting of her own. In 1962, while fourteen, she won both junior and senior handler trophies offered by the New England club. Last February, she took her own pair of full brother Saints to Best Brace in Show at New York's renowned Westminster Kennel Club, an award regarded as so significant to the breed that she was voted a life membership in the New England Saint Bernard Club.

As the last event in Kobi's big week-end, Jessica handled her own dogs, at Framingham, to Best Brace in Show.

Judge A. Alfred LePine Awards Best of Winners, June 1st National Specialty Ladies Dog Club.

Judge Dorothy Breyfogle Awards Best of Winners June 2nd New England Specialty Framingham Kennel Club.

DOGS & PEOPLE

Travellers: *Phyllis and Frank Laventhall*, Toronto, are enjoying a three-week holiday in England.

Chosen at seven months by an eminent European judge for a Samoyed breeder friend in France. Samoyedena's Jaykova has done well in shows. *Mr. and Mrs. L. P. Cozens* of Stouffville, Ont. have learned from *Mlle. DeNizet de Leemans* that "he is now an International Champion, having won his championship points in four countries including Paris, France; Luxumburg, Belgium and now Monaco, and was presented with a beautiful silver trophy by *Princess Antoinette of Monaco* (*Prince Rainier's* sister). The trophy was donated by their father. Another silver trophy was also won by Jaykova, awarded by three judges as the Best Dog in Show coming from France."

The Pekingese entry at the Windsor Championship Show in England, judged by *R. William Taylor* of Montreal June 29, totalled 392, by far the largest breed entry in the show. This is a record entry for this show and the largest entry of Pekingese yet received for a visiting judge.

After many years' absence, *Mr. David Fingard* of Toronto and Port Bolster, Ont., is once more showing Great Danes. His most recent acquisition, the young Ch. Haupt of Harmony Hill, placed consecutively 4th, 3rd, 2nd in Group in three shows, then 1st in Group and BIS at the Progressive Show last month in Toronto. Haupt's breeders are Carolyn D. Thomas and Elinor G. Watson.

Regina, Sask. citizens, reports *Mary Hart* of Brandon, Man., are proud of their Police Service Dog "Duke", a German Shepherd owned and trained by Constable Ken Taylor of the Regina City Police Division. Duke is 17 months old, has been on eight-hour patrol duty with Constable Taylor since October, 1962, and has already helped with seven convictions. In February of this year a second German Shepherd, "Rebel", was added to this Division and is owned by Constable Ron Orthner. These dogs are used in heavily populated areas for searching buildings for criminals, for break-ins, in the search for missing children and in the cover car for other police cars in case of need for help with some convictions. Duke has the ideal Shepherd temperament. He is friendly and trusting with friends and strangers, but does not hesitate to carry out the work for which he is trained. Constable Taylor is anxious to apply correct training methods and has taken out a subscription to *Dogs in Canada* for any ideas he may find there. Regina may well be proud of these members of their Police Division.

Wins in American shows: Mr. Magoo, CD., black Miniature Poodle owned by *Mrs. Hilda Pugh* of Toronto, scored 195½ points under *Mrs. Mary Southcott* at the Western Lakes Obedience Club in Buffalo on May 11, gaining the 2nd leg on his American CD.

Ill: *Mrs. Kenneth Rayner* (Wingait Collies) St. David's, Ont., is recuperating from surgery she underwent at Niagara Falls, Ont., mid-June.

Terrier breeder Alf Veale, Burlington, Ont., has recently arrived home from England where he attended the Wire Fox Terrier Specialty. He was most impressed with his welcome at both the show and dinner and at the latter was asked to respond to the toast to the visitors.

Alber-Mar's Kernel Ali's Pride, seven month old Standard Poodle puppy, attending his first show, went BW and BP in Show under Judge Col. Frank Foster-Davies at the Kingston KC Show June 23. His owners Mr. and Mrs. A. Guest, Lindsay, Ont., were heartbroken about his sudden death shortly after these wins.

An 11-month old Weimaraner named Zeus, who refused to bark when teased was the star witness in the magistrates' court in Kingston, Ont. recently. Owned by Mrs. Henritte Ninger, Zeus was charged with barking for 20 minutes and disturbing the peace. The charge was laid by Mrs. Ninger's neighbor. The case was dismissed after Zeus, held on a leash, refused to bark when a weiner was waved in front of his nose.

The "Weekend with the Saints" provided a "heavenly" surprise for Mr. C. M. Cawker of Belleville. Although the Cawkers had entered two Saints, their intention was to show only one, as they had no handler for the older dog, "Kobi". Jessica, 15-year-old daughter of Mr. and Mrs. Rex Roberts (Mr. Roberts is editor of a new edition of Denlinger's The Complete St. Bernard) and Kobi struck up a friendship. Her offer to show him was accepted, with the result that this 6½-year-old dog, who was about to be retired from the ring, walked off with BW for five points both days. Kobi's performance, Mr. Cawker believes, is a breed record and "certainly in the breed is a record for either amateur or professional handling under AKC rules". For exhibitors and their dogs, he reports, facilities, arrangements and planning by the host New England Club surpassed anything he has encountered in the show world. ●

HI-HOPE KENNELS REG'D.

Shetland Sheepdogs

"salute"

* **CH. HI-HOPE'S MERRY McMORLAND C.D.** who finished (subject to C.K.C. conf.) taking a 5 pt. win at the S.S. of B.C. Specialty. In only 7 shows "Morry" has had two Specialty wins, placing Winners or better in all but two shows (on both occasions he was Reserve to a kennelmate). A son of Ch. Timberidge Typesetter (& 12th. descendent to finish).

* **CH. SUNSET'S PRINCE OF HI HOPE** — B.O.S. & Best Canadian-bred at the same Specialty show, over several Specials.

"Morry & Prince are two of 6 champion studs at Hi-Hope".

* * *

Show and breeding prospects available, all fully guaranteed. Also some nice pets.

E. H. & Frances Clark

847 Alexandra Rd.,

Richmond (Vancouver) B.C.

Phone CRestwood 8-1300

A few club members attended the Lucan, Sarnia weekend dog shows and watched *Milo Pearsall* judging Obedience. A very relaxed and obviously capable judge and a very nice person as well.

Demonstrations are still being held regularly, ably organized by *Mary Krawesky*. The club is not overly active during July and August but it looks forward to Fall when classes will resume with gusto.

THE IRISH SETTER CLUB OF CANADA

The club offers congratulations to *Mel Babcooke* of Nova Scotia who has just completed both a Field and Bench Championship on his Irish.

A club match was held June 16 in Streetsville and a Booster Show is planned in conjunction with the *Oakville and District K.C.* in September.

The executive have under consideration plans for additions to the club's annual awards to cover Field wins. Details of such awards will be forthcoming shortly. It is felt this is now necessary due to the increased interest being shown in Field work in its breed.

MINIATURE SCHNAUZER CLUB OF CANADA

Show Secretary, *Mrs. Gottschalk*, reports a very satisfactory Specialty Show held March 23 in conjunction with the Sportsmen's Show. An entry of 23 Miniature Schnauzers were judged by *Anton B. Korbel*. A championship parade of nine was headed by a 13 year old female, Sandman's Kandy, followed by her 12 year old son, Ch. Boxerley's Sonanaire and her 11 year old daughter, Ch. Boxerley Sugar's Skamper.

Spring meeting was held April 16 at the Carlton Club, Toronto. Plans for future meetings look very promising. Members who were absent missed a very pleasant evening. Plans for revamping the point system show very practical study by its organizer, *Mrs. Claire Raber*. This has entailed many hours of study and she is to be commended for the specific detail presented. Results for 1962 will soon be forthcoming.

THE NEWFOUNDLAND CLUB OF AMERICA

The club held its annual Specialty Show on May 5 at Trenton, N.J. where Newfoundlands from Canada and the United States competed for BB under Judge *Mrs. Francis V. Crane*. BB was won by Can. Am. Ch. Captain Morgan's Prince, owned by *Mr. and Mrs. F. Kearsey* of Baltimore, Ont. This was the second time "Cappy" has won this event and he also won the Ontario Specialty at the Sportsmen's Show. *Mr. and Mrs. Drury* of Dryad Kennels took BOS with Dryad's Mistletoe, as well as taking RW in both females and males. The winning dog was Harobed Hill Rescue owned by *Robert Gage*. An especially interesting feature of the Show was a display of dog carts, all being pulled by Newfoundlands, put on by *Mr. Hubert Garnsey*. This was a sight worth seeing.

The annual meeting of the club was held May 4 at the home of *Rev. G.*

Boardman, Lawrenceville, N.J. and was well attended. Representatives from Canada were *Mrs. M. Nutbeem*, Harbour Beem Kennels, Nfld., *Mr. and Mrs. F. Kearsey and Susan*, and *Mr. and Mrs. D. G. Suckling* of Scarborough. Our American neighbours were very gracious hosts and those of us from Canada would like to express our appreciation for their efforts in helping to improve the breed which all Canadian members love so well.

THE ST. BERNARD CLUB OF ONTARIO

Officers for the next term are: President, *Mrs. Marge Sorrell;* Vice-President, *Mr. Donald H. Davis;* Secretary, *Dr. B. Sorrell;* Treasurer, *Mr. P. Schirrer.* An executive committee was appointed consisting of *Mr. J. Pemberton, Mr. T. Griffin* and *Mrs. Lois Ward* to assist the executive officers. It was also decided to make Secretary and Treasurer separate offices because of the increased membership.

Plans are being made for a picnic for all members and their dogs. Members will be notified of the exact date and place. The June meeting was the last until the Fall season.

THE SKYWAY OBEDIENCE CLUB

The club has completed plans for its September trial. *Mrs. Isabell Hart* and *Mr. Fred Tremain* will be the judges. Congratulations to *Mrs. Helen Dmytrus'* daughter *Jackie* who was awarded second prize in the Junior Handling class at a recent trial.

The club's training classes will soon be at an end, then the club will relax until September although it will be having its usual get-togethers for a few social events just to keep in touch during the summer months.

quebec

EVELYN McCULLOUGH, 26 Golf Ave., Pointe Claire, Que. Breeder and exhibitor of Standard Smooth and Wire Dachshunds.

MOUNTAIN CITY OBEDIENCE CLUB

The 27th, 28th and 29th Trials, with perfect weather, large rings, and good organization, added up to a smooth-running show. Entries exceeded expectation and the unofficial classes were also represented. The new location at the Holiday Inn, with swimming pool and air-conditioned rooms helped considerably in cooling off jangled nerves and frayed tempers aggravated by the extreme heat. And cocktails and dinner Saturday night, at which the special prizes were presented, revivified all after a long hard day. Three DC&SSA spoons were awarded; the Star Sweepstakes Trophy, open to club members only, was won by *Mr. A. Orme*, and *Janis*, daughter of dependable and efficient

FOR YOUR INFORMATION

After January 1, 1964, all dogs that carry a breed weight or height disqualification will have to be measured if the owner cannot produce a CKC certificate as to the height of the dog. Those breeds so affected will be: Golden Retrievers (males under 22" and over 25", females under 20½" and over 23½"); Brittany Spaniels (under 17½" or over 20½"); Beagles (over 15"); Briard (males under 23" females under 22"); Great Danes (males under 30", females under 28"); Schnauzers (Standard) (males under 18" or over 20", females under 17" or over 19"); Shetland Sheepdogs (under 13" or over 16"); Siberian Husky (males over 60 lbs, females over 50 lbs); Schnauzers (Miniature) (under 12" or over 14"). Papillon (12"); Pekingese (over 14 lbs); Pinscher (Miniature) (under 10" or over 12½"); Toy Manchester (over 12 lbs); French Bulldogs (over 28 lbs); Poodles (Toy) (over 10"); Miniature (10" under or 15"), Standard (under 15").

•

A show-giving club must not advertise or publish the date of any show which it proposes holding until that date has been approved by The Canadian Kennel Club.

•

Ribbons for all unofficial classes, Brace, Team, etc. must be green, and show-giving clubs are held responsible for the providing of the required ribbons for all awards at shows. Failure to do so shall subject all officials of the offending club to disciplinary action by the Board of Directors.

•

If a judge disqualifies a dog at any show he shall make a note in the judge's book giving his reasons for such disqualification. In computing the championship points for the breed, said dog shall be counted as being in the show.

•

A judge shall not judge any dog, owned outright or jointly, by any person for whom he has handled a dog, whether for pay or not, within six months previous to the show at which he is to judge. Where a judge is aware that a violation of this rule is taking place he shall excuse a dog, entered in violation of this rule, from the judging ring, and shall indicate in the judge's book why such action has been taken.

•

A judge shall not judge any dog he has owned, conditioned, handled, sold, held under lease or boarded within six months prior to the date of the show at which he officiated as judge. This rule shall apply regardless of whether the judge benefited in any way from any of the aforementioned activities. It is the joint responsibility of the judge, and of the owner of the dog, to see that this rule is not violated. The judge shall excuse the dog, entered in violation of this rule, from the judging ring and shall indicate in the judge's book why such action has been taken.

•

A dog shall not be handled, regardless of whether there is any remuneration, in the show ring by any person who has judged that dog, or any other dog owned by the same person (or kenneled on that person's premises) within one year preceding the show.

•

Should it come to the attention of the Show Superintendent that the foregoing rule has been infringed, it shall be his duty to immediately take action to correct the situation, by suitably instructing the Exhibitor or Handler, as the case may be. It shall not be necessary that the Show Superintendent receive any form of formal protest before enforcing this rule.

•

A show-giving club must provide scales and measuring standard to comply with CKC regulations.

•

A show-giving club must have available, through their bench show committee, a copy of all the standards of the breeds recognized by The Canadian Kennel Club, and at least one complete copy of The Dog Show Rules of The Canadian Kennel Club.

•

At bench shows, signs must be posted over the breeds indicating the breeds benched in each row of benching. Signs must be posted advising the public not to handle the dogs in any way, and that they do so on their own responsibility if this notice is disregarded.

•

The rule stated in section 7, Chapter 21 "All dogs entered must compete in all classes and groups ....." does not apply to Best Canadian Bred in Group or in Show, as this is considered an extra, not regular class.

MR. AND MRS. W. IONSON
(877-9952) R.R. 3 Georgetown, Ont.

Trial Secretary, *Marg Hamilton*, took home the prize for highest scoring dog handled by a Junior in the 29th Trial.

AROUND THE TRIALS

Gay umbrellas (under which the odd dog sensibly moved during the Long Down), sunburnt noses, bathing suits, and weird and wonderful hats the order of the day — *Margaret and Milo Pearsall* renewing old friendships and regaling one and all with accounts of their judging in Hawaii — *Gerry McNally* helping out by taking over one of the unofficial classes towards the end of the day, after continuous stewarding in the noon-day sun (to mad dogs and Englishmen add obedience enthusiasts!) — an unusually large entry of Schipperkes, and *V. Frances Griggs*, with four of them, in two days acquiring twelve ribbons! — The Parade of 17 OT Champions attracting many spectators and loud applause, especially for some of the old-timers proudly returning to the ring after years of retirement — so unfortunate that the grass rings planned were unavailable but a promise of the cool green sward for next year — and last, but not least, a deep bow to the four judges, remaining calm and collected, if not cool, throughout the two hot and arduous days.

MONTREAL DOG OBEDIENCE TRAINING CLUB INC.

The club wound up a successful year with the annual meeting and dinner at the Montreal Badminton and Squash Club. The following officers were elected for 1963-64: President, *Dr. Laird Wilson;* Vice-President, *Phil Willis;* Secretary, *Hazel Slaughter;* Treasurer, *Peggy Gardner;* Directors, *Abe Tafler, Frank Mingie,* and *Doug Armstrong*. CD medals were awarded to *Joyce Buckle* and *Hazel Slaughter* and a CDX medal to *Jane Stoeckel*. The Junior Racine Trophy was won by *Hazel Slaughter* and her Sheltie, Gypsy, while the Senior Racine and also the President's Trophy went to hard-working and enthusiastic teenager, *Jane Stoeckel* and her Miniature Poodle, Babette.

At the final graduation of the Basic Obedience classes, Judges *Gloria Cappadocia* and *Bill Collard* awarded first place to *Miss Pat Paterson* and her Toy Poodle, Pete, a close second going to *Mario Sinai* and his Miniature Poodle, Susy, while *Mr. Gordon Nickel* and his American Cocker, Honey, walked off with the handling prize.

The MDOTC managed to hold the lead over the MCOC at the final Interclub Competition, to win (at last!) the coveted Millar Trophy, the scores being *MDOTC* 1702½; *MCOC* 1634; and *200 Club* 728.

DOMINION COLLIE AND SHETLAND SHEEPDOG ASSN. (MONTREAL BRANCH)

The club reports that *Vi Dery* has been made an Honorary member in recognition of all her help and cooperation in the past. She has kindly consented to do the translating of the bulletin into French for the benefit of the French-speaking members.

Dr. Reid, one of the out-of-town

members, was the recent recipient of an honorary degree from the University of Manitoba.

Kris Ena's Golden Crest, a Sheltie owned by *Mrs. R. Burgess* of Fonthill, Ont., won three DC&SSA Obedience spoons at her first three trials, and accomplished this before she was ten months old!

SOMETHING TO BRAG ABOUT

Nan Young of Rye, N.Y., a member of the *MDOTC*, proudly reports her Miniature Poodle, Amedee, now has his Canadian, American and Bermuda UD's, probably the first dog on the continent to hold all degrees in three countries.

Misty Morn, a Cairn owned, trained and handled by *Marg Hamilton*, continues to add to her long list of wins in trophies and prizes from the *Associated Terrier Clubs* (USA) and the *Cairn Terrier Club of America*, having the highest UD score (198) and also was highest scorer in Open B with 197½.

It's another Group win for *Bill Taylor* and *Nigel Aubrey Jones*, this time with their Peke St. Aubrey Eloise of Elsdon, at Willimantic, Conn.

Bob Grant, the obedience enthusiast of Glanrobin Kennels, has just received his B.Sc. in Agriculture, and been awarded the Cyanamid Co. of Can. Scholarship to boot. Congratulations!

If *Valerie Reid* does as well at the Old English Sheepdog Specialty in Connecticut as she did here recently there *will* be something to brag about next month.

POT-POURRI

In a report on the Field Trial Council (Pack) meeting at Cornwall in the May column, it was stated "there is no doubt the Council has access — with the regrettable exception of the Maritimes — to the feelings of a broad portion of the Beagle pack trial world". A letter received from *Coady MacDonald*, Secretary of the Bluenose Hare Club, Sydney, N.S., points out that although their club was not able to send a representative, a brief was forwarded and read at the meeting by Mrs. Thomas Joel. Thank you for clarifying this point, *Mr. MacDonald*.

Rumour has it that orders have gone off to England for four Bearded Collie pups. They may not all come at one time, but are eagerly awaited by quite a few interested parties.

Off to spend a month in Europe, *Mac Stephens* (Shelties) hopes to take in the Windsor Show before hopping the plane for home.

Gerhard Kotiza (German Shepherds) recently put on a demonstration of guard dog training and attack at the request of the Dorval Police Dept. It is to be hoped that these dogs will be used only for the work for which they are trained and not end up as family pets with owners unable to cope with and control them, thus creating a difficult and possibly dangerous situation.

Each month brings reports of the deaths of old and well-loved dogs who have offered so much during their brief

Oldtimers Get Together

On May 26 I had the privilege of judging a most unique event worked out by Mrs. Grace Probert, to celebrate her faithful Tarzan's Tenth Birthday. It could best be described as a Veteran Obedience Trial, and how willingly all the Oldtimers worked!

Mrs. Marg Davies' grand old Gypsy CDX, totally blind now, performed with the loving trust that has been developed through a lifetime of devotion. Jess Cornish's Dasso UDT and Burga CDX bounced into the ring with Dasso running off with the Highest Score of the Day, 198. Marjorie Parkinson's seemingly ageless Charm UDT bounced in too, but bounced down on the Long Sit. The Star of the Show though, (and I'll bet Grace has been sneaking out training for months,) was the Big Man, himself – O.T. Ch. Tarzan, UDT. His work was very willing and accurate. Still a Champion at ten!

This was surely the Farewell Ring Performance for many of these ever faithful companions. If indeed it was, the curtain fell to a warm round of applause.

—Richard Reid

Fourth Newf Gains Obedience Title

The Newfoundland Breeders of Ontario congratulate Mr. Dennis Moon, of Paris, Ont. on obtaining the CD title for his Newfoundland Hiawick Heath Princess. We believe this is the fourth Newfoundland to obtain the title in Canada, and to be the first Canadian owned and Canadian bred. Princesss, through her Landseer sire, is closely related to Mrs. Gibson's Landseer Newfoundland, Seaward's Frosty Spray, CDX. Frosty, the first Newfoundland with an obedience title in Canada, was American-bred, as was Mr. Garnsey's Little Bear Seldom-Come By. Major Clark's Carbonear Newf was Canadian-bred but owned in the States. We sincerely hope that Mr. Moon will continue training Princess, and that other owners will be encouraged to follow his example and give their Newfoundlands the training that is so very valuable in giant breeds.

Those 'doggy folk' who live in or around the New York area are fortunate in being able to attend the talks given each week at the Dog Fanciers Luncheon. Two recent topics were of particular interest to breeders and exhibitors. Mr. John Prentiss, Carmel, N.Y. spoke on 'a plea for better judges, or at least better judging by judges'. Speaking on behalf of the judges was Mrs. Paul M. Silvernail. Mr. Prentiss is living proof that professional handlers do not dominate the sport of dogs. Mrs. Silvernail, on the other hand, said that judges, and the AKC, would like to see more amateur handlers. The other talk was given by Dr. Leon F. Whitney who spoke on the mysteries of shyness in dogs.

A CLEAN SWEEP FOR POODHALL IN 1962

The Poodle Advancement Association has announced their annual awards as follows:

TOP WINNING POODLE FOR 1962
Am. & Can. Ch. Poodhall Gus

(ever since its inception 3 years ago Gus has won this bowl and has been, in fact, top winning Poodle (all sizes) in Canada for the past 6 years in spite of the fact that in 1962 he was retired in midseason with 26 BIS and 100 Group Firsts).

TOP PRODUCING MIN. POODLE SIRE FOR 1962
Am. & Can. Ch. Poodhall Gus

(with his 12 Champion children Gus has likewise retained this award since its inception).

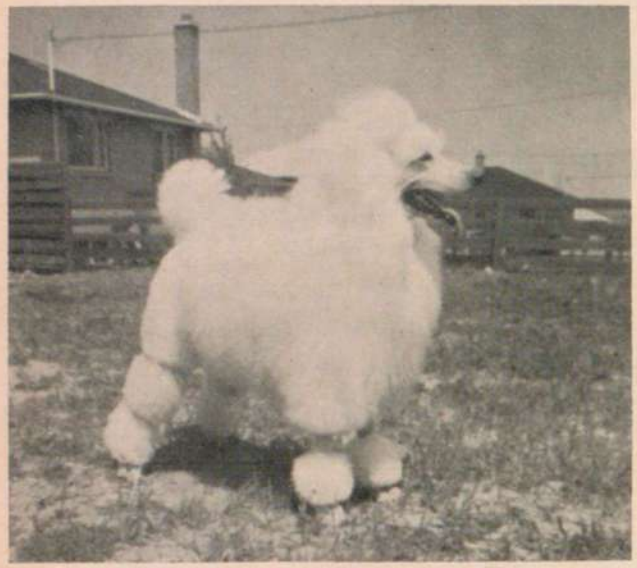

TOP PRODUCING MIN. POODLE BITCH FOR 1962
Ch. Poodhall Jezabel

(dam of our latest star, **AM. & CAN. CH. PODHALL BARBARA,** who now has 1 BIS, 2 BCBS, and 8 Group firsts to her credit. Her last Group win, under Louis Murr, over stiff American competition at Detroit, May 19, 1963 will be pictured in the Recent Winners Section).

Club Roundup

from page 37

stay here. *Kay Harrison* is finding it very lonely now without her American Cocker, Susie, who has been her constant companion for 15 years and who was so outstanding in the obedience field. *Fred and Jo Grant*, too, have had to say farewell to Merry Chase King, a Beagle they took for purely sentimental reasons when it became necessary to find a home for him, and who more than repayed them by siring their first homebred Champion. It is believed he was the first of his breed to get a BIS which he won many years ago in Quebec City.

Brightening up the T.V. screen recently were *Bill Taylor* and *Gerda Schmidt*, the former appearing on "To Tell The Truth" and the latter puzzling the panelists on "What's My Line".

Nice to see *Wally Owen* around these parts again. Now living in Scarsdale, N.Y., he is still active in obedience, being Vice-President of the Port Chester Club and will be handling the job of Obedience Chairman at the forthcoming Westchester Trials.

Guest speaker at a recent MCOC meeting, *Nigel Aubrey-Jones* in a witty and informative talk described the close connections between Breed and Obedience and laid particular stress on the fact that in either ring one's dog should be groomed to perfection and presented at his best, a point often deemed unimportant by many exhibitors to the detriment of all obedience dogs.

Suggested sign for a kennel advertising puppies — "Love for Sale" — The response should be sexational! ●

No matter how
I balk and talk
The dog has to
Be taken for a walk —
Because he has to.

Memo from the Editor

from page 2

all times preserve their objectivity in and out of the show ring. A good judge will keep informed of changes in breed Standards and Dog Show Rules; his decisions will not be clouded by either his own failure or success as a breeder.

Perfection in judging is like the perfect dog, much to be desired but unlikely to be achieved. This fascinating sport of dogs would be greatly enhanced if the hypercritics and malcontents would realize what they are doing to the dog game when they vociferously criticize the judging and their competition. Obviously they have no conception of the infection they spread when they announce to all and sundry what a rotten policial sham the dog shows have gotten to be and malign without right or reason the dog who wins. ●

The Old Timer

from page 6

"Second, I'd say use simple English and avoid technical terms insofar as they could be avoided. Complete elimination of course is impossible.

"Third, a carefully compiled glossary of technical terms would be desirable, and finally I'd say avoid generalities like the plague. Make every phrase, every adjective have a meaning. Let it help to form a picture, not just of any dog, but of the dog it sought to describe."

"You think that would do it?" I asked.

"The Old Timer laughed.

"It might help," he said. "It would not cure. But it least it might be a start in the right direction. Beyond that I'm not prepared to go." ●

Humanely Speaking

from page 9

permits these conditions to exist. One can only conclude that they are indifferent.

And just in case anyone may think that the "dealer" can't afford anything better for his charges or that a shortage of funds is part of the problem, let me

tell you that in a recent court case in which a "dealer" in Ontario was found guilty of cruelty to animals as a result of a criminal charge brought against him by the Ontario Humane, the accused admitted under oath that he received an average of $35,000. to $40,000. a year from the laboratories and hospitals. Not bad money for a Prime Minister, or a leading surgeon, or a top-flight business executive; pretty fantastic for a dealer in dogs.

A handsome reward for causing death and misery to countless thousands of innocent, defenceless animals. ●

What is a Breed Standard

from page 16

of which all standards would be expected to conform to an arrangement authorized by the Board.

In conclusion, it is seen that advantageous changes can be made in standards within our present state of knowledge, these having to do with standardization of terminology and format and with clarity and accuracy of writing. It is equally obvious that standards must be placed on a firmer footing by a scientific approach to the appraisal of canine characteristics. Our CKC Board can give leadership in the first of these endeavours but only the individual breeder and fancier, by personal study and by support of organized research, can contribute materially to the long term improvement in the standards of breeds. ●

Dog Show Rules

from page 17

appears in the Group. Canada carries it just a little further – the four Best of Varieties meet for Best of Breed and only the one is in the Group.

Where Canada has fewer dogs in the Group for the above two breeds, quite the opposite is the case with Dachshunds. Six Dachshunds could appear in the Hound Group in Canada. Both Miniature and Standard are eligible in all three coats. In the USA the Miniatures are judged along with the Standards and only three, therefore, are ever in the group.

There are very few breeds recognized in the United States that are not recognized in Canada. Some are listed in Canada and not by the AKC. One difference applies as well, in the breeds appearing in the Group. In Canada, the Lhasa Apsos is classed as a Terrier and in the United States they are shown as a Non-Sporting dog. The AKC allows a miscellaneous class for breeds not yet recognized, but are, nevertheless pure-bred. Canada has not, as yet, admitted such a classification.

American judges are more closely governed on the time they take to pass on the dogs. The basis is a minimum of 20 dogs an hour and the time they commenced and finished each breed must be recorded on the sheet for that breed in the Judge's book. Clubs are expected to provide a judge for every 100 dogs expected.

In Canada, we prohibit a judge from opening the dog's mouth. Instead the judge requests the handler to do so. This rule does not apply in the United States.

Dogs may be shown as "Listed" in Canada as often as the exhibitor wishes. But the dog must be registered before being listed and acclaimed as a Champion. The charge for this is $1.00 for each show. The American listing fee is only 25c but a dog may only be listed for three shows before being registered.

It is gratifying that exhibitors may travel back and forth across the border with such little difficulty. Border restrictions are simple and with such small differences in the rules and procedures, residents of both countries enjoy the privilege of acquiring Canadian and American Championships. ●

AURORA AND DISTRICT KENNEL CLUB
branched out this year to two one-day shows, Saturday and Sunday. The show was again held in the Bradford Arena which is a bright, clean, airy building excellent for a show of this type. The double entry of many dogs should help to compensate for the lack of spectator interest. Mrs. Anne Clarke served as Show Secretary for her second year.

THE PROGRESSIVE KENNEL CLUB
held an unbenched show for the second consecutive year and again used the excellent facilities of the Don Mills Arena. One need not worry about week end shopping while attending this show, for it is in the very center of a large shopping plaza with every type of store one could wish for right at the door. One of the oldest members of the club, Mrs. Martha Stevens, who acted as Show Secretary for many, many years, was able to attend to make a presentation of trophies. Martha was welcomed by everyone on her first time out after a long seige of illness.

THE ONTARIO COUNTY KENNEL CLUB
held its show a week earlier than last year and as usual it was a clean, well conducted show. Mrs. Porter, though very seldom seen at other shows, seems to have the ability to make everyone feel at home and comfortable. A panel of all-Canadian judges, along with good stewards, kept the rings going and all judging was completed in good time.

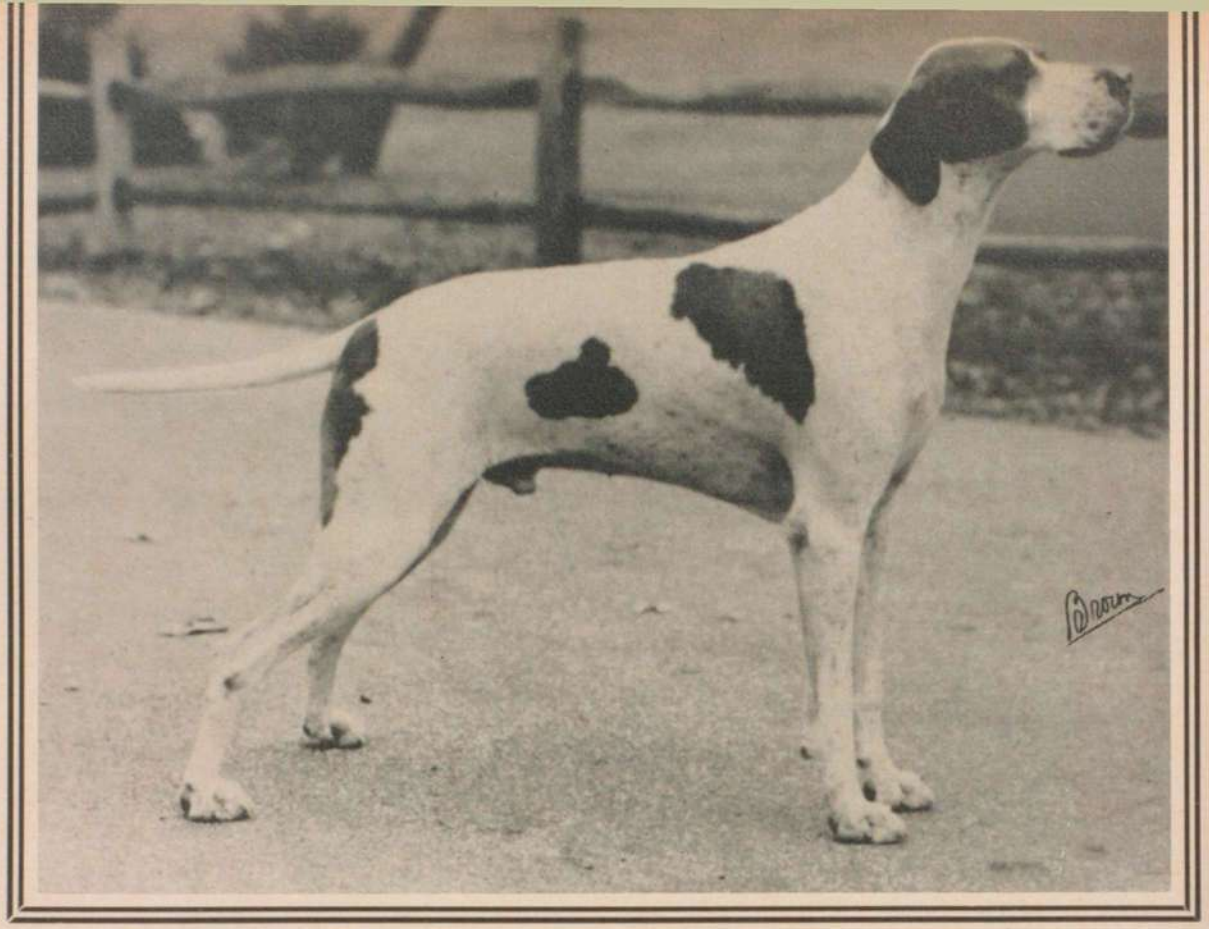

THE BERMUDA KENNEL CLUB
held its Spring shows on three days of beautiful weather except for a slight rainfall one day which forced Judge Wilfrid Shute indoors for a portion of his judging. Three entries from Canada and three from the USA brought the total entry up to 82 dogs with 17 entries for the Obedience Trial. All three breed judges were from Canada. As well as Dr. Shute, John Lundberg and Mrs. P. A. Margeson, N.S. filled the judge's panel together with George Taylor, Cooksville, and Mrs. Arnold Redman, Bermuda judging the obedience. Even the dogs enjoyed the relaxed atmosphere. So much so that the Irish Setter, a local dog who took BIS the first day, took a notion to go for a stroll just prior to the show. He was sent to the show, when found, by taxi, full of burrs. Promptly de-burred, he was shown and proceeded to win the highest honor. The well known American Obedience judge, Nan Young, N.Y., finished her U.D. degree with Ch. Pine Islands Amedee, U.D. (Am. Can. Bda.) for the first Bermuda UD degree. The certificates given for each BB, Group win, BIS and high Score in class are something that all exhibitors enjoy receiving. ●

The breeder called on a friend whose wife had just presented him with triplets. Proudly the parents wheeled in the tiny trio for his inspection. The breeder looked them over with interest.
"I'd keep that one," he said, pointing to the mite in the middle.

BREED STANDARDS

The Canadian Kennel Club recognizes 123 breeds of dogs. Dogs in Canada takes pleasure in presenting, for the first time, the Standards for these breeds in condensed form. While space did not permit reprinting each Standard in its entirety, all salient points are covered. Sixty-two breeds are illustrated by dogs who distinguished themselves in the show ring in 1962. Standards for those breeds not illustrated appear at the end of the pictorial section in their respective Group. It is to be hoped that the next Standards Issue Dogs in Canada presents will contain illustrations of all the breeds which can be possible if the owner of one of the top-winning dogs in each breed accepts our invitation to participate. Breed Standards provide a word picture of the perfect dog. Without these Standards no controlled form of judging would exist nor would the breeder have a yardstick to use in assessing the success or failure of his breeding program. The complete, official book of Standards, recently published by The Canadian Kennel Club, may be purchased by writing direct to them.

CH. (CAN. AM.) BRYANT'S BUCKEYE CHIEN D'OR (whelped March 25/59), by Bryant's Buckeye Top Brass ex Bryant's Buckeye Queenie. American show record—67 BB, 10 1st in Group, 2 BIS, BB American Pointer Club Specialty 1961. Breeder, Mark M. Bryant. Handler, Jane F. Kamp. Owned by Mrs. Cheever Porter, 135 East 74th St., New York 21, N.Y.

SPORTING POINTER

General Appearance—The Pointer is bred primarily for sport afield; he should unmistakably look and act the part. The ideal specimen gives the immediate impression of compact power and agile grace; the head noble, proudly carried; the expression intelligent and alert; the muscular body bespeaking both staying power and dash. Here is an animal whose every movement shows him to be a wide-awake, hard driving hunting dog possessing stamina, courage, and the desire to go. And in his expression are the loyalty and devotion of a true friend of man.

Temperament—The Pointer's even temperament and alert good sense make him a congenial companion both in the field and in the home. He should be dignified, yet showing at all times a responsive attitude.

Head—Skull long, proportionately wide, indicating length rather than width. Slight furrow between eyes, cheeks cleanly chiseled. Pronounced stop midway between nostrils and occiput. Muzzle long, same plane as skull. Jaws ending level and square, with scissors or even bite. Flews clean. Nostrils large, spongy, widely open.

Ears—Set eye level. When hanging naturally, should reach below lower jaw, close to head, little or no folding. Should be somewhat pointed at tip—never round—soft and thin in leather.

Eyes—Medium size, rounded, pleasant expression, darker the better.

Neck—Long, dry, muscular, slightly arched, springing cleanly from shoulders.

Shoulders—Long, thin, sloping. Top of blades close together.

Front—Elbows well down, directly under withers and truly parallel, to work just clear of body. Forelegs straight with oval bone. Knee-joint never to knuckle over. Pasterns moderate length, finer in bone than the leg, slightly slanting. Chest, deep rather than wide, must not hinder free action of the forelegs. Breastbone bold, without being unduly prominent. Ribs well sprung, descending as low as elbow-point.

Back—Strong, solid, only slight rise from croup to top of shoulders. Loin moderate length, powerful and slightly arched. Croup falling only slightly to base of tail. Tuck-up apparent, but not exaggerated.

Tail—Heavier at root, gradually tapering to fine point. Length no greater than to reach to hock-joint. Carried straight, ideally level with the back.

Hindquarters—Muscular, powerful, with great propelling leverage. Thighs long, well-developed. Stifles wide, well bent. Hocks clean and parallel. Decided angulation is the mark of power and endurance.

Feet—Oval, with long, closely-set, arched toes, well padded, and deep.

Coat—Short, dense, smooth with sheen.

Color—Liver, lemon, black, orange; either in combination with white or solid-colored. A good Pointer cannot be a bad color. In darker colors, nose black or brown; in the lighter shades lighter or flesh-colored.

Gait—Smooth, frictionless, with powerful hindquarters drive. Head carried high, nostrils wide, tail moving from side to side rhythmically with the pace, giving the impression of a well-balanced, strongly-built hunting dog capable of top speed combined with great stamina.

Balance and Size—Balance—overall symmetry — is much more important in the Pointer than size. Provided there is balance, considerable variation in size and weight is permissible.

CH. THE BRAT OF SHADYWELL (whelped May 10/60), by Ch. Golden Knoll's Gold Nugget ex Shadywell Sugartime. 28 BB, 11 BOS, Group wins include 2 1sts, 1 2nd, 11 3rds, 4 4ths, 4 BCB and 3 BCBP. BB Golden Retriever Club of Canada Specialty 1962. Breeder, Mr. N. C. Macdonald, Schomberg, Ont. Enquiries invited for "Brat's" puppies, expected shortly. Owned by Olive and Jim Taylor, Glenmorag Kennels, 501 Enfield Rd., Burlington, Ont.

Size—Males 23-24" in height at withers, females 21½ - 22½. Length from breastbone to buttocks slightly greater than height at withers in ratio of 12-11. Weight for dogs 65-75 pounds; bitches 60-70 pounds.

Head—Broad in skull, slightly arched laterally and longitudinally without prominence of frontal or occipital bones. Good stop. Foreface deep and wide, nearly as long as skull. Muzzle, when viewed in profile, slightly deeper at stop than at tip; when viewed from above, slightly wider at stop than at tip. No heaviness in flews. Removal of whiskers for show purposes optional.

Eyes—Friendly and intelligent, medium large with dark rims, set well apart and reasonably deep in sockets. Color preferably dark brown, never lighter than color of coat. No white or haw visible when looking straight ahead.

Teeth—Scissors bite with lower incisors touching inside of upper incisors.

Nose—Black or dark brown, though lighter shade in cold weather not serious. Dudley nose (pink without pigmentation) to be faulted.

Ears—Rather short, hanging flat against head with rounded tips slightly below jaw. Forward edge attached well behind and just above eye with rear edge slightly below eye. Low, houndlike ear-set to be faulted.

Neck—Medium long, sloping well back into shoulders, giving sturdy muscular appearance with untrimmed natural ruff. No throatiness.

Body—Well balanced, short-coupled, deep through the heart. Chest at least as wide as a man's hand, including thumb. Brisket extends to elbows. Ribs long and well sprung but not barrel shaped, extending well to rear of body. Loin short, muscular, wide and deep, with very little tuck-up. Top line level from withers to croup, whether standing or moving. Croup slopes gently. Slabsidedness, narrow chest, lack of depth in brisket, excessive tuck-up, roach or sway back to be faulted.

Forequarters—Forequarters well coordinated with hindquarters and capable of free movement. Shoulder blades wide, long and muscular showing angulation with upper arm of approximately 90 degrees. Legs straight with good bone. Pastern short and strong, sloping slightly forward with no suggestion of weakness.

Hindquarters—Well - bent stifles (angulation between femur and pelvis approximately 90 degrees) with hocks well let down. Legs straight when viewed from rear. Cow hocks and sickle hocks to be faulted.

Feet—Medium size, round and compact with thick pads. Excess hair may be trimmed to show natural size and contour. Open or splayed feet to be faulted.

Tail—Well set on, neither too high nor too low, following natural line of croup. Length extends to hock. Carried with merry action with some upward curve but never curled over back nor between legs.

Coat and Color—Dense and water repellent with good undercoat. Texture not as hard as that of a short-haired dog nor silky as that of a setter. Lies flat against body and may be straight or wavy. Moderate feathering on back of forelegs and heavier feathering on front of neck, back of thighs and underside of tail. Feathering may be lighter than rest of coat. Color lustrous golden of various shades.

Disqualifications — Deviation in height of more than 1" from standard; Undershot or overshot jaws; Trichiasis.

CH. KNOLL TOP LEIF (whelped May 7/61), by Ch. Lisnamallard Limelight ex Knoll Top Bella of Bonython. 12 BB, 11 Group placings, 1 BCB in Show. WD at Westminster, 1963. Breeder, J. and C. Rowan. Handler, Lorna Jackson. Stud service to approved females. Owned by Stuart C. Lauchlan, 1954 Henderson Highway, North Kildonan, Winnipeg 16, Man.

RETRIEVER (LABRADOR)

General Appearance—A strongly built, short-coupled, very active dog. Fairly wide over loins, strong and muscular in hindquarters. Coat close, short, dense, free from feather.

Head—Skull wide, giving brain room; slight stop, **i.e.** brow slightly pronounced, so that skull is not absolutely in straight line with nose. Head clean-cut and free from fleshy cheeks. Jaws long and powerful and free from snipiness; nose wide and nostrils well developed. Teeth strong and regular, with level mouth. Ears hang moderately close to head, rather far back, set somewhat low and not large and heavy. Eyes of medium size, expressing great intelligence and good temper, can be brown, yellow or black, but brown or black preferred.

Neck and Chest—Neck medium length, powerful and not throaty. Shoulders long and sloping.

Chest must be of good width and depth, ribs well sprung and loin wide and strong, stifles well turned, and hindquarters well developed of great power.

Legs and Feet—Legs must be straight from shoulder to ground, and feet compact with toes well arched, pads well developed; hocks well bent, must neither be cow-hocked nor too wide behind; must stand and move true all round on legs and feet. Legs medium length, showing good bone and muscle, but not so short as to be out of balance with rest of body. In fact, a dog well balanced in all points is preferable to one with outstanding good qualities and defects.

Tail—Tail is distinctive feature of breed; very thick towards base, gradually tapering towards tip, medium length, free from any feathering, clothed thickly all round with Labrador's short, thick, dense coat, giving that peculiar "rounded" appearance which has been described as the "otter" tail. Tail may be carried gaily, but not curl over back.

Coat—Coat is another very distinctive feature; short, very dense, without wave, and give a fairly hard feeling to hand.

Color—Black, yellow, or chocolate and are evaluated as follows:

(a) Blacks: All black, with a small white spot on chest permissible. Eyes medium size, expressing intelligence and good temper, preferably brown or hazel, although black or yellow is permissible.

(b) Yellows: Yellows may vary in color from fox-red to light cream with variations in shading of coat on ears, under-parts of dog, or beneath tail. A small white spot on chest is permissible. Eye coloring and expression the same as that of the blacks, with black or dark brown eye rims. Nose also black or dark brown, although "fading" to pink in winter weather is not serious. A "Dudley" nose, (pink without pigmentation) should be penalized.

(c) Chocolates: Shades ranging from light sedge to chocolate. A small white spot on chest is permissible. Eyes light brown to clear yellow. Nose and eye rim pigmentation dark brown or liver colored. "Fading" to pink in winter weather not serious. "Dudley" nose should be penalized.

Movement—Movement free and effortless. Forelegs strong, straight, true, correctly placed. Watching a dog move towards one, there should be no signs of elbows being out in front, but neatly held to body with legs not too close together, but moving straight forward without pacing or weaving. Upon viewing dog from the rear, one should get impression that hind legs, which should be well muscled and not cow-hocked, move as nearly parallel as possible, with hocks doing their full share of work and flexing well, giving appearance of power and strength.

Approximate weights of dogs and females in working condition—Dogs—60 to 75 pounds, females—55 to 70 pounds.

Height at Shoulders—Dogs—22½" to 24½"; females—21½" to 23½".

CHIN-PEEK PROM GAL (whelped March 5/60),
by Bidewell's Flip ex Chin-Peek Trixie Girl. Puppies for sale occasionally. Bred and owned by Mrs. Hettie Bidewell,
Chin-Peek Kennels Reg., Box 245,
Moose Jaw, Sask.

General Appearance—Very muscular and heavy in bone, head and neck carried slightly above a straight line with back. When dog is in action, tail should be carried curled high up over hindquarters. Size absolutely necessary. There is a half had expression, until dog is put to work, when that sad expression springs to inquisitiveness and dog trembles with excitement, alertness and determination.

Height—Minimum height of adult dog over 18 months must be 20½"—that of a female 18½".

Weight—Minimum weight of adult dog over 18 months 50 pounds, female 35 pounds.

Head—Resembles that of the Golden Retriever. Muzzle or foreface broad. Skull flat, about 5" wide across base. Size of head varies but not necessarily depending upon size of dog. Entire length from tip of nose to back of occiput, 9" is good measurement. Length from end of nose to point between eyes about equal or preferably of greater length than from this point to back of occiput. Occiput peak not prominent. Stop concave and gradual.

(a) Lips. Hang rather curved in front. Flesh color preferable.

(b) Underline. Of the head, i.e. profile, run almost in straight line from corner of lip to corner of jawbone. Of muzzle, from tip of nose to back end of lip is a clean convex curve.

(c) Jaw. Lower jaw thin. Lower side teeth fit inside upper side teeth. Soft in mouth.

(d) Nose and nostrils. Bridge of nose fairly wide about 1 to 1½", and taper somewhat at tip. Nostrils well open. Flesh color preferred, no objection to black.

(e) Ears. Medium size set high, well back on skull, carried very slightly erect with tips falling forward. Well feathered at back of fold. Tips nicely rounded to conform to round muzzle, hair at ear tips short.

(f) Eyes. Golden brown to match coat. Flesh around eye flesh color. Eyes set well apart.

Neck—Medium length, junction between head and neck is not well defined, owing to long hair on neck and at throat.

Shoulders—Muscular, well sloped back, elbows well under body.

Forelegs and Feet—Forelegs perfectly straight, big in bone. Feet well hardened for rough work, toes well arched, strong curved nails, and most important, feet to have strong web. Deep chest, belly fairly well drawn up.

Back and Loins—Strong.

Tail—About 12½ to 13" long, well feathered. Normally carried below level of back until dog goes into action, when it should be arched up above line of back.

Hindquarters—Muscular, good in appearance, square across top. Hock not set too low turning neither out nor in.

Coat—Hair long, sleek and soft or silky, with a softer undercoat. Coat at throat and ears extremely soft. These dogs retrieve from fresh and salt water during coldest season, and require undercoat. Hair on face, legs, and tips of ears short. Coat straight except down centre of back, where it is wavy. Does not curl. There is a tendency sometimes in winter coats for hair at throat to have a long loose curl.

Movement—Quick, speedy action—a headlong rush, regardless of obstacles. Dog is docile, very playful. In action, head is carried almost straight out on a level with back, and tail is always in motion.

Color—Red or fawn slightly lighter than that of Irish Setter. Belly and underside of tail slightly lighter. No objection white blaze on forehead, chest, toes and tip of tail. Most tollers show white patch on chest and belly; while this is not entirely objected to, it is more desirable to eliminate all white. White on shoulders and around ears or across back or flanks not permitted. Color throughout that of red fox.

Characteristics—Docile, non-roamer, exceptionally easy to train, born retriever on land or from water, cleanliness, timid, good guard dog, will fight as last resort, great swimmer, endurance, playful. The moment the slightest indication is given that retrieving is required, he sets himself for springy action.

SETTER (IRISH)

CH. (CAN. AM.) MICHAEL BRYAN DUKE OF SUSSEX
(whelped Nov. 8/55), by Ch. Thendrin Brian Tristan ex. Ch. Merrilynn
of Glenfield. Breeder, Mr. George S. Gallus.
Owned by Dr. William J. Fritz, 1848
Monroe, Carleton, Mich.

General Appearance—Active, aristocratic birddog, rich red color, substantial yet elegant build. Afield is swift-moving hunter; at home, sweet-natured, trainable companion.

Head—Long, lean, length double width between ears. Brow raised, showing distinct stop midway between tip of nose and well-defined occiput. Skull oval when viewed from above or front; slightly domed when viewed in profile. Muzzle moderately deep, nostrils wide, jaws nearly equal length. Upper lips fairly square, not pendulous, underline of jaws almost parallel with top line of muzzle. Teeth meet in scissors bite or may meet evenly.

Nose—Black or chocolate.

Eyes—Somewhat almond-shaped, medium size, placed rather well apart; neither deep-set nor bulging. Color, dark to medium brown. Expression soft yet alert.

Ears—Set well back, low, not above level of eye. Leather thin, hanging in neat fold close to head, nearly long enough to reach nose.

Neck—Moderately long, strong, not thick, slightly arched; free from throatiness, fitting smoothly into shoulders.

Body—Long to permit straight, free stride. Shoulder blades long, wide, sloping well back, fairly close together at top, joined in front to long upper arms angled to bring elbows slightly rearward along brisket. Chest deep, reaching approximately to elbows; rather narrow in front. Ribs well sprung. Loins moderate length, muscular, slightly arched. Topline slopes slightly downward without sharp drop at croup. Hindquarters wide, powerful, broad, well-developed thighs.

Legs, Feet—Sturdy, plenty of bone, strong, nearly straight pasterns. Feet rather small, firm, toes arched, close. Forelegs straight, sinewy, elbows moving freely. Hind legs long, muscular from hip to hock, short, nearly perpendicular from hock to ground; well angulated at stifle and hock joints.

Tail—Strong at root, tapering to fine point, about long enough to reach hock. Carriage straight or curving slightly upward, nearly level with back.

Coat—Short, fine on head, forelegs, tips of ears; on all other parts moderate length, flat. Feathering long, silky on ears; back of forelegs, thighs long, fine, with fringe of hair on belly and brisket extending onto chest. Well feathered between toes. Fringe on tail moderately long, tapering. All coat and feathering straight and free as possible from curl or wave.

Color—Mahogany or rich chestnut red, no trace of black. Small amount of white on chest or toes or a narrow streak on skull is not penalized.

Size—No disqualification. Overall balance rated more important. Twenty-seven inches at withers, 70 pounds ideal for dog; female 25", 60 pounds. Variance beyond an inch up or down discouraged.

Gait—At trot big, very lively, graceful, efficient. Head high. Hindquarters drive smoothly with great power. Forelegs reach well ahead. Runs straight. Seen from front or rear, forelegs, as well as hindlegs below hock joint, move perpendicularly to ground, with some tendency towards single track as speed increases. Crossing or weaving of legs is objectionable.

Balance—At his best the lines of the Irish Setter so satisfy in overall balance that artists have termed him the most beautiful of all dogs. The correct specimen always exhibits balance whether standing or in motion. Each part of the dog flows and fits smoothly into its neighboring parts without calling attention to itself.

CH. CLARKDALE CAPITAL ITEM (whelped April 7/61), by Ch. (Am.) Har-Dee's Hell Bender II ex Ch. (Am.) Clarkdale Collector's Item. 1 BIS, 15 Group 1sts, 13 other Group placings. Handler, 1962, Walter Martin; 1963, Lorna Jackson. Breeder, Mr. and Mrs. Leslie Clark. Owned by Mr. Henry McNamara, 68 Gilchrist Ave., Ottawa, Ont.

Skull—Well developed, rounded. Forehead smooth, eyebrows and stop clearly defined, median line distinctly marked, gradually disappearing until lost rather more than halfway up to the crown. Bony structure surrounding eye socket well chiseled; sides of muzzle smooth.

Muzzle, Teeth—Distance from tip of nose to stop at a point on a line drawn across top of muzzle between front corners of eyes should approximate one-half distance from stop at this point up over crown to base of skull. Muzzle broad, deep; square, even jaws. Upper lip sufficient depth to cover lower jaw, presenting square appearance. Teeth sound, regular, set at right angles to respective jaws. Scissor bite. Nose sufficient size to balance muzzle and foreface, well-developed nostrils, black in blacks and black and tans; in reds, buffs, livers, parti-colors, and roans may be black or brown, darker coloring preferable.

Eyes—Eyeballs round, full, set in surrounding tissue to look directly forward and give eye slightly almond-shape appearance. Expression intelligent, alert, soft, appealing. Color of iris dark brown to black in blacks, black and tans, buffs and creams, and in darker shades of parti-colors and roans. In reds, dark hazel; in livers, parti-colors, and roans of lighter shades, not lighter than hazel, darker the better.

Ears—Lobular, set on line no higher than lower part of eye, leather fine, extending to nostrils; well clothed with long, silky, straight or wavy hair.

Neck and Shoulders—Neck sufficiently long to allow nose to reach ground easily, muscular. Rises strongly from shoulders, arches slightly as it tapers to join head. Shoulders, deep, clean-cut, sloping.

Body—Height at withers should approximate length from withers to set-on of tail. Chest deep, lowest point no higher than elbows. Ribs deep, well sprung. Body short in couplings and flank, depth at flank somewhat less than at last rib. Back strong, sloping evenly and slightly downward from withers to set-on of tail. Hips wide with quarters well rounded, muscular. Body short, compact, firmly knit together.

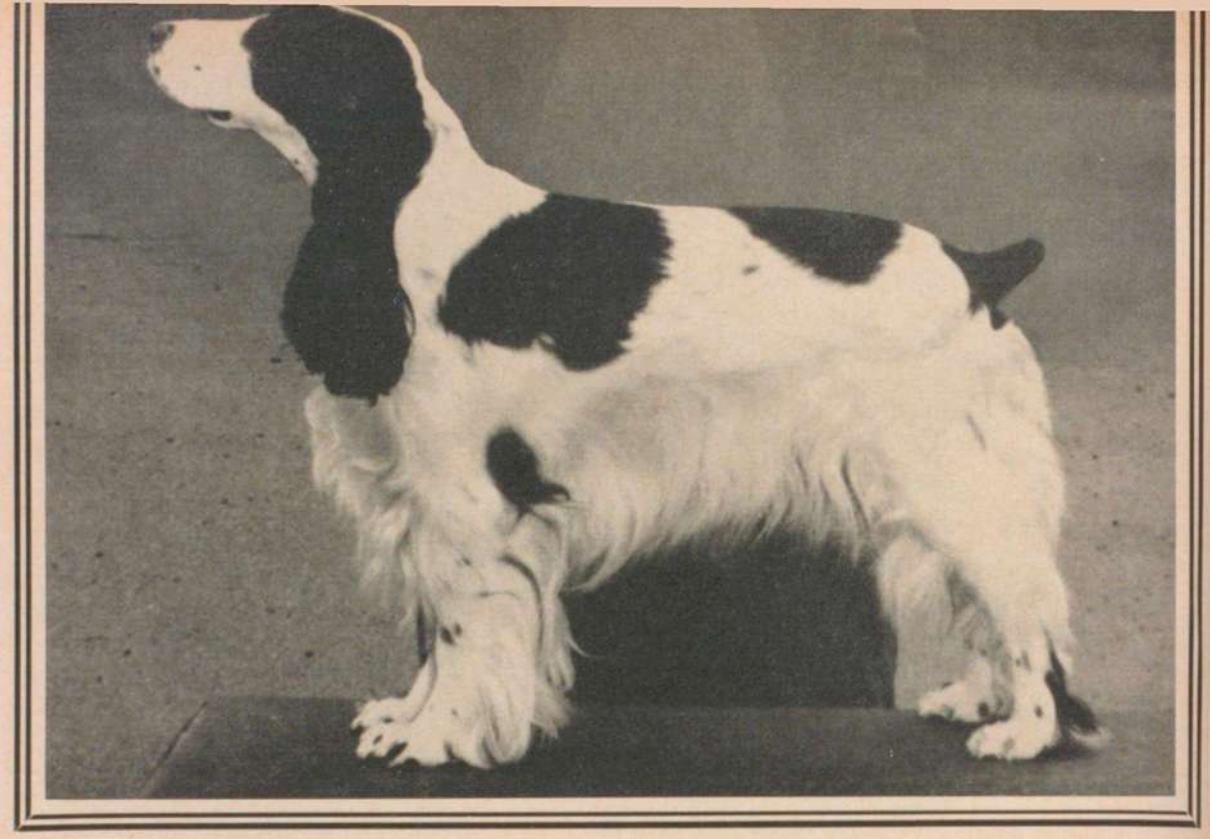

Legs, Feet—Forelegs straight, strongly boned, muscular, set close to body well under scapulae. Elbows well let down. Pasterns short, strong. Hind legs strongly-boned, muscled, well-turned stifles and powerful, clearly defined thighs. Hocks strong, well let down, parallel. Feet compact, not spreading, round, firm, deep, strong horny pads, hair between toes; turn neither in nor out.

Tail—Set on, and carried on line with topline of back; when dog at work its action incessant.

Coat—Flat or slightly waved, soft, dense; ears, chest, abdomen, legs well feathered.

Color, Markings—Blacks jet black; solid colors other than black of sound shade; parti-colors, at least two definite colors appearing in clearly defined markings distinctly distributed over body; roans may follow any typical roaning shade or pattern, and are classed as parti-colors; black and tans have definite tan markings on jet black body with clearly defined lines between the two colors. Markings distinct, plainly visible. More vivid the coloring the better. Quantity and location of tan markings are the essence of this description. Amount of tan restricted to 10% or less, of color of specimen, markings shall be located as follows: **(a)** a clear spot over each eye; **(b)** on sides of muzzle, must not extend up and over and join; on cheeks and on underside of

CH. LOCHRANZA RING DOVE, CD (CAN. AM.), by Lochranza Harvest-Time ex Hightrees Magpie. In 1962, 6 BB, 2 BOS, Group wins: 1 1st, 2 2nd; BB, B.C. Cocker Club Specialty; Obedience, 3 Highest Scoring Dog in Novice B, 2 Highest Scoring Dog in Trial. Breeder, Miss Joan MacMillan, England. Stud service, puppies. Owned by Miss Virginia L. Lyne, Ranzfel Kennels Reg., 3901 Cadboro View Rd., Victoria, B.C.

SPANIEL (ENGLISH COCKER)

General Appearance—An attractive, active, merry sporting dog; with short body, strong limbs, standing well up at withers. Movements are alive with energy; gait powerful and frictionless. Alert at all times.

Head—Skull and forehead well developed with no suggestion of coarseness, arched and slightly flattened on top. Cleanly chiseled under eyes. Proportion of head desirable is approximately one-half for muzzle and one-half for skull. Muzzle square with a definite stop where it blends into skull and in proportion with width of skull. Muzzle and jaws of sufficient strength and size to carry game; length of muzzle should provide room for development of olfactory nerve. Nostrils black except in reds, livers, parti-colors and roans of lighter shades, where brown is permissible, black preferred. Lips square, full, free from flews. Teeth even, set squarely.

Eyes—Medium size, full, slightly oval shaped; set squarely in skull, wide apart. Dark brown except in livers and light parti-colors where hazel is permissible, darker the better.

Ears—Lobular; set low, close to head; leather fine, extending at least to nose, well covered with long, silky, straight or slightly wavy hair.

Neck—Long, clean, muscular; arched towards head; set cleanly into sloping shoulders.

Body—Close coupled, compact, firmly knit. Brisket should reach to elbow, sloping gradually upward to loin. Ribs spring gradually to middle of body, tapering to back ribs.

Shoulders, Chest—Shoulders sloping, fine; chest deep; well developed.

Back, Loin—Back short, strong. Length of back from withers to tail-set should approximate height from ground to withers. Height at withers greater than height at hip joint, providing a gradual slope between these points. Loin short, powerful, slightly arched.

Forelegs—Straight, strong with bone nearly equal in size from elbow to heel; elbows set close to body with free action from shoulders; pasterns short, straight, strong.

Feet—In proportion to legs; firm, round, catlike, thick pads, strong toes.

Hindquarters — Hips rounded; thighs broad; well developed, muscular. Stifles strong, well bent. Hock to pad moderately short, strong, well let down.

Tail—Set on to conform with topline of back. Merry in action.

Color—Various. In self colors white shirt frill is undesirable. In parti-colors, coloring must be broken on body, evenly distributed. No large portion of any one color should exist. White shown on saddle. Any solid color with white feet and chest is not a parti-color. In roans white hair should be distributed over body, the more evenly the better. Roans come in: blue, liver, red, orange, lemon. In black and tans coat black; tan spots over eyes, tan on sides of muzzle, on throat, chest, forelegs from knees to toes and on hind legs on inside of legs, also on stifle and extending from the hock to toes.

Coat—On head short, fine; on body flat or slightly wavy and silky. Of medium length with enough undercoating to give protection. Well feathered but not so profusely as to hide true lines or interfere with field work.

Height—At withers: Males, 16 to 17"; Females, 15 to 16". Deviations to be severely penalized but not disqualified.

Weight—Males, 28 to 34 pounds; Females 26 to 32 pounds.

CH. RINGLEADER O'RANDY CD, by Ch. Mina's Pride of O'Randy ex Patsy Colleen O'Toole. In 1962, 1 BIS, 1 1st in Group, 1 2nd in Group. Also runs in Licensed Trials. Breeder, L. J. Shannon and Mrs. Mina Badger. Stud service, puppies and 4 one-year old males for sale. Owned by Mrs. M. Badger, 154 Arden Ave., St. Vital, Winnipeg 8, Man.

Head—Skull rather large and high in dome with prominent occiput; muzzle square and rather long with deep mouth opening and lips fine in texture. Teeth strong and level. The nose should be large with open nostrils and liver in color. The head should be cleanly chiseled, not cheeky, and should not present a short wedge shaped appearance. Hair on face should be short and smooth.

Topknot—Topknot, a characteristic of the true breed, should consist of long loose curls growing down into a well-defined peak between the eyes and should not be in the form of a wig; **i.e.** growing straight across.

Eyes—Medium in size and set almost flush, without eyebrows. Color of eyes hazel, preferably of dark shade. Expression of the eyes should be keenly alert, intelligent, direct and quizzical.

Ears—Long, lobular, set low with leathers reaching to about the end of the nose when extended forward. The ears should be abundantly covered with curls becoming longer toward the tips and extending two or more inches below the ends of the leathers.

Neck—The neck should be long, arching, strong and muscular, smoothly set into sloping shoulders.

Shoulders and Chest—Shoulders should be sloping and clean; chest deep but not too wide between the legs. The entire front should give the impression of strength without heaviness.

Body, Ribs and Loins — Body should be of medium length, with ribs well sprung, pear-shaped at the brisket, and rounder toward the hindquarters. Ribs should be carried well back. Loins should be short, wide and muscular. The body should not present a tucked-up appearance.

Hindquarters—The hindquarters should be as high as or a trifle higher than the shoulders and should be very powerful and muscular with well-developed upper and second thighs. Hips should be wide; stifles should not be too straight; and hocks low-set and moderately bent. Tail should be set on low enough to give a rather rounded appearance to the hindquarters and should be carried nearly level with the back. Sound hindquarters are of great importance to provide swimming power and drive.

Forelegs and Feet—Forelegs medium in length, well boned, straight and muscular with elbows close set. Both fore and hind feet should be large, thick and somewhat spreading, well clothed with hair both over and between the toes, but free from superfluous feather.

Tail—The so-called "rattail" is a striking characteristic of the breed. At the root it is thick and covered for 2 or 3 inches with short curls. It tapers to a fine point at the end, and from the root-curls is covered with short, smooth hair so as to look as if the tail had been clipped. The tail should not be long enough to reach the hock joint.

Coat—Proper coat is of vital importance. The neck, back and sides should be densely covered with tight crisp ringlets entirely free from wooliness. Underneath the ribs the hair should be longer. The hair on lower throat should be short. The forelegs should be covered all around with abundant hair falling in curls or waves, but shorter in front than behind. The hind legs should also be abundantly covered by hair falling in curls or waves, but the hair should be short on the front of the legs below the hocks.

Color—Solid liver; white on chest objectionable.

Height and Weight—Dogs, 22 to 24", females, 21 to 23", Dogs, 55 to 65 pounds; females, 45 to 58 pounds.

General Appearance—That of a smart, upstanding, strongly built but not leggy dog, combining great intelligence and the rugged endurance with a bold, dashing eagerness of temperament.

Gait—Should be square, true, precise and not slurring.

DU. CH. (CAN. AM.) SOUVENIR CSABE LIDI
(whelped July 17/57), by Buck Selle ex Sona Selle. Group wins: 2 1st, 2 2nd, 1 3rd, 2 4th. Breeder F. S. Verrall.
Handlers: U.S.A. — Jim Hall; Canada — Gene Habnlen. Owned by Roy Geil, PO. Box 47, Kingston, Wash.

VIZSLA

General Appearance—A distinguished and robust breed, but light weight, slim waisted, gait decided and supple.

Skull—In the upper part of skull the head is refined, covered with strong muscles that leave a depression the length of the middle line between the eyes, the forehead continues into the frontal-nasal part by a moderate crease.

Ears—The ears are thin, proportionately long, covered with a very fine skin, placed low on the skull and fall against the sides of the head, with rounded tips.

Eyes—Neither deep set, nor prominent, the balls of the eyes are circled with the eyelids, well set that they show no whites, the irises are of a shade corresponding to the light or dark shading of the hair, (the light yellow ones are not desirable for this breed).

Muzzle—In comparison to the skull, the muzzle is a little longer than the forehead, and seen from either side is not of a tapered shape but well squared, the nostrils are slightly open. (A black or slate grey nose is a defect), it should be dark brown, but a skin colored one is not to be rejected. The lips and the folds of the face are moderately developed and cover the mouth completely, the jaws are solidly developed, the gums are strong and set with well developed teeth strong and white as porcelain and perfectly set with no teeth under or over shot.

Neck—Moderately long, well muscled, nobly arched and shaping larger at the body end, with no dewlaps showing. The skin is sleek and smooth.

Trunk—Well muscled and well proportioned.

Back—Wide and straight, moderately arched, muscular and short.

Loins—Short, wide, well muscled, moderately arched.

Shoulders—Well laid back,, not steep, fitting close to the body, muscular.

Rump—Wide and rather long, starting at the height of the back and sloping gradually towards the tail.

Tail—Thick at the root, slimming out slightly to the extremity, the cropping of the last section is done in the first week after birth.

Chest—Deep, long and proportionately wide descending to the elbows, (a barrel chest or a too narrow one constitutes a serious defect).

Belly—Slightly tucked up.

Forelegs—Bones straight and well covered with muscles, strongly developed to support the body like the columns of a building. The elbows are parallel to the body, neither turned in or outward.

Hindlegs — Hindquarters are straight, if seen from the rear, thighs full and muscular. A too bent stifle is worse than a straight one.

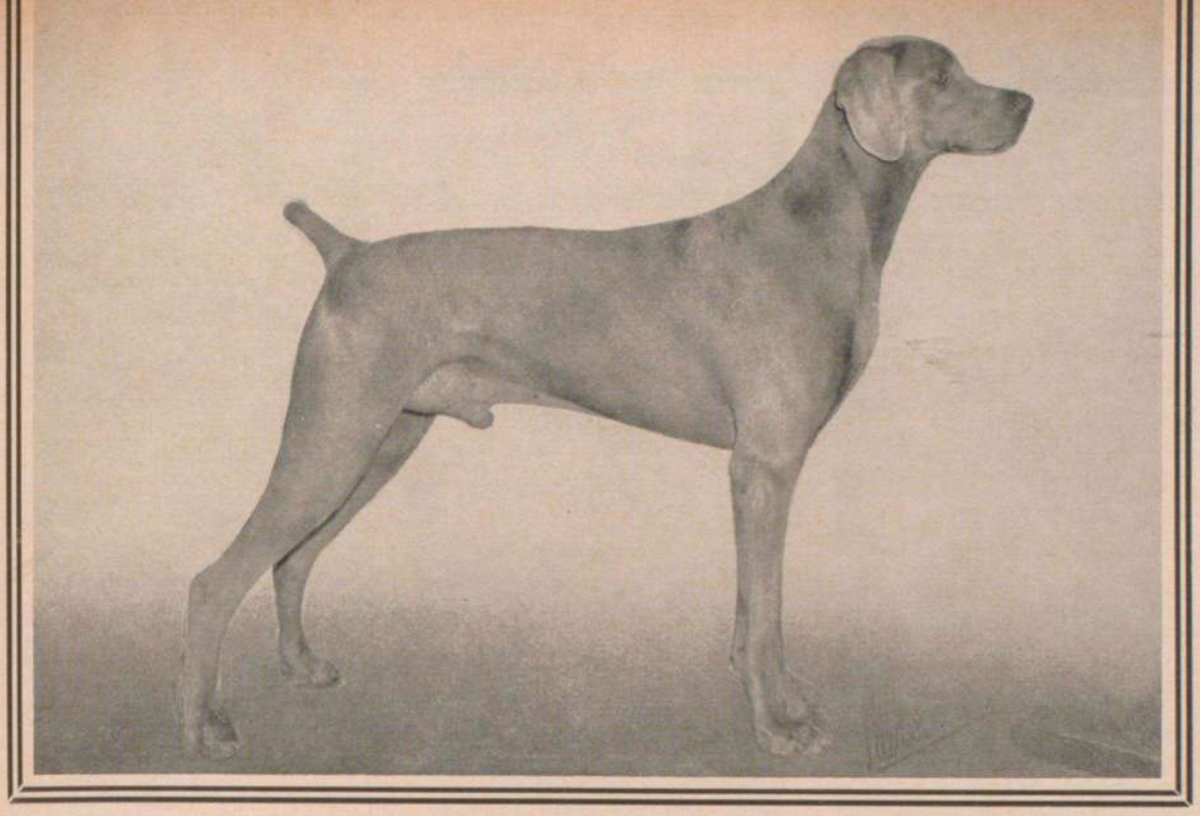

Feet—The toes well formed and shaped like a cat's, (hare foot is objectionable), the nails should be slate grey, short and strong, the pads should be strong, (badly placed dewclaws are considered a defect).

Quality and Color of Coat—The coat is short, neither hard nor fluffy. Should be close fitting to the body, thick, without woolly under coat. It should be short and sleek. The coat is waterproof and protects against the weather. An animal with too fine coat and not thickly furred (like a mouse-coat) should be excluded from future breeding.

The color comprises all the shades of gold but the darker shades are preferable, (coffee color and dark brown or any mixed shade is a serious defect) but small white spots on chest or feet are not considered defects, but should be eliminated in future breedings.

general facts

Known as the Hungarian Pointer, its ancestry dates back 1000 years. The purity of its strain was upheld throughout the years by the barons and warlords who used the breed extensively as a companion to their falcons during hunting expeditions.

CH. (CAN. AM.) DURMAR'S DOCTOR DON, by Ch. Ann's Ringleader ex Ch. Victor Christina Harrasburg. Show Record — American (one year's showing), 34 BB, 7 Group 1sts, 18 Group placings; Canadian (1962), shown 11 times, 11 BB, 5 Group 1st, 1 Group 2nd, 3 Group 4th. Breeder, Durwood H. Van Zandt. "Doc" is at stud to approved females. Mrs. Jean Edwards, Harvest Hills, Bridgton, Maine.

General Appearance—A medium-sized gray dog with light eyes, he should present a picture of great driving power, stamina, alertness and balance. Above all, the dog **should indicate ability to work hard in the field.**

Height—Height at withers: dogs, 25 to 27"; females, 23 to 25".

Head—Moderately long and aristocratic, with moderate stop and slight median line extending back over the forehead. Rather prominent occipital bone and trumpets set well back, beginning at the back of the eyesockets. Measurement from tip of nose to stop to equal that from stop to occipital bone. The flews should be moderately deep, enclosing a powerful jaw. Foreface perfectly straight, delicate at the nostrils. Skin tightly drawn. Neck clean-cut and moderately long. Expression kind, keen, intelligent.

Ears—Long and lobular, slightly folded and set high. The ear when drawn snugly alongside the jaw should end approximately 2" from the point of the nose.

Eyes—In shades of light amber, gray or blue-gray, set well enough apart to indicate good disposition and intelligence. When dilated under excitement the eyes may appear almost black.

Teeth—Well-set, strong and even; well-developed and proportionate to jaw with correct scissors bite, the upper teeth protruding slightly over the lower teeth but not more than 1/16". Complete dentition is greatly to be desired.

Nose—Gray.

Lips and Gums—Pinkish flesh shades.

Body—The back should be moderate in length, set in straight line, strong, and should slope slightly from the withers. The chest should be well developed and deep, shoulder well laid on and snug. Ribs well sprung and long. Abdomen firmly held; moderately tucked-up flank. The brisket should drop to the elbow.

Coat—Short, smooth and sleek in shades of mouse-gray to silver-gray, usually blending to a lighter shade on the head and ears. Small white mark allowable on the chest, but not on any other part of the body. White spots that have resulted from injuries shall not be penalized.

Legs — Forelegs — Straight and strong, with the measurement from the elbow to the ground approximately equaling the distance from the elbow to the top of the withers.

Hindquarters — Well-angulated stifles and straight hocks. Musculation well developed.

Feet—Firm and compact, webbed, toes well arched, pads closed and thick, nails short and gray or amber in color.

Dewclaws—Allowable only on forelegs, there optional.

Tail—Docked. At maturity it should measure approximately 6" with a tendency to be light rather than heavy and should be carried in a manner expressing confidence and sound temperament.

Gait—The walk is rather awkward. The trot should be effortless, ground covering and should indicate smooth co-ordination. When seen from the rear, the hind feet should parallel the front feet. When viewed from the side, the top line should remain strong and level.

Temperament—The dog should display a temperament that is keen, fearless, friendly, protective and obedient.

Very Serious Faults

Any long-haired coat or coat darker than mouse-gray to silver-gray is considered a most undesirable recessive trait. White, other than a spot on chest. Eyes any other color than gray, blue-gray or light amber. Black, mottled mouth. Non-docked tail. Dogs exhibiting strong fear. Viciousness.

Serious Faults

Poor gait. Very poor feet. Cowhocks. Faulty backs, either roached or sway. Badly overshot or undershot jaw. Snipey muzzle. Short ears. Yellow in white marking. Undersize.

GRIFFON
(Wire-Haired Pointing)

Head — Long, harsh coat, forming mustache and eyebrows, skull long, narrow, muzzle square.
Eyes — Large, open, iris yellow or light brown.
Ears—Medium size, flat or sometimes slightly curled, set rather high, very lightly furnished with hair.
Nose—Always brown.
Neck—Rather long, no dewlap.
Shoulders—Long, sloping.
Ribs—Slightly rounded.
Forelegs—Straight, muscular, furnished with rather short wire hairs.
Hind Legs—Furnished with rather short stiff hair, thighs long, well developed.
Feet—Round, firm, well formed.
Tail—Carried straight or gaily, furnished with hard coat without plume, generally cut to a third of its length.
Coat—Hard, dry, stiff, never curly, undercoat downy.
Color—Steel gray with chestnut splashes, gray white with chestnut splashes, chestnut, dirty white mixed with chestnut, never black.
Height—21½ to 23½" for males, 19½ to 21½" for females.

POINTER
(German Long-Haired)

Head — Long, slightly curved crown. Stop rising gradually. Bridge of nose slightly arched.
Ears—Lying close, broad at skull, rounded at bottom, inner edges covered with hair. Hairs on ears slightly waved and overhanging at end of ear.
Eyes—Brown, well closed.
Nose—Dark brown.
Neck—Strong and noble.
Chest—Appearance of depth in comparison to width. Deeper than elbow joint, abdomen correspondingly tucked up.
Back—Straight and strong. Loins muscular. Back strongly developed. Croup slightly sloped.
Tail—High set, straight or slightly bent upwards. Good feathers, longest at middle of tail.
Front Legs, Paws—The shoulder blade, upper arm, forearm and pastern, when viewed from the front, vertical when the dog is standing. Shoulders flat against body. Elbows pointing directly to rear or slightly outwards. When dog is motionless and seen from the side, shoulder blade and forearm form a 90° angle, the forearm with the lower arm a flat angle (about 135°). Joint only very slightly bent.
Hindlegs—Seen from the back, hipbone, thighbone, shankbone and metatarsus form a vertical line. Well-angled hocks. Dew claws removed.
Toes, Pads—Toes well closed. Pads firm strong.
Coat—On back and side of body approximately, 1 to 2" long. Underneath neck, chest and belly hair somewhat longer. On ears, hair wavy and overhanging. Tail with good feathering. Backs of front and hindlegs feathered, shorter on lower running parts. Spaces between toes have dense hair growth. Head hair is considerably shorter, but longer than on a short-haired dog.
Color—Brown, brown with light spot on chest, white with patches and small brown spots.

POINTER
(German Short-Haired)

Head — Clean-cut. Skull reasonably broad, arched on side, slightly round on top. Scissura not too deep, occipital bone not as conspicuous as the Pointer. Foreface should rise gradually from nose to forehead—more strongly pronounced in the dog. Chops fall away from the somewhat projecting nose. Lips full and deep. Jaw powerful and muscles well developed. Line to forehead should rise gradually. Muzzle long.
Ears—Ears broad, set fairly high, lie flat, above eye level. Ears, should about meet lip angle.
Eyes—Medium size. Eyelids close well. Color dark brown.
Nose—Brown, larger the better; nostrils well opened and broad.
Teeth — Strong and healthy. Molars should intermesh properly. Scissor bite.
Neck—Adequate length, sloping downwards on curving lines. Nape rather muscular, becoming gradually larger towards shoulders.
Breast, Thorax—Breast should give the impression of depth rather than breadth; Ribs forming thorax well-curved. Back ribs reach well down. Circumference of breast immediately behind elbows smaller than that of breast about a hands-breadth behind elbows.
Back, Loins—Back short, strong and straight with slight rise from root of tail to withers. Loins strong, of moderate length, slightly arched. Tuck-up apparent.
Assembly of Back Members — Hips broad, hip sockets wide apart and fall slightly toward tail in graceful curve. Thighs strong, well muscled. Stifles well bent. Hock joints well angulated with strong, straight bone structure from hock to pad.
Assembly of Front Members—Shoulders sloping, movable, well covered with muscle. Shoulder blades lie flat. The upper arm as long as possible, standing away somewhat from the trunk so that straight and closely muscled legs, when viewed from in front, appear to be parallel. Pasterns strong, short and nearly vertical.
Feet—Compact, close-knit and round to spoon-shaped. Toes sufficiently arched, heavily nailed. Pad strong, hard.
Coat—Skin close, tight. Hair short, thick and feel tough and hard to hand; somewhat longer on underside of tail and back edge of haunches, softer, thinner and shorter on ears and head.
Tail — Set high and firm, docked, leaving approximately two-fifths of length, hangs down when dog is quiet, held horizontally when he is walking, wagged when on search.
Height—Dogs, 23 to 25". Females, 21 to 23" at shoulders.
Color — Solid liver, liver and white spotted, liver and white spotted and ticked, liver and white ticked, liver roan. Any colors other than liver and white (gray white) not permitted.

POINTER
(German Wire-Haired)

Head—Moderately long, skull broad, occipital bone not too prominent. Stop medium, muzzle fairly long, nasal bone straight, broad, lips a trifle pendulous but close and bearded. Nose dark brown, nostrils wide open, teeth strong with scissors bite. Ears, rounded, close to sides of head. Eyes brown, medium size, oval in contour, overhung with bushy eyebrows. Neck medium length, slightly arched, devoid of dewlap.
Body, Tail—Body little longer than high, as ten to nine, back short, straight, strong, entire back line showing perceptible slope down from withers to croup. Chest deep, capacious, ribs well sprung, loins taut, slender, tuck-up apparent. Hips broad, croup nicely rounded. Tail docked, approximately 2/5ths original length.
Legs, Feet—Forelegs straight, shoulders obliquely set, elbows close. Thighs strong, muscular. Hind legs moderately angulated at stifle and hock, viewed from behind parallel to each other. Round in outline, feet webbed, high arched, toes close, pads thick, hard, nails strong, quite heavy.
Coat—Weather resisting, water repellent. Undercoat dense in winter to insulate against cold but so thin in summer as to be almost invisible. Outer coat straight, harsh, wiry and rather flat-lying, from one and one half to 2" in length. On lower legs shorter, between toes of softer texture. On skull it is short, close fitting, over shoulders and around tail it is very dense, heavy. Tail coated particularly on underside, devoid of feather. Bushy eyebrows of strong, straight hair. Beards and whiskers of medium length.
Color—Liver and white, usually either liver and white spotted, liver roan, liver and white spotted with ticking and roaning or sometimes solid liver. Nose, dark brown. Head brown, sometimes with a white blaze, ears brown.
Size—Males from 24 to 26" at withers, females smaller but not under 22".

PUDELPOINTER

Coat—Dense, hard, rather tight to body with fine woolly undercoat. Medium long.
Color—Dark liver to autumn leaves. Inconspicuous small white marks (chest and paws) permitted.
Head—Long, wide, balanced muzzle and forehead. Well developed beard and eyebrows. Ears medium size, close to head, slightly turned forward, rather pointed than round, well covered with protecting hair.
Eyes—Rather large, agile, dark amber, well closed eyelids.
Neck — Medium long, well muscled and arched.
Chest—Wide, very deep, ribs rather barrel round.
Back—Short, strong loins, croup wide with well developed muscles. Tail in line with croup.
Frontquarters—Shoulder close to body, well covered with muscles. Shoulder and upper arm with plenty of angulation creating a long stride. Elbow located well back off brisket. Forearm straight, dry, clear lines and bones, well covered with hard protecting hair.
Hindquarters—Upper and lower thigh well angulated, lower thigh long with backward slope toward hock joint. Bone from hock to pad absolutely straight.
Paws—Round, closed, with hard pad. Hairs on and between paws not long.
Tail—Rather thin, carried level, no feathering but covered with hard dense hair, docked.

RETRIEVER (Chesapeake Bay)

Head—Skull broad, round with medium stop, nose medium short-muzzle, pointed, not sharp. Lips thin. Ears small, set well up on head, hanging loosely of medium leather. Eyes medium large, yellowish color, wide apart.
Neck—Medium length, strong muscular appearance, tapering to shoulders.
Shoulders, Chest, Body — Shoulders, sloping. Chest strong, deep, wide. Barrel round, deep, Body medium length, flanks well tucked up.
Back Quarters, Stifles—Back quarters as high or a trifle higher than shoulders. Hindquarters especially powerful. Back short, well-coupled, powerful.
Legs, Elbows, Hocks and Feet—Legs medium length and straight, well-webbed hare feet of good size. Toes well rounded, close pasterns slightly bent, both pasterns and hocks medium length.
Stern—Tail medium length—varying from: males, 12" to 15" and females, from 11" to 14"; medium heavy at base, moderate feathering on stern and tail permissible.
Coat and Texture—Coat thick, short, nowhere over 1½" long, with dense fine woolly undercoat. Hair on face and legs very short and straight with tendency to wave on shoulders, neck, back and loins only.
Color—Any color varying from a dark brown to a faded tan or deadgrass.
Height—Males, 23" to 26"; females, 21" to 24".
Disqualifications
Black or liver colored. White on any part of body, except breast, belly or spots on feet. Feathering on tail or legs over 1¾" long. Dewclaws on hind-legs, undershot, overshot or any deformity. Coat curly or tendency to curl all over body. Specimens unworthy or lacking in breed characteristics.

RETRIEVER (Curly-Coated)

Head—Long, well proportioned, skull not too flat, jaws long and strong, nose black, in black coated variety, wide nostrils. Teeth strong, level.
Eyes—Black or brown, large.
Ears—Small, set on low, lying close to head, covered with short curls.
Coat—One mass of crisp curls all over. Color, black or liver.
Shoulders, Chest, Body, Loins — Shoulders very deep, muscular, obliquely placed. Chest, decidely deep. Body, short, muscular, well ribbed up. Loin, powerful deep, firm to the grasp.
Legs, Feet—Legs of moderate length, forelegs straight, set well under body. Quarters strong, muscular, hocks low to ground with moderate bend to stifle and hock. Feet round and compact with well-arched toes.
Tail—Moderately short, carried fairly straight, covered with curls, slightly tapering towards point.

Experienced hunters are convinced that a great contribution can be made to conservation by the use of any of the Retriever breeds as a working companion on hunting trips.

RETRIEVER (Flat-Coated)

Head—Long, nicely molded. Skull flat, moderately broad. Depression or stop between eyes, slight. Nose of good size, open nostrils. Eyes, of medium size, dark brown or hazel. Jaws long, strong. Ears small, well set on close to side of head.
Neck, Shoulders, Chest—Head well set in neck, latter long, free from throatiness, symmetrically set and obliquely placed in shoulders running well into back. Chest deep, fairly broad, well-defined brisket, on which elbows work cleanly and evenly. Fore ribs fairly flat showing a gradual spring and well arched in center of body but rather lighter towards quarters.
Back and Quarters—Back short, square, well ribbed up, muscular quarters. Stern short, straight, well set on, carried gaily but never much above level of back.
Legs, Feet — Forelegs straight, with bone of good quality carried right down to feet which are round and strong. Stifle not too straight or too bent. He must stand and move true all round on legs and feet, with toes close and well arched, soles thick and strong, when dog is in full coat limbs well feathered.
Coat—Dense, of fine quality and texture, flat as possible. Color: black or liver.

SETTER (English)

Head—Long, lean, well-defined stop. Skull oval, medium width, little difference between width at base of skull and at brows, moderately defined occipital protuberance. Brows at sharp angle from muzzle. Muzzle long, square, width in harmony with skull, straight from eyes to tip of nose. Lips square, fairly pendant. Nose black or dark liver, except in white, lemon and white, orange and white, or liver and white dogs, when it may be of lighter color. Nostrils wide apart, large in openings. Jaws of equal length. Ears carried close to head, well back, set low, of moderate length, slightly rounded at ends, covered with silky hair. Eyes bright, mild, intelligent, dark brown.
Neck—Long, lean, arched at crest.
Shoulders—Formed to permit perfect freedom of action to forelegs. Shoulder blades long, wide, sloping moderately well back, standing fairly close together at top.
Chest—Good depth.
Ribs—Spring gradually to middle of body, taper to back ribs, of good depth.
Back—Strong at junction with loin, straight or sloping upward very slightly to top of shoulder. Loins strong, moderate length, slightly arched. Hipbones wide apart.
Forelegs—Arms flat, muscular with bone fully developed, muscles hard, devoid of flabbiness; of good length from point of shoulder to elbow, set at such an angle as will bring legs fairly under dog. Pastern short, strong, nearly round with slope from pastern joint to foot deviating very slightly forward from perpendicular.
Hind Legs—Wide, muscular thighs, well developed lower thighs. Stifles well bent, strong. Hocks wide, flat. Pastern short, strong, nearly round, with slope from pastern joint to foot deviating very slightly forward from perpendicular.
Feet—Closely set, strong, pads well developed, tough, toes well arched, protected with short, thick hair.
Tail—Straight, taper to a fine point, only sufficient length to reach hocks, or less. Feather straight, silky, falling loosely in a fringe and tapering to point when tail is raised.
Coat—Flat, of good length. Feather on legs moderately thin, regular.
Height — Dogs about 25"; females about 24".
Colors—Black, white and tan; black and white; blue belton; lemon and white; lemon belton; orange and white; orange belton; liver and white; liver belton; solid white.
Markings—Without heavy patches of color on body, but flecked all over preferred.

SETTER (Gordon)

Head — Deep rather than broad, rounded good-size skull, broadest between ears, clearly indicated stop. Below and above the eyes lean, cheek narrow. Muzzle fairly long with almost parallel lines. Nose big, broad, open nostrils, black.
Eyes—Fair size, dark brown.
Ears—Set low, fairly large, thin.
Neck—Long, lean, arched to head.
Shoulders—Fine at points, deep, sloping well back.
Chest—Deep, ribs well sprung.
Forelegs—Big-boned, straight, elbows free.
Hind Legs—From hip to hock long, flat, muscular, from hock to heel short, strong. Stifle and hock joints well bent.
Feet—Fore and hind feet have close knit, well-arched toes with plenty of hair between with full toe pads, deep heel cushions.
Tail—Short, carried horizontal or nearly so, thick at root, finishing in a fine point. Feather, which starts near root of tail, slightly waved or straight, has three square appearance growing shorter uniformly toward end.
Coat—Soft, shining, resembling silk, straight or slightly waved—latter preferred — long hair on ears, under stomach, on chest, back of fore and hind legs to feet.
Color, Markings — Deep, coal black with tan markings, either of rich chestnut or mahogany red color. Tan shining. Black penciling allowed on toes. Borderlines between black and tan colors clearly defined.
Size—Males, 24" to 27", females, 23 to 26".
Tan Markings
Two clear spots over eyes not over ¾" in diameter; on sides of muzzle, tan should not reach above base of nose, resembling a stripe around end of muzzle from one side to other; on throat; two large, clear spots on chest; on inside of hind legs, inside of thighs showing down front of stifle, broadening out to outside of hind legs from hock to toes. It must, however, not completely eliminate the black on back of hind legs; on forelegs from knees or a little above downward to toes; around vent; a white spot on chest is allowed, but smaller the better.

Preserve game by using Sporting dogs.

SPANIEL
(American Water)

Head—Moderate length, skull rather broad, full, stop moderately defined. Forehead covered with short smooth hair, without tuft or topknot. Muzzle medium length, square, jaws strong, of good length, teeth straight, well shaped. Nose sufficiently wide, well developed nostrils.
Eyes—Hazel, brown or dark tone to harmonize with coat; set well apart.
Ears—Lobular, long, wide, set slightly above eyeline. Leather extending to end of nose, well covered with close curls.
Neck—Round, medium length, strong, muscular, arch not accentuated.
Body—Well developed, sturdily constructed, not too compactly coupled. Shoulders sloping, clean, muscular. Strong loins, lightly arched, well furnished, deep brisket, not excessively broad. Well-sprung ribs. Legs, medium length, well boned.
Legs, Feet—Forelegs powerful, reasonably straight. Hind legs firm with suitable bent stifles, strong hocks well let down. Feet to harmonize with size of dog. Toes closely grouped, well padded.
Tail—Moderate length, curved in a slightly rocker shape, carried slightly below level of back; tapered and covered with hair to tip, action lively.
Coat—Coat closely curled or have marcel effect, sufficient density to be of protection against weather, water or punishing cover, yet not coarse. Legs have medium short, curly feather.
Color—Solid liver or dark chocolate, little white on toes or chest permissible.
Height—15 to 18" at shoulder.
Disqualification: Yellow eyes.

SPANIEL
(Brittany)

Skull—Medium length, rounded, slightly wedge shaped. Well defined, gently sloping stop. Median line indistinct. Occipital crest only apparent to touch. Lateral walls well rounded.
Muzzle—Medium length, tapers gradually.
Nose—Nostrils well open, fawn, tan, light shades of brown or deep pink.
Eyes—Well set, heavy eyebrow. Skull well chiseled under eyes. Dark eyes.
Ears—Set high, above level of eyes. Short, leafy, reaching about half length of muzzle. Lie flat close to head. Tip rounded very slightly. Well covered with dense, but relatively short hair, little fringe.
Lips—Tight to muzzle, upper lip overlapping lower jaw sufficiently to cover under lip. Lips dry.
Teeth—Scissors bite.
Neck—Medium length. Strong, well set into sloping shoulders.
Body Length—Approximately same as height when measured at withers. Body length is measured from point of forechest to rear of haunches.
Withers—Two thumbs width or less between blades. Slightly higher than at rump.
Shoulders—Sloping, muscular.
Coat—Hair dense, flat or wavy.
Skin—Fine, fairly loose.
Color—Dark orange and white, liver and white. Some ticking is desirable. Roan patterns or factors of orange or liver shade permissible. Orange and liver are found in standard parti-color, or piebald patterns.
Back—Short, straight. Slight slope from withers to root of tail. Slight drop from hips to root of tail.
Chest—Deep, reaching the level of elbow.
Flanks—Rounded. Fairly full. Loins short, strong.
Hindquarters—Broad, strong, muscular, powerful thighs, well-bent stifles, giving a hip set well into loin, marked angulation.
Tail—Naturally tailless, or not over 4" long. Natural or docked. Set on high, actually an extension of the spine at about same level.
Front Legs—Viewed from the front, perpendicular. Pastern slightly bent to give cushion to stride. Leg bones clean, graceful. Height to elbows should approximately equal distance from elbow to withers.
Hind Legs—Stifles well bent. Thighs well feathered, halfway to the hock. Hocks moderately short, perpendicular when viewed from side.
Feet—Strong, close-fitting, well-arched toes, thick pads. An ideal foot is half way between hare- and cat-foot.
Height—17½ to 20½" — measured from ground to highest point of back.
Disqualifications
Any Brittany Spaniel measuring under 17½" or over 20½". Any black in the coat or a nose so dark in color as to appear black. A tail substantially more than 4" in length.

SPANIEL
(Clumber)

Head—Large, massive; round above eyes, flat on top, with a furrow running from between eyes. Marked stop, large occipital protuberance. Jaw long, broad, deep. Lips of upper jaw overhung. Muzzle not square, but at same time powerful-looking. Nostrils large, open, flesh-colored, sometimes cherry-colored.
Eyes—Large, soft, deep-set, showing haw. Hazel in color.
Ears—Ears long, broad at top, turned over on front edge; vine-shaped close to head; set on low, feathered only on front edge, and there but slightly. Hair short, silky.
Neck and Shoulders—Neck long, thick, powerful with a large ruff. Shoulders immensely strong, muscular, giving a heavy appearance in front.
Body—Long, low, well ribbed up. Chest wide, deep; back long, broad, level, with very slight arch over loin.
Legs, Feet—Forelegs short, straight, very heavy in bone, elbows close. Hind legs only slightly less heavily boned than forelegs. Moderately angulated, hocks well let down. Quarters well developed, muscular. No feather above hocks, thick hair on back of legs just above feet. Feet large, compact, well filled with hair between toes.
Coat, Feathers—Coat silky, straight, not too long, extremely dense; feather long and abundant.
Color, Markings—Color, lemon and white, orange and white. Fewer markings on body the better. Perfection of markings, solid lemon or orange ears, evenly marked head and eyes, muzzle and legs ticked.
Stern—Stern set on a level, carried low.
General Appearance, Size—Long, low, heavy-looking dog, thoughtful expression. Great power. Sedate in movement, not clumsy. Weight of dogs averaging between 55 and 65 pounds; females from 35 to 50 pounds.

SPANIEL
(English Springer)

Head—Size in balance with dog, approximately same length as neck and blend with body in substance. Skull medium length, fairly broad, flat on top, slightly rounded at sides and back. Occiput bone inconspicuous, rounded rather than peaked or angular. Foreface approximately same length as skull, in harmony to width and general character. Muzzle about one-half width of skull. Stop, moderate. Eyebrows well-developed. Jaws fairly square, lean, strong, even. Upper lip to come down full, rather square to cover line of lower jaw. Nostrils well opened, broad, liver color or black depending on color of coat, cheeks flat, with nice chiseling under the eyes.
Teeth—Strong, clean. Even bite or a close scissors bite.
Eyes—Medium size, set rather well apart, fairly deep in their sockets. Color of iris to harmonize with color of coat. Lids tight.
Ears—On level with line of eye; on side of skull and not too far back. Flaps long, fairly wide, hanging close to cheeks. Leather thin, approximately long enough to reach tip of nose.
Neck — Moderately long, muscular, slightly arched at crest gradually blending into sloping shoulders.
Body—Well coupled, strong, compact; chest deep, brisket sufficiently developed to reach to level of elbows. Ribs fairly long, springing gradually to middle of body then tapering as they approach the end of ribbed section. Back straight, strong. Loins strong, short; slight arch over loins and hip bones. Hips nicely rounded, blending smoothly into hindlegs. Topline slopes very gently from withers to tail; back practically level; arch over hips somewhat lower than withers; croup sloping gently to base of tail; tail carried to follow natural line of body. The bottom line, starting on a level with elbows, to continue backward with almost no up-curve until reaching end of ribbed section, then a more noticeable up-curve to flank.
Forequarters—Blades sloping back to form an angle with the forearm of approximately 90 degrees. Shoulders (fairly close together at the tips) to lie flat and mold smoothly into contour of body. Forelegs to be straight with same degree of size to the foot. Bone strong, slightly flattened. Knee straight, almost flat; pasterns short, strong; elbows close to body with free action from shoulders.
Hindquarters—Well developed in hips and thighs, hip joints to be set rather wide apart and hips nicely rounded. Thighs broad and muscular; stifle joint strong and moderately bent. Hock joint somewhat rounded, moderately angulated. Leg from hock joint to foot pad, short and strong with good bone structure. When viewed from the rear hocks to be parallel whether dog is standing or in motion.
Tail—An index to temperament and conformation. Merry tail action is characteristic. The proper set is somewhat low following natural line of croup. Carriage nearly horizontal, slightly elevated when dog excited. Should not be docked too short, well fringed with wavy feather.
Feet—Round, or slightly oval, compact, well arched medium size with thick pads, well feathered between toes. Excess hair to be removed to show natural shape and size of foot.
Color, Coat—Color may be liver or black with white markings; liver and

white (or black and white) with tan markings; blue or liver roan; or predominantly white with tan, black or liver markings. On his ears, chest, legs and belly the Springer is nicely furnished with a fringe of feathering (of moderate heaviness). On his head, front or forelegs, and below hocks on front of hindlegs hair is short and fine. Body coat is flat or wavy of medium length, sufficiently dense to be waterproof, weatherproof and thornproof. Texture fine and hair should have clean, glossy, live appearance indicative of good health.
Size and Proportion—The Springer is built to cover rough ground with ability and reasonable speed. He should be kept to medium size. Ideal shoulder height for dogs is 20"; for females 19". Length of topline (the distance from top of shoulders to root of tail) approximately equal to dog's shoulder height.

SPANIEL (Field)

Head—Skull well developed, with a distinctly elevated occipital tuberosity. Muzzle long, lean, curving gradually from nose to throat; lean beneath eyes.
Eyes—Dark hazel or brown, or nearly black, according to the color of dog. Grave in expression and showing no haw.
Ears—Moderately long and wide, sufficiently clad with nice Setterlike feather, set low and fall in graceful folds; lower parts curling inwards and backwards.
Neck—Long, strong, muscular.
Body—Moderate length, well ribbed up to a good strong loin, straight or slightly arched.
Nose—Well developed, with good open nostrils.
Shoulders, Chest—Former long, sloping and well set back. Latter deep, well developed.
Back, Loin—Very strong, muscular.
Hindquarters—Strong, muscular. Stifles moderately bent.
Stern—Well set on and carried low, if possible below level of back, in a straight line or with a slight downward inclination; in action always kept low; nicely fringed with wavy feather of silky texture.
Forelegs—Fairly good length, with straight, clean, flat bone, and nicely feathered.
Feet—Round, with short soft hair between toes; good, strong pads.
Coat—Flat or slightly waved Sufficiently dense to resist weather. Silky in texture, glossy and refined in nature. On chest, under belly and behind legs, abundant feather, especially below the hocks, and that of the right sort, **viz.** setterlike. Hindquarters similarily adorned.
Color—Black, liver, golden liver, mahogany red, or roan; or any one of these colors with tan over eyes and on cheeks, feet and pasterns.
Height—About 18" to shoulder.

SPANIEL (Sussex)

Head—Skull moderately long, wide, with indention in middle, full stop, brows fairly heavy; occiput full.
Eyes—Hazel color, fairly large, soft, languishing.
Nose—Muzzle about 3" long, square, lips somewhat pendulous. Nostrils well developed, liver color.
Ears—Thick, fairly large, lobe shaped; set moderately low; carried close to head, furnished with soft, wavy hair.
Neck—Rather short, strong, slightly arched, frill in coat.
Chest, Shoulders—Chest round, especially behind shoulders, deep, wide giving good girth. Shoulders oblique.
Back, Back Rib—Back and loin, long, very muscular, both in width and depth; back ribs deep. Whole body is characterized as low, long, level.
Legs—Hindlegs well feathered above hocks, short from hock to ground, wide apart.
Tail—Docked from 5 to 7", set low, thickly covered with moderately long feather.
Coat—Body coat abundant, flat or slightly waved, moderately well feathered on legs and stern, clean below hocks.
Color—Rich golden liver; dark liver or puce.
Weight—From 35 pounds to 45 pounds.

SPANIEL (Welsh Springer)

Skull—Proportionate, of moderate length, slightly domed, clearly defined stop, well chiseled below eyes.
Muzzle—Medium length, straight, fairly square; nostrils well developed, flesh colored or dark.
Jaw—Strong.
Eyes—Hazel or dark, medium size.
Ears—Set moderately low, hanging close to cheeks, comparatively small, gradually narrowing towards tip, covered with setterlike feathering.
Neck, Shoulders—Neck long, muscular, clean in throat, neatly set into long, sloping shoulders.
Forelegs—Medium length, straight, well boned, moderately feathered.
Body—Strong, muscular with deep brisket, well sprung ribs; length of body should be proportionate to length of leg, and very well balanced, with muscular loin slightly arched and well coupled up.
Quarters—Strong, muscular, wide, fully developed, deep second thighs.
Hind Legs—Hocks well let down; stifles moderately bent, moderately feathered.
Feet—Round, thick pads.
Stern—Well set on low, lightly feathered; lively action.
Coat—Straight or flat, thick, silky texture.
Color—Dark rich red and white.

general facts

The breeds which make up the Sporting Group are all used to hunt some type of feathered game, although many also serve as utility dogs used by hunters for animals as well. The Sporting breeds vary in size, from the small American Cocker to the large Weimaraner.

Each breed has its specialty for which it was originated. This, to some extent, has governed its size. The family of Cockers, both English (the original Cocker) and the later developed American, was primarily used on woodcock, for which game a small dog was all that was required. The large Spaniel family was developed to assist hunters by flushing birds from cover as well as for retrieving the game after the shot was made. This dual function was found to be most useful when the hunter was in thick cover.

Pointers and Setters both come to a point when game is found, holding the quarry until flushed and shot. Many hunters, therefore, use a combination of Spaniel and Pointing dog with great success.

Retrievers are all blessed with a water repellant coat. They are used extensively in hunting and retrieving water-fowl. Hot and heavy discussions can easily be provoked by suggesting one breed is better than another.

Vizslas and Weimaraners are the latest additions to the Group. Both are classed as pointers and retrievers, but are usually to be found participating in Field Trials conducted for the Pointing breeds. Although used extensively in their country of origin, they are not yet well known in Canada. Their success in the field is fast becoming recognized and the future looks bright for both breeds.

A few of the Sporting breeds are now being bred with extensive coat and feathering, a trend which is feared by some fanciers who are concerned that such a program will gradually diminish the instinct and ability in the dogs to perform the functions for which they were developed. These heavily coated breeds, however, are still a thrilling sight to see at work.

SPANIEL (American Cocker)

from page 49

ears; (c) on all feet extending upward toward knee and hock joint; (d) under tail and around vent.

Tan on chest not essential; solid tan chest undesirable and shall be penalized. Same penalties and disqualifications apply to white markings on the Black and Tan as apply to solid colors. Tan pigmentation solely on the stern, and undersides of ears disqualifies. Black hairs and penciling on tan markings do not penalize but when tan is "brindled", it is NOT rich.

Black and Tans which do not qualify under this description shall be barred from competition.

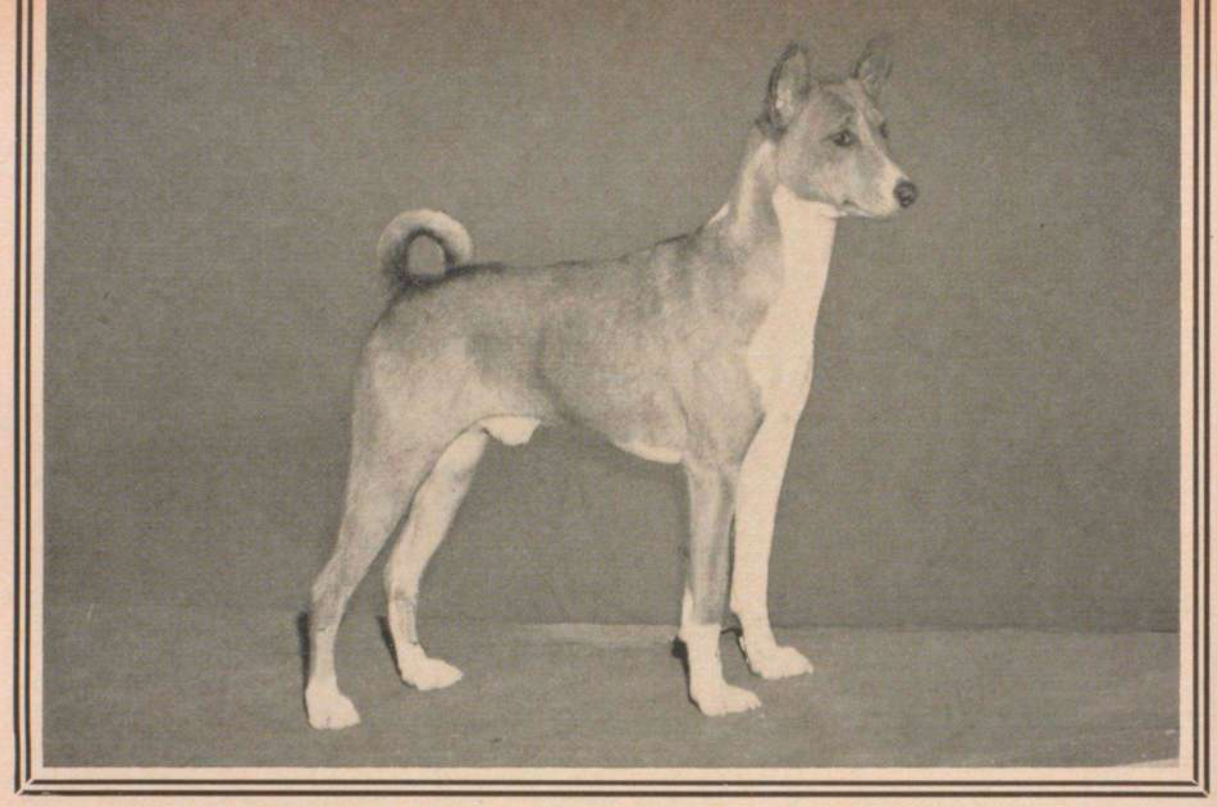

Weight—Not under 22 or over 28 pounds. Weights under or in excess shall be severely penalized. Puppies exempt from minimum limitation.

Disqualifications

Solids colors, black and tans: White in any location other than on chest, throat.

Black and tans: See requirements above.

Parti-colors: Dogs which in the opinion of the judge are 90 per cent or more one solid color and possess limited markings of another color on skull, neck, toes or other locations.

CH. (CAN. AM.) CHAFYA OF THE ZANDE, by Am. Ch. Brahme of Syngefield ex Ch. (Can. Am.) Bettina's Dark Diamond. 25 Group placings 1961, 1962: 4 1sts, 5 2nds, 11 3rds, 5 4ths. Sole agent in Canada, Mr. A. M. FitzGerald. Stud service, puppies available. Bred and owned by Marvin G. Wallis, Basenjis of the Zande, 604 Laura Dr., Falls Church, Va.

Characteristics — The Basenji should not bark, but is not mute. The wrinkled forehead and the swift, tireless running gait (resembling a racehorse trotting full out) are typical of the breed.

General Appearance—The Basenji is a small, lightly built, short backed dog, giving the impression of being high on the leg compared to its length. The wrinkled head must be proudly carried, and the whole demeanor should be one of poise and alertness.

Head and Skull—The skull is flat, well chiseled and of medium width, tapering towards the eyes. The foreface should taper from eye to muzzle and should be shorter than the skull. Muzzle, neither coarse, nor snipey but with rounded cushions. Wrinkles should appear upon the forehead, and be fine and profuse. Side wrinkles are desirable, but should never be exaggerated into dewlap.

Nose—Black greatly desired. A pinkish tinge should not penalize an otherwise first class specimen, but it should be discouraged in breeding.

Eyes—Dark hazel, almond shaped, obliquely set and far seeing.

Ears—Small, pointed and erect, of fine texture, set well forward on top of head.

Mouth—Teeth must be level with scissors bite.

Neck—Of good length, well crested and slightly full at base of throat. It should be well set into flat, laid back shoulders.

Forequarters—The chest should be deep and of medium width. The legs straight with clean fine bone, long forearm and well defined sinews. Pasterns should be of good length, straight and flexible.

Body—The body should be short and the back level. The ribs well sprung, with plenty of heart room, deep brisket, short coupled, and ending in a definite waist.

Hindquarters—Should be strong and muscular, with hocks well let down, turned neither in nor out, with long second thighs.

Feet—Small, narrow and compact, with well arched toes.

Tail—Should be set on top and curled tightly over to either side.

Coat—Short and silky. Skin very pliant.

Color—Chestnut red (the deeper the better) or pure black, or black and tan, all with white feet, chest and tail tip. White legs, white blaze and white collar optional.

Weight—Females 22 pounds approximately. Dogs 24 pounds approximately.

Size—Females 16" and dogs 17" from the ground to the top of the shoulder. Females 16" and dogs 17" from the front of the chest to the farthest point of the hindquarters.

Faults—Coarse skull or muzzle. Domed or peaked skull. Dewlap. Round eyes. Low set ears. Overshot or undershot mouths. Wide chest. Wide behind. Heavy bone. Creams, shaded or off colors, other than those defined above, should be heavily penalized.

general facts

The Basenji is one of the most ancient of breeds, dating back to the days of the Pharaohs. Originated in Central Africa, it is still valued there, which accounts for the purity of today's bloodlines. Known as the "barkless dog" it is not a mute, but rather gives a peculiar and appealing voice when happy and a growl or snarl when occasion demands.

It is one of the few Hound breeds with a mouth soft enough to be used on birds. In its native country it is used for pointing and retrieving game.

First introduced to England in 1895, the Basenji was not brought to America until about 1937. Dr. A. R. B. Richmond established a kennel of Basenjis in Canada early in the 1940's and some of his stock was used to start the breed in the United States.

CH. (CAN. AM.) HOUND HOLLOW'S HAPPY WANDERER (whelped August 10/58), by Ch. (Can. Am.) Lewin's Jovial Bing ex Ch. Hound Hollow's Dungaree Doll. Show record: 3 BIS, 11 BCB in Show, 6 BCBP in Show, 20 Group 1sts and 26 other Group Placings, 49 BB in Canada. 2 Group placings in the United States. American Handler, Barbara Sayres (nee Worcester). Stud services, puppies and Champions for sale. Owned, bred (and handled in Canada) by John J. LeMoine, Hound Hollow Kennels Reg'd., 26 Regent St., Amherst, N.S.

Head—skull fairly long, slightly domed at occiput, with cranium broad and full.

Ears—Set on moderately low, long, reaching when drawn out nearly, if not quite, to end of the nose; fine in texture, fairly broad — with almost entire absence of erectile power — setting close to head, with forward edge slightly inturning to the cheek — rounded at tip.

Eyes—Large, set well apart — soft and houndlike — expression gentle and pleading; of a brown or hazel color.

Muzzle—Of medium length — straight and square-cut, stop moderately defined.

Jaws—Level. Lips free from flews; nostrils large and open.

Defects—A very flat skull, narrow across the top; excess of dome, eyes small, sharp and terrierlike, or prominent and protruding; muzzle long, snipey or cut away decidedly below eyes, or very short. Roman-nosed, or upturned, giving a dish-face expression. Ears short, set on high or with a tendency to rise above point of origin.

Neck and Throat—Neck rising free and light from shoulders strong in substance yet not loaded, of medium length. Throat clean and free from folds of skin; a slight wrinkle below the angle of the jaw, however, may be allowable.

Defects—A thick, short, cloddy neck carried on a line with top of shoulders. Throat showing dewlap and folds of skin to a degree termed "throatiness."

Shoulders and Chest—Shoulders sloping — clean, muscular, not heavy or loaded—conveying the idea of freedom of action with activity and strength. Chest deep and broad.

Defects—Straight, upright shoulders. Chest disproportionately wide or with lack of depth.

Back, Loin and Ribs—Back short, muscular and strong. Loin broad and slightly arched, ribs well sprung, giving abundance of lung room.

Defects—Very long or swayed or roached back. Flat, narrow loin. Flat ribs.

Forelegs and Feet — Forelegs — Straight, with plenty of bone in proportion to size of hound. Pasterns short and straight.

Feet—Close, round firm. Pad full, hard.

Defects—Out at elbows. Knees knuckled over forward, or bent backward. Forelegs crooked or Dachshundlike. Feet long, open or spreading.

Hips, Thighs, Hind Legs and Feet—Hips and thighs strong and well muscled, giving abundance of propelling power. Stifles strong and well let down. Hocks firm, symmetrical and moderately bent. Feet close and firm.

Defects—Cowhocks, or straight hocks. Lack of muscle and propelling power. Open feet.

Tail—Set moderately high; carried gaily, but not turned forward over back; with slight curve; short as compared with size of hound; with brush.

Defects—Long tail. Teapot curve or inclined forward from root. Rat tail with absence of brush.

Coat—Close, hard, hound coat of medium length.

Defects—Short, thin coat, or of a soft quality.

Varieties — There shall be two varieties: 13" — which shall be for hounds not exceeding 13" in height; 15" — which shall be for hounds over 13" but not exceeding 15" in height.

Disqualification: Any hound measuring more than 15" shall be disqualified.

Color—Any true hound color.

CH. (CAN. AM.) EASTWAY REBECCA, by Nor Western Trapper ex Imogen of Norril. 4 Group Placings, 2 BOS in Canada. In the United States: 1962, 3 BB, and RW, Female at the Specialty. 1963, BW for 4 points. Breeder, J. E. Jose. Puppies available. Owned by Mrs. Charles Rowland, Landrover Kennels, DeKalb Junction, N.Y.

BLOODHOUND

Height—Average adult dogs 26", adult females 24".

Weight—Average, adult dogs, 90 pounds, adult females, 80 pounds. Dogs attain 110 pounds, females 100 pounds.

Expression — Noble, dignified, characterized by solemnity, wisdom, power.

Temperament—Affectionate; nature is somewhat shy, and equally sensitive to kindness or correction by his master.

Head—Narrow in proportion to length, long in proportion to body, tapering slightly from temples to end of muzzle, when viewed from above and in front having appearance of being flattened at sides and of being nearly equal in width throughout entire length. In profile upper outline of skull nearly in same plane as that of foreface. Length from end of nose to stop (midway between eyes) not less than that from stop to back of occipital protuberance (peak). Entire length of head from posterior part of the occipital protuberance to end of muzzle 12", or more, in dogs, and 11", or more, in females.

Skull—Long, and narrow, occipital peak very pronounced. Brows not prominent, although, owing to deep-set eyes, may have that appearance.

Foreface—Long, deep, of even width throughout, square outline in profile.

Eyes—Deeply sunk in orbits, lids assuming a lozenge or diamond shape, in consequence of lower lids being dragged down and everted by heavy flews. Eyes correspond with general tone of color of animal, varying from deep hazel to yellow. Hazel color, however, preferred, although seldom seen in red-and-tan hounds.

Ears—Thin and soft to touch, extremely long, set very low, and fall in graceful folds, lower parts curling inwards and backwards.

Wrinkle—Head furnished with loose skin, which in nearly every position appears superabundant, but more particularly so when head carried low; skin then falls into loose, pendulous ridges and folds, especially over forehead and sides of face.

Nostrils—Large and open.

Lips, Flews, and Dewlap—In front lips fall squarely, making a right angle with the upper line of foreface; behind they form deep, hanging flews and, being continued into the pendant folds of loose skin about neck, constitute the dewlap, which is very pronounced. These characters are found, though in a less degree, in the female.

Neck, Shoulders and Chest—Neck long, shoulders muscular, well sloped backwards; ribs well sprung; chest well let down between forelegs, forming deep keel.

Legs and Feet—Forelegs straight, large in bone, elbows squarely set; feet strong, well knuckled up; thighs and second thighs (gaskins) muscular; hocks well bent, let down, squarely set.

Back and Loin—Strong, latter deep, slightly arched.

Stern—Long, tapering, set on rather high, with moderate amount hair underneath.

Gait—Elastic, swinging, free, stern carried high, but not too much curled over back.

Color—Black and tan, red and tan, and tawny; darker colors sometimes interspersed with lighter or badger-colored hair, sometimes flecked with white. Small amount of white permissible on chest, feet and tip of stern.

General Character — Powerful, stands over more ground than is usual with hounds of other breeds. Skin is thin to the touch and extremely loose, this being more noticeable about head and neck.

CH. TERSAI OF GWEJON (whelped August 8/58) by Barasha H.H.F. of Gwejon ex Ch. Czarina H.H.F. of Gwejon CDX (Can. Am.). In 10 shows, 10 BB, 1 Group placement. At stud, puppies available. Bred, owned and handled by Mr. and Mrs. John M. Pinette, Gwejon Kennels, 7 Donald St., Claremont, N.H.

Head—Skull slightly domed, long and narrow, with scarcely any perceptible stop, rather inclined to be Roman-nosed; jaws long, powerful and deep; teeth strong, clean and even, neither pig-jawed nor undershot; nose large and black.
Ears—Small and fine in quality, lying back on the neck when in repose with the tips when thrown back almost touching behind occiput; raised when at attention.
Eyes—Set somewhat obliquely, dark in color, intelligent, but rather soft in expression, never full nor staring, nor light in color, eyelids dark.
Neck—Clean, free from throatiness, somewhat shorter than in the Greyhound, slightly arched, very powerful and well set on.
Shoulders—Sloping, should be fine at the withers and free from coarseness or lumber.
Chest—Rather narrow, with great depth of brisket.
Ribs—Only slightly sprung, but very deep, giving room for heart and lung play.
Back—Rising a little at the loins in a graceful curve.
Loins—Extremly muscular, but rather tucked up, owing to the great depth of chest and comparative shortness of back and ribs.
Forelegs—Bone flat, straight, giving free play for the elbows, which should be neither turned in nor out; pasterns strong.
Feet—Hare-shaped, with well-arched knuckles, toes close and well padded.
Hindquarters—Long, very muscular and powerful, with well bent stifles and strong second thighs, hocks broad, clean and well let down.
Tail—Long, set on and carried low in a graceful curve.
Coat—Long, silky (not woolly), either flat, wavy or rather curly. On the head, ears and front of legs it should be short and smooth; on the neck the frill should be profuse and rather curly. Feather on hindquarters and tail, long and profuse, less so on the chest and back of forelegs.
Color—Any color, white usually predominating, more or less marked with lemon, tan, brindle, gray or black. Whole-colored specimens of these tints occasionally appear.
General Appearance—Should be that of an elegant, graceful aristocrat among dogs, possessing courage and combining muscular power with extreme speed.
Size—Dogs, average height at shoulder from 28 to 31"; average weight from 75 to 105 pounds. Larger dogs are often seen, extra size being no disadvantage when it is not acquired at the expense of symmetry, speed and staying quality. Females are invariably smaller than dogs, and 2" less in height, and from 15 to 20 pounds less in weight is a fair average.

general facts

The appearance of the Borzoi belies its specialized purpose, that of hunting wolves. From this has come its common name—Russian Wolfhound.

First recognized in England in 1875 it has been, nevertheless, known in Russia for more than 300 years. It is believed to be a descendant of the earliest dogs known, for the Greyhound, which was pictured in early Persian and Egyptian art, is suspected of being one of the breeds from which the Borzoi was developed. Many feel the long coat came from the Collie. This long coat was introduced to protect the dog against the rigours of the Russian winter. In the Western United States the dog has been used successfully by ranchers and sheepmen to hunt coyotes.

DACHSHUND (MINIATURE LONG-HAIRED)

CH. ASTRID V ZWERGDACKELHEIM, by Am. Ch. Edmonston's Yazzie Begay ex Schatzi v Freiberg. Finished her championship very quickly after her arrival in Canada as a puppy. Weighing only six pounds, she is now expecting her first litter of puppies. Breeder, Dr. Marie Rupert, Denver, Colorado. Owned by Agness Hammond Connaughton, My Little Kennels, Ghost River Ranch, Cochrane, Alberta.

The distinctive characteristic differentiating this coat from the shorthaired, or smooth-haired, Dachshund is alone the rather long silky hair. Soft, sleek, glistening, often slightly wavy hair, longer under neck, on the underside of body, on ears, behind legs, becoming there a pronounced feather; greatest length on underside of tail; falls beyond lower edge of ear. Tail: Carried gracefully in prolongation of spine; hair attains here its greatest length, forms a veritable flag. Color Hair, Nose, Nails: Exactly as for the Smooth-haired Dachshund.

Head—Tapers uniformly to tip of nose, clean-cut. Skull slightly arched, slopes gradually without stop into finely-formed slightly-arched muzzle. Bridge bones over eyes strongly prominent. Nasal cartilage and tip of nose long, narrow; lips tightly stretched, well covering lower jaw. Nostrils well open. Jaws opening wide, hinged well back of eyes, strongly developed bones and teeth. Powerful teeth, scissors bite.

Eyes—Medium size, oval, situated at sides, clean, energetic, pleasant expression. Reddish-brown to brownish-black.

Ears—Set near top of head, not too far forward, long but not too long, rounded. Carriage animated, forward edge just touch cheek.

Neck — Fairly long, muscular, clean-cut, slightly arched in nape, extending in graceful line into shoulders, carried proudly.

Front—Muscular, compact, deep, long, broad.

Forequarters — Shoulder Blade: Long, broad, obliquely, firmly placed upon fully developed thorax, furnished with hard, plastic muscles. Upper Arm: Same length as shoulder blade, at right angles to latter, strong bone, hard muscle, lying close to ribs, capable of free movement. Forearm: Short in comparison to other breeds, slightly turned inwards; supplied with hard but plastic muscles on front and outside, tightly stretched tendons on inside and at back. Joint between forearm and foot (wrists): Closer together than shoulder joints, front does not appear absolutely straight. Paws: Full, broad in front, trifle inclined outwards; compact, well-arched toes, tough pads. Toes: There are five, though only four are in use. Close together, pronounced arch; provided on top with strong nails, underneath with tough toe-pads.

Trunk—Long, fully muscled. Back, with sloping shoulders, short, rigid pelvis, should lie in straightest possible line between withers and slightly arched loins, latter being short, rigid, broad. Chest: Breastbone strong, so prominent in front that on either side a depression (dimple) appears. When viewed from front, thorax oval, extends downward to mid-point of forearm. Enclosing structure of ribs appears full and oval, and when viewed from above or from side, full-volumed. Well ribbed up, gradually merging into line of abdomen. Front leg when viewed in profile should cover lowest point of breast line. Abdomen: Slightly drawn up.

Hindquarters — Viewed from behind, of completely equal width. (a) Croup: Long, round, full, robustly muscled, plastic, only slightly sinking toward tail. (b) Pelvic Bones: Not too short, rather strongly developed, moderately sloping. (c) Thigh Bone: Robust, good length, set at right angles to pelvic bones. (d) Hind Legs: Robust, well-muscled, well-rounded buttocks. (e) Knee Joint: Broad, strong. (f) Calf Bone: In comparison with other breeds, short; perpendicular to thigh bone, firmly muscled. (g) Bones at base of foot (tarsus) present flat appearance, strongly prominent hock, broad tendon of Achilles. (h) Central foot bones (metatarsus) long, movable towards calf bone, slightly bent toward front, perpendicular (viewed from behind). (i) Hind Paws: Four compactly-closed, beautifully-arched toes, as in case of front paws. Whole foot posed equally on ball and not merely on toes; nails short.

Tail—Set in continuation of spine, extending without pronounced curvature.

CH. GARNER'S LITTLE NICKY M, CD (CAN. AM.), by Garner's Little Conquestor M ex Starkrests Mighty Beautiful. In 28 times shown he won: 1 BIS; Group wins — 5 1sts, 3 2nds, 5 3rds, 2 4ths; 23 BB. Breeder, Mrs. D. Garner. Handler, Jack Haggerty. Stud service, puppies available. Owned by Mrs. Fern Bodrug, R.R. 2, Fort William, Ontario.

Hair: Short, thick, smooth, shining. Tail: Gradually tapered to a point, well but not too richly haired; long, sleek bristles on underside are considered a patch of strong-growing hair, not a fault. Color Hair, Nose, Nails: Exactly as for the Standard Smooth Dachshund.

Head—Tapers uniformly to tip of nose, clean-cut. Skull slightly arched, slopes gradually without stop into finely-formed slightly-arched muzzle. Bridge bones over eyes strongly prominent. Nasal cartilage and tip of nose long, narrow; lips tightly stretched, well covering lower jaw. Nostrils well open. Jaws opening wide, hinged well back of eyes, strongly developed bones and teeth. Powerful teeth, scissors bite.

Eyes—Medium size, oval, situated at sides, clean, energetic, pleasant expression. Reddish-brown to brownish-black.

Ears—Set near top of head, not too far forward, long but not too long, rounded. Carriage animated, forward edge just touch cheek.

Neck — Fairly long, muscular, clean-cut, slightly arched in nape, extending in graceful line into shoulders carried proudly.

Front—Muscular, compact, deep, long, broad.

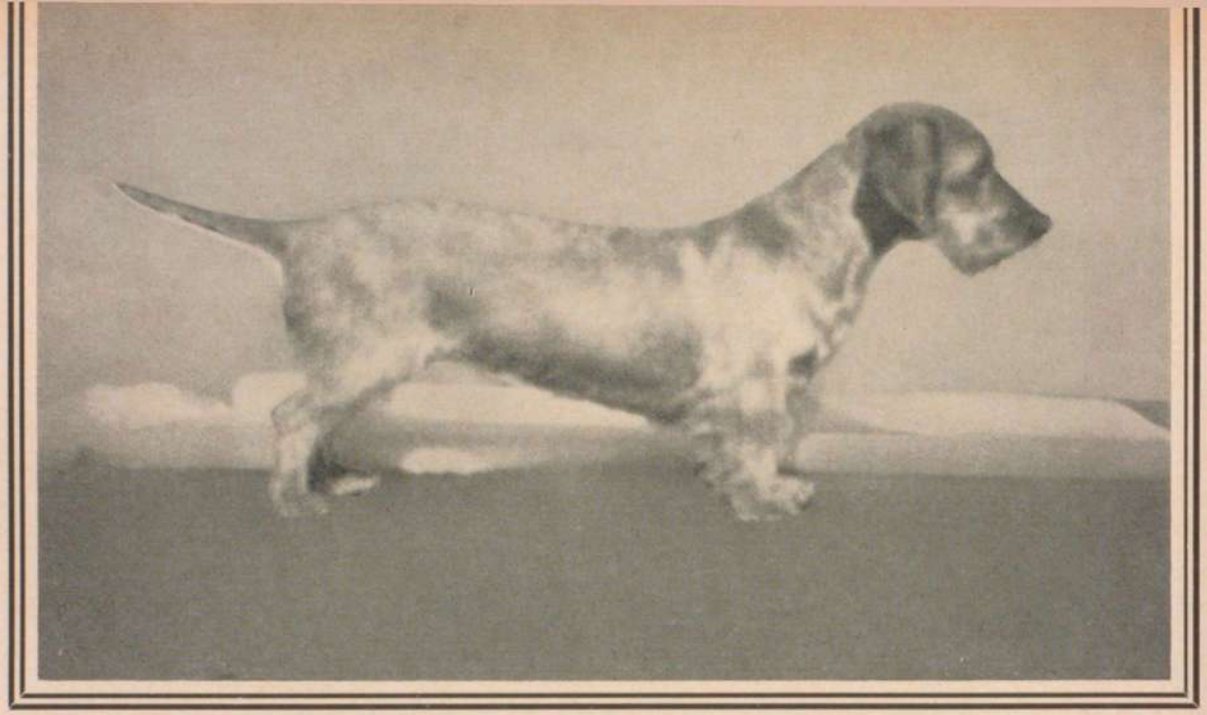

Forequarters — Shoulder Blade: Long, broad, obliquely, firmly placed upon fully developed thorax, furnished with hard, plastic muscles. Upper Arm: Same length as shoulder blade, at right angles to latter, strong bone, hard muscle, lying close to ribs, capable of free movement. Forearm: Short in comparison to other breeds, slightly turned inwards; supplied with hard, plastic muscles on front and outside, tightly stretched tendons on inside and at back. Joint between forearm and foot (wrists): Closer together than shoulder joints, front does not appear absolutely straight. Paws: Full, broad in front, trifle inclined outwards; compact, well-arched toes, tough pads. Toes: There are five, though only four are in use. Close together, pronounced arch; provided on top with strong nails, underneath with tough toe-pads.

Trunk—Long, fully muscled. Back with sloping shoulders, short, rigid pelvis, should lie in straightest possible line between withers and slightly arched loins, latter being short, rigid, broad. Chest: Breastbone strong, so prominent in front that on either side a depression (dimple) appears. When viewed from front, thorax oval, extends downward to mid-point of forearm. Enclosing structure of ribs appears full and oval, and when viewed from above or from side, full-volumed. Well ribbed up, gradually merging into line of abdomen. Front leg when viewed in profile should cover lowest point of breast line. Abdomen: Slightly drawn up. Hindquarters — Viewed from behind of completely equal width. (a) Croup: Long, round, full, robustly muscled, plastic, only slightly sinking toward tail. (b) Pelvic Bones: Not too short, rather strongly developed, moderately sloping. (c) Thigh Bone: Robust, good length, set at right angles to pelvic bones. (d) Hind Legs: Robust well-muscled, well-rounded buttocks. (e) Knee Joint: Broad, strong. (f) Calf Bone: In comparison with other breeds, short; perpendicular to thigh bone, firmly muscled. (g) Bones at base of foot (tarsus) present flat appearance, strongly prominent hock, broad tendon of Achilles. (h) Central foot bones (metatarsus) long, movable towards calf bone, slightly bent toward front, perpendicular (viewed from behind). (i) Hind Paws: Four compactly-closed, beautifully-arched toes, as in case of front paws. Whole foot posed equally on ball and not merely on toes; nails short.

Tail—Set in continuation of spine, extending without pronounced curvature.

A Miniature Dachshund over 9 pounds is not eligible to compete at shows held under Dog Show Rules of The Canadian Kennel Club. If, at such a show, it is officially weighed and is found to exceed 9 pounds said dog shall be declared absent and not permitted in competition at the show. Within the limits imposed, symmetrical adherence to the general Dachshund conformation, combined with smallness and mental and physical vitality should be the outstanding characteristics of the breed.

DACHSHUND (MINIATURE WIRE-HAIRED)

CH. DI-MAR'S AMBER W, by Am. Ch. Erdmann v Osterholz II ex Ch. Val-Jean's Mini-Wire. Completed her Championship while a puppy, placing in the Hound Group and being 4 times BCBP in Group. Handlers, Irving and Sarah Diamond. Stud service, puppies for sale. Bred and owned by Mrs. Sarah Diamond, 17577 St. Mary's Rd., Town of Kirkland, P.Q.

General appearance same as that of shorthaired, without being long in legs, it is permissible for body to be somewhat higher off the ground. Hair: With exception of jaw, eyebrows, ears, whole body covered with perfectly uniform tight, short, thick, rough, hard coat, but with finer, shorter hairs (undercoat) everywhere distributed between the coarser hairs. Beard on chin. Eyebrows bushy. On ears hair shorter than on body; almost smooth. General arrangement of hair such that, when seen from a distance should resemble smooth-haired. Tail: Robust, as thickly haired as possible, gradually coming to a point, and without a tuft. Color of Hair, Nose and Nails: All colors are admissible. White patches on the chest, though allowable, are not desirable.

Head—Tapers uniformly to tip of nose, clean-cut. Skull slightly arched, slopes gradually without stop into finely-formed slightly-arched muzzle. Bridge bones over eyes strongly prominent. Nasal cartilage and tip of nose long, narrow; lips tightly stretched, well covering lower jaw. Nostrils well open. Jaws opening wide, hinged well back of eyes, strongly developed bones and teeth. Powerful teeth, scissors bite.

Eyes—Medium size, oval, situated at sides, clean, energetic, pleasant expression; reddish-brown to brownish-black.

Ears—Set near top of head, not too far forward, long but not too long, rounded. Carriage animated, forward edge just touch cheek.

Neck — Fairly long, muscular, clean-cut, slightly arched in nape, extending in graceful line into shoulders, carried proudly.

Front—Muscular, compact, deep, long, broad.

Forequarters — Shoulder Blade: Long, broad, obliquely, firmly placed upon fully developed thorax, furnished with hard plastic muscles. Upper Arm: Same length as shoulder blade, at right angles to latter, strong bone, hard muscle, lying close to ribs, capable of free movement. Forearm: Short in comparison to other breeds, slightly turned inwards; supplied with hard plastic muscles on front and outside, tightly stretched tendons on inside and at back. Joint between forearm and foot (wrists): Closer together than shoulder joints, front does not appear absolutely straight. Paws: Full, broad in front, trifle inclined outwards; compact, well-arched toes, tough pads. Toes: There are five, though only four are in use. Close together, a pronounced arch; provided on top with strong nails, underneath with tough toe-pads.

Trunk—Long, fully muscled. Back with sloping shoulders, short, rigid pelvis, should lie in straightest possible line between withers and slightly arched loins, latter being short, rigid, broad. Chest: Breastbone strong, so prominent in front that on either side a depression (dimple) appears. When viewed from front, thorax oval, extend downward to mid-point of forearm. Enclosing structure of ribs appears full and oval, and when viewed from above or from side, full-volumed. Well ribbed up, gradually merging into line of abdomen. Front leg when viewed in profile should cover lowest point of breast line. Abdomen: Slightly drawn up.

Hindquarters—Viewed from behind, of completely equal width. (a) Croup: Long, round, full, robustly muscled, plastic, only slightly sinking toward tail. (b) Pelvic Bones: Not too short, rather strongly developed, moderately sloping. (c) Thigh Bone: Robust, good length, set at right angles to pelvic bones. (d) Hind Legs: Robust, well-muscled, well-rounded buttocks. (e) Knee Joint: Broad, strong. (f) Calf Bone: In comparison with other breeds, short; perpendicular to thigh bone, firmly muscled. (g) Bones at base of foot (tarsus) present flat appearance, strongly prominent hock, broad tendon of Achilles. (h) Central foot bones (metatarsus) long, movable towards calf bone, slightly bent toward front, perpendicular (viewed from behind). (i) Hind Paws: Four compactly-closed, beautifully-arched toes, as in case of front paws. Whole foot posed equally on ball and not merely on toes; nails short.

Tail—Set in continuation of spine, extending without pronounced curvature.

CH. HEIDENHEIM'S BLACK FALCON, by Ch. Zachary of Gera ex Heidenheim's Herbstrose. BCBP in Show 1961; 16 times shown in 1962 (from March to June), 3 Groups 1sts, 10 BB, 3 BOS, following which he was retired from the show ring. Handler, Walter J. Martin. Stud services, puppies available. Bred and owned by Mr. and Mrs. W. E. Kieser, Heidenheim Kennels Reg'd., Arva, Ontario.

DACHSHUND (STANDARD SMOOTH)

Hair: Short, thick, smooth, shining. Tail: Gradually tapered to a point, well but not too richly haired; long, sleek bristles on underside are considered a patch of strong-growing hair, not a fault.

Color of hair, nose and nails: (a) One-colored Dachshund—Includes red (often called tan), red-yellow, and yellow, with or without a shading of interspersed black hairs. Clean color preferable, red more desirable than red-yellow or yellow. Dogs strongly shaded with interspersed black hairs belong to this class. Nose, Nails—Black; red admissible, not desirable. (b) Two-Colored Dachshund—Deep black, chocolate, gray, and white; each with rust-brown or yellow marks over eyes, on sides of jaw and underlip, on inner edge of ear, front, breast, inside and behind front leg, on paws and around anus, from there to about one-third to one-half of length of tail on underside. (Most common two-colored Dachshund usually called black-and-tan.) Except on white dogs, no white desirable. Nose, Nails—Black dogs, black; chocolate, brown or black; gray, gray or even flesh color, last named color not desirable; white dogs, black nose and nails preferred. (c) Dappled and Striped Dachshund — Clear brownish or grayish color, or even white ground, with dark irregular patches of dark-gray, brown, red-yellow or black. Striped (brindle) Dachshund red or yellow with darker streaking.

Nose, Nails—As for One — and Two-Colored Dachshunds.

Head—Tapers uniformly to tip of nose, clean-cut. Skull slightly arched, slopes gradually without stop into finely-formed slightly-arched muzzle. Bridge bones over eyes strongly prominent. Nasal cartilage and tip of nose long, narrow; lips tightly stretched, well covering lower jaw. Nostrils well open. Jaws opening wide, hinged well back of eyes, strongly developed bones and teeth. Powerful teeth, scissors bite.

Eyes—Medium size, oval, situated at sides, clean, energetic, pleasant expression; reddish-brown to brownish-black.

Ears — Set near top of head, not too far forward, long but not too long, rounded. Carriage animated, forward edge just touch cheek.

Neck — Fairly long, muscular, clean-cut, slightly arched in nape, extending in graceful line into shoulders, carried proudly.

Front—Muscular, compact, deep, long, broad.

Forequarters — Shoulder Blade: Long, broad, obliquely, firmly placed upon fully developed thorax, furnished with hard plastic muscles. Upper Arm: Same length as shoulder blade, at right angles to latter, strong bone, hard muscle, lying close to ribs, capable of free movement. Forearm: Short in comparison to other breeds, slightly turned inwards; supplied with hard plastic muscles on front and outside, tightly stretched tendons on inside and at back. Joint between forearm and foot. (wrists): Closer together than shoulder joints, front does not appear absolutely straight. Paws: Full, broad in front, trifle inclined outwards; compact, well-arched toes, tough pads. Toes: There are five, though only four are in use. Close together, a pronounced arch; provided on top with strong nails, underneath with tough toe-pads.

Trunk—Long, fully muscled. Back with sloping shoulders, short, rigid pelvis, should lie in straightest possible line between withers and slightly arched loins, latter being short, rigid, broad. Chest: Breastbone strong, so prominent in front that on either side a depression (dimple) appears. When viewed from front, thorax oval, extends downward to mid-point of forearm. Enclosing structure of ribs appears full and oval, and when viewed from above or from side, full-volumed. Well ribbed up, gradually merging into line of abdomen. Front leg when viewed in profile should cover lowest point of breast line. Abdomen: Slightly drawn up.

Hindquarters—Viewed from behind, of completely equal width. (a) Croup: Long, round, full, robustly muscled, plastic, only slightly sinking toward tail. (b) Pelvic Bones: Not too short, rather strongly developed, moderately sloping. (c) Thigh Bone: Robust,

CH. KESARI ASAD GAMYL, by Ch. Sakkara Arabesque (imp.) ex Ch. Aziza Farouk of Pine Paddocks. Show record to date: 7 Group placings, 36 BB, all in Canada. One Group placing with 1 major in the United States. Bred and handled by Mrs. Ruth Coates, Kesari Kennels, R.R. 1, King City, Ont. Owned by Mrs. Cana Tanaka, 1486 Rometown Dr., Port Credit, Ontario.

SALUKI

Head—Long and narrow, skull moderately wide between the ears, not domed, stop not pronounced, the whole showing great quality. Nose black or liver.

Ears—Long and covered with long silky hair hanging close to the skull and mobile.

Eyes—Dark to hazel and bright; large and oval, but not prominent.

Teeth—Strong and level.

Neck—Long, supple and well muscled.

Chest—Deep and moderately narrow.

Forequarters — Shoulders sloping and set well back, well muscled without being coarse.

Forelegs—Straight and long from the elbow to the knee.

Hindquarters — Strong, hipbones set well apart and stifle moderately bent, hocks low to the ground, showing galloping and jumping power.

Loin and Back—Back fairly broad, muscles slightly arched over loin.

Feet—Of moderate length, toes long and well arched, not splayed out, but at the same time not cat-footed; the whole being strong and supple and well feathered between the toes.

Tail—Long, set on low and carried naturally in a curve, well feathered on the underside with long silky hair, not bushy.

Coat—Smooth and of a soft silky texture, slight feather on the legs, feather at the back of the thighs and sometimes with slight woolly feather on the thigh and shoulder.

Colors—White, cream, fawn, golden, red, grizzle and tan tricolor (white, black and tan) and black and tan.

General Appearance—The whole appearance of this breed should give an impression of grace and symmetry and of great speed and endurance coupled with strength and activity to enable it to kill gazelle or other quarry over deep sand or rocky mountains. The expression should be dignified and gentle with deep, faithful, far-seeing eyes. Dogs should average in height from 23 to 28" and females may be considerably smaller, this being very typical of the breed.

The Smooth Variety—In this variety the points should be the same with the exception of the coat, which has no feathering.

general facts

The Saluki is believed to be the oldest purebred dog. Archaeologists have uncovered records establishing the existence of the breed as early as 3600 B.C. They first came to Egypt through trade with the Arabs. Looked upon as sacred, he was never sold but exchanged among the Arab chiefs. The name Saluki, in Arabic, means "the noble one", which certainly describes this breed.

The Saluki's role in hunting was somewhat unique in that he was used together with hawks. Trained first on hares, at the age of two years he was fully qualified to hunt gazelles. After the hawk struck the prey, the dog held it down until the arrival of the hunters.

AFGHAN

Head—Good length, much refinement, skull evenly balanced with foreface. Slight prominence of nasal bone. Center line running up over foreface with little or no stop, falling away in front of eyes so there is absolutely clear outlook; underjaw showing great strength, jaws long, punishing; mouth level, meaning that teeth from upper jaw and lower jaw match evenly. Occipital bone very prominent. Head surmounted by topknot of long silky hair.
Ears—Long, set approximately on level with outer corners of eyes, leather of ear reaching nearly to end of nose, covered with long silky hair.
Eyes—Almond-shaped (almost triangular), dark in color.
Nose—Good size, black in color.
Neck—Good length, strong, arched, running in curve to shoulders which are long, sloping, well laid back.
Body—Back line appearing practically level from shoulders to loin. Strong, powerful loin, slightly arched, falling away toward stern, hipbones very pronounced; well ribbed, tucked up in flanks. Height at shoulders equals distance from chest to buttocks; brisket well let down, medium width.
Tail—Set not too high on body, having a ring, or a curve on end.
Legs—Forelegs straight, strong, great length between elbow and pastern; elbows well held in, forefeet large in both length and width; toes well arched; feet covered with long thick hair; fine in texture; pasterns long and straight; pads of feet unusually large and well down on ground. Shoulders have plenty of angulation. Feet are in line with body. Hind feet broad, good length; toes arched, covered with long thick hair; hindquarters powerful, well muscled with great length between hip and hock; hocks well let down; good angulation of both stifle and hock; slightly bowed from hock to crotch.
Coat—Hindquarters, flanks, ribs, forequarters, legs well covered with thick, silky hair, very fine in texture; ears and all feet well feathered; from in front of shoulders, also backwards from shoulders along saddle from flanks and ribs upwards, hair is short and close, forming a smooth back in mature dogs.
Height—Dogs, 27", plus or minus 1"; females, 25", plus or minus 1".
Color—All colors permissible, but color or color combinations are pleasing.
Gait—When running free, moves at a gallop, showing great elasticity and spring in his smooth, powerful stride.

BASSET

Head—Large, skull narrow, good length, peak fully developed, most perfect when it closest resembles head of Bloodhound, heavy flews, forehead wrinkled to eyes. Expression when sitting or still very sad. Head covered with loose skin.
Jaws—Nose strong, free from snipiness. Teeth of upper and lower jaws meet.
Ears—Very long, when drawn forward folding well over nose. Set on head as low as possible, hang loose in folds like drapery, ends curling inward, texture thin, velvety.
Eyes—Deeply sunken, showing prominent haw, deep brown.
Neck, Shoulders—Neck powerful, heavy pendant dewlaps. Shoulders muscular, sloping, well laid back.
Forelegs—Forelegs short, very powerful, very heavy in bone, close fitting to chest with a crook'd knee and wrinkled ankle, ending in massive paw.
Feet—Thick, massive, weight of forepart of body borne equally by each toe of forefeet so far as compatible with crook of legs.
Chest and Body—Chest deep, full. Body long, low, well ribbed up.
Quarters—Full of muscle, which stands out so when one looks at dog from behind, gives him round, barrel-like effect, with quarters "round as an apple". When trotting away from you, hocks bend well and he should move true all round.
Stern—Coarse underneath, carried "gaily".
Coat—Similar to that of the Foxhound, of sufficient strength to be of use in bad weather. Skin loose, elastic.
Color—Any recognized Foxhound color.
Disqualification
Unsoundness in legs or feet should disqualify a hound from taking a prize.

COONHOUND
(Black and Tan)

Head—Cleanly modeled, medium stop occurring midway between occiput bone and nose. Head from 9 to 10" in males, from 8 to 9" in females. Viewed from the profile the line of skull is on a practically parallel plane to foreface or muzzle. Flews well developed with typical hound appearance. Nostrils well open, always black. Skull tends toward oval outline. Eyes from hazel to dark brown, almost round. Ears low set and well back, hang in graceful folds. In length should extend well beyond tip of nose. Teeth fit evenly with slightly scissors bite.
Body—Neck, Shoulders, Chest—Neck muscular, sloping, medium length, extending into powerfully constructed shoulders and deep chest. Possess full, round, well-sprung ribs.
Back, Tail—Back level, powerful, strong, with a visible slope from withers to rump. Tail strong, with base slightly below level of back line, carried free, when in action at approximately right angle to back.
Legs, Feet—Forelegs straight, elbows well let down, turning neither in nor out; pasterns strong, erect. Feet catlike with compact, well-arched toes and thick strong pads.
Hindquarters—Quarters well boned and muscled. From hip to hock long and sinewy, hock to pad short and strong. Stifles and hock well bent. When standing on a level surface hind feet set back from under body, leg from pad to hock to be at right angle to ground when viewed both from profile and rear. Stride easy and graceful with plenty of reach in front and drive behind.
Coat, Color—Coat short but dense, coal black, with rich tan markings above eyes, on sides of muzzle, chest, legs and breeching with black pencil markings on toes.
Size—Measured at shoulder: males, 25 to 27", females, 23 to 25".
Disqualification
White on chest or other parts of body if it exceeds 1½" in diameter.

DACHSHUNDS
(Standard Long-Haired)
(Standard Wire-Haired)

See Dachshunds pictorial Section — same standards.

DEERHOUND
(Scottish)

Head—Broadest at ears, narrowing slightly to eyes, muzzle tapering more decidedly to nose, pointed, teeth and lips level. Head long, skull flat with very slight rise over eyes. Hair on skull moderately long, softer than rest of coat. Nose black (in some blue fawns—blue), slightly aquiline. In lighter colored dogs black muzzle preferable. Good mustache of rather silky hair and a fair beard.
Ears—Set on high; in repose, folded back like a Greyhound's, though raised above head in excitement, in some cases semierect. Ears soft, glossy, like a mouse's coat to touch and smaller the better. Sometimes a silky, silvery coat on body of ear and tip. Ears black or dark colored.
Neck, Shoulders — Neck long, strong. Nape very prominent where head is set on, throat clean cut at the angle and prominent. Shoulders well sloped; blades well back.
Tail—Tolerably long, tapering, reaching to within 1½" off ground and about 1½" below hocks. Dropped perfectly down or curved when still, when in motion or excited, curved, well covered with hair, on inside, thick and wiry, underside longer, and towards the end a slight fringe is not objectionable. A curl or ring tail is undesirable.
Eyes—Dark—generally dark brown, brown or hazel, moderately full, with a soft look in repose, but a keen, faraway look when roused. Rims of eyelids black.
Body—General formation is that of a Greyhound of larger size and bone. Chest deep rather than broad. Good girth of chest. Loin well arched and drooping to tail. A straight back is not desirable, this formation being unsuited for uphill work, and very unsightly.
Legs, Feet—Legs broad and flat, good broad forearms and elbows. Forelegs as straight as possible. Feet close, compact, with well-arranged toes. Hindquarters drooping, as broad and powerful as possible, hips set wide apart. Stifles well bent, with great length from hip to hock, which should be broad and flat. Cowhocks, weak posterns, straight stifles and splay feet are very bad faults.
Coat—Hair on body, neck and quarters harsh, wiry, about 3 or 4" long; head, breast and belly much softer. Slight fringe on inside of forelegs and hind legs. Ideal coat is thick, close-lying ragged, harsh, crisp to touch. Color dark blue-gray most preferred, next come darker and lighter grays or brindles, yellow, sandy red or red fawn equally high in estimation.
Height—Dogs, from 30 to 32"; females — from 28" up.
Disqualification
White Blaze on head, or a white collar.

USE HUNTING DOGS AND PRESERVE GAME.

DREVER

Head—Relatively large, longish, broadest between ears, diminishing toward snout with slight supraorbital ridge. Snout well developed and snippy neither from above nor from side view. Bridge of nose straight or slightly convex. Tip of nose well developed, wide nostrils, preferably black. Lower edge of upper lip overlaps edge of lower jaw. Lower lip fits tightly against lower jaw. Bite powerful, upper incisors fit firmly against lowers.
Eyes—Clear, expressive, preferably dark brown. Eyelids thin, fit closely over eyes.
Ears—Medium length, wide, bluntly rounded at tips. When at attention forward edge of ear against head.
Neck—Long powerful, flows gracefully, smoothly into trunk. Skin of neck fairly loose.
Trunk—Back straight or, from side view, slightly arched at rear, strong, slope gently from withers to sacral region. Hindquarters flow evenly in to slightly ascending line of abdomen.
Extremities—Shoulders muscular with long, sloping shoulder blades, set well into chest and back. Front legs powerful and in front view, straight, parallel. Upper foreleg relatively long, broad and form good angle with shoulder blade. Meta carpus springy and form only slight angle with radius and ulna. From rear view hind legs straight, parallel, good bends at knee and back joints. Thighs muscular, broad from side view. The meta tarsus short, almost perpendicular. Both front and back paws firm with toes pointing forward, close together. Pads well developed, hard.
Tail—Long, thick at root. Preferably carried hanging, when in motion it may be carried higher.
Coat—Hair close, straight. On head, ears, lower legs, upper side of tail relatively short; longer on neck, back and back part of thighs, bristly on underside of tail.
Color—All colors permitted, must be some white visible from front, sides and back, preferably on front, including neck and at tip of tail and on paws. Color clean.
Height—Dog at withers 36 c.m., female 34. Dog's height not exceed 40 c.m., nor be less than 32. Height of female should not vary from a maximum of 38 c.m. and a minimum of 30.

FOXHOUND (American)

Skull—Fairly long, slightly domed at occiput, cranium broad, full.
Ears—Set on moderately low, long, fine in texture, fairly broad, almost entire absence of erectile power—setting close to the head, forward edge slightly inturning to cheek, round at tip.
Eyes—Large, set well apart—soft houndlike — expression gentle and pleading; brown or hazel.
Muzzle—Fair length — straight and square-cut—top moderately defined.
Neck and Throat—Neck rising free and light from shoulders, strong in substance, medium length. Throat clean, free from folds of skin.
Shoulders, Chest, Ribs—Shoulders, sloping, clean, muscular. Chest deep, narrower in proportion to depth than English hound—28" (girth) in a 23" hound being good. Well-sprung ribs — back ribs extend well back — 3" flank allowing springiness.
Back, Loins—Back moderately long, muscular, strong. Loins broad, slightly arched.
Forelegs—Straight, fair amount of bone. Pasterns short straight.
Feet—Foxlike. Pad full, hard. Well-arched toes. Strong nails.
Hips, Thighs, Hind Legs and Feet — Hips, thighs, strong, muscled. Stifles strong, well let down. Hocks firm, symmetrical, moderately bent. Feet close, firm.
Tail—Set moderately high; carried gaily, slight curve; very slight brush.
Coat—Close, hard, hound coat medium length.
Height—Dogs not under 22 or over 25". Females not under 21 or over 24".
Color—Any color.

FOXHOUND (English)

Head—Full size. Brow pronounced. Good length and breadth, sufficient to give girth in front of ears of fully 16". Nose long (4½"), wide, with open nostrils. Ears set on low, lying close to cheeks. Most English hounds are "rounded" which means about 1½" is taken off end of ear. Teeth meet squarely.
Neck—Long, clean, not less than 10" from cranium to shoulder, tapering nicely from shoulders to head, the upper outline slightly convex.
Shoulders—Long, well clothed with muscle, especially at points, well sloped, and the true arm between front and elbow long and muscular.
Chest and Back Ribs—Chest should girth over 31" in a 24" hound, back ribs very deep.
Back and Loin—Very muscular, running into each other without any contraction between them. Couples wide, even to raggedness, topline of back absolutely level. Stern well set on and carried gaily. End should taper to a point, fringe of hair below.
Hindquarters — Very strong, straight stifles preferred.
Elbows—set quite straight, well let down.
Legs and Feet—straight as a post, and as strong; size of bone at ankle being especially regarded as all important. Bone large, feet in all cases round and catlike, well-developed knuckles and strong horn.
Color and Coat—not regarded as very important, so long as former is good "hound color," and latter is short, dense, hard, and glossy. Hound colors are black, tan, and white, or any combination of these three, also the various "pies" compounded of white and the color of the hare and badger, or yellow, or tan.

GREYHOUND

Head—Long, narrow, fairly wide between ears, scarcely perceptible stop, little or no development of nasal sinuses, good length of powerful muzzle. Teeth very strong, even in front.
Ears—Small, fine in texture, thrown back and folded, except when excited, when they are semipricked.
Eyes—Dark, bright, intelligent, indicating spirit.
Neck—Long, muscular, slightly arched, widening gradually into shoulder.
Shoulders—Placed as obliquely as possible, muscular.
Forelegs—Perfectly straight, set well into shoulder, pasterns strong.
Chest—Deep, as wide as consistent with speed, fairly well-sprung ribs.
Back—Muscular, broad, well arched.
Loins—Good depth of muscle, well cut up in flanks.
Hindquarters—Long, very muscular, powerful, wide, well let down, well-bent stifles. Hocks well bent, rather close to ground, wide but straight fore and aft.
Feet—Hard, close, rather more hare than cat-feet, well knuckled up with good strong claws.
Tail—Long, fine, tapering with a slight upward curve.
Coat—Short, smooth and firm in texture.
Color—Immaterial.
Weight—Dogs, 65 to 70 pounds; females 60 to 65 pounds.

HARRIER

Head—Medium size, bold forehead, plenty of expression, well set up on neck of ample length.
Back—Level and muscular, arching over loin.
Shoulders—Clean, sloping into muscles of the back.
Elbows—Set well away from ribs, parallel with body.
Ribs—Deep, well sprung, running well back, deep chest.
Legs—Straight, plenty of bone running well down to toes. Knuckled over slightly. Hind legs and hocks square with good sweep. Thigh muscular.
Feet—Catlike with close toes turning inward.
Stern—Well set up, long and well controlled.
Size—19-21".

NORWEGIAN ELKHOUND

Head—Dry, broad at ears; forehead and back of head slightly arched; stop clearly defined. Muzzle of medium length, thickest at base seen from above or from the side, tapers evenly. Bridge of the nose is straight; lips tightly closed.
Ears—Set high, firm and erect, higher than wide at the base, pointed, very mobile. When the dog is listening, orifices are turned forward.
Eyes—Brown, preferably dark, lively, with fearless energetic expression.
Neck—Medium length, dry, strong, well set up.
Body—Powerful, compact, short, with broad deep chest, well-sprung ribs, straight back, well-developed loins, stomach very little drawn-up.
Legs—Firm, straight, strong; elbows closely set on; hind legs with little angulation at knees and hocks. Seen from behind, they are straight.
Feet—Comparatively small, somewhat oblong, with tightly closed toes.

Tail—Set high, short, thickly and closely haired, tightly curled.
Coat—Thick, rich and hard, rather smooth-lying. On head and front of legs, short and even; longest on neck and chest, buttocks, hindside of forelegs and underside of tail. It is made up of longer and harder covering hairs, dark at the tips, of a light, soft, woolly undercoat.
Color—Gray, with black tips to the long covering hairs; somewhat lighter on chest, stomach, legs, underside of tail, and around anus. The color may be lighter or darker, with a slight shading towards yellow.
Height at Shoulder—Dogs, about 20.5" females about 18".
Disqualification—Pronounced variation from gray color.

OTTERHOUND

Head—Large, broad, forehead high, muzzle of fair length.
Nostrils—Wide.
Ears—Long, thin and pendulous, fringed with hair.
Neck—Looks shorter from abundance of hair.
Shoulders—Slope well.
Back—Strong, wide. Ribs well let down.
Legs—Straight. Thighs big and firm. Hocks well let down. Feet compact, good size.
Stern—Thickly covered with hair, carried well up. Not curled.
Color—Grizzle or sandy with black and tan clearly defined.

RHODESIAN RIDGEBACK

Head—Fair length, skull flat, broad between the ears. Stop reasonably well defined.
Muzzle—Long, deep and powerful, jaws level and strong, well developed teeth, especially canines or holders. Lips clean, closely fitting the jaws.
Eyes—Moderately well apart, round, bright and sparkling, with intelligent expression, color harmonizing with color of nose.
Ears—Set rather high, medium size, rather wide at base, tapering to a rounded point. Carried close to head.
Nose—Black, or brown, in keeping with the color of eyes.
Neck and shoulders — Neck fairly strong. Shoulder sloping, clean and muscular.
Body, back, chest, loins—Chest very deep and capacious; ribs moderately well sprung, back powerful, loins strong, muscular, slightly arched. Ridge is formed by hair growing in opposite direction to rest of coat. It is clearly defined, tapering and symmetrical. Starting immediately behind shoulders, continuing up to a point between prominence of the hips (hunch bones), with two identical crowns opposite each other.
Legs and Feet—Forelegs perfectly straight, strong and heavy in bone; elbows close to body. Feet compact, well arched toes, round, tough, elastic pads, protected by hair between toes and pads. In hind legs muscles clean, well defined, and hocks well down.
Tail—Strong at insertion, generally tapering towards end, should be carried with a slight curve upwards.
Coat—Short, dense, sleek, glossy.
Color—Light wheaten to red wheaten. A little white on chest and toes permissible.
Size—Dogs 25 to 27", and females 24 to 26".

WHIPPET

Head—Long, lean, fairly wide between ears, scarcely perceptible stop, good length of muzzle, powerful without being coarse. Nose black.
Ears—Small, fine in texture, thrown back, folded. Semipricked when at attention.
Eyes—Large, intelligent, round, dark hazel, must be at least as dark as coat color. Expression keen and alert.
Teeth—White, strong, even. Teeth of upper jaw closely over lower.
Neck—Long, muscular, well-arched, widening gradually into shoulders.
Shoulders—Long, well-laid back with long, flat muscles.
Brisket—Very deep, strong, reaching as nearly as possible to point of elbow. Ribs well sprung. Should fill in the space between the forelegs so that there is no appearance of a hollow between them.
Forelegs—Straight and rather long, held in line with shoulders. Elbows move freely with the point of shoulder. Fair amount of bone, which carry down to feet. Pasterns strong.
Feet—Well formed with strong, thick pads, well-knuckled-up paws.
Hindquarters — Long and powerful, stifles well bent, hocks well let down and close to ground. Thighs broad and muscular, muscles long and flat.
Back—Strong and powerful, rather long with a good, natural arch over loin creating a definite tuck-up of underline but covering a lot of ground.
Tail—Long and tapering, should reach to a hipbone when drawn through between hind legs.
Coat—Close, smooth and firm in texture.
Color—Immaterial.
Size—Ideal height for dogs, 19 to 22"; for females, 18 to 21".
Gait—Low, free moving and smooth, as long as is commensurate with size of dog.
Disqualifications—Undershot mouth.

WOLFHOUND (Irish)

Head—Long, frontal bones of forehead slightly raised, little indentation between eyes. Muzzle, long, moderately pointed. Ears, small and Greyhound-like in carriage.
Neck—Rather long, strong, muscular, well arched.
Chest—Very deep. Breast, wide.
Back—Rather long than short. Loins arched.
Tail—Long, slightly curved, of moderate thickness, well covered with hair.
Belly—Well drawn up.
Forequarters—Shoulders, muscular, giving breadth of chest, set sloping. Elbows well under. Leg, or forearm muscular, and the whole leg strong and quite straight.
Hindquarters — Muscular thighs and second thigh long and strong, hocks well let down.
Feet—Moderately large, round. Toes, well arched and closed. Nails, very strong and curved.
Hair—Rough and hard on body, legs and head; especially wiry and long over eyes and underjaw.
Color and Markings—Gray, brindle, red, black, pure white, fawn, or any other color that appears in the Deerhound.
Height—Males 32", females 30" (minimum).

DACHSHUND (Miniature Long-Haired)

from page 62

A Miniature Dachshund over 9 pounds is not eligible to compete at shows held under Dog Show Rules of The Canadian Kennel Club. If, at such a show, it is officially weighed and is found to exceed 9 pounds said dog shall be declared absent and not permitted in competition at the show. Within the limits imposed, symmetrical adherence to the general Dachshund conformation, combined with smallness and mental and physical vitality should be the outstanding characteristics of the breed.

DACHSHUND (Miniature Wire-Haired)

from page 64

A Miniature Dachshund over 9 pounds is not eligible to compete at shows held under the Dog Show Rules of The Canadian Kennel Club. If, at such a show, it is officially weighed and is found to exceed 9 pounds said dog shall be declared absent and not permitted in competition at the show. Within the limits imposed, symmetrical adherence to the general Dachshund conformation, combined with smallness and mental and physical vitality should be the outstanding characteristics of the breed.

DACHSHUND (Standard Smooth)

from page 65

good length, set at right angles to pelvic bones. (d) Hind Legs: Robust, well-muscled, well-rounded buttocks. (e) Knee Joint: Broad, strong. (f) Calf Bone: In comparison with other breeds, short; perpendicular to thigh bone, firmly muscled. (g) Bones at base of foot (tarsus) present flat appearance, strongly prominent hock, broad tendon of Achilles. (h) Central foot bones (metatarsus) long, movable towards calf bone, slightly bent toward front, perpendicular (viewed from behind). (i) Hind Paws: Four compactly-closed, beautifully-arched toes, as in case of front paws. Whole foot posed equally on ball and not merely on toes; nails short.
Tail—Set in continuation of spine, extending without pronounced curvature.

AM. CH. KODARA EL TORO (whelped Dec. 4/59), by Am. Ch. Husky-Pak Erok ex Kobuk's Dark Beauty. Just a few points away from Canadian Championship. Shown 6 times in Canada: 6BB, 1 4th in Group. Used as the lead dog in a team of Malamutes, which won three of the four races entered in Oregon during the winter of 1962. Has the record of pulling close to 1,000 pounds in a weight-pulling contest. Stud services, puppies. Owned by Dick and Dianne Ross, Tote-Um Kennels, 22324 45th Ave., Bothell, Wash.

Head—Broad, powerful, in proportion to size of dog.

Skull—Broad between ears, gradually narrowing to eyes, moderately rounded between ears, flattening on top as it approaches eyes, rounding off to cheeks, moderately flat. Slight furrow between eyes; top line of skull and muzzle showing little break downward from a straight line as they join.

Muzzle—Large, bulky in proportion to size of skull, diminishing little in width and depth from junction with skull to nose; lips close fitting; nose black; upper and lower jaws broad, large teeth, front teeth scissors grip.

Eyes — Brown, almond shaped, moderately large, set obliquely in skull. Dark eyes.

Ears—Medium size, small in proportion to head. Upper halves of ears triangular, slightly rounded at tips, set wide apart on outside back edges of skull with lower part of ear joining skull on a line with upper corner of eye, giving tips of ears appearance, when erect, of standing off from skull. When erect, ears point slightly forward, when dog is at work ears are sometimes folded against skull.

Neck—Moderately arched.

Body—Chest strong, deep; body strong, compactly built. Back straight, gently sloping to hips. Loins well muscled.

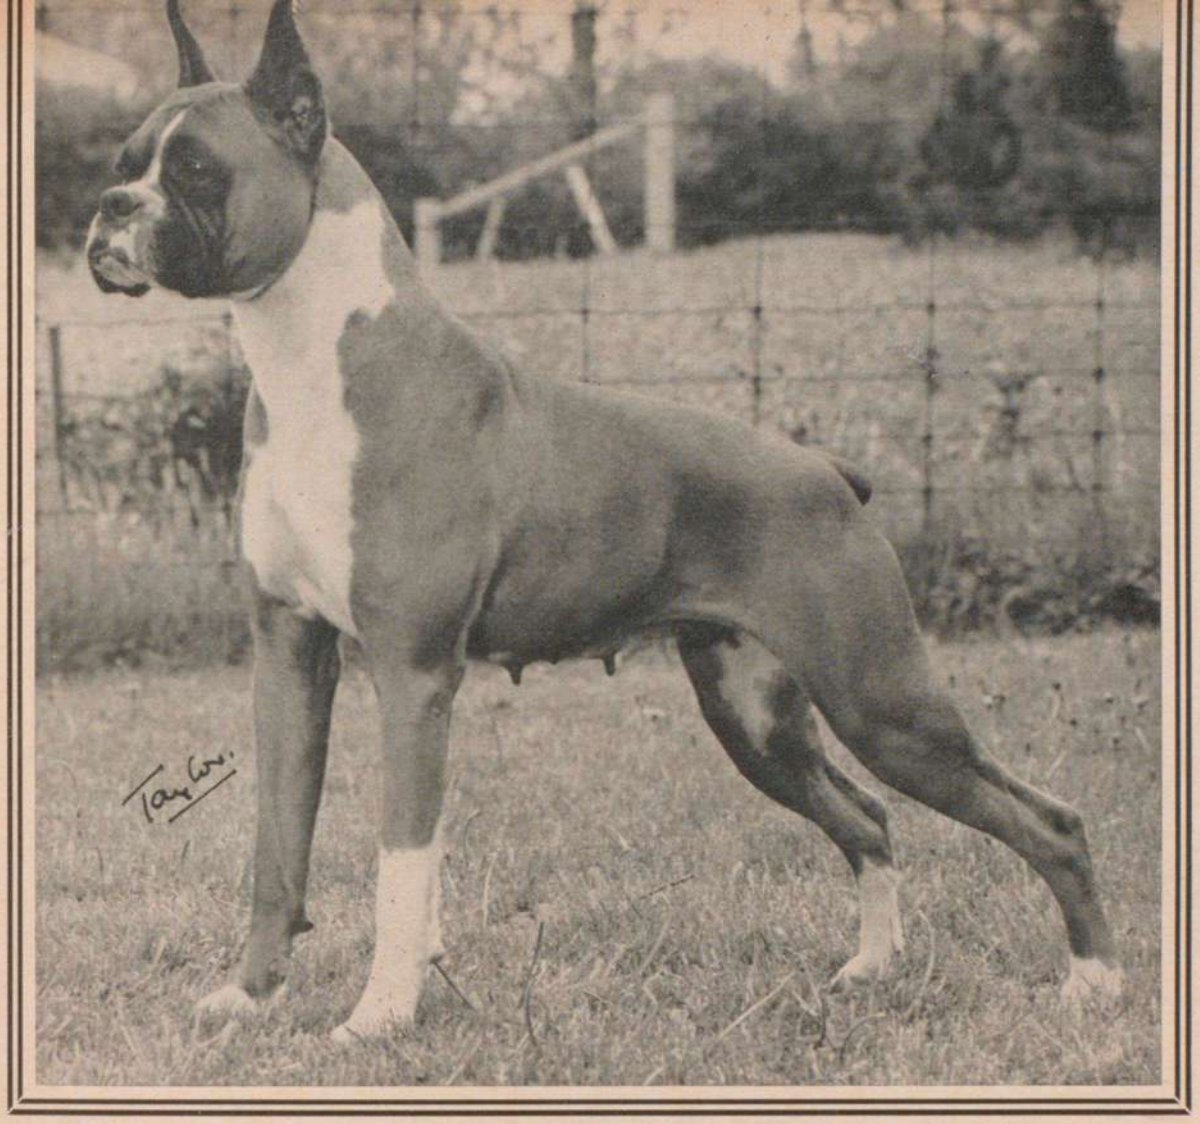

Shoulders, Legs, Feet—Shoulders moderately sloping; forelegs heavily boned, muscled, straight to pasterns, short, strong, almost vertical as viewed from side. Feet large, compact, toes tight-fitting, well arched, pads thick, tough, toe nails short, strong, protective growth of hair between toes. Hindlegs broad, powerfully muscled through thighs; stifles moderately bent, hock joints broad, strong, moderately bent, well let down. Viewed from behind, hind legs appear bowed in bone, but stand and move true, in line with movement of front legs. Legs indicate unusual strength and tremendous propelling power.

Tail—Moderately set, following line of spine at start, well-furred, carried over back when not working, not tightly curled to rest on back, or short-furred and carried like a fox brush, a waving plume appearance, instead.

Coat—Thick, coarse, guard coat. Undercoat dense, from 1 to 2" in depth, oily, woolly. Coarse guard coat stands out, thick fur around neck. Guard coat varies in length as does undercoat, however, in general, coat moderately short to medium along sides of body with length of coat increasing somewhat around shoulders and neck, down back and over rump, breeching and plume.

Color and Markings—Range from light grey through intermediate shadings to black, always with white on underbodies, parts of legs, feet and part of mask markings. Markings either cap-like and/or mask-like on face. White blaze on forehead and/or collar or spot on nape attractive, acceptable, but broken color extending over body in spots or uneven splashings undesirable. One should distinguish between mantled dogs and splash-coated dogs. Only solid color allowable is all-white.

Size—Is a natural range in size. Desirable freighting sizes are: Males: 25" at shoulders — 85 pounds; females: 23" at shoulders — 75 pounds. Size consideration should not outweigh type.

CH. BONNIE LEE'S DANCING DOLL (whelped March 24/60), by Ch. Black Diamond's Yermo Red ex Ch. Char De Pado's Rhapsody. Best of Breed Boxer Club of Canada Specialty Show, 1963. Bred by Mr. and Mrs. Scott McNair, Ilderton, Ont. Puppies for sale, dogs at stud. Owned by Mr. and Mrs. Stanley Whitmore, Haviland Boxer Kennels Reg'd., 217 Highway #7 East, Thornhill, Ont.

Head—Beauty depends upon harmonious proportion between muzzle and skull. Muzzle powerful. Head clean, not showing deep wrinkles. Folds normally appear upon forehead when ears erect, are always indicated from lower edge of stop running downward on both sides of muzzle. Dark mask is confined to muzzle, is in distinct contrast to color of head. Muzzle powerfully developed in length, width and depth.

Lower jaw protrudes moderately beyond the upper and bends slightly upward. The Boxer is normally undershot. Upper jaw broad where attached to skull, maintains this breadth except for a slight tapering to front. Lower jaw incisor teeth are in straight line. In upper jaw, are slightly rounded. Upper corner incisors fit snugly back of lower canine teeth, the pre-molars, anterior palative formamen (a technical term pertaining to the placing of teeth) and molars fitting in the most normal possible manner, creating a sound, powerful bite.

Upper lip thick and padded, filing out frontal space formed by projection of lower jaw and it is supported by the jaw's fangs. These fangs stand far apart, of good length so that front surface of muzzle broad and squarish; when viewed from side, form a rounded angle with top line of muzzle. Lower edge of upper lip rests on edge of lower lip. The repandous (bent upward) part of the under-jaw with the lower lip (sometimes called the chin) must not rise above front of upper lip, but much less may it disappear under it. Must be perceptible when viewed from front as well as side, without protruding and bending upward in manner of the English Bulldog. Must not show teeth or tongue when mouth closed.

Top of skull slightly arched, distinct stop. Tip of nose lies somewhat higher than root of muzzle. Forehead shows suggestion of furrow. Powerful teeth; cheeks well developed, taper into muzzle in slight, graceful curve. Ears cut rather long, well trimmed, carried erect. Dark brown eyes, not too small, not protruding, nor deep-set, alert and intelligent expression, encircled by dark hair. Nose broad and black, slightly turned up; nostrils broad with the naso-labial line running between them.

Neck — Round, ample length; strong, muscular, clean throughout, distinctly marked nape, elegant arch running down to back.

Body—Body square.

Chest and Front Leg Measurements — Brisket deep, reaching down to elbows; depth of body at lowest point of brisket amounts to half height of dog at withers. Ribs, extending far to rear are well arched. Loins short and muscular; lower stomach line lightly

CH. (CAN. AM. BER.) RITTER'S BEAU (3 years old) by Ch. Almericus of Buttonoak ex Ambassador's Angelina. Top Bullmastiff in the United States 1962 (Phillips System). 1963 BB every time shown, including Westminster, with group placements more than half of the time. BIS Bermuda. Breeder, Ted Ritter. Handler, Agent, Wm. T. Callahan, 921 Franklin Turnpike, Allendale, N.J. "Beau" at stud. Owned by Jay Monge, Box 7, Hartsdale, N.Y. (also, "Temulac", Calumet, P.Q.).

BULLMASTIFF

General Appearance—That of a symmetrical animal, showing great strength; powerfully built but active. The dog is fearless yet docile, has endurance and alertness. The foundation breeding was 60% Mastiff and 40% Bulldog.

Head—Skull large, with a fair amount of wrinkle when alert; broad, with cheeks well developed. Forehead flat. Muzzle broad and deep; its length, in comparison with that of the entire head, approximately as 1 is to 3. Lack of foreface with nostrils set on top of muzzle is a reversion to the Bulldog and is very undesirable. Nose black with nostrils large and broad. Flews not too pendulous, stop moderate, and the mouth (bite) preferably level or slightly undershot. Canine teeth large and set wide apart. A dark muzzle is preferable.

Eyes—dark and of medium size.

Ears—v-shaped and carried close to the cheeks, set on wide and high, level with occiput and cheeks, giving a square appearance to the skull; darker in color than the body and medium in size.

Neck—slightly arched, of moderate length, very muscular, and almost equal in circumference to the skull.

Body—Compact. Chest wide and deep, with ribs well sprung and well set down between the forelegs.

Forequarters—Shoulders muscular but not loaded, and slightly sloping. Forelegs straight, well boned and set well apart; elbows square. Pasterns straight, feet of medium size, with round toes well arched. Pads thick and tough, nails black.

Back—short, giving the impression of a well balanced dog.

Loins—wide, muscular and slightly arched, with fair depth of flank.

Hindquarters—broad and muscular with well developed second thigh denoting power, but not cumbersome. Moderate angulation at hocks. Cow hocks and splay feet are bad faults.

Tail—set on high, strong at the root and tapering to the hocks. It may be straight or curved, but never carried hound fashion.

Coat—Short and dense, giving good weather protection.

Color—Red, fawn or brindle. Except for a very small white spot on the chest, white marking is considered a fault.

Size—Dogs, 25 to 27" at the shoulder and 110 to 130 pounds weight. Females, 24 to 26" at the shoulder, and 100 to 120 pounds weight. Other things being equal, the heavier dog is favored.

general facts

As the name implies, the Bullmastiff was developed by the breeding of a Bulldog and a Mastiff. This was done to produce a dog of smaller stature than the Mastiff and still hold the bull and bear-baiting characteristics. They are also used with marked success as guard dogs. Known originally as Keeper's Night Dogs, they became known as Bullmastiffs in 1925.

CH. ALANDALE SEAN GLYN by Ch. Alandale Lord Buff ex Sunday O'Saxon. Approximately 30 BB with numerous Group placements, 1 BCB in Show. Top winning Collie in B.C. 1960, 1961, 1962 retiring the B.C. Collie Club Challenge Trophy. Breeder, W. G. Hassell. Handler, Christine Mullins. Puppies for Sale. Stud service. Owned by Margaret McDevitt, Crayster Collies Reg'd., 342 No. 7 Road, Richmond, B.C.

Head—In proportion to size inclined to lightness, never appears massive. In front and profile view bears general resemblance to well-blunted lean wedge, smooth, clean, nicely balanced. On sides tapers gradually and smoothly from ears to end of black nose. In profile top of backskull and top of muzzle lie in two approximately parallel, straight planes of equal length, divided by a slight stop or break. A mid-point between inside corners of eyes is the center of balance in length of head. End of smooth, well-rounded muzzle is blunt. Underjaw strong, clean-cut, depth of skull from brow to under part of jaw not excessive. Teeth good size, scissors bite. Slight prominence of eyebrows. Backskull flat, occipital bone not highly peaked. Width of backskull depends upon combined length of skull and muzzle, width less than length.

Eyes—Foreface chiseled to form a receptacle for eyes, placed obliquely to give required forward outlook. Except for blue merles, are matched in color, almond-shaped, medium size. Color dark, eye does not show a yellow ring or a sufficiently prominent haw to affect the dog's expression. Clear, bright appearance. Blue merles, dark brown preferable.

Ears—In proportion to head. In repose folded lengthwise, thrown back into frill. On alert, drawn well up on backskull, carried about three-quarters erect, about one-fourth tipping or "breaking" forward.

Neck — Firm, clean, muscular, sinewy, heavily frilled. Fairly long, carried upright with slight arch at nape.

Body—Firm, hard muscular, trifle long in proportion to height. Ribs well-rounded behind well-sloped shoulders, chest deep, extending to elbows. Back strong, level, powerful hips, thighs; croup sloped. Loin powerful, slightly arched.

Legs—Forelegs straight, muscular, fair amount of bone. Forearm moderately fleshy, pasterns flexible. Hind legs less fleshy, muscular at thighs, sinewy, hocks and stifles well bent. Comparatively small feet approximately oval in shape. Soles well padded, tough, toes well arched, close together.

Gait—Front feet tracking comparatively close together at the ground. Viewed from rear, hind legs, from hock joint to ground, move in comparatively close-together, parallel, vertical planes. Hind legs powerful, propelling. Viewed from side, gait smooth.

Tail — Moderately long, bone reaching to hock joint or below. Carried low when dog is quiet, the end having an upward twist or "swirl." When gaited it is carried gaily but not over back.

Coat—Abundant except on head and legs. Outer coat straight and harsh. Undercoat soft, furry, close together. Coat abundant on mane and frill. Face or mask smooth. Forelegs smooth and well feathered to back of pasterns. Hind legs smooth below hock joints. Hair on tail profuse and on hips long and bushy.

Color—Sable and white, tri-color, blue merle and white. There is no preference among them.

Size—Dogs are from 24 to 26" at the shoulder and weigh from 60 to 75 pounds. Females are from 22 to 24" at shoulder, weighing from 50 to 65 pounds.

DOBERMAN PINSCHER

CH. (CAN. AM.) KAUKAUNA'S ALDERBARAN by Ch. (Can. Am.) Defender of Jan-Har ex Lady Kaukauna. 3 BIS (all breed), 1 BIS (Specialty); 6 BCBP in Show, 7 BCB in Show, 47 BB, 26 BOS, 39 Group Placings (21 1sts). Stud service, top quality stock. Handler, Lorna Jackson. Bred and owned by Mrs. Beatrice England, Kaukauna Kennels Reg., Crediton, Ont.

Head Shape—Long, dry, resembling blunt wedge. When seen from front, head widens gradually toward base of ears. Top of skull flat, turning with slight stop to bridge of muzzle, with muzzle line extending parallel to top line of skull. Cheeks flat, muscular. Lips close to jaws. Jaws full, powerful, well filled under eyes. Nose, solid black in black dogs, dark brown in brown ones, dark gray in blue ones.

Eyes—Almond-shaped, moderately deep set, vigorous, energetic expression. Iris of uniform color, ranging from medium to darkest brown in black dogs, darker shade more desirable. In reds or blues, color of iris blends with markings.

Teeth—Strongly developed, white. Scissors bite. Forty-two teeth (22 in lower jaw, 20 in upper jaw).

Ears—Well trimmed, carried erect. Upper attachment of ear, when held erect, on a level with top of skull.

Neck—Carried upright, well muscled, dry. Well arched, nape of neck widening gradually toward body. Length of neck proportioned to body and head.

Body—Back short, firm, of sufficient width, muscular at loin extending in a straight line from withers to slightly rounded croup. Withers pronounced and forming highest point of body. Brisket full and broad, reaching deep to elbow. Chest broad, forechest well defined. Spring of ribs pronounced. Belly well tucked up, extending in a curved line from chest. Loins wide and muscled. Hips broad in proportion to body, breadth of hips being approximately breadth of body at rib spring. Tail, docked at approximately second joint, should appear to be continuation of spine.

Forequarters—Shoulder blade and upper arm meet at an angle of 90 degrees. Relative length of shoulder and upper arm as one to one. Legs, seen from the front and side, perfectly straight and parallel to each other from elbow to pastern; muscled and sinewy, round, heavy bone. In a normal position, and when gaiting, the elbow close to brisket. Pasterns firm, almost perpendicular position to ground. Feet well arched, compact, catlike.

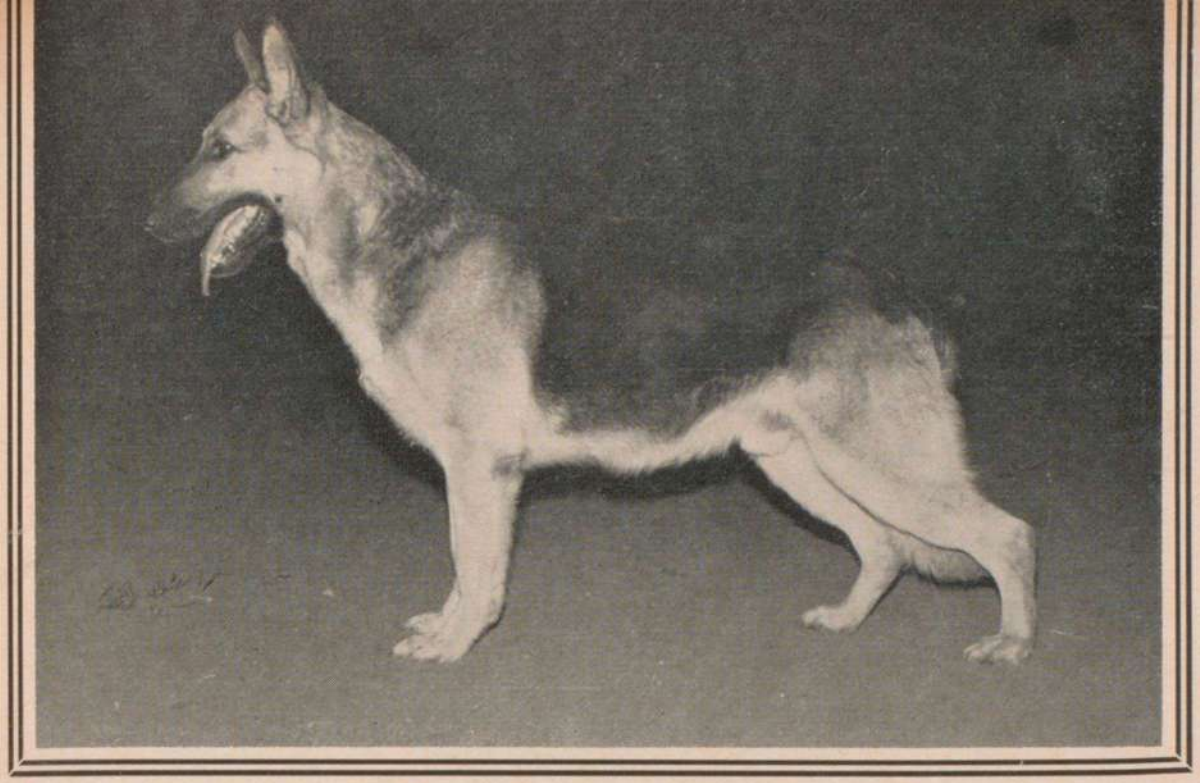

Hindquarters.—In balance with forequarters. Upper shanks long, wide muscled, clearly defined stifle. Hocks while the dog is at rest: hock to heel perpendicular to the ground. Upper shanks, lower shanks, and hocks parallel to each other. Hipbone falls away from spinal column at an angle of about 30 degrees. The upper shank at right angles to hip bone. Croup well filled out. Cat-feet.

Gait—Free, balanced, vigorous, good reach in forequarters, good driving power in hindquarters. When trotting, a strong rear action drive, with rotary motion of hindquarters. Each rear leg moves in line with foreleg on same side. Back strong, firm and level.

Coat, Color, Markings — Coat, smooth-haired, short, hard, thick, close-lying. Invisible gray undercoat on neck permissible. Black, brown, or blue. Markings, rust red, sharply defined, appearing above each eye, on muzzle, throat, forechest, legs, feet, below tail. White on chest, not exceeding one-half square inch, permissible.

Disqualifications

Shyness, viciousness. Overshot more than 3/16"; undershot more than 1/8".

CH. THOR'S HELIOS CD, CDX (2½ years old) by Hart-Wald's Trojan CD, CDX ex Ch. Cita of Elgee CD. 1962: 1 BIS, 1 BCB in Show; Group wins, 1 2nd, 4 3rd, 2 4th; 11 BB. Breeders, Natalie Maydanski and F.C.S. Young. Show puppies, training and handling. Handled and owned by Natalie Maydanski, Thor Kennels, R.R. 5, Edmonton, Alta.

General Appearance — Strong, agile, well muscled, alert. Well balanced.

Height—Dogs 25", females, 23" at shoulder. Weights, dogs 75 and 85 pounds, females, 60 and 70 pounds.

Coat—Normally a double coat, amount of undercoat varying with season of the year and proportion of time dog spends out of doors. Outer coat dense, hair straight, harsh, lying close to body. A slightly wavy outer coat, often of wiry texture, equally permissible. Head, including inner ear, foreface, legs, paws covered with short hair, neck with longer and thicker hair. Rear of forelegs and hind legs somewhat longer hair extending to pastern and hock respectively.

Proportion—Longer than tall, most desirable proportion as 10 is to 8½.

Angulation — (a) Forequarter: Shoulder blade long, laid flat against body with its rounded upper end in vertical line above elbow, sloping well forward to point where it joins upper arm. Withers high, shoulder blades meeting closely at top, upper arm set on at an angle approaching as nearly as possible a right angle. (b) Hindquarters: Angulation consists ideally of a series of sharp angles as far as relation of bones to each other is concerned, thigh bone parallels the shoulder blade while stifle bone parallels upper arm. Whole assembly of thigh, viewed from side, broad, both thigh and stifle well muscled, of proportionate length, forming as nearly as possible a right angle. The metacarpus strong, clean and short, hock joint clean-cut, sharply defined.

Head—Clean-cut, strong, characterized by nobility. In proportion to body not clumsy. Muzzle long, strong, lips firmly fitted, top line parallel with an imaginary elongation of line of forehead. Seen from front, forehead moderately arched, skull slopes into long wedge-shaped muzzle without abrupt stop. Jaws strongly developed. (a) Ears: The ears moderately pointed, open toward front, carried erect when at attention. (b) Eyes: Medium size, almond-shaped, set a little obliquely, not protruding. Dark as possible. (c) Teeth: Strong, 42 in number — 20 upper, 22 lower — strongly developed, scissor grip.

Neck—Strong, muscular, clean-cut, relatively long, proportionate in size to head. At attention or excited, head is raised and neck carried high, otherwise typical carriage is forward rather than up and but little higher than top of shoulder, particularly in motion.

Top Line—(a) Withers: Higher than, and sloping into, level back. (b) Back: Straight, strongly developed, section from wither to croup relatively short. (c) Loin: Viewed from top, broad, strong, blending smoothly into back without undue length between last rib and thigh, when viewed from side. (d) Croup: Long, gradually sloping. (e) Tail: Bushy, with last vertebra extended at least to hock joint, and usually below. Set smoothly into croup, low. At rest hangs in slight curve like a sabre. When excited or in motion, curve is accentuated and tail raised, but never lifted beyond a line at right angles with line of back.

Body—Gives an impression of depth and solidity without bulkiness. (a) Forechest: Commencing at prosternum, well-filled and carried well down between legs with no sense of hollowness. (b) Chest: Deep, capacious with ample room for lungs and heart. Well carried forward, with prosternum, or process of breastbone, showing ahead of shoulder when dog viewed from side. (c) Ribs: Well sprung, long, neither barrel-shaped nor too flat, carried down to breastbone, which reaches to elbow. Ribbing carried well back. (d) Abdomen: Firmly held. Bottom line moderately tucked up in flank.

Legs—(a) Bone straight, oval. Development in proportion to size of dog. (b) Pastern: Medium length, strong, springy. (c) Metacarpus: Short, clean, sharply defined, of great strength. (d) Feet: Rather

GREAT DANE

CH. CELESTE OF VI DAYNE (whelped Sept. 30/59), by Ch. Lillard Deacon of Visier ex Ch. Kendis Lady Gina. Consistently winning since her first BB in 1961. Breeder Violet Janice. Owned and handled by Agnes E. Misener, Kilcare Kennels, Woodlawn, Dartmouth, N.S.

1. GENERAL CONFORMATION

(a) General Appearance—Combines dignity, strength, elegance with great size; powerful, well-formed, smoothly muscled body. One of the giant breeds, but well-balanced, never appears clumsy. Spirited, courageous—never timid. Friendly, dependable. Great masculinity in dogs as compared to an impression of femininity in females. Male more massive throughout with larger frame and heavier bone. Ratio between length and height, square as possible. (b) **Color and Markings**—(i) Color: Brindle Danes. Base color ranging from light golden yellow to deep golden yellow always brindled with strong black cross stripes. (ii) Fawn Danes. Golden yellow up to deep golden yellow color with a deep black mask. Golden deep-yellow color always given preference. (iii) Blue Danes. Pure steel blue as far as possible without any tinge of yellow, black or mouse gray. (iv) Black Danes. Glossy black. (v) Harlequin Danes. Base color: pure white with black torn patches irregularly and well-distributed over the entire body; pure white neck preferred. The black patches should never be large enough to give the appearance of a blanket nor so small as to give a stippled or dappled effect. (c) **Size**—Male not less than 30" at shoulders, but preferable 32" or more, providing well proportioned to height. Female not less than 28" at shoulders, but preferable 30" or more, providing she is well proportioned to height. (d) **Substance**—Substance is that sufficiency of bone and muscle which rounds out a balance with frame. (e) **Condition of Coat**—Very short, thick, smooth, glossy.

2. MOVEMENT (a) **Gait**—Long, easy, springy stride with no tossing or rolling of body. Back li should move smoothly, parallel ground. Gait should deno strength and power. Rear le have drive. Forelegs track smoot ly and straight. Track in t parallel straight lines. (b) **Rear E (Croup, Legs, Paws)**—Croup fu slightly drooping and continue i perceptibly to tail root. Hind le first thighs broad, muscular. Se ond thighs strong, long. Seen fr side, angulation of first thigh wi body, of second thigh with fi thigh, and pastern root with s ond thigh very moderate. Fr rear, hock joints appear to be p fectly straight. (c) **Front E (Shoulders, Legs, Paws)**—Sho ders: Blades strong sloping a seen from side, form as nearly possible a right angle in its a culation with humerus. A li from upper tip of shoulder to bc of elbow joint as nearly perper

CH. BORSODI ERCES (imp) (3 years old), by Oregur ex Borsodi Bodros Lujza. Has only had one opponent in the breed but has placed in the Working Group 4 times (1 1st, 2 2nd, 1 3rd, 1 4th). Breeder, Mr. Jeno Kolos, Hungary. Erces available at stud. Reservations for puppies by him in 1963 accepted. Owned by Mr. and Mrs. Jack C. Anderson, Doron Kennels, 1316 Centre St. N., Calgary, Alta.

KOMONDOR

General Appearance —The Komondor is characterized by imposing strength, courageous demeanor and pleasing conformation. In general he is a big, muscular dog with plenty of bone and substance.

Nature and Characteristics — As a houseguard as well as a guardian of herds he is, when grown up, an earnest, courageous and very faithful dog. The young dog, however, is just as playful as any other puppy. He is much devoted to his master and will defend him against attack by any stranger. On account of this trait he is not used for driving the herds, but only for guarding them. His special task is to protect the animals, and he lives during the greater part of the year in the open air without protection against strange dogs and all kinds of beasts of prey.

Head—Covered with long hair, thus head looks somewhat short, in comparison to seemingly wide forehead. Skull somewhat arched if viewed from the side; forehead not wide, but appears wider through rich growth of hair. Stop moderate, muzzle somewhat shorter than length of skull. Top line of muzzle straight, about parallel with line of top of skull. Muzzle fairly square. Lips cover teeth closely, are black. Muzzle mostly covered by long hair, edges are black or steel blue-gray. Jaws powerful, teeth level and close together evenly.

Ears—Ears rather low set, hang along side of head. Medium-sized, surface covered with long hair.

Eyes—Eyes express fidelity. Medium-sized, almond-shaped, not too deeply set, surrounded by rough, unkempt hair. Iris is of coffee or darker brown color. Edges of eyelids slate-gray.

Muzzle—In comparison to length given in head description, muzzle wide, coarse, not pointed. Nostrils wide. Nose black.

Neck—Covered with long hair, muscular, medium length, moderately arched. Head erect.

Body—Powerful, deep chest, muscular and proportionately wide. Shoulders slope into neck without apparent protrusion. Body moderately long, level. Back and loins wide. Rump wide, muscular, moderately sloping towards root of tail. Body somewhat drawn up at rear.

Tail — Straight continuation of rump-line, reaches down to hocks slightly curved upwards at end. Covered with long hair, which when the dog is at ease almost touches ground. When dog excited tail raised up to level of back.

Forelegs — Straight, well boned, muscular. Viewed from any side, legs like vertical columns. Upper arm joins body closely. Legs covered by long, evenly hanging hair.

Hindquarters and Legs — Steely, strong bone structure covered with highly developed muscles, the legs evenly covered with long hair, hanging down in matted clods. Legs straight as viewed from rear. Stifles well bent. Body and legs about form a rectangle.

Feet—Strong, rather large, with close well-arched toes. Hind feet stronger, all covered with long hair. Nails black or slate-gray. Pads hard, elastic, black.

Coat—Long, soft woolly, dense hair of different length on different parts of body, inclination to entanglement and shagginess. Longer hair begins on head and ears and lengthens gradually on body, being longest on thighs and tail. Somewhat shorter, but still long hair on legs, muzzle and cheeks.

Color—White.

Size—The bigger the better, a minimum height of 25½ inches at top of shoulders for males and 23½" for females required.

Disqualifications

Blue-white eyes; color other than white.

CH. ROMY V.D. SCHURZ, by Int. Ch. Bob v.d. Warte
ex Helga v.d. Schurz. Has been shown 16 times, winning 1 BIS, 2 Group
1sts and 6 Group placings, with 12 BB.
Owned by Mr. and Mrs. R. W. Nutbeem, harbour beem Kennels,
Harbour Grace, Nfld.

Head—Broad and massive, the occipital bone well developed, no decided stop, muzzle short, clean cut, and rather square in shape, covered with short fine hair.

Coat — Flat and dense, of a coarsish texture and oily nature, and capable of resisting the water. If brushed the wrong way it should fall back into its place naturally.

Body — Well ribbed up with a broad back. A neck, strong, well set on to the shoulders and back, with strong muscular loins.

Forelegs—Perfectly straight, well covered with muscle, elbows in but well let down and feathered all down.

Hindquarters and Legs — Very strong; the legs should have great freedom of action, and a little feather. Slackness of loins and cowhock are a great defect.

Chest—Deep and fairly broad and well covered with hair, but not to such an extent as to form a frill.

Bone—Massive throughout but not to give a heavy inactive appearance.

Feet—Large and well shaped.

Tail—Of moderate length, reaching down a little below the hocks, it should be of fair thickness, and well covered with long hair, but not to form a flag. When the dog is standing still, and not excited, it should hang downwards with a slight curve at the end; but when the dog is in motion it should be carried a trifle up, and when he is excited straight out with a slight curve at the end.

Ears—Small, set well back, square with the skull, lie close to the head, and be covered with short hair and no fringe.

Eyes—Small, of a dark brown color, rather deeply set, and they should be rather widely apart.

Color—Dull jet black. A slight tinge of bronze, or a splash of white on chest and toes is not objectionable.

Height and Weight—A fair average height at the shoulders is 28" for a dog, and 26" for a female, fair average weight is dogs 140 to 150 pounds, females 110 to 120 pounds.

Other Than Black (Landseers) — Should in all respects follow the black except in color, which may be almost any, so long as it disqualifies for the black class, but the colors most to be encouraged are white and black or bronze. Beauty in markings to be taken greatly into consideration.

Black dogs that have only white toes and white breasts and white tip to tail, should be exhibited in the classes provided for "black."

general facts

Contrary to what the name implies, no record can be found of Newfoundlands being native to that Province, although it is assumed that the dog was the result of dogs, from ships of various countries, mingling and breeding with the native wolves. From this dubious beginning the breed was developed in England where breeders are proficient in producing the type of dogs they most desire.

Originally the Newfoundlands were all black but after an artist, Sir Edwin Landseer, painted a dog that looked like a Newfoundland but was black and white, the idea pleased many fanciers and the "Landseer" was developed.

The first recorded dog to be brought into America was in 1881.

CH. SILVERSHAG PIRATE PETE (whelped Nov. 1/60), by Am. Ch. Shepton Bobbibingo ex Greyfriars Jenny. Group wins — 3 1st, 2 2nd, 3 3rd, 1 4th; 19 BB (7 in the United States). Breeder, Dr. L. C. T. Forest. Handler, Mrs. Patricia Tripp. Stud service to approved bitches. Owned by Mr. John Descent, 323 Simons Rd., Calgary, Alta.

Skull — Capacious and rather squarely formed. Parts over eyes well arched and the whole well covered with hair.

Jaw—Fairly long, strong, square and truncated. Top well defined to avoid a Deerhound face.

Eyes—Vary according to color of dog. Very dark preferred, but in the glaucous or blue dogs a pearl, walleye or china eye is considered typical.

Nose — Always black, large, capacious.

Teeth — Strong, large, evenly placed, level in opposition.

Ears—Medium-sized, carried flat to side of head, coated moderately.

Legs — Forelegs dead straight, plenty of bone, removing body medium height from ground, without approaching legginess, well coated all around.

Feet — Small, round; toes well arched, pads thick, hard.

Tail — It is preferable that there should be none. Should never, however, exceed 1½" or 2" in grown dogs. When not natural-born bobtails, puppies should be docked at first joint from body and operation performed when they are three to four days old.

Neck and Shoulders—Neck fairly long, arched gracefully and well coated with hair. Shoulders sloping and narrow at points, the dog standing lower at shoulder than at loin.

Body—Rather short and very compact, ribs well sprung, brisket deep and capacious. Loin very stout, gently arched, hindquarters round and muscular with well-let-down hocks, hams densely coated with thick, long jacket in excess of any other part.

Coat—Profuse, and of a good hard texture; shaggy and free from curl. **Quality and texture of coat to be considered above mere profuseness.** The undercoat should be a waterproof pile, when not removed by grooming or season.

Color—Any shade of gray, grizzle, blue or blue-merled with or without white markings or in reverse.

Size—Twenty-two inches and upwards for dogs and slightly less for females. Type, character and symmetry are of the greatest importance and are on no account to be sacrificed to size alone.

General Appearance and Characteristics—Strong, compact-looking, of great symmetry, practically the same in measurement from shoulder to stern as in height, free from legginess or weaselness, very elastic in his gallop, but in walking or trotting has a characteristic ambling or pacing movement, bark loud, with a peculiar "pot-casse" ring in it. Taking him all round, he is profusely, but not **excessively** coated, thick-set, muscular, able-bodied with a most intelligent expression, free from all Poodle or Deerhound character. **Soundness of greatest importance.**

general facts

Believed to have been originated about 1800, the Old English Sheepdog made its first official appearance in the United States at Westminster, in 1903, with an entry of 56. Shortly after 1900 the breed was introduced into Canada and met with immediate success. The Canadian climate is particularly suitable for the coat and it is possible to keep the dogs in full coat for the majority of the year. Not a familiar sight in Canada, in other countries the Old English is frequently seen in the Obedience ring, in which sport he excels. His unique appearance and sunny disposition never fail to endear him to spectators around the ring.

CH. DORONARUA BETYAR (whelped Aug. 3/60) by Ch. Zumpel v Lechgau CD (imp) ex Ch. Vandor Sari of Chapel Hill CD. BCBP in Group, 2nd in Group. Retired from show ring until coat develops. Breeders, Mr. and Mrs. Jack C. Anderson. Handled by Mrs. E. Kemenes-Kettner. Puppies for sale. Stud service. Owned by Bakony Kennels Ltd., West Silver Springs Rd., R.R. 4, Calgary, Alta.

Size—Medium size—Males: 16" to 18". Females: 14" to 16". Variations of AN INCH above or below the standard heights are acceptable.

Weight—Dogs between 20 and 30 pounds for both sexes, sometimes up to 35 pounds.

Head—Short, fairly small. Completely covered with hair. Skull in proportion to muzzle, not too broad. Stop, slight. Muzzle, not too pointed, covered by long hair. Nose blunt, BLACK. Flews tight, BLACK.

Ears—Pendant, not too close to head, fairly high set, V-shaped, medium-sized, covered with long hair.

Eyes—Medium sized, dark-brown; edges of eyelids black, bushy eyebrows cover eyes completely.

Teeth—Strong developed, large for size of dog; level or scissors bite.

Structure—Although frame hidden beneath mantle of hair, general appearance should suggest vigorous well-proportioned body.

Neck—Medium long, muscular, slightly arched, covered with long hair, running into clean-cut sloping shoulders, elbows set closely to chest. Head erect.

Chest — Fairly broad and deep. Ribs well sprung and deep.

Body — Back medium length, straight, muscular. Rump slightly sloping towards root of tail; moderately broad loins, well tucked up. Body and legs form about a quadrangle.

Forelegs—Very straight; not high; well-boned, muscular. Viewed from any side legs are like vertical columns. Upper leg joins body closely without loose elbows. Covered all around with long hair.

Hindquarters — Well developed; moderately broad through stifle, which is well bent and muscular; hocks well developed; covered all around with long hair.

Feet — Strong, round, compact, hard pads, well furnished with hair between toes. Nails strong, black.

Tail—Medium length, carried gay over back curling slightly to one side. Covered with long hair.

Gait—Gay and bouncy; dog lifts feet well up. Capable of great speed and show great stamina.

Coat—Felt-like, growing in narrow or wide flat strands or round tied cords. Uniform appearance. Hair same texture on all parts of body and be of a natural-original solid structure. Long all over body. A combed-out or brushed-out coat is as undesirable as a neglected coat. Undercoat, which resembles wool, soft and dense, grows out and tangles with outer coat, which is of fairly coarse texture, not straight or silky, free of curls. Through this the strands or cords form naturally.

Color—Black, reddish-black, grey-reddish-black, all shades of grey and occasionally white. "Reddish-black" and grey-reddish-black are most typical colors.

Disqualifications

Any other colors than above mentioned; particolors, etc.

CH. MOONLIGHT HAVEN'S HI FI (whelped Nov. 24/57), by Omar Fallon v Schwarzwald Hof ex Barriley Classic. Breeder, Mrs. R. Crumpton. BB, 12 times. Latest victory, BB 2nd Annual Booster Show, St. Bernard Club of Ontario, March 1963, (13 entries). Handled by Mrs. B. Sorrell. Owned by Dr. and Mrs. B. Sorrell, 8 Pinevale Rd., Willowdale, Ont.

Head—Powerful, imposing. Massive skull wide, slightly arched, sides slope into strongly developed, high cheek bones. Occiput moderately developed. Supra-orbital ridge strongly developed forms nearly a right angle with horizontal axis of head. Deeply imbedded between eyes starting at root of muzzle, furrow runs over whole skull, strongly marked in first half, gradually disappearing toward base of occiput. Lines at sides of head diverge considerably from outer corner of eyes toward back of head. Skin of forehead, above eyes, forms rather noticeable wrinkles which converge toward furrow. Slope from skull to muzzle sudden, rather steep. Muzzle short, does not taper, vertical depth at root greater than length. Bridge greater than length, straight; in some dogs, occasionally, slightly broken. Flews of upper jaw strongly developed, curve into lower edge, slightly overhanging. Flews of lower jaw not deeply pendant. Bite strong and, in proportion to conformation of head, only moderately developed. Black roof to mouth desirable.

Nose — Very substantial, broad, wide open nostrils, black.

Ears — Medium size, high set, strongly developed burr at base. Stand slightly away from head at base, then drop with sharp bend to side and cling to head without a turn. Flap tender, forms a rounded triangle, slightly elongated toward point, front edge lying firmly to head, back edge may stand somewhat away from head, especially when the dog is at attention.

Eyes—More to front than sides, medium size, dark brown, set moderately deep. Lower eyelids, as a rule, do not close completely and, if that is the case, form an angular wrinkle toward the inner corner of eye.

Neck—Set high, very strong, in action carried erect. Otherwise horizontally or slightly downward. Junction of head and neck distinctly marked by an indentation. Nape of neck very muscular, rounded at sides. Dewlap of throat and neck well-pronounced.

Shoulders — Sloping, broad, very muscular, powerful. Withers strongly pronounced.

Chest—Well arched, moderately deep, not reaching below elbows.

Back—Broad, perfectly straight as far as haunches, from there gently sloping to rump, merging imperceptibly into root of tail.

Hindquarters — Well-developed. Legs muscular.

Belly—Distinctly set off from very powerful loin section, only little drawn up.

Tail — Starting broad and powerful directly from the rump is long, very heavy, ending in powerful tip. In repose hangs straight down, turning gently upward in lower third only. In action more or less turned upward.

Forearms—Powerful, extraordinarily muscular.

Forelegs — Straight, strong.

Hind Legs — Hocks of moderate angulation.

Feet—Broad, strong toes, moderately closed, rather high knuckles.

Coat—Dense, short-haired (stockhaarig), lying smooth, tough. Thighs slightly bushy. Tail at root has longer and denser hair which gradually becomes shorter toward tip. Tail appears bushy, not forming a flag.

Color—White with red or red with white, the red in its various

more on page 90

CH. SNOWLAND ZISKA BUCK (imp.) (whelped May 6/55), by Snowland Sarnac ex Chloe of the Tundras. Imported from England at 14 weeks, his numerous achievements include many BB and all 4 group placements, also BIS in 1962. Breeder, Mrs. Tapley. Exclusive handler, Lorna Jackson. Top winning Samoyed in Canadian show competition, 1962. Owned by Mrs. Betty A. Dickson, Ziska Kennels, R.R. 1, Dorchester, Ontario.

SAMOYED

General Appearance — A picture of beauty, alterness and strength, with agility, dignity and grace. Coat heavy, weather resistant, of good quality rather than quantity. Male carries more of a "ruff" than the female. Not be long in the back as a weak back would make him practically useless for his legitimate work, but at the same time a close coupled body would also place him at a great disadvantage as a draft dog. Breeders should aim for the happy medium, a body not long but muscular, allowing liberty, with a deep chest and well sprung ribs, strong arched neck, straight front and especially strong loins.

Appearance of being capable of great endurance but free from coarseness. Because of depth of chest required, legs moderately long. Hindquarters particularly well developed, stifles well bent.

Gait—Good, well-balanced movement. An easy, agile stride that is well timed. The gait free with a good reach in forequarters and a sound, driving power in hindquarters.

Coat—Body covered with a thick, close, soft, short undercoat, with harsh hair growing through it, forming outer coat, which should stand straight away from body and be quite free from curl. Legs have good feathering.

Head—Powerful and wedge shaped with a broad, flat skull, muzzle of medium length, a tapering foreface, not too sharply defined. Stop not too abrupt—nevertheless well defined. Ears not too long but rounded at tips, set well apart and well covered inside with hair. Eyes dark, set well apart and deep with alert intelligent expression. Lips black, flews should not drop predominantly at corners of mouth. Hair short, smooth before ears. Nose and eyerims black for preference, but may be brown. Strong jaws with level teeth.

Back—Medium in length, broad and very muscular. Females may be slightly longer in back than males.

Chest and Ribs—Chest broad and deep. Ribs well sprung, giving plenty of heart and lung room.

Hindquarters — Very muscular, stifles well let down, cowhocks or straight stifles should be severely penalized.

Forelegs—Straight and muscular. Good bone. In or out at the elbow to be severely penalized.

Feet—Long, flattish and slightly spread out. Soles well padded with hair.

Tail—Long and profuse, carried over the back when alert, sometimes dropped when at rest. A judge should see the tail over the back once when judging. A double hook should be penalized.

Size and Weight—Dogs 20" to 22" at the shoulder; females 18" to 20"; weight in proportion to size.

Color—Pure white, cream, biscuit, or white and biscuit.

Disqualifications

Blue eyes. Dew claws on the hind legs. Any color other than pure white, cream, biscuit or white and biscuit.

CH. (CAN. AM.) ROSSLYNN'S MAGIC TOUCH (whelped July 2/60), by Ch. (Can. Am.) Nashcrest Golden Note ex Ch. (Can. Am.) Rosslynn's Dainty's Dividend. Canadian Championship completed at 7½ months in 3 straight shows. BB, DC&SSA Specialty March, 1961 Toronto; BB, DC&SSA Specialty April, 1963 Montreal. American Championship completed at Chicago International, April 1963 going BOS for 5 pts. Breeder, Douglas G. Ross. Handler, Wm. J. Trainer. Stud service; puppies by reservation. Owned by Mrs. F. H. Mingie, Summit Kennels, Centerville, Mass.

Size—Between 13 and 16" at shoulder.

Coat—Double, outer coat long, straight, harsh hair; undercoat short, furry, dense. Hair on face, tips of ears and feet smooth. Mane, frill abundant. Forelegs well feathered, hind legs heavily so, smooth below hock joint. Hair on tail profuse.

Color — Black, blue merle, and sable; marked with varying amounts of white and/or tan.

Temperament—Intensely loyal, affectionate, responsive to owner. May be reserved toward strangers.

Head—Refined, viewed from top or side, long, blunt wedge tapering slightly from ears to black nose.

Skull and Muzzle—Top of skull flat. Cheeks flat, merge smoothly into well-rounded muzzle. Skull and muzzle of equal length. In profile top line of skull parallels top line of muzzle, slight but definite stop. Jaws clean, powerful. Deep, well-developed underjaw, rounded at chin, should extend to base of nostril. Lips tight. Scissors bite.

Eyes—Medium size with dark, almond-shaped rims, set somewhat obliquely in skull. Dark, blue or merle eyes permissible in blue merles only.

Ears—Small, flexible, placed high, carried three-fourths erect, tips breaking forward.

Neck—Muscular, arched, sufficient length to carry head proudly.

Body—Should appear moderately long as measured from shoulder joint to ischium; much of this length actually due to proper angulation and breadth of shoulder and hindquarter, back itself comparatively short, level, strongly muscled. Chest deep, brisket reaching to point of elbow. Ribs well sprung, flattened at lower half. Abdomen moderately tucked up.

Forequarters—From withers shoulder blades slope at a 45-degree angle forward and downward to shoulder joint. At withers they are separated only by vertebra, must slope outward sufficiently to accommodate spring of rib. Upper arm should join shoulder blade at as nearly as possible a right angle. Elbow joint equidistant from ground or from withers. Forelegs straight, muscular, clean, strong bone. Pasterns strong, sinewy, flexible.

Feet—Oval, compact, toes well arched, fitting tightly together. Pads deep, tough, nails hard, strong.

Hindquarters—Slight arch at loins, croup slopes gradually to rear. Hipbone (pelvis) set at a 30-degree angle to spine. Thigh broad, muscular. Thighbone set into pelvis at a right angle corresponding to angle of shoulder blade and upper arm. Stifle bones join thighbone, angled at stifle joint. Over-all length of stifle at least equal length of thighbone, preferably should slightly exceed it. Hock joint clean-cut, angular, sinewy, good bone, strong ligamentation. Hock short, straight.

Tail—Sufficiently long so that last vertebra will reach hock joint. Carriage of tail at rest straight down or in slight upward curve. When dog alert tail normally lifted.

SIBERIAN HUSKY

CH. RACECREST'S BANDIT (whelped March 25/61), by Ch. Snowridge Chiefson; grandsire, Ch. Manawan's Chieftain. 10 BB; shown to Canadian Championship at 15 months, undefeated in classes, 3 Group placings. At first show in U.S.A. (1963 Chicago International) WD, BW. Breed leader all-breed competition Canada, 1962. Handler, Lorna Jackson. Quality puppies, stud service. Bred and owned by Mrs. J. W. Anderson, "Racecrest" Reg'd., Box 318, Ancaster, Ont.

General Appearance, Conduct — Alert, gracefully built, medium-sized, quick, light on feet, free, graceful in action. Strong, moderately compact body; deep, strong chest; well-muscled shoulders, hindquarters; straight, strong legs, medium bone. Coat dense, very soft, brush tail carried curved over back when at attention, trailing in repose. Head finely chiseled, often foxlike appearance, eyes keen, friendly expression. Gait free, tireless, almost effortless when free or on loose leash; showing great strength when pulling; trot brisk, smooth, quite fast.

HEAD. 1. Skull—Medium size in proportion to body; width between ears medium to narrow, gradually tapering to eyes, moderately rounded. Muzzle medium length. Skull and muzzle finely chiseled. Lips dark, close-fitting; jaws, teeth strong, scissors bite. **2. Ears** — Medium size, erect, close-fitting, high on head, well covered with hair on inside. Arch at back of ears. Slightly taller than width at base, moderately rounded at tips. When dog at attention, ears usually carried practically parallel on top of head, with inner edges quite close together at base. **3. Eyes**—Brown or blue, one blue and one brown eye permissible, not preferable; set only very slightly obliquely in skull. Keen, friendly and foxlike expression. **4. Nose**—Black for preference; brown allowed in occasional specimens of reddish coloring; flesh-colored nose and eye rims allowed in white dogs. Some dogs, especially black-and-white ones have "snow nose," or "smudge nose," **i.e.** a nose normally solid black, but acquiring a pink streak in winter. Permissible, not preferable.

Coat—Thick, soft, double coat; soft, dense, downy under coat of fur next to skin; an outer coat soft, smooth texture, giving a smooth, full-furred appearance and clean-cut outline. Usually medium in length; longer coat allowed, but texture must remain same in any length.

Tail—Well-furred brush carried over back in sickle curve when running or at attention, trailing out behind when working or in repose. Hair on tail usually medium length, varying somewhat with length of dog's coat.

Color—All colors and white, and all markings.

Chest, Ribs, Shoulders — Chest deep, strong, not too broad. Ribs well arched, deep. Shoulders well developed, powerful.

Back, Loins, Quarters—Back medium length, and strongly developed. Loins well muscled, slightly arched, should carry no excess weight of fat. Hindquarters powerful, showing good angulation.

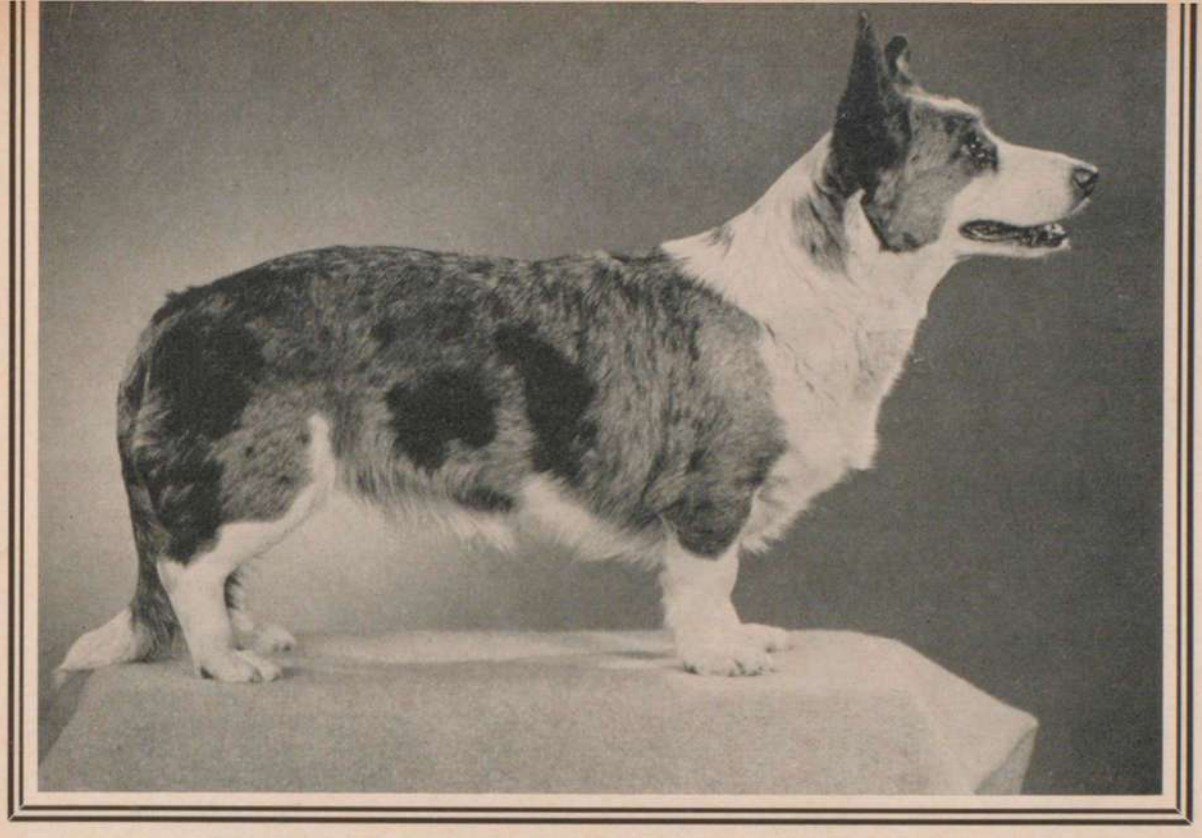

Legs—Straight, well muscled, good bone. Stifles well bent.

Feet—Oblong in shape, well furred between pads which are tough, thickly cushioned; compact; neither too large nor too small. Somewhat webbed between toes. Good feet are very important, feet should always be examined in the ring.

Height—Dogs, 21 to 23½" at shoulder; females 20 to 22".

Weight—Dogs, 45 to 60 pounds; females, 35 to 50 pounds.

Disqualification: Weight over 60 pounds in a male or over 50 in a female. (Anything over these weights indicates cross-breeding.) Height and weight are **very** important, the upper limit in each must be rigidly maintained.

CH. DOGDENE BLUE SUGAR N' SPICE CD, by Kentwood Clogwyn ex Rozavel Blue Smoke. Obtained first leg of her CD 10 days after commencing training. Has 2 legs on American degree, starting CDX shortly. Bred by Thelma Gray in England, imported in dam by Mrs. J. Head. Puppies expected shortly. Owned by Mrs. Agness Hammond Connaughton, My Little Kennels, Ghost River Ranch, Cochrane, Alta.

Head—To be foxy in shape and appearance. Skull to be fairly wide between the ears and flat, tapering toward the eyes. Muzzle to measure about 3" in length (or in proportion to skull as 3 to 5) and to taper toward the snout. Nose to be rather pointed. Teeth—strong, level and sound.
Eyes—To be of medium size, but giving a sharp and watchful expression, preferably dark in color but clear. Silver eyes permissible in blue merles.
Ears—Proportionate to size of dog and prominent; preferably pointed at the tips; moderately wide at the base; carried erect and set about 3½" apart and well back so that they can be laid flat along neck, sloping forward slightly when erect.
Neck—To be fairly long and without throatiness, fitting into well sloped and strong muscular shoulders.
Front—To be slightly bowed, with strong bone; Chest to be moderately broad with prominent breastbone.
Body—To be fairly long and strong, with deep brisket, well sprung ribs and clearly defined waist. Hindquarters to be strong with muscular thighs.
Feet—To be round and well-padded. Legs—short and strong (front forelegs slightly bowed or straight). Dewclaws removed.
Tail—To be moderately long and set in line with body (not curled over back) and resembling that of a fox.
Coat—Short or medium, of hard texture. Any color except pure white. Other points being equal, preference to be given in following order: Red (sable, fawn or golden); brindle; black and tan; black and white; blue merles. (White markings are considered to enhance the general appearance.)
Height—To be as near as possible to 12" at shoulder.
Weight—Dogs, 18 to 25 pounds; females, 15 to 22 pounds.
General Appearance and Expression—To be as foxy as possible; alertness essential, the body to measure about 34 to 36" from point of nose to tip of tail.
Fault—(Examples.) Overshot or undershot mouth; high, peaked occiput; prominent cheeks, low, flat forehead; expressionless eyes, crooked forearms; splayed feet; tail curled over back; silky coat, etc.

general facts

The oldest of the two Welsh Corgi breeds comes from Cardiganshire, hence the name Cardigan. It is believed he was brought into Britain from Central Europe when the Celts invaded Wales about 1200 B.C.

Used as a cattle dog, biting at the heels of the cattle, his short stature allowed him to escape the kicks coming his way by dropping to the ground.

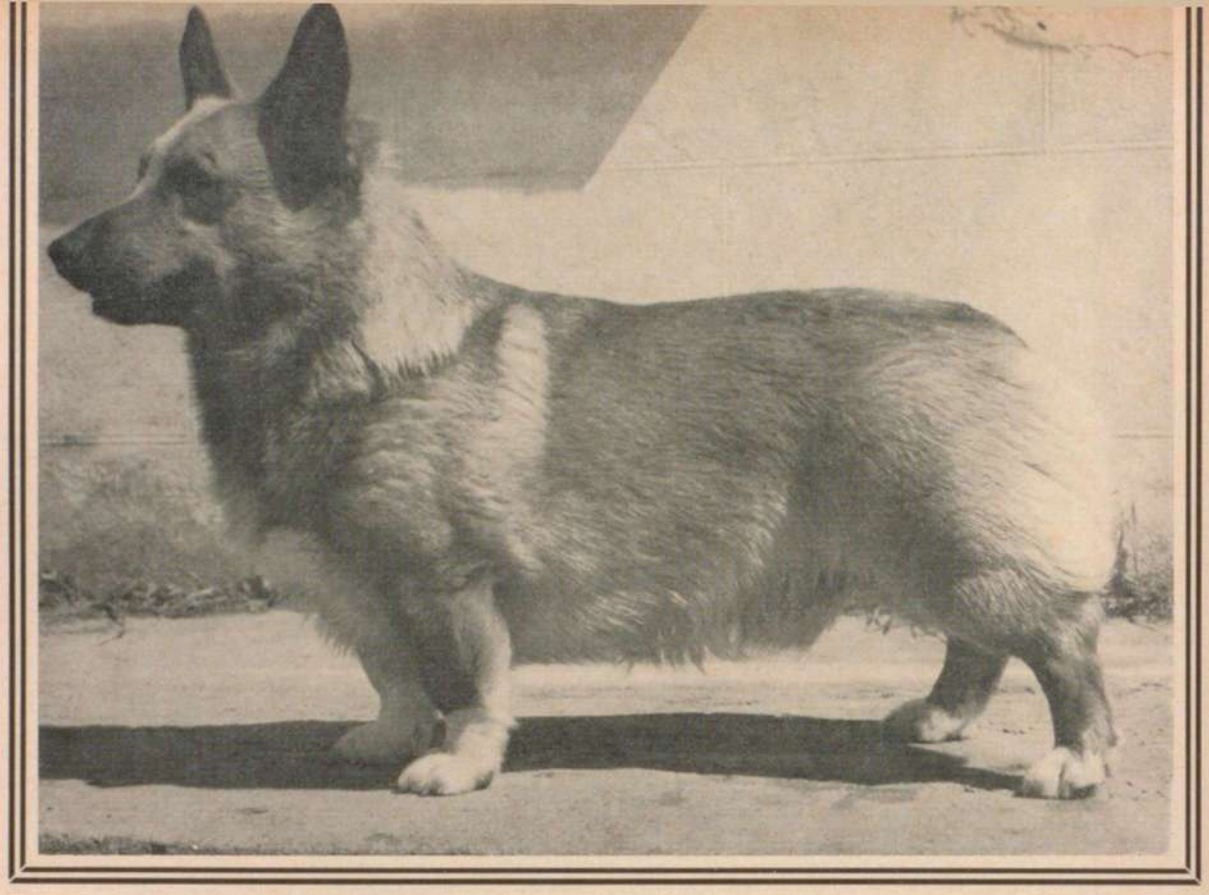

It would appear that the original stock disappeared after the ranges of Wales were fenced. To save the stock, crosses were made with other herding dogs and Dachshunds. Many claim the breed to be a member of the Dachshund family but others as positively deny this.

The name itself is somewhat obscured, but the most readily believed story is that the word "Corgi" is of Celtic origin meaning "dwarf dog".

This completely utility dog spent many daytime hours driving the cattle on the long trip to markets in London and the nights guarding his charges from would be marauders.

The main difference between this breed and his popular cousin is the long tail, a difference in color and texture of coat.

WELSH CORGI (PEMBROKE)

CH. LEES RHINOG AMBASSADOR (imp.), by Int. Ch. Lees Symphony ex Rhinog Welsh Moel. Shown 7 times in 1962 — 5 Group placings including 1st Group Specialty over 140 dogs. Unbeaten in breed last 10 shows. Top winning Corgi, Canada, 1962. Owned by Peter and Rosalie Harvie, Polruan Kennels (Greyhounds and Welsh Corgis), R.R. 5, Barrie, Ont. (Greyhound puppies for sale).

General Appearance — Low-set, strong, sturdily built, alert and active, giving an impression of substance and stamina in a small space; outlook bold, expression intelligent and workmanlike. The movement should be free and active, elbows fitting closely to the sides, neither loose nor tied. Forelegs should move well forward, without too much lift, in unison with thrusting action of hind legs.

Head and Skull—Head to be foxy in shape and appearance, with alert and intelligent expression, skull to be fairly wide and flat between the ears; moderate amount of stop. Length of foreface to be in proportion to the skull as three is to five. Muzzle slightly tapering. Nose black.

Eyes—Well set, medium size, hazel in color and blending with color of coat.

Ears — Pricked, medium-sized, slightly pointed. A line drawn from the tip of the nose through the eye should, if extended, pass through, or close to, the tip of the ear.

Mouth—Teeth level, or with the inner side of the upper front teeth resting closely on the front of the under ones.

Neck—Fairly long.

Forequarters—Legs short and as straight as possible. "Straight as possible" means straight as soundness and deep broad chest will permit. It does not mean terrier-straight. Ample bone carried right down to the feet. Elbows should fit closely to the sides, neither loose nor tied. Forearm should curve slightly round the chest.

Body—Of medium length, with well-sprung ribs. Not short-coupled or terrierlike. Level top line. Chest broad and deep, well let down between the forelegs.

Hindquarters—Strong and flexible, slightly tapering. Legs short. Ample bone carried right down to the feet. Hocks straight when viewed from behind.

Feet—Oval, the two center toes slightly in advance of two outer toes, pads strong and well arched. Nails short.

Tail—Short, preferably natural.

Coat—Of medium length and dense; not wiry.

Color—Self colors in red, sable, fawn, black and tan, or with white markings on legs, chest and neck. Some white on head and foreface is permissible.

Weight and size—Dogs, 20 to 24 pounds; females, 18 to 22 pounds. Height, from 10 to 12" at shoulder.

general facts

Coming from Pembrokeshire, in South Wales, this often tailess dog with the bright eyes and devoted temperament is fast becoming one of the most popular breeds. Since King George VI presented his two daughters with Corgis, the breed has led the list in England.

Frequently referred to as the Welsh heeler, he dates back to about 920 A.D. In 1928 the breed was admitted into the English Kennel Club register and shortly after appeared in America.

The true meaning of the name "Corgi" seems to be veiled in mystery. Some fanciers claim it was taken from "Cur Dog", which was not meant to be derogatory but instead was the pet name given to all working dogs. However, the more popular belief is that it is of Celtic origin, meaning dwarf dog.

At one time English K.C. law prohibited docking the tails of any pups born with more than a stump but it has now become legal to do so. This has done much to improve the breed in England for it was a common sight to see dogs at shows with tails of varying lengths.

BELGIAN SHEEPDOG

Skull—Flattened.
Stop—Moderate.
Head, Muzzle—Head in proportion to body: long, moderately pointed muzzle. Jaws strong. Lips tight.
Eyes—Brown, medium size.
Ears—Triangular, stiff, erect, well placed.
Neck—Round, outstretched.
Top Line—Back, loins, hips horizontal, large, powerful, medium length.
Tail—Strong at base, medium length.
Breast—Narrow.
Chest—Not broad, deep, well let down.
Abdomen—Moderate development.
Shoulders—Long oblique, forming a sharp angle with upper arm.
Arms—Governed exactly by length of body.
Forearms—Long, strong moderately heavy from elbow to pastern.
Hindquarters, Thighs — Strong, well muscled.
Legs—Long, strong.
Feet—Round, compact (cat-footed); well padded, straight in line with body and forearm.
Hair — Abundant, close. Undercoat dense.
Teeth—Strong, regular, even.

DISTINCTIVE CHARACTERISTICS — GROENENDAEL

Long-haired—Color—(a) Black. Some white hairs on chest and hind feet allowed. Long, smooth, straight and flat over entire surface of body, except on head, outside of ears and lower part of legs, where it is short. Opening of ear protected by tufts of hair. Neck adorned with long, abundant hair. Back of forearm ornamented with fringe of long hair from elbow to level of knee. Hindquarters trimmed with long, abundant hair forming what is known as breeches. Tail heavily plumed. (b) Fawn. (c) Any other color.

DISTINCTIVE CHARACTERISTICS— MALINOIS

Short-haired—Color—(a) Brindled fawn with black mask. Besides general characteristics of breed, this variety recognized by the hair, short over entire body, notably on head and lower part of limbs; half-length elsewhere and more furred around neck, tail. Back of hind legs fringed with long hair. (b) Fawn. (c) Any other color.

BOUVIER DES FLANDRES

Head—Medium long, skull slightly longer than muzzle.
Skull—Almost flat on top, moderately wide between ears, sloping slightly toward muzzle. Brow noticeably arched over eyes. Stop shallow, under-eye fill-in good.
Ears—Rough-coated, set high on head, cropped to triangular contour. Stand erect, carried straight up.
Eyes—Neither protruding nor sunken, set trifle obliquely in skull, medium size, nearly oval. Dark nut-brown.
Muzzle—Wide, deep, well filled out, width narrowing gradually towards tip of nose. Cheeks clean or flat-sided, jaws powerful, lips dry, tight-fitting.
Teeth—Strong, white, canines set well apart, scissors bite.
Nose—Black, well developed, nostrils wide open. Across top, contour trifle rounded.
Neck, Shoulders—Neck well rounded, slightly arched, carried almost upright, thickness gradually increasing as fits into shoulders. Clean, dry at throat. Shoulders long, sloping.
Body, Tail—Brisket deep, extending down at least to point of elbows, moderate width.
Back—Short, strong, straight.
Loins—Short, taut, slightly arched in top line, rump broad, square. Ribs deep, well sprung.
Tail—Set high, carried up, docked to about 4".
Legs, Feet—Leg bones, moderate in girth, made to appear heavy because covering with thick, rough hair.
Forelegs—Straight viewed from front or side.
Hindlegs—Hindquarters firm, well muscled, large, powerful hams. Legs strong, sturdy, hocks well let down, wide apart. Slightly angulated at stifle and hock joints. From back absolutely parallel.
Feet—Round, compact, toes arched, close. Nails black, pads thick, tough.
Coat—Rough, tousled, unkempt.
Topcoat—Harsh, rough, wiry, so thick when separated skin hardly visible.
Undercoat—Fine, soft, thicker in winter. On skull hair shorter, almost smooth. On brows longer, forming eyebrows. Longer growth on muzzle, underjaw form moustache, beard. On legs thick, rough, on feet rather short.
Color—From fawn to black; pepper and salt, gray and brindle. White star on chest allowed.
Height—Dogs from 23½" to 27½"; females minimum of 22¾".

BRIARD

Head—Large, rather long. Stop well marked, placed at equal distance from top of head and tip of nose. Forehead slightly rounded. Line from stop to tip of nose straight. Teeth strong, white, meeting even. Nose rather square, black. Hair heavy, long on top of head, ears, around muzzle, forming eyebrows standing out. Eyes horizontal, well opened, dark, rather large; intelligent, gentle. Ears placed high.
Conformation—Neck muscular, distinct from shoulders. Chest broad, deep. Back straight. Rump slightly sloped. Legs muscular, heavy bones. Hock not too near ground, making well-marked angle, leg below hock not quite vertical.
Tail—Well feathered, carried low, curled at end, tip when straightened reaching to point of hock.
Feet—Strong, round, toes close together, hard pads; nails black.
Coat—Long, slightly wavy, stiff, strong.
Color—All solid colors, except white. Dark colors preferable. Usual colors: black, and black with some white hairs, dark and light gray, tawny, and combinations of two of these colors, provided there are no marked spots and transition from one to the other takes place gradually and symmetrically.
Dewclaws—Two dewclaws on each hind leg required.
Size—Height at shoulders: Dogs, 23 to 27"; females, 22 to 25½". Young dogs may be below minimum.
Disqualifications
Size below limit. Absence of dewclaws. Short hair on head, face or feet. Tail lacking or cut. Nose light in color or spotted. Eyes spotted. Hair curled. White hair on feet. Spotted colors of the coat.

COLLIE (Smooth)

The Smooth Variety of Collie is judged by the same Standard as the Rough Variety, except that the references to the quantity and the distribution of the coat are not applicable to the Smooth Variety, which has a hard, dense, smooth coat.

ESKIMO

Head — Well proportioned, broad, wedge-shaped, flat skull, powerful jaws. Large black or brown nose. Lips black or brown. Muzzle medium length.
Eyes—Small, deep set.
Ears—Short, firm, carried erect, turned forward.
Neck—Short, heavy, muscular.
Forequarters—Broad, big-boned and muscular. Forelegs straight.
Chest—Deep, broad, ribs well sprung.
Tail—Large, bushy, carried up or curled over back.
Hindquarters—Medium length, heavy, muscular. Stifles well bent.
Paws—Large, thick pads, well protected with hair.
Coat—Heavy covering of master hair varying from 3" to 6" in length. Some specimens are found in Northern Labrador with a long, shaggy coat of master hair averaging 6" in length. Dense undercoat of wool varying from 1" to 2" in length.
Color, Markings—All known dog colors: black, white, black and white, wolf gray, blue gray, all shades of tan or buff; all combinations of these colors.
Size—Shoulder height for males, 22 to 25"; females, 20 to 23".

GREAT PYRENEES

Head—Large, wedge-shaped, 10" to 11" from dome to point of nose, rounding crown, furrow slightly developed, no apparent stop.
Cheeks—Flat.
Ears—V-shaped, rounded at tips, medium size, set parallel with eyes, carried low, close to head except when raised at attention.
Eyes—Medium size, set slightly obliquely, dark rich brown, with close eyelids, well pigmented.
Lips—Close-fitting, edged with black.
Dewlaps—Developed but little.
The head is in brief that of a brown bear, with the ears falling down.
Neck—Short, stout, muscular.
Body—Well-placed shoulders set obliquely, close to body.
Back, Loin—Well coupled, straight, broad.
Haunches—Fairly prominent.
Rump—Sloping slightly.
Ribs—Flat-sided.
Chest—Deep.
Tail—Sufficient length to hang below hocks, well plumed, carried low in repose, curled high over back, "making the wheel" when alert.
Coat—Heavy fine white undercoat,

long flat thick outer coat of coarser hair, straight or slightly undulating.
Size—Average height at the shoulder is 27" to 32" for dogs, and 25" to 29" for females. Average length from shoulder blades to root of tail same as height in any given specimen. Average girth is 36" to 42" for dogs and 32" to 36" for females.

KUVASZ

Head—In proportion to body, skull broad, flat.
Muzzle—Clean cut, rather square, covered with short, fine hair.
Ears—Rather small, set well back, folded over level with top of skull, lying close to head, covered with fine, short hair, no fringe.
Eyes—Medium size, set slightly obliquely, rather wide apart, dark as possible.
Nose—Nostrils well developed. Nose together with flews black.
Color—Pure white.
Coat—Rather long on neck and croup, little shorter and slightly wavy on sides.
Body—Well ribbed up, fairly broad back, neck fairly short, strong, well set on sloping shoulders, strong muscular loins.
Forelegs—Strong bone, straight, well muscled, elbows in but well let down. Hair short on front and sides of legs. Slightly feathered on back of legs.
Hindquarters—Strong, legs have great freedom of action.
Chest—Deep, fairly broad.
Feet—Strong, well shaped.
Tail—Of moderate length reaching a little below hocks, covered with thick, fairly long hair.
Height—Dogs about 26" at shoulder, females somewhat less.

MASTIFF

Head—In general outline massive appearance when viewed from any angle. Breadth desired.
Skull—Broad, somewhat rounded between ears, forehead slightly curved, showing marked wrinkles. Brows moderately raised. Muscles of temples well developed, those of cheeks powerful. Arch across skull flattened curve, furrow up center of forehead, from between eyes to halfway up skull.
Ears—Small, V-shaped, rounded at tips. Leather moderately thin, set widely apart at highest points on sides of skull continuing outline across summit. Lie close to cheeks when in repose. Ears dark, blacker the better, conforming to color of muzzle.
Eyes—Wide apart, medium size. Stop well marked. Brown, darker the better.
Face, Muzzle—Short, broad under eyes and running nearly equal in width to end of nose. Blunt, cut off square, forming a right angle with upper line of face. Great depth from point of nose to under jaw. Underjaw broad to end, slightly rounded. Teeth healthy, powerful, wide apart. Scissor bite preferred. Lips diverging at obtuse angles with septum, sufficiently pendulous to show modified square profile. Nose broad, always dark, blacker the better, spread flat nostrils in profile. Muzzle dark, blacker the better. Muzzle half the length of skull, dividing head into three parts—one for foreface and two for skull.
Neck — Powerful, muscular, slightly arched, medium length. Neck gradually increases in circumference as it approaches the shoulder. Neck moderately "dry".
Chest, Flanks—Wide, deep, rounded, well let down between forelegs, extending at least to elbow. Forechest deep, well defined. Ribs extremely well rounded. False ribs deep, well set back. Reasonable, but not exaggerated, cut-up.
Shoulder, Arm—Slightly sloping, heavy, muscular.
Forelegs, Feet—Legs straight, strong, set wide apart, heavy-boned. Elbows parallel to body. Feet heavy, round, compact with well-arched toes. Pasterns strong, bent only slightly. Black nails preferred.
Hind Legs—Hindquarters broad, wide, muscular. Second thighs well developed, hocks set back, wide apart, parallel when viewed from rear.
Back, Loins—Back muscular, powerful, straight. Loins wide, muscular, slightly rounded over rump.
Tail—Set on moderately high, reaching to hocks or a little below. Wide at root, tapering to end, hanging straight in repose, forming a slight curve but never over back when dog in action.
Coat—Outer coat moderately coarse. Undercoat, dense, short, close lying.
Color—Apricot, silver fawn or dark fawn-brindle. Fawn-brindle have fawn as a background color completely covered with very dark stripes. Muzzle, ears, nose must be dark, blacker the better, with similar color tone around the orbits, extending upwards between them.
Size—Dogs, minimum, 30" at shoulder; females, minimum, 27½" at shoulder.

ROTTWEILER

Head—Medium length, broad between ears. Stop well pronounced as is also occiput. Nose well developed, relatively large nostrils, black. Flews not too pronounced also black. Jaws strong, muscular; teeth strong—incisors of lower jaw touch inner surface of upper incisors. Eyes medium size, dark brown. Ears comparatively small, set high, wide, hang over about on level with top of head. Neck fair length, strong, round, muscular, slightly arched, free from throatiness.
Forequarters—Shoulders well placed, long, sloping, elbows well let down. Legs muscular, plenty of bone and substance, pasterns straight, strong. Feet strong, round, close, toes well arched. Soles very hard, toe nails dark, short, strong.
Body—Chest roomy, broad, deep. Ribs well sprung. Back straight, strong, rather short. Loins strong, deep. Croup short, broad, not sloping.
Hindquarters—Upper thigh short, broad, muscular. Lower thigh very muscular at top, strong, sinewy at bottom. Stifles fairly well bent, hocks strong. Hind feet somewhat longer than front ones, close, strong, toes well arched. Tail short, placed high (on level with back), carried horizontally. Dogs frequently born with short stump tail, when tail too long must be docked close to body.
Coat—Hair short, coarse, flat. Undercoat, absolutely required on neck and thighs should not show through outer coat. Hair little longer on back of front and hind legs and on tail.
Color—Black, clearly defined markings on cheeks, muzzle, chest, legs, over both eyes. Markings: tan to mahogany brown. Small spot of white on chest and belly permissible, not desirable.
Height—Shoulder height for males 23¾ to 27", for females, 21¾ to 25¾" height always considered in relation to general appearance and conformation.

SCHNAUZER (Giant)

Head—Strong, elongated, gradually narrowing from ears to eyes thence toward tip of nose, in proportion to size of body. Total length (tip of nose to occiput) should compare approximately to one-third length of back. Upper part of head broad between ears — width not more than two-thirds of length — flat, creaseless forehead, well-muscled, not too strongly developed cheeks. Ears, small V-shaped, moderate thickness, set well on head, dropping forward closely to cheek, or cropped, ears evenly cut, placed high, carried erect in excitement. Eyes medium-sized, dark, oval, turned forward, brows arched, wiry. Powerful ferreting snout formed by upper and lower jaw in proportion to upper head, should end in moderately blunt manner, heavy stubby whiskers. Ridge of nose straight, running almost parallel to extension of forehead. Tip of nose black, full. Lips tight, strongly developed fangs, healthy, pure white.
Neck—Not too short, skin close-fitting at throat. Nape strong, slightly arched.
Forequarters—Shoulders slanting, flat, strongly muscled. Forelegs seen from all sides vertical without any curve.
Chest—Moderately broad with visible, strong breastbone reaching at least to height of elbow, slowly extending backwards. Back strong, straight, well-developed short thighs. Length of back equal to shoulder height, built squarely, belly well drawn up towards back.
Tail—Carried high, cut down to three joints.
Hindquarters—Thighs slanting, flat, strongly muscled. Hind legs at first vertical to knee, from knee to hock in line with extension of upper neckline, from hock vertical to ground.
Paws—Short, round, extremely compact paws, close, arched toes (cat's paws) dark nails, hard soles.
Hair—Close, strong, hard, wiry, on back seen against grain — unruly — that is, neither short nor smooth; shorter on ears, forehead, legs and paws.
Height—From 21½ to 25½" shoulder height.
Color—All pepper-and-salt colored or similar equal mixtures, pure black or black with tan.

SCHNAUZER (Standard)

Head—Strong, rectangular, diminishing slightly from ear to eyes, again to tip of nose. Total length about one-third length of back, measuring from withers to beginning of tail.
Skull—Moderately broad between ears,

width not exceeding two-thirds of length.
Forehead—Flat, unwrinkled.
Cheeks—Well muscled.
Muzzle—Strong in proportion to skull, ending in moderately blunt manner, wiry whiskers accenting rectangular shape of head.
Nose—Powerful, black, full, ridge running almost parallel to extension of forehead. Lips tight.
Ears—Evenly shaped, set high, carried erect when cropped. If uncropped, small and V-shaped, of moderate thickness, carried rather high, close to head.
Eyes—Medium size, dark brown, oval, turned forward. Vision not obstructed from front or profile by too long an eyebrow. Brow arched, wiry.
Jaw—Level, powerful, square.
Teeth—Sound, strong, white, scissors bite.
Neck—Nape strong, slightly arched, set cleanly on shoulders. Skin, tight, fitting closely to throat.
Shoulders—Somewhat sloping, strongly muscled.
Chest—Moderately broad, breastbone plainly discernible reaching at least to height of elbows, extending slowly backwards. Belly well drawn up toward back, no tuck-up.
Back—Strong, stiff, straight, short, well-developed short loin section, ribs well sprung. Length of back from withers to set-on of tail should approximate height at withers.
Forelegs—Straight, vertical when seen from all sides, bone carried well down to feet; elbows set close to body, pointing directly backward.
Feet—Small, compact; round with thick pads, strong nails. Toes well arched, pointing straight ahead.
Hindquarters—Strongly muscled, thighs slanting, flat.
Body—Compact, strong, short coupled, substantial.
Tail—Moderately high, carried erect. Cut down to two joints, should not be longer than 2".
Coat—Hard, wiry, standing up on back, when seen against course of hair, neither short nor lying flat. Outer coat harsh, undercoat soft. Trimmed only to accent body outline, not more than 1" long except on ears and skull.
Color—Pepper and salt or similar equal mixtures, light or dark including pure black.
Action—Gait sound, strong, quick, free, true, level.
Disqualifications
Shy, savage or highly nervous dogs, dogs which are in excess of or less than the standard in height.

BOXER

From page 71

tucked up, blending into graceful curve to rear. Shoulders long, sloping, close lying. Upper arm long, closely approaching a right angle to shoulder blade. Forelegs when seen from front, straight, stand parallel to each other, have strong, firmly joined bones. Chest fair width, forechest well defined. Forearm straight, long, firmly muscled. Pastern (knee) joint of foreleg clearly defined. Pastern short, slightly slanting, standing almost perpendicular to ground. Feet compact, turning neither in nor out, tightly arched toes and hard soles (cats paws).
Back—Withers defined, back short, straight, very muscular.
Hindquarters — In balance with forequarters; strongly muscled. Thighs broad and curved, breech musculation strongly developed. Croup slightly sloped, broad. Tail attachment high. Tail clipped, carried upward. Pelvis long and especially broad in females. Upper and lower thigh long, leg well angulated. In standing position, the leg below hock joint practically perpendicular to ground. Viewed from behind hind legs straight. Hocks (metatarsus) clean, strong and short, supported by powerful rear pads with hock joint clean-cut, clearly defined. Rear toes a little longer than front toes, but similar in all other respects.
Height—Males—22" to 24" at withers. Females—21" to 23" at withers.
Coat—Short, shiny, lying smooth and tight to body.
Color—Fawn and brindle. Fawn in various shades from light yellow to dark deer red. Brindle have clearly defined black stripes on fawn background. White markings in fawn and brindle dogs not to be rejected. Black mask required. When white occurs on muzzle it should be edged by remnants of black mask. Black toenails preferred. Even distribution of head markings desirable.
Character—The character is of greatest importance. Alert and fearless; willing to make friends, but not necessarily effusive.
Disqualifications—White or black ground color, or entirely white or black or any color other than fawn or brindle. (White markings are allowed but must not exceed one-third of ground-color).

GERMAN SHEPHERD

From page 75

short, compact, toes well-arched, pads thick, hard, nails short, strong. The feet are important to the working qualities of the dog. Good gripping power, plenty of depth of pad.
Pigment—All colors are permissible. Strong, rich colors preferred.
Gait—(a) Outreaching, elastic, seemingly without effort, smooth and rhythmic. Feet travel close to ground. (b) Hindquarter delivers, through back, powerful forward thrust which slightly lifts the whole animal and drives body forward. Reaching far under, and passing imprint left by front foot, the strong arched hind foot takes hold of ground; then hock, stifle and upper thigh sweep back, the stroke of hind leg finishing with foot still close to ground in a smooth follow-through. (c) Must be full muscular co-ordination throughout structure with action of muscles and ligaments positive, regular and accurate. (d) Back transmission: Gait cannot be maintained without great strength and firmness of back. Whole effort of hindquarter is transmitted to forequarter through muscular and bony structure of loin, back and withers. At full trot, back must remain firm and level without sway, roll, whip or roach. (e) To compensate for the forward motion imparted by hindquarter, shoulder should open to its full extent — forelegs reach out in a stride balancing that of the hindquarter. (f) The Shepherd Dog brings the feet inward toward middle line of body when at trot in order to maintain balance. (g) Excellence of gait must also be evaluated by viewing from the side the effortless, properly co-ordinated covering of ground.
Character—As has been noted before, the Shepherd Dog is not one that fawns upon every new acquaintance. At the same time, it should be approachable, quietly standing its grounds and showing confidence and a willingness to meet overtures without itself making them. It should be poised, but when the occasion demands, eager and alert; both fit and willing to serve in any capacity as companion, watch dog, blind leader, herding dog or guardian, whichever circumstances demand.

The Shepherd Dog must not be timid, shrinking behind its master or handler; nervous, looking about or upward with anxious expression or showing nervous reactions to strange sounds or sights, nor lackadaisical, sluggish or manifestly disinterested in what goes on about him. Lack of confidence under any surroundings is not typical of good character; cases of extreme timidity and nervous unbalance sometimes give the dog an apparent, but totally unreal, courage and it becomes a "fear biter," snapping not for any justifiable reason but because it is apprehensive of the approach of a stranger. This is a serious fault subject to heavy penalty.

In summary: It should never be forgotten that the ideal Shepherd is a working animal, which must have an incorruptible character combined with body and gait suitable for the arduous work which constitutes its primary purpose. All its qualities should be weighed in respect to their contribution to such work, and while no compromise should be permitted with regard to its working potentiality, the dog must possess a high degree of beauty and nobility.
Disqualifications
White if indicative of albino characteristics. Cropped ears, hanging ears. Docked tail.

GREAT DANE

From page 76

icular as possible. Ligaments and muscles holding shoulder blade to rib cage well developed, firm and secure. **Forelegs:** Upper arm strong and muscular. Seen from side or front strong lower arms run straight to pastern joints. Seen from front, forelegs and pastern roots form perpendicular lines to ground. Seen from side, pastern root slopes very slightly forward. **Paws:** Round, turned neither toward inside nor outside. Toes short, highly arched, well closed. Nails short, strong dark.

3. HEAD (a) **Head**—Long, narrow, distinguished, expressive, finely chiseled, especially below eyes (skull plane under and to inner point of eye must slope without any bony proturberance in pleasing line to full square jaw), with strongly pronounced stop. Masculinity of male very pronounced in expression and structure of head; female's head may be more delicately formed. Seen from side, forehead sharply set off from bridge of nose. Forehead and bridge of nose straight and parallel to one another. Seen from front, head narrow, bridge of nose as broad as possible. Cheek muscles show slightly. Muzzle part must have full flews and be as blunt vertically as possible in front; angles of lip quite pronounced. Front part of head, from tip of nose up to center of stop as long as rear part of head from center of stop to slightly developed occiput. Head angular from all sides, flat planes, dimensions absolutely in proportion to general appearance. (b) **Teeth**—Strong, well developed, clean. Scissors bite. (c) **Eyes**—Medium size, dark as possible, lively intelligent expression; almond-shaped eyelids, well-developed eyebrows. In blue and black Danes lighter eyes permitted but not desirable. In Harlequins, eyes dark. **Nose**—Large and in the case of brindled and "single-colored" Danes, always black. In harlequins, nose black; a black spotted nose permitted. **Ears**—High, set not too far apart, medium in size, moderate thickness, drooping forward close to cheek. Top line of folded ear about level with skull. Cropped ears, well pointed, always in proportion to shape of head.

4. TORSO (a) **Neck**—Firm, clean, high-set, well arched, long, muscular, sinewy. From chest to head, slightly tapering, beautifully formed, well-developed nape. (b) **Loin and Back**—Withers form highest part of back which slopes downward slightly toward loins, which are imperceptibly arched and strong. Back short, tensely set. Belly well shaped, tightly muscled, and, with rear part of thorax, swing in a pleasing curve (tuck-up). (c) **Chest**—Quite broad, deep, well muscled. (d) **Ribs and Brisket**—Broad, with ribs sprung well out from spine and flattened at side to allow proper movement of shoulders.

5. TAIL — Should start high and fairly broad, terminating slender and thin at hock joint. At rest, fall straight. When excited or running, curved.

Disqualifications

Deaf Danes. Danes under minimum height. White Danes without any black marks (albinos). Merles, a solid mouse-gray color or a mouse-gray base with black or white or both color spots or white base with mouse-gray spots. Harlequins and solid-colored Danes in which a large spot extends coat-like over the entire body so that only the legs, neck and the point of the tail are white. Brindle, fawn blue and black Danes with white forehead line, white collars, high white stockings and white bellies. Danes with predominantly blue, gray, yellow or also brindled spots. Docked tails. Split noses.

ST. BERNARD

From page 81

shades; brindle patches with white markings. Red and brown-yellow of equal value. Necessary markings: white chest, feet and tip of tail, nose band, collar or spot on nape; latter and blaze desirable.

Height at Shoulder—Dog 27.56" minimum, female 25.59". Female more delicate and finer build.

LONG-HAIRED

Completely resembles short-haired variety except for coat which is of medium length plain to slightly wavy, never rolled or curly and not shaggy either. Usually, on the back, especially from region of haunches to rump, hair is more wavy. Tail bushy with dense hair of moderate length. Face and ears are covered with short and soft hair; longer hair at base of ear permissible. Forelegs slightly feathered; thighs bushy.

SHETLAND SHEEPDOG

From page 83

Gait—Trotting gait. Drive from rear, true, straight, allowing dog to reach well under body with hind foot and propel himself forward. Foot lifted only enough to clear ground as leg swings forward. Viewed from front, both forelegs and hind legs move forward almost perpendicular to ground at walk, slanting a little inward at a slow trot, until at a swift trot feet are brought so far inward toward center line of body that tracks left show two parallel lines of footprints actually touching a center line at their inner edges.

Disqualifications

Heights below or above the desired range, i.e. 13-16. Brindle color.

---

general facts

The Working Group is comprised of breeds that were developed to perform some specific type of work to assist man in his daily quest for a livelihood. Some were herd dogs, used by shepherds to guard their herds of cattle, sheep and deer. The breed used depended to a great extent on the climatic and ground conditions of the various countries — the Belgian, whose color makes him almost invisible at night, does not frighten the herds of sheep he guards — the fleet-footed Collie, proficient in the hills of Scotland and his diminutive cousin for the small breeds on the Shetland Islands — the German Shepherd, with his strength and stamina, excelled in battling wolves in the ranges of Germany — Komondorok, Kuvasz and Pulik, excellent in herding and guarding sheep in Hungary — the Old English Sheepdog, noted for his keen sense of smell and hearing which made him invaluable in the hills of England — the Samoyed, whose color made him ideal in caring for the herds of deer in northern countries — the Schnauzer family, fine cattle drovers in southern Germany and Bavaria — the Welsh Corgis, at home on the rocky ledges of Wales.

The Boxer, Great Dane, Rottweiler and other breeds were developed for their instinct to guard both man and his property.

Other breeds, such as the Bouvier des Flandres, were primarily used as draught dogs and could, and still can, be seen pulling milk carts and similar vehicles on the roads of European countries.

The Alaskan Malamute, Eskimo and Siberian Husky are noted for their excellent work in dog teams, the former for freighting, pulling many times his own weight; the latter two for their swiftness on the frozen trails of the north.

The St. Bernard and Great Pyrenees were used mainly as rescue dogs in the snow-covered mountains of Central Europe and are still a valued breed for this work. Many of the breeds in the Working Group are today being used in Canada for the purpose for which they were intended.

CH. CINDY'S GIRL GAY (whelped Jan. 9/61), by Am. Ch. Town Girls Challenge ex Can. Ch. Cindy Atomic Fabulous. 1 BCB in Show (Terrier Specialty), 2 BCB in Group, 1 BCBP in Group, 1 2nd in Group (Terrier Specialty), 1 4th in Group, 12 BB (including 3 Terrier Specialties). Bred and owned by, Garth J. Windsor, 6326 Grandview Douglas Hwy., Burnaby, B.C.

Head—Well balanced, little apparent difference between length of skull and foreface.

Skull—Long, flat, not too broad between ears, narrowing very slightly to eyes. Scalp free from wrinkles, stop hardly visible, cheeks level, free from fullness.

Ears—V-shaped, carriage rather to side of head, not pointing to eyes, small but not out of proportion to size of dog. Top line of folded ear above level of skull.

Foreface—Deep, powerful, strong, muscular. Well filled up before eyes.

Eyes—Dark, small, not prominent, full of Terrier expression, keenness, intelligence.

Lips—Tight.

Nose—Black, not too small.

Teeth—Strong, white. Bite either level or vise-like. Slightly overlapping or scissor bite permissible without preference.

Neck—Moderate length, thickness gradually widening towards shoulders. Skin tight.

Shoulders, Chest—Shoulders long, sloping well into back. Shoulder blades flat. From front, chest deep but not broad. Depth of chest approximately on level with elbows.

Body—Back short, strong, level. Ribs well sprung. Loins muscular, of good width. Little space between last rib and hip joint.

Hindquarters — Strong, muscular with no droop.

Tail—Root of tail set well up on back, carried gaily, not curled over back, of good strength and substance, fair length.

Legs—Forelegs perfectly straight, plenty of muscle and bone.

Elbows—Perpendicular to body, working free of sides.

Thighs—Long, powerful, muscular second thigh stifles well bent, not turned either in or out, hocks well let down parallel with each other when viewed from behind.

Feet—Small, round, compact, good depth of pad, well cushioned; toes moderately arched, not turned either in or out.

Coat—Hard, dense, wiry, lying straight and close, covering well over body and legs. Some of the hardest are crinkling or just slightly waved. At base of hard very stiff hair should be shorter growth of softer hair termed the undercoat.

Color—Head and ears tan, ears being of a darker shade than the rest. Dark markings on either side of skull permissible. Legs up to thighs and elbows and under-part of body and chest also tan, tan frequently runs into shoulder. Sides and upper parts of body black or dark grizzle. Red mixture often found in black, not to be considered objectionable. A small white blaze on chest is a characteristic of certain strains.

Size—Dogs approximately 23" in height at shoulder; females slightly less. Both sexes sturdy, well muscled, boned.

Movement—Is the crucial test of conformation. Movement free. As seen from front forelegs swing perpendicular from body free from sides, feet same distance apart as elbows. As seen from rear hind legs parallel with each other, neither too close nor too far apart, placed to give strong well-balanced stance and movement. Toes not be turned either in or out.

Yellow eyes, hound ears, white feet, soft coat, being much over or under the size limit, being undershot or overshot, having poor movement, are faults which should be severely penalized.

AUSTRALIAN TERRIER

CH. (CAN. BER.) KANBERRI WALTZING MATILDA (whelped April 12/61), by Ch. Seven Oaks Tuckerbox ex Kanberri Copper Rose Victoria. Gained her Canadian and Bermuda Championships in 7 months at 18 months of age, with 14 BB and 9 Group placings, including 2 1sts. Breeders, Mr. and Mrs. D. Anderson. Handler, Mr. Henderson. Reservations accepted for show prospects. Whelped June 4/63. Owned by Mr. and Mrs. R. P. Henderson, Grem Lyn Kennels, 577 Division St., Peterborough, Ont.

General Appearance—A sturdy low-set dog rather long in proportion to height with strong terrier character, alertness, activity and soundness. Its untrimmed harsh coat with definite ruff around the neck extending to the breastbone, assists its hard bitten and rugged appearance. Essentially a working terrier, it is equally suited as a companion dog owing to its loyalty and even disposition.

Head—Long with flat skull of moderate width, full between the eyes, with slight but definite stop. The muzzle, strong and powerful, of equal length to that of the skull, which is covered with a soft silky top-knot.

Eyes—The eyes are small, with keen expression, and of dark brown colour, set well apart and not prominent.

Ears—The ears are small, erect, pointed, well carried, set on moderately wide, free from long hair and sensitive in their use (puppies under six months excepted).

Nose—Black, of moderate size; the leather extending to bridge of muzzle.

Mouth—Jaw strong and punishing, teeth large and evenly spaced, the upper incisors fitting closely over the lower, lips black, tight and clean.

Body—Long in proportion to height, strongly constructed, with well-sprung ribs and chest of moderate depth and width. Level topline. Loins strong, flanks deep.

Forequarters—Neck long, slightly arched, shapely and strong, blending into long well-laid shoulders. Forelegs well-boned and perfectly straight, parallel when viewed from the front. Pastern strong, without slope (slightly feathered to the knee).

Hindquarters—Moderate length of quarters, broad with strong muscular thighs. Stifles well turned and hocks well bent and let down. Viewed from behind they should be parallel neither too wide nor too close.

Tail—Docked 2/3 set on high, and well carried, but not over the back.

Feet—Small, well padded, toes closely knit and moderately arched, turned neither in nor out, with strong black or dark toe-nails.

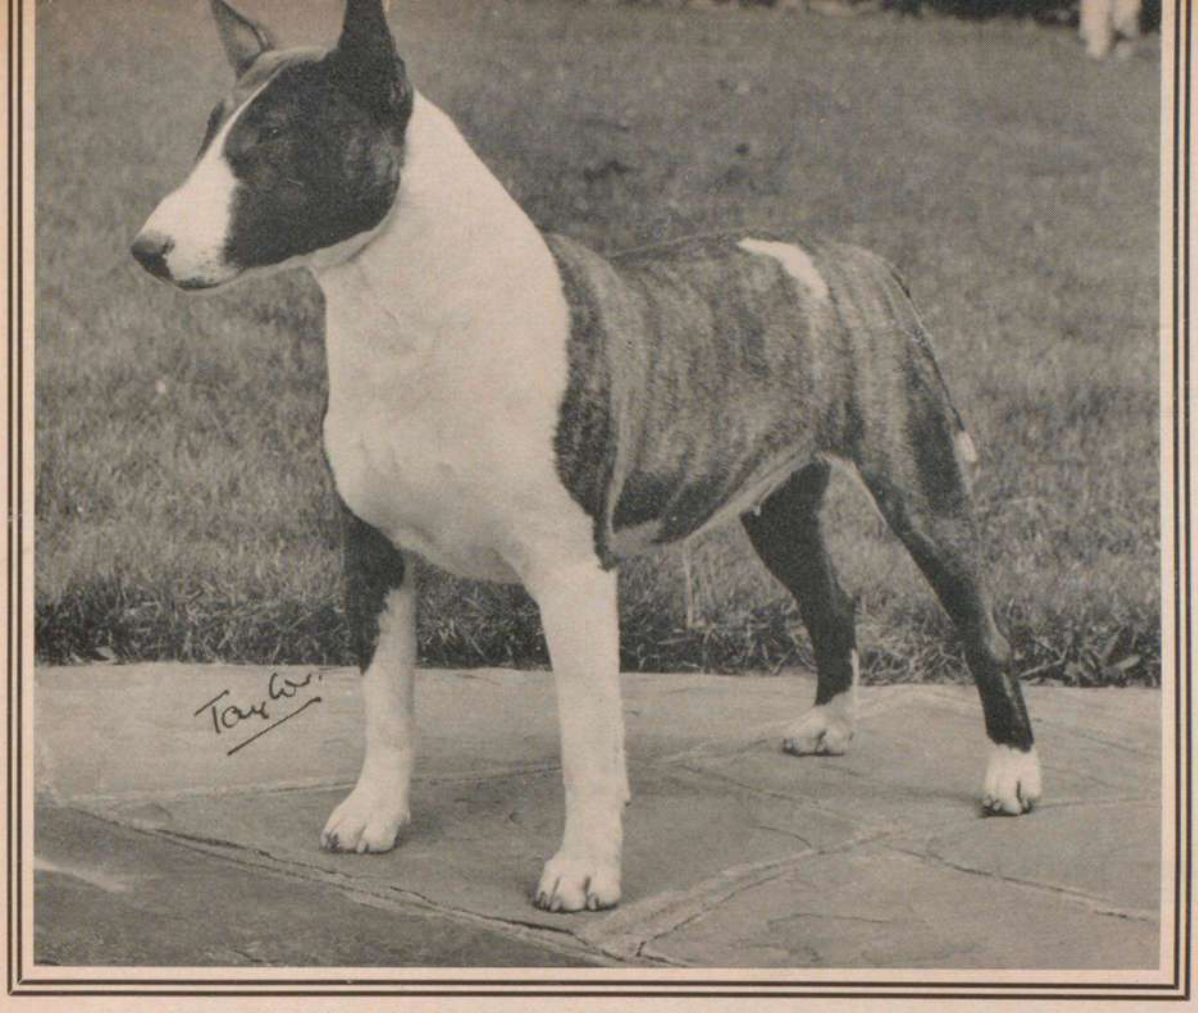

Coat—The body coat consists of a harsh, straight dense top coat approximately 2½" long, with short soft textured under-coat. The muzzle, lower legs and feet to be free from long hair.

Color (a) Blue, steel-blue or dark grey-blue, with rich tan (not sandy) on face, ears, under body, lower legs and feet and around the vent (puppies excepted). The richer the color and more clearly defined the better. Topknot blue, silver or a lighter shade than head color. (b) Clear sandy or red. Topknot a lighter shade.

Weight—Approximately 14 lbs.

Height—Approximately 10" at the withers.

Movement—The action to be free, springy and forceful. When viewed from the front, the forelegs should move truly without looseness of shoulder, elbows or pasterns. The hindquarters to have drive and power, with free movement of stifles and hocks. Seen from the rear the legs from the hocks to the ground to be parallel.

CH. KEARBY'S STORMY PETREL (whelped Sept. 17/60), by Kearby's Mac Dream ex Dulac Bower Bird. Completed her Championship at one year of age, with several Group placings. Shown once in the United States was BB at Westminster, 1962. Breeder, Mrs. Quita Youatt, England. Handler, Jim Kingdon. Owned by Hugh Williams, 2027 Edinburgh Dr., Burlington, Ont.

Head—Long, strong, deep right to end of muzzle, not coarse. Full face, oval in outline, filled completely up giving impression of fullness with surface devoid of hollows and indentations, i.e., egg shaped. In profile, curve gently downwards from top of skull to tip of nose. Forehead flat across from ear to ear. Distance from tip of nose to eyes perceptibly greater than that from eyes to top of skull. Underjaw deep and well defined.

Lips—Clean and tight.

Teeth—Meet in either a level or scissors bite. In scissors bite top teeth should fit in front of and closely against the lower teeth, sound, strong, perfectly regular.

Ears—Small, thin, placed close together. Capable of being held stiffly erect, when they point upwards.

Eyes—Well sunken, dark as possible, with a piercing glint, small, triangular, obliquely placed; set near together, high up on head.

Nose—Black, with well developed nostrils bent downwards at tip.

Neck—Very muscular, long, arched, clean, tapering from shoulders to head, free from loose skin.

Chest—Broad when viewed from front, great depth from withers to brisket, latter is nearer ground than the belly.

Body—Well rounded, marked spring of rib, back short, strong. Back ribs deep. Slightly arched over loin. Shoulders strong, muscular but without heaviness. Shoulder blades wide and flat, very pronounced backward slope from bottom edge of blade to top edge. Behind the shoulders no slackness or dip at withers. Underline from brisket to belly forms graceful upward curve.

Legs—Big boned but not to point of coarseness; forelegs moderate length, perfectly straight, and dog must stand firmly upon them. Elbows must turn neither in nor out, the pasterns strong, upright. Hindlegs parallel viewed from behind. Thighs very muscular, hocks well let down. Hind pasterns short, upright. Stifle joint well bent with a well developed second thigh.

Feet—Round, compact, well arched toes like a cat.

Tail—Short, set on low, fine, ideally should be carried horizontally. Thick where it joins body, tapers to a fine point.

Coat—Short, flat, harsh to touch, fine gloss. Skin should fit it tightly.

Movement — Smoothly, covering ground with free, easy strides, fore and hindlegs move parallel each to each when viewed from in front or behind. Forelegs reaching out well and hindlegs moving smoothly at hip and flexing well at stifle and hock. The dog should move compactly, in one piece, with a jaunty air that suggests agility, power.

Color—Pure white, markings on head are permissible. Any markings elsewhere on coat disqualify.

COLORED

Standard for Colored variety same as for White except that section on Color reads as follows:

Color—Any color other than white, or any color with white markings. Preferred color, brindle. A dog predominantly white shall be disqualified.

CH. (CAN. AM.) WALMAR'S IRISH GLEAM (whelped April 28/60), by Ch. (Can. Am.) Tailteann's No Regrets ex Ch. Tailteann's Nickey's Girl. Top winning Kerry Blue female, Canada, 1962. Show record: 1 BIS Specialty; 5 Group 1sts, Canada; 2 Group 1sts, 1 Group 2nd, U.S.A.; 7 other Group placings; 12 BCB in Group; 20 BB. Breeders, Mr. and Mrs. Walter A. Jacob. Puppies available. Owned and handled by Henry and Hella Herwig, Falconmoor Kennels Reg. (formerly Terrycroft), 16621-104 Ave., N. Surrey, B.C.

KERRY BLUE

Head—Long, not exaggerated, good proportion. Well balanced, little apparent difference between length of skull and foreface.

Skull—Flat, very slight stop, moderate breadth between ears, narrowing very slightly to eyes.

Cheeks—Clean, level.

Ears—V-shaped, small, not out of proportion to size of dog, moderate thickness, carried forward close to cheeks, top of folded ear slightly above level of skull.

Foreface—Jaws deep, strong, muscular. Foreface full, well made up, moderately chiselea out to relieve foreface from wediginess.

Nose—Black, nostrils large, wide.

Teeth—Strong, white, either level or with upper teeth slightly overlapping lower.

Eyes—Dark, small, not prominent, well placed, keen Terrier expression.

Neck—Clean, moderately long, gradually widening to shoulders, well set, carried proudly.

Shoulders, Chest—Shoulders fine, long, sloping, well laid back, well knit. Chest deep, moderate breadth.

Legs, Feet—Legs moderately long, plenty bone, muscle. Forelegs straight, elbows hanging perpendicularly to body, working clear of sides in movement, pasterns short, straight, hardly noticeable. Forelegs, hind legs move straight forward when travelling, stifles turning neither in nor out. Feet strong, compact, fairly round, moderately small, good depth of pad free from cracks, toes arched, turned neither in nor out, black toenails.

Body—Back short, strong, straight (i.e. level), no appearance of slackness. Loin short, powerful, slight tuck-up, ribs fairly well sprung, deep rather than round.

Hindquarters, Stern — Hindquarters strong, muscular, full freedom of action, free from droop or crouch, thighs long, powerful, stifles well bent, turned neither in nor out, hocks near ground, when viewed from behind, upright and parallel with each other. Tail set on high, moderate length, carried gaily erect, straighter the better.

Color—Any shade of blue gray or gray blue from deep slate to light blue gray, fairly uniform throughout except that distinctly darker to black parts may appear on muzzle, head, ears, tail and feet. Solid black never permissible in show ring. Up to 18 months any doubt as to whether a dog is black or a very dark blue should be resolved in favor of the dog, particularly in case of a puppy.

Coat—Soft, dense, wavy. Harsh, wire or bristle coat severely penalized. In show trim body well covered but tidy, head (except for whiskers), ears and cheeks clear.

General Conformation, Character—Upstanding, well knit, good balance, well developed, muscular body.

Height—18½" at the withers for a dog, slightly less for a female.

In judging Kerries, a height of 18-19½" for a dog, 17½-19" for a female given preference. Minimum limits do not apply to puppies.

Weight—Fully developed dog 33-40 pounds, females weighing proportionately less.

Disqualifications

1. Solid black. 2. Faking or dyeing. 3. Dewclaws on hind legs.

CH. TENSING OF ABBOTSFORD (whelped Oct. 11/59), by Ch. Miradel's Que Tee ex Ch. Karandale Tangee. In the past 12 months placed consistently in Group: 8 BCB, 2 1sts, 4 2nds, 2 3rd, 6 4ths. Breeder, Mr. and Mrs. James Roberts. Stud Service, puppies usually. Owned and handled by Mrs. Justine Campbell, Justdean Kennels, 1975 Hosmer Ave., Vancouver 9, B.C.

Character—Gay and assertive, but chary of strangers.
Size—Variable, but about 10" or 11" at shoulder for dogs, females slightly smaller.
Color—Golden, sandy, honey, dark grizzle, slate, smoke, parti-color, black, white or brown. This being the true Tibetan Lion-dog, golden or lionlike colors are preferred. Other colors in order as above. Dark tips to ears and beard are an asset.
Body Shape—The length from point of shoulders to point of buttocks longer than height at withers, well ribbed up, strong loin, well-developed quarters and thighs.
Coat—Heavy, straight, hard, not woolly nor silky, of good length, and very dense.
Mouth and Muzzle—Mouth level, otherwise slightly undershot preferable. Muzzle of medium length; a square muzzle is objectionable.
Head—Heavy head furnishings with good fall over eyes, good whiskers and beard; skull narrow, falling away behind the eyes in a marked degree, not quite flat, but not domed or apple-shaped; straight foreface of fair length. Nose black, about 1½" long, or the length from tip of nose to eye to be roughly about one-third of the total length from nose to back of skull.
Eyes—Dark brown, neither very large and full, nor very small and sunk.
Ears—Pendant, heavily feathered.
Legs—Forelegs straight; both forelegs and hind legs heavily furnished with hair.
Feet—Well feathered, should be round and catlike, with good pads.
Tail and Carriage—Well feathered, should be carried well over back in a screw; there may be a kink at the end. A low carriage of stern is a serious fault.

general facts

From approximately 1583, the beginning of the Manchu Dynasty, until 1908, the Lhasa Apso was used as a "gift" from the Dalai Lama to all visiting dignataries. In addition to being a great honor to receive one of these dogs it was also considered to be a token of good fortune.

It is believed the Lhasa Apso has existed, about as they are today, for 800 years. First brought to England as the "Talisman Dog", it was not until 1934 that the present name came into being.

The larger Tibetan dogs were used as outside guard dogs but the Lhasa excelled as a sentinel inside the walls of the palaces. Generations of careful breeding and training have made this bright, hardy and alert dog one of the finest watch dogs. The cold climate of his country of origin did not present a problem to this little dog whose dense coat provided ample protection.

Stories have come down from the mysterious land of Mt. Everest that the Lhasa has had a place in religion, but no records have been found to substantiate such claims.

Known in his homeland as "Abso Seng Kye", meaning "Bark Sentinel Lion Dog", the Lhasa is listed in Group IV in Canada and Group VI in the United States.

Extremely responsive to affection, its keenly developed instinct to detect friends from strangers makes them ideal and devoted companions.

LHASA APSO

SCHNAUZER (MINIATURE)

CH. TANNENBAUM'S LILLIBET (whelped July 14/61), by Ch. Handful's Blue Teal ex Ch. Jo-An-Alaur's Annastasia. 2 BCBP in Show, 1 Group 1st, numerous Group placings, BCB in Group, 11 BB, 6 BOS. October 1962 earned 9 points and her major towards Bermuda Championship. Puppies available occasionally. Stud service. Bred and owned by, Mrs. C. M. Morden, 572 Cedar Ave., Burlington, Ont.

Head—Strong, rectangular, width diminishing slightly from ears to eyes, and again to tip of nose. Forehead unwrinkled. Skull flat, fairly long. Foreface is parallel to top skull, slight stop; is at least as long as top skull. Muzzle strong in proportion to skull; ends in moderately blunt manner, thick whiskers accentuate rectangular shape of head.

Teeth—Scissors bite.

Eyes—Small, dark brown, deep-set. Oval, keen expression.

Ears—When cropped ears identical in shape and length, pointed tips. In balance with head, not exaggerated in length. Set high on skull, carried perpendicularly at inner edges, as little bell as possible along outer edges. When uncropped ears are small, v-shaped, folding close to skull.

Neck—Strong, well arched, blending into shoulders, skin fitting tightly at throat.

Body—Short, deep, brisket extending at least to elbows. Ribs well sprung, deep, extending well back to short loin. Underbody does not present a tucked-up appearance at flank. Top-line straight; declines slightly from withers to base of tail. Over-all length from chest to stern bone equals height at withers.

Forequarters — Flat, somewhat sloping shoulders, high withers. Forelegs straight, parallel when viewed from all sides. Strong pasterns, good bone. Separated by fairly deep brisket which precludes pinched front. Elbows close, ribs spread gradually from first rib to allow space for elbows to move close to body.

Hindquarters — Strong-muscled, slanting thighs; well bent at stifles, straight from hock to so-called heel. Sufficient angulation so that, in stance, hocks extend beyond tail.

Feet — Short, round (cat-feet), thick, black pads. Toes arched, compact.

Action—Trot is gait at which movement is judged. Must gait in straight line. Coming on, forelegs parallel, with elbows close to body. Feet turn neither inward nor outward. Going away, hind legs parallel from hocks down, travel wide. Viewed from side, forelegs have good reach, while hind legs have strong drive with good pick-up of hocks.

Tail—Set high, carried erect. Docked only long enough to be clearly visible over top line of body when dog in proper length of coat.

Coat—Double, hard, wiry outer coat, close under coat. Body coat plucked. When in show condition, proper length not less than ¾" except on neck, ears, skull. Furnishings fairly thick, not silky.

Size — 12 to 14". Ideal size 13½".

Color—Salt and pepper, black and silver, solid black. Tan shading permissible. Salt and pepper mixture fades out to light gray or silver white in eyebrows, whiskers, cheeks, under throat, across chest, under tail, leg furnishings, under body, inside legs. Light underbody hair not to rise higher on sides of body than front elbows. Black and silvers follow same pattern as salt and peppers. Entire salt and pepper section must be black. Black only solid color allowed. A small white spot on the chest is permitted.

Disqualifications

Dogs or females under 12" or over 14". Color solid white or white patches on body.

CH. (CAN. AM.) DRESSEN'S POSTSCRIPT by Frangan Counsler ex Dressen's Echo of Chime. Best Puppy 1959 Scottish Terrier Specialty; 1 BIS, 13 Group 1st, 9 2nd, 6 3rd; 30 BB, 8 BOS. Handler Gene Hahnlen. Stud service, puppies available. Bred and owned by Mrs. John C. Dressen, 1738 N.E. 88th, Seattle 15, Wash.

Skull—Long, of medium width, slightly domed and covered with short, hard hair. It should not be quite flat, as there should be a slight stop or drop between the eyes.

Muzzle — In proportion to the length of skull, with not too much taper toward the nose. Nose should be black and of good size. The jaws should be level and square. The nose projects somewhat over the mouth, giving the impression that the upper jaw is longer than the lower. The teeth should be evenly placed, having a scissors or level bite, with the former being preferable.

Eyes—Set wide apart, small and of almond shape, not round. Color to be dark brown or nearly black. To be bright, piercing and set well under the brow.

Ears—Small, prick, set well up on the skull, rather pointed but not cut. The hair on them should be short and velvety.

Neck—Moderately short, thick and muscular, strongly set on sloping shoulders, but not so short as to appear clumsy.

Chest—Broad and very deep, well let down between the forelegs.

Body—Moderately short and well ribbed up with strong loin, deep flanks and very muscular hindquarters.

Legs and Feet—Both forelegs and hind legs should be short and very heavy in bone in proportion to the size of the dog. Forelegs straight or slightly bent with elbows close to the body. Scottish Terriers should not be out at the elbows. Stifles should be well bent and legs straight from hock to heel. Thights very muscular. Feet round and thick with strong nails, forefeet larger than the hind feet.

Note: The gait is peculiarly its own and is very characteristic of the breed. It is not the square trot or walk that is desirable in the long-legged breeds. The forelegs do not move in exact parallel planes—rather in reaching out incline slightly inward. This is due to the shortness of leg and width of chest. The action of the rear legs should be square and true and at the trot both the hocks and stifles should be flexed with a vigorous motion.

Tail—Never cut and about 7" long, carried with a slight curve but not over the back.

Coat—Rather short, about 2", dense undercoat with outer coat intensely hard and wiry.

Size and Weight—Equal consideration must be given to height, length of back and weight. Height at shoulder for either sex should be about 10". Generally, a well-balanced Scottish Terrier dog of correct size should weigh from 19 to 22 pounds and a female from 18 to 21 pounds. The principal objective must be symmetry and balance.

Color—Steel or iron gray, brindled or grizzled, black, sandy or wheaten. White markings are objectionable and can be allowed only on the chest and that to a slight extent only.

General Appearance — The face should wear a keen, sharp and active expression. Both head and tail should be carried well up. The dog should look very compact, well muscled and powerful, giving the impression of immense power in a small size.

Penalties: Soft coat, round or very light eye, overshot or undershot jaw, obviously oversize or undersize, shyness, timidity or failure to show with head and tail up are faults to be penalized. No judge should put to Winners or Best of Breed any Scottish Terrier not showing real terrier character in the ring.

general facts

Although there is no recorded history prior to the first time they were exhibited in 1879, it is admitted that the Scottish Terrier did exist many years before. Several types of Terriers were known in the Scottish highlands and it is believed that the one called Scottish came from the Blackmount region of Perthshire. They are described as a good, rough and ready dog, with a lion heart, equivalent to about two dozen rat traps.

CH. WIL-WAG'S DROP OF BRANDY, by Am. Ch. Coltan Spitfire ex Ch. Calonyn Mafon, CD (Can. Am.). Brandy has proven herself in the ring, finishing her title with 2nd in Group at Ottawa, 1962, and is starting on her Obedience title, having completed her first leg. Bred, owned and handled by Barbara G. Pirrie, Wil-Wag Kennels Reg'd., 58 Wolfrey Ave., Toronto, Ont.

Head—The skull should be flat, and rather wider between the ears than the Wire-haired Fox Terrier. The jaw should be powerful, clean-cut, rather deeper, and more punishing—giving the head a more masculine appearance than that usually seen on a Fox Terrier. Stop not too defined, fair length from stop to end of nose, the latter being of a black color.

Ears—The ear should be V-shaped, small, not too thin, set on fairly high, carried forward and close to the cheek.

Eyes—The eye should be small, not being too deeply set in or protruding out of skull, of a dark hazel color, expressive and indicating abundant pluck.

Neck — The neck should be of moderate length and thickness, slightly arched and sloping gracefully into the shoulders.

Body—The back should be short, and well-ribbed up, the loin strong, good depth, and moderate width of chest. The shoulders should be long, sloping, and well set back. The hindquarters should be strong, thighs muscular and of good length, with the hocks moderately straight, well let down, and fair amount of bone. The stern should be set on moderately high, but not too gaily carried.

Legs and Feet—The legs should be straight and muscular, possessing fair amount of bone, with upright and powerful pasterns. The feet should be small, round and catlike.

Coat—The coat should be wiry, hard, very close and abundant.

Color—The color should be black and tan, or black grizzle and tan, free from black penciling on toes.

Size — The height at shoulder should be 15" for dogs, females proportionately less. Twenty pounds shall be considered a fair average weight in working condition, but this may vary a pound or so either way.

Disqualifications

(1) Nose: white, cherry or spotted to a considerable extent with either of these colors. (2) Ears: prick, tulip or rose. (3) Undersot jaw or pig-jawed mouth. (4) Black below hocks or white to an appreciable extent.

general facts

It is said that the Welsh Terrier is the purest and oldest of the British Terriers. The breed, it is believed, was originally known as the "Black and Tan Wire Haired Terrier", indicating that the original color has remained as it was some one hundred years ago.

The Welsh Terrier first made its appearance in shows in England in 1886 at which time it was listed under both names. In 1893 the two breeds were divided, with the one going out of existence and the Welsh Terrier remaining.

He was used with Otterhounds on many occasions but alone was proficient in hunting fox and badger.

At first his head was considered "too short" and when longer heads began to appear his popularity with the sporting fraternity grew to the extent that dogs were bought and sold at unbelievable prices, particularly for that period.

Listed in the Miscellaneous class at Madison Square Garden shows as early as 1888, the breed was given official recognition in 1901.

Many believe the dog was developed from a cross breeding of Fox Terrier and Airedale. Although this was attempted, the parent body in England refused to accept the theory.

CH. DINA-KEN'S LITTLE PIP (whelped June 24/59), by Ch. (Can. Am.) Dreamland's Phantom ex Shipmates Dione. Top winning West Highland in Canada 1961, 1962; top winning Terrier in Canada 1961, 1962; Ken-L Products Award Winner All Breeds (Mid-Eastern Division) 1961, 1962. Breeder, Mr. and Mrs. Ed Payne. Puppies, Stud service. Owned and handled by Albert and Muriel Kaye, Dreamland Kennels Reg'd., #7 Hwy. East, R.R. 1, Thornhill, Ont.

WEST HIGHLAND WHITE

Color—Pure white; any other color objectionable.

Coat — Very important, seldom seen to perfection; double-coated. Outer coat consists of hard hair, about 2" long, free from any curl. Undercoat, which resembles fur, short, soft, close. Open coats objectionable.

Size—Dogs about 11" at withers, females about 1" less.

Skull—Not too narrow, being in proportion to his powerful jaw, not too long, slightly domed, gradually tapering to eyes, between which there should be a slight indentation or stop, eyebrows heavy. Little apparent difference in length between muzzle and skull.

Eyes—Widely set apart, medium in size, dark as possible in color, slightly sunk in head, sharp, intelligent, which, looking from under the heavy eyebrows give a piercing look. Full eyes and light-colored eyes very objectionable.

Muzzle—Nearly equal in length to rest of skull, powerful, gradually tapering towards nose, which should be fairly wide. Nose itself black. Jaws level, powerful, teeth square or evenly met, well set, large for size of dog.

Ears—Small, carried tightly erect, never dropped, set wide apart and terminating in a sharp point. Hair on them short, smooth, velvety, never cut. Ears free from fringe at top.

Neck—Muscular and nicely set on sloping shoulders.

Chest—Very deep, breadth in proportion to size of dog.

Body—Compact, straight back, ribs deep, well arched in the upper half of rib, presenting a flattish side appearance, loins broad and strong, hindquarters strong, muscular and wide across the top.

Legs and Feet—Both fore and hind legs short and muscular. Shoulder blades comparatively broad, well sloped backwards. Points of shoulder blades closely knitted into backbone, so that very little movement of them noticeable when dog is walking. Elbow close into body both when moving or standing, thus causing foreleg to be well placed in under shoulder. Forelegs straight and thickly covered with short hard hair. Hind legs short and sinewy. Thighs very muscular, not too wide apart. Hocks bent and well set in under the body, so as to be fairly close to each other either when standing, walking, or trotting. Forefeet are larger than the hind feet; are round, proportionate in size, strong, thickly padded, covered with short hard hair. Hind feet are smaller and thickly padded. Cowhocks detract from general appearance. Straight or weak hocks, both kinds, undesirable, should be guarded against.

Tail—Five or 6" long, covered with hard hairs, no feather, as straight as possible, carried gaily but not curled over back. Tails longer than 6" objectionable.

Movement—Free, straight, easy all round. In front leg freely extended forward by shoulder. Hind movement free, strong and close. Hocks freely flexed and drawn close in under the body, so that when moving off on the foot the body is thrown or pushed forward with some force.

Disqualifications

Any faking such as blackening the nose or bleaching the coat.

BEDLINGTON

Skull—Narrow, deep, rounded, high at occiput, wedge-shaped, profuse topknot, nearly white, when trimmed Roman nose appearance.
Jaws—Long, tapering. No "stop", line from occiput to nose end straight, unbroken. Well filled up beneath eye. Close fitting lips, no flews.
Teeth — Level or pincer-jawed, large, strong.
Nose—Nostrils large, well defined. Blues, blue and tans black noses; livers, sandies, etc., brown noses.
Eyes—Small, bright well sunk. Appearance of being triangular. Blue, dark eye; blue and tans, light eyes with amber lights; liver and sandies, light hazel eye.
Ears—Moderate, filbert shaped; set low, hanging flat to cheek. Covered with short, fine hair, fringe of silky hair at tip.
Legs, Feet—Muscular, moderate length. Hind legs, by reason of roach back and arched loin, have appearance of being longer than forelegs. Forelegs straight, moderately wide chest, harefeet.
Body—Muscular, flexible. Flat-ribbed, deep through brisket, well ribbed up. Chest deep, fairly broad. Back roached, loin markedly arched. Light, muscular, galloping quarters.
Neck—Long, tapering arched neck, deep at base. Neck springs well from shoulders, which should be flat, head carried high.
Coat—Coat distinctive, unlike any other Terrier in that it should be thick and linty (not wiry), when in show condition, not exceed 1" in length. Brushed on body, back, from root of tail toward head, should not lie flat against body. Absence of hair on ears except at tip, where fringe from one-half to 1" long. Hair on legs slightly longer, straighter than that of body. Topknot highest at occiput, tapers gradually to just in back of nose. It (topknot) rounded from side to side from an imaginary line drawn from outer corner of eye to top of ear on one side to a like line on opposite side.
Tail—Moderate length, thick at root, tapering to a point gracefully curved, slightly feathered, 9 to 11" long, scimitar shaped, carried elevated but not over back.
Color—Blue, blue and tan, liver, liver and tan, sandy, sandy and tan.
Height—About 15 or 16".
Action—Very distinctive. Rather mincing, light and springy, must gallop like a Greyhound, with whole body.

BORDER

Head—Similar to an otter. Moderately broad, flat in skull plenty of width between eyes and between ears. Slight, moderately broad curve at stop. Cheeks slightly full.
Ears—Small, V-shaped, moderate thickness, dark preferred. Set somewhat on side, dropping forward close to cheeks.
Eyes—Dark hazel, full of fire and intelligence. Moderate in size.
Muzzle—Short, "well filled." Dark muzzle is characteristic, desirable. A few short whiskers are natural.
Teeth—Strong, scissors bite, large in proportion to size of dog.
Nose—Black, good size.
Neck—Clean, muscular, only long enough to give a well-balanced appearance. Should gradually widen into the shoulder.
Shoulders—Well laid back, good length, blades converging to withers gradually from a brisket not excessively deep or narrow.
Forelegs—Straight, not too heavy in bone, placed slightly wider than in a Fox Terrier.
Feet—Small, compact. Toes point forward, moderately arched, thick pads.
Body—Deep, fairly narrow, sufficient length to avoid any suggestion of lack of range and agility. Deep ribs carried well back not oversprung in view of the desired depth and narrowness of body. Body capable of being spanned by a man's hands behind shoulders. Back strong but laterally supple, no suspicion of a dip behind shoulder. Loin strong, under line fairly straight.
Tail—Moderately short, thick at base, then tapering. Carried gaily when at alert. When at ease, a Border may drop his stern.
Hindquarters—Muscular, racy, thighs long, nicely molded. Stifles well bent, hocks well let down.
Coat—Short, dense undercoat covered with very wiry and somewhat broken top coat which should lie closely.
Hide—Very thick, loose fitting.
Movement—Straight and rhythmical before and behind, good length of stride and flexing of stifle and hock.
Color—Red, grizzle and tan, blue and tan, or wheaten. Small amount of white allowed on chest.

CAIRN

Skull—Broad in proportion to length, decided stop, well furnished with hair on top of head, which may be somewhat softer than body coat.
Muzzle — Strong. Teeth large. Nose black.
Eyes—Set wide apart, rather sunken, shaggy eyebrows, medium in size, hazel or dark hazel, depending on body color, keen terrier expression.
Ears — Small, pointed, well carried erectly, set wide apart on side of head. Free from long hairs.
Tail—In proportion to head, well furnished with hair. Carried gaily. Set on at back level.
Body — Well muscled, strong, active body, well-sprung, deep ribs, coupled to strong hindquarters, level back of medium length.
Shoulders, Legs, Feet—Sloping shoulder, medium length of leg, good bone; forelegs perfectly straight, forefeet may be slightly turned out. Forefeet larger than hind feet. Legs covered with hard hair. Pads thick, strong, dog should stand well up on its feet.
Coat—Hard, weather resistant. Double coated, profuse harsh outer coat, short, soft, close furry undercoat.
Color—May be any color except white. Dark ears, muzzle, tail tip desirable.
Ideal Size — Weight for females, 13 pounds, for dogs, 14 pounds. Height at the withers—females, 9½", dogs, 10". Length of body from 14¼ to 15" from front of chest to back of hindquarters. Dog must be of balanced proportions. Weight and measurements are for matured dogs at 2 years of age. Older dogs may weigh slightly in excess, growing dogs may be under these weights and measurements.

DANDIE DINMONT

Head—Strongly made, large, not out of proportion to dog's size, muscles showing extraordinary development, more especially maxillary. **Skull** broad between ears, less towards eyes, measuring about same from inner corner of eye to back of skull as it does from ear to ear. Forehead well domed. Head **covered** with soft silky hair, not confined to mere topknot, lighter in color and silkier the better. **Cheeks,** starting from ears proportionately with skull have gradual taper towards muzzle, which is deep, strongly made, measures about 3" in length, or in proportion to skull as 3 is to 5. **Muzzle** covered with hair little darker than topknot, same texture as feather of forelegs. Top of muzzle generally bare for about 1" from back part of nose, bareness coming to a point towards eye, being about 1" broad at nose. Nose, inside of **Mouth** black or dark-colored. **Teeth** strong, especially canines, which are of extraordinary size for such a small dog. Canines fit well into each other, teeth level in front, upper ones very slightly overlapping under ones.
Eyes — Set wide apart, large, full, round, bright, expressive of great determination, intelligence, dignity; set low, prominent in front of head; rich dark hazel.
Ears — Pendulous, set well back, wide apart, low on skull, hanging close to cheek, very slight projection at base, broad at junction of head, tapering almost to a point, forepart of ear tapering very little—tapering being mostly on back part, forepart of ear coming almost straight down from its junction with head to tip. Harmonize in color with body color. Have thin feather of light hair starting about 2" from tip, of nearly same color and texture as topknot, which gives ear appearance of a **distinct point.** Cartilage and skin of ear not thick, but rather thin. Length of ear from 3 to 4".
Neck—Very muscular, well-developed, strong, showing great power of resistance, well set into shoulders.
Body—Long, strong flexible; ribs well sprung, round, chest well developed, let well down between forelegs; back rather low at shoulder, having a slight downward curve and a corresponding arch over loins, very slight gradual drop from top of loins to root of tail; both sides of backbone well supplied with muscle.
Tail—Rather short, from 8" to 10", covered on upper side with wiry hair of darker color than that of body, hair on under side lighter in color, not so wiry, with nice feather about 2" long, getting shorter as it nears tip; rather thick at root, getting thicker for about 4" then tapering off to point. Should come up with a curve like a scimitar, the tip, when excited, being in a perpendicular line with root of tail. Neither be set on too high nor too low. When not excited carried gaily, a little above level of body.
Legs—Forelegs short, immense muscular development and bone, set wide apart, chest coming well down between them. Feet well formed **and not flat**, very strong brown or dark-colored claws. Hair on forelegs and feet of a Pepper dog should be tan, varying according to body color from a rich tan to a pale fawn; of a Mustard dog are a darker shade than its head, which is a creamy white.

In both colors there is a nice feather, about 2" long, rather lighter in color than hair on forepart of leg. Hind legs little longer than forelegs, set rather wide apart, not spread out in an unnatural manner, feet are much smaller; thighs well developed, hair of same color and texture as forelegs, but having no feather or dewclaws; whole claws dark; claws of all vary in shade according to color of dog's body.

Coat—Hair about 2" long; that from skull to root of tail, mixture of hardish and soft hair, which gives a sort of crisp feel to hand. Hard not wiry; coat piley or penciled. Hair on under part of body lighter color, softer than on top. Skin on belly accords with color of dog.

Color — Pepper or mustard. Pepper ranges from dark bluish black to light silvery gray, intermediate shades being preferred, body color coming well down shoulder and hips, gradually merging into leg color. Mustards vary from reddish brown to pale fawn, head being creamy white, legs, feet shade darker than head. Claws dark as in other colors. (Nearly all Dandie Dinmont Terriers have some white on the chest, some have also white claws.)

Size—Height 8 to 11" at top of shoulder. Length from top of shoulder to root of tail not more than twice the height, but preferably 1 or 2" less.

FOX TERRIER (Smooth and Wire)

Head — Skull flat and moderately narrow, gradually decreasing in width to eyes. Not much stop apparent, more dip in profile between forehead and top jaw than the Greyhound. Cheeks not full. Ears V-shaped, small moderate thickness, drooping forward close to cheek, not hanging by side of head like a Foxhound. Jaws, upper and lower, strong, muscular, of fair punishing strength, but not to resemble the Greyhound or modern English Terrier. Not much falling away below eyes. This part of head moderately chiseled out, not to go down in a straight slope like a wedge. Nose, toward which muzzle must gradually taper; black. Eyes and rims dark, **moderately** small, rather deep-set, full of fire, life and intelligence, as nearly as possible circular in shape. Teeth as nearly as possible together, **i.e. the points** of the upper **(incisors)** teeth on outside of or **slightly overlapping** lower teeth.

Neck—Clean, muscular, without throatiness, fair length, gradually widening to shoulders.

Shoulders — Long, sloping, well laid back, fine at points, clearly cut at withers.

Chest—Deep and not broad.

Back — Short, straight **(i.e. level)**, strong, no appearance of slackness.

Loin—Very powerful, muscular, very slightly arched. Foreribs moderately arched, back ribs deep and well sprung, well ribbed up.

Hindquarters—Strong, muscular, quite free from droop or crouch; thighs long, powerful; stifles well curved and turned neither in nor out; hocks well bent and near the ground, perfectly upright and parallel each with the other when viewed from behind, the dog standing well up on them like a Foxhound, not straight in stifle.

Stern—Set on rather high, carried gaily, not over back or curled. Of good strength, anything approaching a "pipe-stopper" tail especially objectionable.

Legs—Forelegs viewed from any direction straight with bone strong right down to feet, showing little or no appearance of ankle in front, short and straight in pasterns. Forelegs and hind legs carried straight forward in traveling, stifles not turning outward. Elbows hang perpendicularly to body, working free of sides.

Feet—Round, compact, not large; soles hard, tough; toes moderately arched, turned neither in nor out.

Coat — Smooth, flat, hard, dense, abundant. Belly and under side of thighs not bare.

Color — White should predominate; brindle, red, or liver markings objectionable.

Symmetry, Size, Character — Must present a generally gay, lively, active appearance; bone and strength in a small compass are essentials, but this must not be taken to mean that a Fox Terrier should be cloddy, or in any way coarse—speed and endurance must be looked to as well as power, symmetry of the Foxhound taken as a model. Must on no account be leggy, nor too short in leg. Should stand like a cleverly made hunter, covering a lot of ground, yet with a short back. Weight is not a certain criterion of fitness for his work—general shape, size and contour are main points.

WIRE FOX TERRIER

This variety of the breed should resemble the smooth sort in every respect except the coat, which should be broken. Harder and more wiry the texture of coat is, the better. On no account should the dog look or feel woolly; there should be no silky hair about the poll or elsewhere. Coat not too long, so as to give dog a shaggy appearance, but should show a marked and distinct difference all over from the smooth species.

Disqualifications

Nose—White, cherry or spotted to a considerable extent with either of these colors. Ears—Prick, tulip or rose. Mouth—Much undershot, or much overshot.

IRISH TERRIER

Head—Long, in proportion to body; skull flat, rather narrow between ears, narrowing slightly towards eyes; free from wrinkle, stop hardly noticeable. Jaws strong, muscular, not too full in cheek, good punishing length. Hair on upper and lower jaws similar in quality and texture to that on body, of sufficient length to present an appearance of additional strength and finish to foreface.

Teeth — Strong, even, white, sound.

Lips—Close, well-fitting, almost black.

Nose — Must be black.

Eyes—Dark hazel, small, full of life, fire, intelligence.

Ears — Small, V-shaped; moderate thickness; set well on head, dropping forward closely to cheek, free of fringe, hair much shorter and somewhat darker than on body.

Neck—Fair length, gradually widening towards shoulders; well and proudly carried, free from throatiness. Generally slight frill in hair at each side of neck, extending almost to corner of ear.

Shoulders, Chest—Shoulders fine, long, sloping well into back. Chest deep, muscular, neither full nor wide.

Back, Loin — Body moderately long. Back symmetrical, strong, straight, free from appearance of slackness or "dip" behind shoulders. Loin strong, muscular, slightly arched. Ribs fairly sprung, deep rather than round, well-ribbed back. Female may be slightly longer in appearance.

Hindquarters—Strong, muscular; powerful thighs; hocks near ground; stifles moderately bent.

Stern—Docked, set on rather high, not curled. Good strength, substance; fair length, well covered with harsh, rough hair, free from fringe or feather. Three-quarters dock about right.

Feet, Legs — Feet strong, tolerably round, moderately small; toes arched, turned neither out nor in, black toenails. Pads deep, velvety quality, perfectly sound. Legs, moderately long, well set from shoulders, perfectly straight, plenty of bone and muscle; elbows working clear of sides; pasterns short, straight, hardly noticeable. Forelegs and hind legs move straight forward when traveling. Free from feather, covered, like head, with hair of similar texture to that on body, but not so long.

Coat—Dense, wiry, rich in quality, broken appearance, lying fairly close to body, not so long as to alter outline of body, particularly in hindquarters. At base of stiff outer coat growth of finer and softer hair, differing in color, termed undercoat.

Color—Whole-colored; the bright red, red wheaten, or golden red colors preferable. Small patch of white on chest permissible, not desirable.

Size—27 pounds for dog, 25 pounds for female. Height at shoulder approximately 18".

Temperament — The Irish Terrier is game and asks no quarter. He is of good temper, most affectionate, and absolutely loyal to mankind. Tender and forbearing with those he loves, this rugged, stout-hearted terrier will guard his master, his mistress, children in his charge, or their possessions, with unflinching courage and with utter contempt of danger or hurt.

Disqualifications

Nose—Any other color than black. Mouth—Much undershot or overshot. Ears—Cropped ears. Color—Any other color than red, golden red, or red wheaten. A small patch of white on the chest is permissible; otherwise parti-colored coats disqualify.

LAKELAND

Color—Blue and tan, blue, black, black and tan, red, mustard, wheaten grizzle.

Weight—Dogs not to exceed 17 pounds, females not to exceed 16 pounds.

Head — Moderately broad in skull, broad strong muzzle, not excessively long, black nose preferred but liver or flesh color not to disqualify.

Mouth—Level.

Ears—Small, dropped, round or V-shaped.

Eyes — Dark or hazel (not too prominent).

Neck—In proportion to body.

Front—Narrow.

Forelegs—Straight.

Back—Moderately short, well coupled, long, sloping hindquarters.

Feet—Sound but not too flat.

Coat—Hard, dense and wiry.

Tail—Carried gaily, not docked too short.

General Appearance—Smart and workmanlike.

MANCHESTER/NORWICH/SEALYHAM/SKYE/STAFFORDSHIRES

MANCHESTER

Refer to Toy Manchester Standard, pictorial section, Toy Group. Exceptions include references to ears, weight and disqualifications there being no disqualifications listed in the Standard for the Manchester.

NORWICH

Head — Skull wide, slightly rounded, good width between ears. Muzzle strong, slightly "foxy" appearance. Length about one-third less than measurement from occiput to bottom of well defined stop.
Ears—Prick or drop. If pricked, small, pointed, erect, set well apart. If dropped, neat, small, with break just above skull line, front edge close to cheek, not falling lower than outer corner of eye.
Eyes—Very bright, dark, keen.
Jaw — Clean, strong, tight lipped, strong, large, closely-fitting teeth; scissors bite.
Neck—Short, strong, well set on clean shoulders.
Body—Moderately short, compact, deep with level top line, ribs well sprung.
Legs—Short, powerful, straight as is consistent with short legs for which we aim. Sound bone, round feet, thick pads.
Quarters—Strong, rounded.
Tail—Medium docked, carriage not excessively gay.
Color — Red (including red-wheaten), black and tan or grizzle.
Coat—Hard, wiry as possible, lying close to body, definite undercoat. Top coat straight; full coat longer, rougher forming almost a mane on shoulders and neck. Hair on head, ears, muzzle, except for slight eyebrows, slight whiskers, short, smooth. Dogs should be shown with as nearly a natural coat as possible.
Weight—Ideal, 11 to 12 pounds.
Height—Ideal, 10" at withers.
Disqualifications
Cropped ears.

SEALYHAM

Head—Long, broad, powerful, in perfect balance with body, joining neck smoothly. Length of head roughly, three-quarters height at withers, about 1" longer than neck. Breadth between ears little less than one-half length of head.
Skull—Very slightly domed, shallow indentation running down between brows, joining muzzle with moderate stop.
Cheeks—Smoothly formed, flat.
Jaws—Level, powerful, square.
Teeth—Sound, strong, white, canines fitting closely together.
Nose—Black, large nostrils.
Eyes—Very dark, deeply set, fairly wide apart, medium size, oval.
Ears—Folded level with top of head, forward edge close to cheek. Well rounded at tip, of length to reach outer corner of eye. Thin, not leathery, sufficient thickness to avoid creases.
Neck—Length slightly less than two-thirds of height of dog at withers. Muscular without coarseness, good reach, refinement at throat, set firmly on shoulders.
Shoulders—Well laid back, powerful, sufficiently wide to permit freedom of action.
Legs—Forelegs strong, good bone; as straight as is consistent with chest being well let down between them. Hind legs longer than forelegs, not so heavily boned.
Feet—Large, compact, round, thick pads, strong nails. Toes well arched, pointing straight ahead. Forefeet larger, though not quite so long as hind feet.
Body—Strong, short-coupled, substantial, to permit great flexibility. Brisket deep, well let down between forelegs. Ribs well sprung.
Back—Length from withers to set on of tail should approximate height at withers, or 10½". Top line level.
Hindquarters—Very powerful, protruding well behind set on of tail. Strong second thighs, stifles well bent, hocks well let down.
Tail—Docked, carried upright. Set on far enough forward so that spine does not slope down to it.
Coat—Weather-resisting, soft, dense undercoat, hard, wiry top coat.
Color—All white, or with lemon, tan or badger markings on head and ears.
Action — Sound, strong, quick, free, true, level.
Height — At withers about 10½" Weight: 21 pounds for dogs, and 20 pounds for females.

SKYE

Body—Long, low. Back level. Neck long, gracefully arched. Chest deep. Ribs deep oval.
Forequarters—Straight front. Good layback of shoulders, tight placement of shoulder blades at withers. Elbows close to body. Legs short, muscular, straight.
Hindquarters — Full, well developed, moderately angulated. Legs short, muscular, straight when viewed from behind.
Feet—Large hare feet, pointing forward. Pads thick. Nails strong, preferably black.
Movement—Legs carried straight forward when traveling. When approaching, forelegs form continuation of straight line of front, feet being same distance apart as elbows. Principal propelling power furnished by hind legs, straight forward without weaving. Movement fluid without waddle or bounce.
Head—Long, powerful, slight stop, never coarse. Powerful jaws and mouth, incisor teeth closing level or upper teeth just fitting over lower. Moderate width at back of skull tapering gradually to strong muscle. Muzzle dark, nose black.
Eyes—Brown, preferably dark. Medium size, close set.
Ears (Prick or drop)—Gracefully feathered, symmetrical. When prick, not large, erect at outer edges, slightly wider apart at peak than at skull; placed high on skull. When drop, placed lower on head; larger ears permitted, should hang flat against skull.
Ideal Measurements—Dog: Height at shoulder 10". Length, chest bone over tail at rump 20". Head, 8½". Tail, 9" female: Height at shoulder 9½". Length, chest bone over tail at rump 19". Head, 8". Tail, 8½".
Coat (Double)—Undercoat short, close, soft, woolly. Outercoat 5½", no extra credit for greater length. Hard, straight, flat. Body coat hanging straight down each side, parting from head to tail. Hair on head shorter, softer, veiling forehead and eyes, moderate beard and apron. On ears, overhanging inside, falling down, mingling with side locks, surrounding ears like a fringe, allowing shape to appear.
Tail—When hanging, upper section pendulous, following line of rump; lower section thrown back in gentle arc. When raised, a prolongation of line of back. Well feathered.
Color—Any color, including but not limited to black, dark or light blue, gray, fawn or cream. Shade of head and legs approximate that of body. In dogs of all colors, muzzle, ears, tip of tail preferably dark.

STAFFORDSHIRE BULL TERRIER

Head, Skull—Short, deep through, broad skull, very pronounced cheek muscles, distinct stop, short foreface, black nose.
Eyes—Dark preferable. Round, medium size, set to look straight ahead.
Ears—Rose or half-pricked, not large.
Mouth—Lips tight and clean.
Neck—Muscular, rather short, clean in outline, gradually widening towards shoulders.
Forequarters—Legs straight, well-boned, set rather wide apart, without looseness at shoulders, showing no weakness at pasterns, from which point feet turn out a little.
Body—Close-coupled, level topline, wide front, deep brisket, well-sprung ribs, rather light in loins.
Hindquarters—Well muscled, hocks let down with stifles well bent. Legs parallel when viewed from behind.
Feet—Well padded, strong, medium size.
Tail—Medium length, low set, tapering to a point, carried rather low. Not curl much, may be likened to an old-fashioned pump handle.
Coat—Smooth, short, close to skin.
Color—Red, fawn, white, black or blue, or any of these colors with white. Any shade of brindle or any shade of brindle with white. Black-and-tan or liver-color not to be encouraged.
Weight, Size—Weight: Dogs, 28 pounds to 38 pounds. Females, 24 pounds to 34 pounds. Height (at shoulder), 14 to 16", these heights being related to the weights.

STAFFORDSHIRE TERRIER

Head—Medium length, deep through, broad skull, very pronounced cheek muscles, distinct stop; and ears are set high.
Ears—Cropped or uncropped, the latter preferred. Uncropped ears should be short and held half rose or prick.
Eyes—Dark and round, low down in skull and set far apart.
Muzzle—Medium length, rounded on upper side to fall away abruptly below eyes. Jaws well defined. Under-

more on page 114

CH. WEE-MITE'S TINY TEQUILLA, by Allan's Little Mr. Rebel ex Wee-Mite Pequita's Juanita. In 14 shows: 2 Group placements, 12 BB, 1 BOS, 1 BW. Top winning Smooth Chihuahua in Canadian show competition, 1962. Puppies available. Stud service. Bred, owned, handled by Mrs. Jessie M. Carr, 1294 Guelph Line, Burlington, Ont.

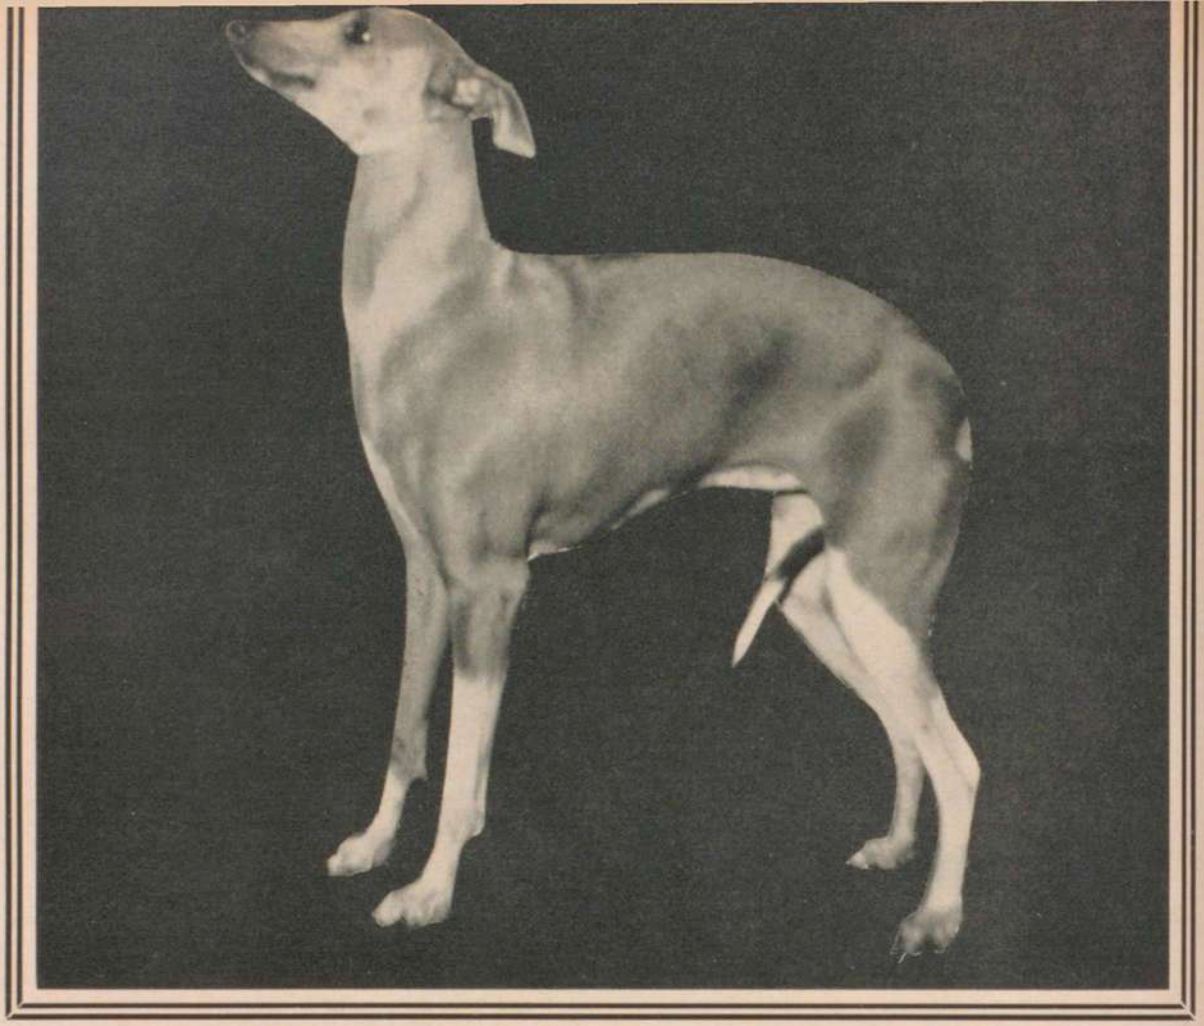

Head—A well-rounded apple dome skull, with or without molera. Cheeks and jaws lean. Nose moderately short, slightly pointed (self-colored, in blond types, or black). In moles, blues, and chocolate, they are self-colored. In blond types, pink nose permissible.
Ears—Large, held erect when alert, but flaring at the sides at about an angle of 45 degrees when in repose. This gives breadth between the ears.
Eyes—Full, but not protruding, balanced, set well apart—dark, ruby, or luminous. (Light eyes in blond types, permissible.)
Teeth—Level.
Neck and Shoulders — Slightly arched, gracefully sloping into lean shoulders, may be smooth in the very short types, or with ruff about neck preferred. Shoulders lean, sloping into a slightly broadening support above straight forelegs that are set well under, giving a free play at the elbows. Shoulders should be well up, giving balance and soundness, sloping into a level back. (Never down or low.) This gives a chestiness, and strength of forequarters, yet not of the "Bulldog" chest, plenty of brisket.
Back and Body—Level back, slightly longer than height. Shorter backs desired in males. Ribs rounded (but not too much "barrel-shaped").
Hindquarters — Muscular, with hocks well apart, neither out or in, well let down, with firm sturdy action.
Tail—Moderately long, carried cycle either up or out, or in a loop over the back, with tip just touching the back. (Never tucked under.) Hair on tail in harmony with the coat of the body, preferred furry. A natural bobtail or tailless permissible, if so born, and not against a good dog.
Feet—Small, with toes well split up, but not spread, pads cushioned, with fine pasterns. (Neither the hare nor the catfoot.) A dainty, small foot with nails moderately long.
Coat—In the smooth, the coat should be soft texture, close and glossy. (Heavier coats with undercoats permissible.) Coat placed well over body with ruff on neck, and more scanty on head and ears.
Color—Any color—solid, marked or splashed.
Weight—One to 6 pounds, with 2 to 4 pounds preferable, if 2 dogs are equally good in type, the more diminutive is preferred.
General Appearance—A graceful, alert, swift-moving little dog with saucy expression. Compact, and with terrierlike qualities.

general facts

The world's smallest breed of dog, the Chihuahua is one of America's favorites. Contrary to many stories, the Chihuahuas in Mexico today all came from the United States. There is no kennel in Mexico raising them to any extent and Mexico does not have a Standard for the breed. It is believed the Chihuahua came from the Orient, where the natives excelled in producing dwarf species of animals and plants. In 1928 a female, Ch. Empress Carlotto, was imported into Canada and since then the breed has risen to great popularity.

The foregoing greatly belies many glamorous stories told of this breed but all such stories have been found to be mere fiction by one authority or another. The result has been that the origin as stated above seems to be the most authoratative one to be found.

ITALIAN GREYHOUND

CH. WARM VALLEY TINA OF OAK GABLES (whelped Aug. 1/60) by Trade Winds' Piccolo Bambi ex Lilli D'Or of Malora. Shown 10 times in Canada — 10 BB, 6 Group placings. Shown twice in the U.S.A. — 2 WB. Breeder, Nicky Peters. Owned and handled by Mr. and Mrs. E. B. Reid, Oak Gables Kennels Reg., R.R. 2, Stittsville, Ont.

General Appearance—A miniature English Greyhound, more slender in all proportions, and of ideal elegance and grace in shape, symmetry and action.

Head—Skull, long, flat and narrow. Muzzle, very fine, nose dark, teeth level. Ears, rose shaped, placed well back, soft and delicate. Eyes, rather large, bright and full of expression.

Body—Neck, long and gracefully arched. Shoulders, long and sloping. Chest, deep and narrow. Back, curved and drooping at the hindquarters.

Legs and Feet—Forelegs, straight, set well under the shoulders, fine pasterns, small delicate bones. Hind legs, hocks well let down, thighs muscular. Feet, the long hare foot.

Tail—Rather long, fine and with low carriage.

Coat—Skin fine and supple, hair thin and glossy like satin.

Color—All shades of fawn, red, mouse, blue, cream and white are recognized, Black and Tan Terrier markings not allowed.

Action—High-stepping and free.

Size — Two classes, one of 8 pounds and under, and one over 8 pounds. A good small dog is preferable to an equally good large one but a good larger dog is preferable to a poor smaller one.

general facts

The Italian Greyhound, developed in Italy from the larger Greyhound, has never found great popularity in any other country. Known in its native land as the Piccoli Levrieri Italiani, it is not known just when and how it was dwarfed in size. It is believed that they did exist during the Renaissance. Beloved and petted by the ladies, it would seem that this was and is the main purpose of the breed. Between 1875 and 1900 it enjoyed some popularity in the United States. This was short lived, but was revived some years later, so much so that after World War I, which brought about the extinction of the breed in England, the English turned to Americans for breeding stock. It is possible that this is the only breed, today, that can make such a claim.

The Italian Greyhound was a favorite of several royal fanciers. Mary, Queen of Scots, Anne of Denmark, consort of James I of England, Mary Beatrice D'Este, consort of James II, Frederick the Great of Prussia, and the poet Shelley's son, Sir Percy Shelley, all owned very good specimens.

The rigors of the Canadian winter do not seem to deter these graceful dogs and it is as popular here as it is in the United States. Chas. F. Gilbert, Fergus, Ont. had one of the first kennels to promote the breed in this country together with Ed Beaupre of Winnipeg, Mrs. T. W. Edwards and F. D. Miller, both of Ontario.

Despite its apparent fragility the Italian Greyhounds are strong and active. Although not a "yapper", their bark is very deep for their size.

CH. (CAN. AM.) GAILINGA'S RISING SUN, by Ch. Ito of Rin Gu (Eng. imp.) ex Gailinga's Hatsuko. Top winning Japanese Spaniel Canadian show competition, 1962. Handler, Mrs. V. Haggerty. Bred and owned by Mrs. R. Koski, Gailinga Kennels Reg., 93 Walkover St., Port Arthur, Ont.

General Appearance—That of a lively, high-bred little dog with dainty appearance, smart, compact carriage and profuse coat. These dogs should be essentially stylish in movement, lifting the feet high when in action, carrying the tail (which is heavily feathered, proudly curved or plumed) over the back. In size they vary considerably, but the smaller they are the better, provided type and quality are not sacrificed. When divided by weight, classes should be under and over 7 pounds.

Head—Should be large for the size of the dog, with broad skull, rounded in front.

Eyes—Large, dark, lustrous, rather prominent and set wide apart.

Ears—Small and V-shaped, nicely feathered, set wide apart and high on the head and carried slightly forward.

Nose—Very short in the muzzle part. The end or nose proper should be wide, with open nostrils, and must be the color of the dog's markings, **i.e.** black in black-marked dogs, and red or deep flesh color in red or lemon-marked dogs. It shall be a disqualification for a black and white Japanese Spaniel to have a nose any other color than black.

Neck—Should be short and moderately thick.

Body—Should be squarely and compactly built, wide in chest, "cobby" in shape. The length of the dog's body should be about its height.

Tail—Must be well twisted to either right or left from root and carried up over back and flow on opposite side; it should be profusely covered with long hair (ring tails not desirable).

Legs — The bones of the legs should be small, giving them a slender appearance, and they should be well feathered.

Feet—Small and shaped somewhat long; the dog stands up on its toes somewhat. If feathered, the tufts should never increase in width of the foot, but only its length a trifle.

Coat — Profuse, long, straight, rather silky. It should be absolutely free from wave or curl, and not lie too flat, but have a tendency to stand out, especially at the neck, so as to give a thick mane or ruff, which with profuse feathering on thighs and tail gives a very showy appearance.

Color—The dogs should be either black and white or red and white, **i.e.** parti-colored. The term red includes all shades of sable, brindle, lemon and orange, but the brighter and clearer the red the better. The white should be clear white, and the color, whether black or red, should be evenly distributed, patches over the body, cheek and ears.

Disqualifications

In black and whites, a nose any other color than black.

general facts

The Japanese Spaniel (or Japanese Chins) were first brought into the United States about 100 years ago, from England. Authorities believe that the dog originated in Korea or China. A Korean Prince, on a mission to Japan in 732, was said to have one of these dogs with him. It had such a charming disposition that the ladies of Japan immediately wanted one.

It is also believed that these dogs were taken to England about 1613 and were bred with English Toy Spaniels, which perhaps accounts for the pushed-back nose of the English dogs.

MALTESE

CH. (CAN. AM.) GINA OF VILLA MALTA, by Ch. Ricco of Villa Malta ex Martha Smug. Leading Maltese 1961, 1962. Shown 31 times: 4 BIS; Group wins (Canada and U.S.A.) — 16 1sts, 4 2nds, 3 3rds, 1 4th; 27 BB; 3 BOS. Breeder, Dr. C. V. Calverisi. Handler, Mrs. H. J. Brunotte. Stud service. Owned by Mrs. Justin Morgan, 5032 Goodrich, Clarence, N.Y.

General Appearance — Intelligent, sprightly, affectionate with long straight coat hanging evenly down each side, the parting extending from nose to root of tail. Although the frame is hidden beneath a mantle of hair, the general appearance should suggest a vigorous well-proportioned body.

Weight—Not to exceed 7 pounds. Smaller the better. Under 3 pounds ideal.

Color—Pure white.

Coat—Long, straight, silky but strong and of even texture throughout. No undercoat.

Head—In proportion to size of dog—should be of fair length: the **Skull** slightly round, rather broad between the ears and moderately well defined at the temples, **i.e.** exhibiting a moderate amount of stop and not in one straight line from nose to occiput bone.

Muzzle—Not lean nor snipey but delicately proportioned.

Nose—Black.

Ears—Drop ears set slightly low, profusely covered with long hair.

Eyes—Very dark—not too far apart—expression alert but gentle: black eye rims give a more beautiful expression.

Legs—Short, straight, fine-boned and well feathered.

Feet—Small with long feathering.

Body and Shape—Back short and level. Body low to ground, deep loins.

Tail and Carriage — Tail well feathered with long hair, gracefully carried, its end resting on the hindquarters and side.

general facts

Maltese — a name which has been familiar in dog circles for perhaps 3,000 years but whose origin is perhaps the most puzzling of any breed. It is thought, although no one can be certain, that the beloved dog of the Roman and Greek ladies before the time of Christ was this same diminutive dog. If this is the case, the dogs, according to picture, had prick ears and were sharp faced. Some authorities claim the dog came from Malta, but others think Melita was the original home.

The earliest evidence that can be relied upon seems to be a painting which depicted a dog, similar to our modern Maltese, reclining in a lady's lap. The picture was painted about 1763.

Some of these dogs were first imported into England from Manila where, it is said, several very good Maltese were found. The first dog show for the breed was held in London in 1862, after which the breed grew in popularity until World War I when it began to die out in England. When an attempt was made to revive the breed a trip was made to Malta, but no Maltese could be found there and stock was purchased in Holland and Germany. This seems surprising for by this time the breed was well established in Canada. Fair classes of them were shown at widely-spread shows both in the east and in the west. The best known kennel, at that time, was in London, Ont., owned by Mrs. H. E. Short. The first Canadian Champion was owned by Raymond W. Gard, Toronto.

Sometimes referred to as the Maltese Spaniel or Maltese Terrier, it has been conceded that such a graceful, diminutive dog could be neither one nor the other so dogdom has now limited the name to Maltese Dog. Although three pounds is the ideal weight the Maltese is nevertheless a strong and very healthy dog that draws exclamations of admiration from the ringside.

CH. RINGLANDS HAUTE ECOLE (whelped Feb. 27/61), by Ringlands Herola Pompey ex Ringlands Red Link. 1962-63 — Group wins: 2 1st, 3 2nd, 5 3rd, 6 4th. Breeder, Mrs. N. E. Staff, England. Handled to Championship by Mrs. Lorna Jackson, balance by A. M. FitzGerald. Puppies available. Owned by Mrs. J. H. Daniell-Jenkins, Kennels of the Rouge Reg'd., Rouge Hill P.O., Ont.

Head—Well proportioned. Skull medium width, slightly rounded between ears. Well-defined stop. Muzzle shorter than skull, fine, abruptly thinner than head, becoming more slender down to nose.
Nose—Small, rounded, slightly flat on top. Black.
Eyes—Center of eyes on line with stop. Round. Rim around eyes black.
Mouth—Lips tight, thin, black. Scissors bite.
Ears—Erect or drop type, large, set on sides of head. Fringed. (1) Erect type carried obliquely, moves like spread wings of butterfly. At rest forms angle approximately 45 degrees to head. Concha largely open, inside covered with silken hair. Fine leather. (2) Drop type must be completely down.
Neck—Slender.
Body—Slightly longer than high. Back level. Chest medium depth, width. Ribs arched. Loins tucked up.
Shoulders—Flexible, well-angulated.
Forelegs—Fine, straight. It stands with front feet rather close together. Back of forelegs covered with abundant fringes, diminishing to pastern; front of forelegs covered with short hair.
Hindlegs—Thighs, fairly muscular, well-angulated. Hindlegs slender, parallel. Covered to hocks with abundant breeches; hind pastern covered short smooth hair. Stifles well-angulated. Hocks fairly high.
Feet—Thin, elongated. Toes close, arched. Hair on feet short, fine tufts may appear between toes, grow beyond them.
Tail—Set high, carried well arched over body. Plume usually hangs on side of body.
Coat—Short, smooth on head, muzzle, front of legs, back of legs from hocks downward. Hair around neck forms collarette. Hair on neck, shoulders, breast abundant in comparison with rest of body. Back of forelegs well fringed, length of fringes shortening down to pastern. Tail covered with long abundant plume.
Quality of Coat—Profuse, shiny, may be slightly wavy. No undercoat. Hair on back flat. Coat soft, comparatively fine, resilient quality.
Size—Height at withers 11" or under. Weight, height in good proportion.
Gait—Free, quick, easy, graceful.
Color, Markings—Two-colored or tri-colored. Usual two-colors white and black, white and sable, or white and some shade red, varying from light tan to deep red.

PINSCHER (MINIATURE)

CH. AIRLANE METEOR OF WILD ROCK, by Ch. Airlane's Thunderbolt ex Urray Tap Dancer. Canada's only BIS Miniature Pinscher. Top winning Min Pin for 2 years. BCIS Toy Specialty, Sportsmen's Show, 1962. Puppy Champion, numerous BCBP in Group, BCB in Group, Group placings, consistent BB winner. Breeder, W. Wartnow. Stud service, puppies (Min Pins and Boxers). Owned and handled by Mrs. Flora Hewitt, Tweed, Ont.

General Appearance—The Miniature Pinscher was originated in Germany and named the "Reh Pinscher" due to his resemblance in structure and animation to a very small specie of deer found in the forests. This breed is structurally a well-balanced, sturdy, compact, short-coupled, smooth-coated toy dog. He is naturally well groomed, proud, vigorous and alert. The natural characteristic traits which identify him from other toy dogs are his precise Hackney gait, his fearless animation, complete self-possession, and his spirited presence.

Head—Proportion with body. From Top: Tapering, narrow, well-fitted; not too prominent, foreface should balance with skull. From Front: Skull appears flat, tapering forward toward muzzle. Muzzle strong, in proportion to head; cheeks, lips small, taut, closely adherent to each other. Teeth in alignment, apposition. From Side: Well-balanced, only slight drop to muzzle, which should be parallel to top of skull. Eyes: Full, slightly oval, almost round, clear, bright, dark, wide apart, fitted well into sockets. Ears: Well-set, firmly placed, upstanding (when cropped, pointed, carried erect in balance with head). Nose: Black only (chocolates may have self-colored nose).

Neck—Proportioned to head, body. Slightly arched, gracefully curved, clean, firm, blending into shoulders, length well-balanced, muscular, free from dewlap, throatiness.

Body—From Top: Compact, slightly wedge-shaped, muscular, well-sprung ribs. From Side: Depth of brisket, base line of which level with points of elbows; short, strong loin, belly moderately tucked up. Back level, or slightly sloping toward rear. Length of males equals height at withers. Females may be slightly longer. From Rear: High tail-set; strong, sturdy upper shanks, croup slope about 30 degrees; vent opening not barreled. Forequarters: Forechest well-developed, full, moderately broad, shoulders clean, sloping, moderate angulation. Hindquarters: Well-knit muscular quarters.

Legs, Feet—Strong bone, small clean joints; feet catlike, toes strong, well-arched, closely knit, deep pads, thick, blunt nails. Forelegs, Feet: from front straight, upstanding, elbows close to body, well-knit, flexible yet strong, perpendicular pasterns. Hind Legs: All adjacent bones well-angulated, well-muscled thighs or upper shanks, well-defined stifles, hocks short, set well apart turning neither in nor out.

Tail—Set high, held erect, docked to ½ to 1".

Coat — Smooth, hard, short, straight, lustrous, closely adhering to, uniformly covering body.

Color—1. Solid red or stag red. 2. Black, sharply defined tan, rust-red markings on cheeks, lips, lower jaw, throat, twin spots above eyes, chest, lower half of forelegs, inside of hind legs, vent region, lower portion of hocks, feet. Black pencil stripes on toes. 3. Solid brown or chocolate with rust or yellow markings.

Size—Desired height 11" to 11½" at withers.

Disqualifications

Color—Thumb marks or any area of white on feet or forechest exceeding ½" in its longest dimension. Under 10" or over 12½".

CH. HARLOW FLASHING AMBER (whelped May 22/61), by Harlow Red Flame 2nd ex Lilyburn Wembley. 3 pound male. 1962 record: 1 BCB in Group, 2 BCBP in Group, 7 Group placings, 12 BB. Stud service. Puppies and grown stock usually available. Bred, owned and handled by James and Louise Procter, Harlow Kennels Reg'd., R.R. 1, Kennedy Rd., Milliken, Ont.

Appearance—The Pomeranian in build and appearance should be a compact, short-coupled dog, well knit in frame. He should exhibit great intelligence in his expression, docility in his disposition and activity and buoyancy in his deportment and be sound in action.
Head—Wedge-shaped, somewhat foxy in outline, skull being slightly flat, large in proportion to muzzle. In its profile it has a little stop not too pronounced, hair on head and face smooth or short-coated. Muzzle should finish rather fine. Scissors grip.
Eyes—Medium, oblique in shape, not set too wide apart, or too close together, bright and dark in color. The eye rims of the blues and browns are self-colored. In all other colors eye rims must be black.
Ears—Small, not set too far apart or too low down, carried perfectly erect, covered with soft, short hair. Trimming unruly hairs on edges of ears permissible.
Nose—Self-colored in blues and browns. In all other colors black.
Neck, Shoulders—Neck rather short, well set in, lion-like, covered with profuse mane and frill of long, straight hair sweeping from underjaw, covering the whole of front part of shoulders and chest as well as top part of shoulders. Shoulders clean and laid well back.
Body—Back short, level, body compact, being well ribbed up, rounded. Chest fairly deep.
Legs—Forelegs well feathered, perfectly straight, medium length, strength in due proportion to well-balanced frame. Feet small, compact, standing well up on toes. Hind legs and thighs well feathered down to hocks, must be fine in bone, free in action. Trimming around edges of toes and up back of legs to first joint is permissible.
Tail—Characteristic of breed, turned over back and carried flat, set high. Profusely covered with long, spreading hair.
Coat—Should be two coats, an under and an over coat; soft, fluffy under coat, and a long, perfectly straight, glistening coat covering whole body, being very abundant around neck and forepart of shoulders and chest where it should form a frill of profuse, standing-off, straight hair extending over shoulders. Hindquarters clad with long hair or feathering from top of rump to hocks. Texture of guard hairs must be harsh to touch.
Color—12 colors, or color combinations permissible and recognized namely, black, brown, chocolate, beaver, red, orange, cream, orange-sable, wolf-sable, blue, white and parti-color. Beaver color is dark beige. Parti-color white with orange or black color distributed in even patches on body, white blaze on head desirable. Where whole colored and parti-colored Pomeranians compete together, preference should, other points being equal, be given whole colored specimen. Sable-colored dogs, shaded throughout as uniformly as possible, no self-colored patches. In orange-sable, undercoat a light tan color with deeper orange guard hairs ending in black tippings. In wolf-sable undercoat light gray with deeper shade of steel gray guard hairs ending in black tippings. Shaded muzzle on sables permissable. Orange Pomeranians self-colored throughout, light shadings of same tone (not white) on breechings permitted. Above colors only allowable colors or combination of colors.
Size—3 pounds to 7 pounds. Ideal size from 4 to 5 pounds.
Classification—Classes may be divided by color in Open Classes as follows: Black and brown; red, orange or cream; sables. Any other allowable color.

CH. ACACIA'S MAR-MA-DUKE (whelped Jan. 29/61), by Ch. (Can. Am.) Blaylock's Mar-Ma-Duke ex Ch. Acacia's Madam La Zonga. 1962-63 show record: Group wins — 2 1st, 3 2nd, 5 3rd, 4 4th; 21 BB. Included, BIS, Toy Specialty, Sportsmen's Show, 1963. Bred, owned and handled by Mr. and Mrs. John Loftus, R.R. 2, Stittsville, Ont.

Symmetry—Symmetry and general appearance, decidedly square and cobby. A lean, leggy Pug and a dog with short legs and a long body are equally objectionable.

Size and Condition—The Pug should be **multum in parvo,** but this condensation (if the word may be used) should be shown by proportions, and hardness of developed muscle. Weight from 14 to 18 pounds (dog or female) desirable.

Body—Short and cobby, wide in chest and well ribbed up.

Legs—Very strong, straight, of moderate length and well under.

Feet—Neither so long as the foot of the hare, nor so round as that of the cat; well-split-up toes, and the nails black.

Muzzle—Short, blunt, square, but not up-faced.

Head—Large, massive, round — not appleheaded, with no indentation of the skull.

Eyes—Dark in color, very large, bold and prominent, globular in shape, soft and solicitous in expression, very lustrous, and when excited, full of fire.

Ears—Thin, small, soft, like black velvet. There are two kinds—the "rose" and "button." Preference is given to the latter.

Markings—Clearly defined. The muzzle or mask, ears, moles on cheeks, thumb mark or diamond on forehead, back-trace should be as black as possible.

Mask—The mask should be black. The more intense and well defined it is the better.

Wrinkles—Large and deep.

Trace—A black line extending from the occiput to the tail.

Tail—Curled tightly as possible over the hip. The double curl is perfection.

Coat—Fine, smooth, soft, short and glossy, neither hard nor woolly.

Color—Silver or apricot-fawn. Each should be decided, to make the contrast complete between the color and the trace and the mask. Black.

general facts

Because the Pug is sometimes referred to as "The Dutch Dog", it can be assumed that it came originally from Holland. Many are of the opinion, however, that it is far more reasonable to place China as the birthplace. Dutch traders carried on a flourishing business in China and one would expect them to take home some of these attractive dogs.

Early fanciers of the breed in England, it is said, obtained their original stock from Russia but these were not of the clear color that was desired and had pinched faces and small eyes. A dog from Peking was imported and used at stud to correct these undesirable points. The first black Pug was exhibited in England in 1866 and it is believed that this color came from a breeding with a Japanese dog which was black or black and white.

PUG

CH. (CAN. AM.) LILAC FARM PEACH HONEY, by Ch. Lilac Farm Wild Hay ex Ch. Lilac Farm Honeysuckle. Debut Westminster at 6 months (1949), won BB. 1st in Group, Canada, 5 times in succession. Winner of: Janet Mack Cup (most Toy Group placements, 3 years succession); Acker Cup (most Toy Group 1sts any Toy Manchester to date); 16 Best Brace in Show with half brother. Bred and owned by Mrs. Lourene Wishart, Lilac Farm (since 1860), Bennet, Lancaster Co., Neb. Mailing address: 2140 Sheridan Blvd., Lincoln, Neb.

Head—Long, narrow, tight-skinned, almost flat, slight indentation up forehead; slightly wedge-shaped, tapering to nose, with no visible cheek muscles, well filled up under eyes; level in mouth, tight-lipped jaws.

Eyes—Small, bright, sparkling, as near black as possible; set moderately close together; oblong shape, slanting upwards on outside; neither protrude nor sink in skull.

Nose—Black.

Ears—Moderate size; set well up on skull, rather close together; thin, moderately narrow at base; pointed tips; naturally erect carriage.

Neck and Shoulders—Neck moderate length, slim, graceful; gradually becoming larger as it approaches, and blends smoothly with sloping shoulders; free from throatiness; slightly arched from occiput.

Chest—Narrow between legs; deep brisket.

Body—Moderately short, robust loins; ribs well sprung out behind shoulders; back slightly arched at loin, falling again to joining of the tail to same height as shoulder.

Legs—Forelegs straight, well under body. Hind legs should not turn in or out as viewed from rear; carried back; hocks well let down.

Feet—Compact, well arched, jet-black nails; two middle toes in front feet rather longer than others; hind feet shaped like those of a cat.

Tail—Moderately short, set on where arch of back ends; thick where it joins body, tapering to a point; not carried higher than back.

Coat—Smooth, short, thick, dense, close, glossy; not soft.

Color—Jet black and rich mahogany tan, which should not run or blend into each other but meet abruptly forming clear, well-defined lines of color division. Small tan spot over each eye; very small tan spot on each cheek; lips of upper and lower jaws tanned, extending under throat, ending in shape of letter V; inside of ears partly tanned. Tan spots, called rosettes, on each side of chest above front legs, more pronounced in puppies than in adults. Black "thumb mark" patch on front of each foreleg between pastern and knee. Distinct black "pencil mark" line running lengthwise on top of each toe on all feet. Remainder of forelegs to be tan to the knee. Tan on hind legs should continue from penciling on feet up inside of legs to a little below stifle joint; outside of hind legs black. Tan under tail, on the vent, but only of such size as to be covered by tail.

Weight — Not exceeding 12 pounds. It is recommended that at all dog shows the open class shall be (and any or all other classes, except puppy class, may be) divided as: (a) Under 7 pounds. (b) 7 pounds to 12 pounds.

Disqualifications

Cropped or cut ears. White whenever it shall form a patch or stripe measuring as much as ½" in its longest dimension. Weight, more than 12 pounds.

YORKSHIRE TERRIER

CH. (CAN. AM.) KATHLEEN PRIDE, by Rusty Blue Boy ex Sabine. Top winning Yorkshire Terrier in Canada, 1962. Breeder, M. E. Mead, England. Handler in the United States, Mrs. Pat Tripp. Owned by R. D. Thompson, Abon Hassan Kennels Reg'd., 314 Bower Bldg., 543 Granville St., Vancouver 2, B.C.

General Appearance—Should be that of a long-coated toy terrier, the coat hanging quite straight and evenly down each side, a parting extending from the nose to the end of the tail.

The animal should be very compact and neat, the carriage being very upright, and having an important air. The general outline should convey the existence of a vigorous and well-proportioned body.

Head—Should be rather small and flat, not too prominent or round in the skull, nor too long in the muzzle, with a perfect black nose. The fall on the head to be long, of a rich golden tan, deeper in color at the sides of the head about the ear roots, and on the muzzle where it should be very long. The hair on the chest a rich bright tan. On no account must the tan on the head extend on to the neck, nor must there be any sooty or dark hair intermingled with any of the tan.

Eyes—Medium, dark and sparkling, having a sharp, intelligent expression, and placed so as to look directly forward. They should not be prominent, and the edge of the eyelids should be of a dark color.

Ears—Small, V-shaped, and carried semierect, or erect, and not far apart, covered with short hair, color to be of a very deep rich tan.

Mouth—Perfectly even, with teeth as sound as possible. An animal having lost any teeth through accident not a fault, providing the jaws are even.

Body—Very compact, and a good loin. Level on the top of the back.

Coat—The hair on body moderately long and perfectly straight (not wavy), glossy like silk, and of a fine silky texture. Color, a dark steel blue (not silver blue) extending from the occiput (or back of skull) to the root of tail, and on no account mingled with fawn, bronze or dark hairs.

Legs—Quite straight, well covered with hair of a rich golden tan a few shades lighter at the ends than at the roots, not extending higher on the forelegs than the elbow, nor on the hind legs than the stifle.

Feet—As round as possible, and the toenails black.

Tail—Cut to medium length; with plenty of hair, darker blue in color than the rest of the body, especially at the end of the tail, and carried a little higher than the level of the back.

Tan—All tan hair should be darker at the roots than in the middle, shading to a still lighter tan at the tips.

general facts

One of the younger, man-made breeds, the Yorkshire's origin still remains a mystery. In Yorkshire, from where the dog gets his name, the residents had, for companions, several breeds of Toys and Terriers. This also was the home of the Airedale and it is quite conceivable that both of these breeds have common ancestors. The only reference made to any specific breeds contributing to the Yorkshire is that of a black and tan terrier from Manchester and a drop-ear Skye type terrier. The original dogs were not a toy breed for they ran from 12 to 14 pounds and it was only by selective breeding that the breed was dwarfed to its present size.

AFFENPINSCHER/KING CHARLES/CHIHUAHUA/ENGLISH TOY /GRIFFON /HAIRLESS

AFFENPINSCHER

Coat—Very important. Short, dense in certain parts, shaggy, longer in others, but should be hard, wiry. Longer, more loose and shaggy on legs, around eyes, nose, chin, giving typical monkeylike appearance from whence comes his name. Best color black. However; black with tan markings, red, gray, other mixtures permissible.
Head—Round, well-domed forehead.
Eyes—Round, good size, black, brilliant.
Ears—Rather small, set high, pointed, erect, usually clipped to a point.
Muzzle—Short, rather pointed, black nose. Upper jaw trifle shorter than lower, teeth close together. A slight undershot condition is not material. Teeth should not show.
Neck—Short, straight.
Body—Straight with length about equal to height at shoulder. Chest, reasonably deep, body should show only slight tuck-up at loin.
Legs—Front legs straight as possible. Hind legs without much bend at hocks, set well under body.
Feet—Round, small compact, with black pads, nails.
Tail—Cut short, set and carried high.
Size—Smaller dog, if characteristic type, more valuable, shoulder height should not exceed 10¼" in any case.

CAVALIER KING CHARLES SPANIEL

General Appearance—An active, graceful, well-balanced dog. Absolutely fearless and sporting in character and very gay and free in action.
Head, Skull—Head almost flat between ears, without dome. Stop shallow; length from base of stop to tip about 1½". Nostrils well developed, pigment black. Muzzle well tapered to point. Lips well covering.
Eyes—Large, dark, round. Spaced well apart.
Ears—Long, set high, plenty of feather.
Mouth—Level.
Neck—Well set on.
Forequarters — Shoulders not too straight. Legs: moderate bone, straight.
Body—Short-coupled, plenty of spring of rib. Back level. Chest moderate, leaving ample heart room.
Hindquarters — Legs: moderate bone, straight.
Feet — Compact, well-cushioned, well feathered.
Tail—Docking of tails optional. Length in balance with body.
Coat—Long, silky, free from curl. Slight wave permissible. Plenty of feather.
Color—Black and Tan—raven black with tan markings above eyes, on cheeks, inside ears, on chest, legs, underside tail. Tan bright. Ruby — whole-coloured rich red. Blenheim — rich chestnut markings well broken-up on pearly white ground. Markings evenly divided on head, leaving room between ears for much valued lozenge mark or spot, a unique characteristic of this breed. Tri-color — Black and white, well spaced, broken-up, tan markings over eyes, on cheeks, inside ears, inside legs on underside of tail. Black and White permissible, not desirable.
Weight, Size—Weight: 10 to 18 pounds. A small well balanced dog well between these weights desirable.

CHIHUAHUA (Long Coat)

The long-coated variety of the Chihuahua is judged by the same standard as the smooth-coated variety, except for the following:
Coat—In the Long Coats, the coat should be of a soft texture, either flat or slightly curly, with undercoat preferred. Ears fringed (heavily fringed ears may be tipped slightly, never down), feathering on feet and legs, and pants on hind legs. Large ruff on neck desired and preferred. Tail full and long (as a plume).
Disqualifications
Too thin coat, that resembles bareness.

ENGLISH TOY SPANIELS (King Charles, Prince Charles, Ruby & Blenheim)

Head—Well domed, semi-globular.
Eyes—Set wide apart, eyelids square to line of face. Large, dark, enormous pupils.
Stop—Well marked.
Nose—Short, well turned up, deep, wide, open nostrils.
Jaw—Muzzle square, deep, lower jaw wide between branches. Turned up or "finished".
Ears—Long, so as to approach the ground. Set low down on head, hang flat to sides of cheeks, heavy-feathered.
Size—9 to 12 pounds.
Shape — Decidedly "cobby," strong, stout legs, short broad back, wide chest.
Coat—Long, silky, soft, wavy, not curly. profuse mane, extending well down in front of chest. Feather well displayed on ears, feet, in latter case so thickly to give appearance of being webbed. Carried well up backs of legs. In Black and Tan feather on ears very long, profuse, exceeding that of the Blenheim by an inch or more. Feather on tail (which is cut to the length of about 1½") silky, from 3 to 4" in length, constituting a marked "flag" of a square shape, not carried above level of back.
Colors of the Two Varieties—
King Charles and Ruby—The King Charles and Ruby types which comprise one show variety are solid colored dogs. King Charles are black and tan (considered a solid color), black rich and glossy, deep mahogany tan marks over eyes and on muzzle, chest and legs. The Ruby is a rich chestnut red and is whole colored.
Blenheim and Prince Charles — The Blenheim and Prince Charles types which comprise the other show variety are broken colored dogs. Blenhiem is red and white. Ground color is a pearly white which has bright red chestnut or ruby red markings evenly distributed in large patches. Ears and cheeks red, blaze of white extending from nose up forehead, ending between ears in a crescentic curve. In center of blaze at top of forehead, there should be a clear "spot" of red, size of a dime. Prince Charles, a tri-colored dog, white, black and tan. Ground color, pearly white. Black consists of markings evently distributed in large patches. Tan appears as spots over eyes, on muzzle, chest, legs; ears and vent also lined with tan. The Prince Charles has no "spot", that being a particular feature of the Blenheim.
Disqualifications
King Charles and Ruby: A white patch on the chest, or white on any other part.

GRIFFON (BRUSSELS)

Head—Skull: Large, round, domed forehead. Ears—small, set rather high on head. May be cropped or natural. Natural, are carried semi-erect. Eyes—set well apart, very large, black, prominent, well open. Eyelashes long, black. Eyelids edged with black. Nose—very black, extremely short, tip being set back deeply between eyes to form a lay-back. Nostrils large, stop deep. Lips—edged with black, clean finish to mouth. Jaws—chin undershot, prominent, large with upward sweep, lower jaw rather broad.
Body, Legs—Brisket broad, deep, ribs well sprung, back level, short. Neck—medium length, gracefully arched. Tail—set and held high, docked to about one third. Forelegs—medium length, straight in bone, well muscled, set moderately wide apart, straight from point of shoulders as viewed from front. Pasterns short, strong. Hind legs—set true, thighs strong, well muscled, stifles bent, hocks well let down. Feet—round, small, compact. Toes well arched. Black pads, toenails preferred.
Coat — Two distinct types—rough and smooth. Rough coat, wiry, dense, harder and more wiry the better. Coat not so long as to give a shaggy appearance, but distinctly different all over from smooth coat. Head covered with wiry hair, slightly longer around eyes, nose, cheeks, chin, forming a fringe. Smooth coat similar to that of the Boston Terrier or English Bulldog, no trace of wire hair.
Color—In the rough-coated type, coat is either: 1. reddish brown, with a little black at whiskers and chin allowable, or 2. black and reddish brown mixed, usually with black mask and whiskers, or 3. black with uniform reddish brown markings, usually appearing under chin, on legs, over eyebrows, around edges of ears and around vent, or 4. solid black. Colors of the smooth-coated type are same. "Frost" on the black muzzle of a mature dog, is natural.
Weight—For the class of dogs and females of small size, weight should not exceed 7 pounds. For class of dogs and females of a large size, that is weighing more than 7 pounds, should not exceed 11 pounds for dogs, 12 pounds for females. **Note:** Type and quality are of greater importance than weight, and a smaller dog that is sturdy and well proportioned should not be penalized.
Disqualifications
Dudley or butterfly nose, white spot or blaze anywhere on coat, hanging tongue, jaw overshot.

MEXICAN HAIRLESS

Head—Slender, skull narrow, cheeks lean, muzzle long, pointed. Tuft of coarse hair on top of skull, in center but a bit forward, in some cases shadowing brow.
Eyes—Not too deep-set, balanced, not bulging—eye rims pink or dark, eyes themselves hazel, yellow or dark.
Neck—Good length, slender, well arch-

ed into flat shoulders, chest rather broad, legs fairly long, slender, ribs well rounded, chest rather deep.
Back—Level, rump slightly rounded.
Skin—Smooth, soft, not wrinkled, any color, hot to touch, no hair whatever.
Muscles and sinews well developed. Nervous tremor of muscles and sinews is characteristic like that of a nervous race horse.
Feet—Hare feet, nails black in dark skin or pale in pale skin dogs.
Tail—Long, smooth tail, carried out similar to that of Manchester Terrier. Little fuzz or hair on lower half of tail permitted. Absence of tuft on top of head undesirable.
Disqualifications
Cut or broken ears or tail are disqualifications, likewise a fuzz or any hair, except as above described.

PEKINGESE

Expression—Suggest the Chinese origin of the Pekingese in its quaintness and individuality, resemblance to lion in directness and independence, should imply courage, boldness, self-esteem, combativeness rather than prettiness, daintiness or delicacy.
Skull—Massive, broad, wide, flat between ears (not dome-shaped), wide between eyes.
Nose—Black, broad, very short, flat.
Eyes—Large, dark, prominent, round, lustrous.
Stop—Deep.
Ears—Heart-shaped, not set too high, leather never long enough to come below muzzle, nor carried erect, drooping long feather.
Muzzle — Wrinkled, very short, broad, not overshot nor pointed. Strong, broad underjaw, teeth not to show.
Shape of Body—Heavy in front, well-sprung ribs, broad chest, falling away lighter behind, lionlike. Back level. Not too long in body; allowance made for longer body in females.
Legs—Short forelegs, bones of forearm bowed, firm at shoulder; hind legs lighter but firm and well shaped.
Feet—Flat, toes turned out, not round, should stand well up on feet, not on ankles.
Action—Fearless, free, strong, slight roll.
Coat, Feather, Condition—Long, thick undercoat, straight, flat, rather coarse, soft; feather on thighs, legs, tail, toes long, profuse.
Mane—Profuse, extending beyond the shoulder blades, forming ruff or frill round the neck.
Color—All colors allowable. Red, fawn, black, black and tan, sable, brindle, white and parti-color well defined: black masks and spectacles around eyes, with lines to ears desirable.
Definition of a Parti-Color Pekingese—Coloring must be broken on body. No large portion of any one color should exist. White shown on saddle. Dog of any solid color with white feet and chest is not a parti-color.
Tail—Set high; lying well over back to either side; long, profuse, straight feather.
Size—Medium size preferred, providing type and points are not sacrificed; extreme limit 14 pounds.
Disqualifications
Weight—over 14 pounds; Dudley nose.

To the wife who asked for a new Poodle her husband replied: "Extenuating circumstances preclude me from such an extravagance." "I don't get it," she said. "That's right," said he.

TOY POODLE

The Standard for the Toy Poodle, except for size, is identical with that of the Miniature and Standard varieties of the Poodle breed.

PAPILLON

from page 107

Usually in spots or patches against white, which predominates. Tricolored black and white with tan spots. Tan spots may appear over eyes, on cheeks, in ears, under tail. Black appears in patches on white in same manner as in dog of two colors. Saddle permissible. Blaze desirable, not essential.
Disqualifications
Pink nose, or one with pink spots. 12" and over.

general facts

The large Toy Group consists of dogs, all diminutive in size, that have originated or been developed in nearly every country in the world. The Orient, Europe, Arabia, Britain, and America have done a great deal to give us these lovable bundles of affection. Consisting of hairless, smooth coat, wire coat, and long coated dogs, their main purpose is and has always been to be a companion to man. They have found favor in Royal households as well as lowly cabins.

The long hair of the Yorkshire, Maltese, Toy Poodle etc. can often be found done up in curlers or wrapped in paper to prevent breakage to the fine silky hair. Some of these silken tresses reach to, and often trail on the ground. Little or nothing can be seen of the body of a Maltese or Yorkshire when they are in full bloom of coat. Many devoted hours are spent grooming these lovable dogs, for their fine textured hair requires constant care to keep the coat in the best condition. Other long coated breeds, such as the English Toy Spaniels, Papillon, and Long-coated Chihuahua, need only moderate attention and the several short coated breeds require a minimum of effort to keep them ready for top show competition.

Many of the Toy breeds excell in obedience and are frequently seen taking part in Obedience Trials where they compete for all three degrees. Toy Poodles, Chihuahuas, Papillons and Miniature Pinschers have all been known to carry off high scores in the advance work in the Open and Utility rings.

The origin of the majority of the Toy breeds is obscured in mystery. Many fantastic stories are told and retold of their development, dating back many hundreds of years and others of more recent vintage. Weights range from the smallest of all breeds, the Chihuahua's one pound, to the 18 pounds of the Pug, the largest breed in the Group.

Each member of the Group has had some marked degree of popularity, with the Chihuahua presently enjoying one of the leading positions in the United States and Canada for a number of years. In order of popularity (based on the registrations) at present in the United States are the Chihuahua, Pekingese, Pomeranian, Pug, Yorkshire, Miniature Pinscher, Maltese, Italian Greyhound, Japanese Spaniel and the Papillon. The other breeds follow somewhat down the list. It must be remembered, however, that the Toy Poodles are registered with the Miniature and Standard, as Poodles, and therefore no figures are available on their registrations. Although not available at present, the figures, when released for Canada, will in all probability show the breeds in about the same order of popularity.

This Group includes many breeds that are frequent Best in Show winners. Pekingese, Toy Poodles, Maltese are regularly winning this high honor. Pomeranians, Yorkshires and Miniature Pinschers follow closely. Other breeds only occasionally achieve this high award.

Pet accessories abound for many of the Toys, from bejewelled collars and leads, studded hair ornaments, mink coats, lounging robes, pyjamas and numerous other items both ornamental and necessary. Fancy show cases and carrying cases are seen at most shows, serving as comfortbale quarters for the dogs and solving the owners' problems in transporting such little dogs.

These diminutive dogs are excellent city dwellers and generally are welcome tenants in the most exclusive apartment buildings. Their small food requirements permit people in any wage bracket to participate in the fascinating hobby of breeding dogs. The average litter is small, contributing to the practicability of a breeding program without the expense of kennel buildings.

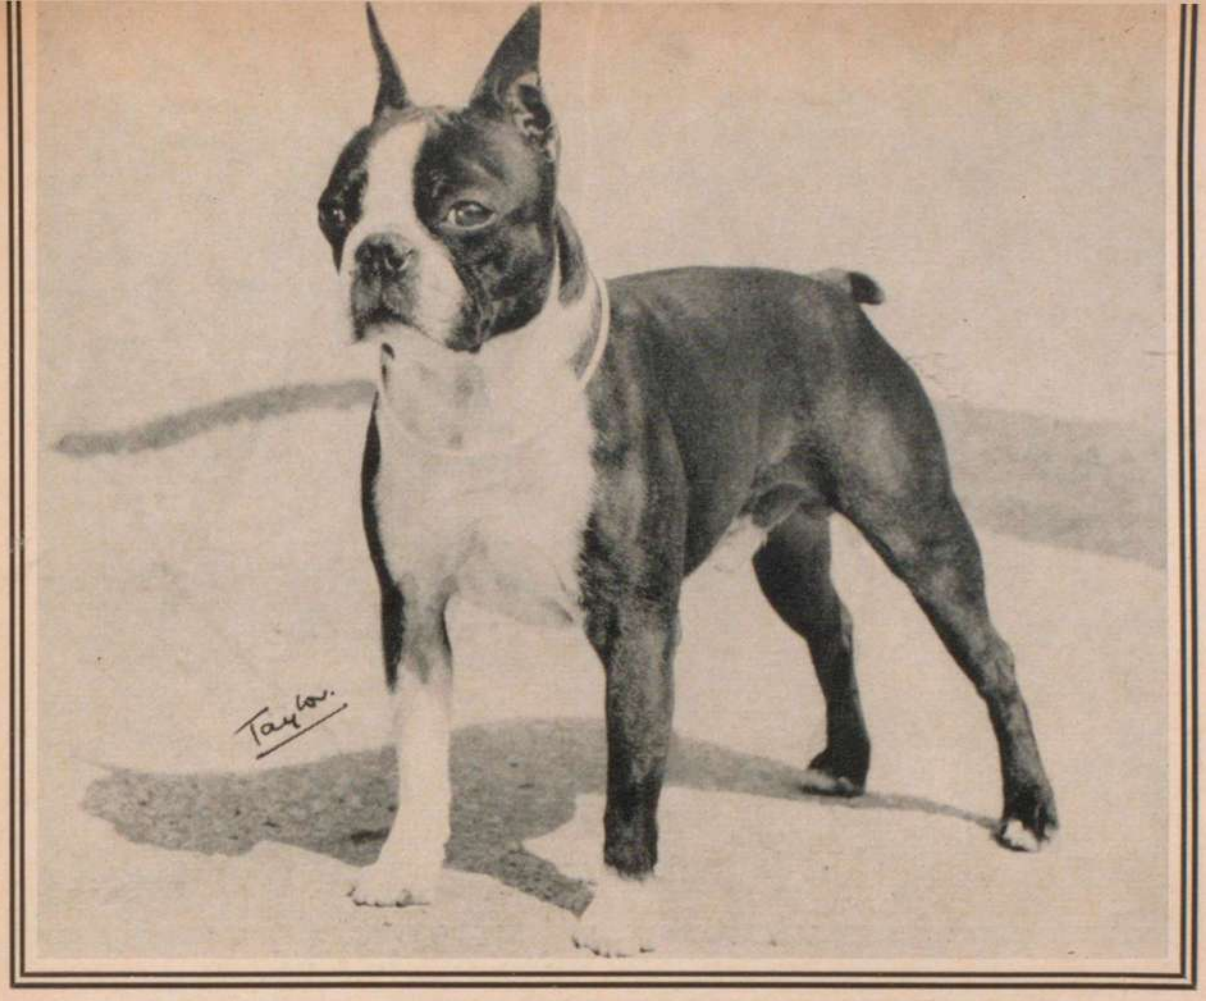

The Toy breeds are hardy animals, unless pampered with over protection when small. They can take extreme weather conditions without great discomfort.

All toy breeds are posed on a table in the show ring, allowing the judge to better examine the dogs and it follows that this should become part of their training in preparation for the show ring.

STAFFORDSHIRE TERRIER

from page 102

jaw to be strong and have bitting power. Lips close and even. Upper teeth to meet tightly outside lower teeth in front. Nose definitely black.
Neck—Heavy, slightly arched, tapering from shoulders to back of skull. Medium length.
Shoulders—Strong and muscular with blades wide and sloping.
Back—Fairly short. Slight sloping from withers to rump with gentle short slope at rump to base of tail. Loins slightly tucked.
Body—Well-sprung ribs, deep in rear. All ribs close together. Forelegs set rather wide apart to permit of chest development. Chest deep and broad.
Tail—Short in comparison to size, low-set, tapering to a fine point; not curled or held over back. Not docked.
Legs—The front legs should be straight, large or round bones, pastern upright. Hindquarters well-muscled, let down at hocks. Feet of moderate size, well-arched and compact. Gait must be springy but without roll or pace.
Coat—Short, close, stiff to the touch, and glossy.
Color—Any color, solid, parti, or patched is permissible, but all white, more than 80 per cent white, black and tan, and liver not to be encouraged.
Size—Height and weight should be in proportion. A height of about 18 to 19" at shoulders for the male and 17 to 18" for the female.

CH. (CAN. AM.) ACECOURT CLOWN, by Acecourt Jester ex Ch. Escort's Lady Be Good. Top winning Boston Terrier in Canada, 1962. In 1961 completed his Canadian and American Championship at 12 months of age, coming up from the classes to win 1 BIS (all breeds), 4 BCBP in Show, 5 1st, 2 2nd, 2 3rd and 1 4th in Group. Handled exclusively by George Kennedy. Bred and owned by Mrs. Dorothy Drury, 27 Reynolds St., Oakville, Ont.

Skull—Square, flat on top, free from wrinkles; cheeks flat; brow abrupt, stop well defined.

Eyes—Wide apart, large and dark in color, expression alert, but kind and intelligent. The eyes should set square in the skull, and the outside corners should be on a line with the cheeks as viewed from the front.

Muzzle—Short, square, wide and deep, and in proportion to skull; free from wrinkles; shorter in length than in width and depth, not exceeding in length approximately one-third of length of skull; width and depth carried out well to end; the muzzle from stop to end of nose on a line parallel to the top of the skull; nose black and wide, with well defined line between nostrils. The jaws broad and square, with short regular teeth. Bite even or sufficiently undershot to square muzzle. The chops of good depth but not pendulous, completely covering the teeth when mouth is closed.

Ears—carried erect, either cropped to conform to the shape of the head, or natural bat, situated as near the corners of skull as possible.

Neck—Of fair length, slightly arched and carrying the head gracefully; setting neatly into shoulders.

Body—Deep with good width of chest; shoulders sloping; back short; ribs deep and well sprung, carried well back to loins; loins short and muscular; rump curving slightly to set-on of tail; flank very slightly cut up. The body should appear short but not chunky.

Elbows—Standing neither in nor out.

Forelegs — Set moderately wide apart and on a line with the point of the shoulders; straight in bone and well muscled; pasterns short and strong.

Hind Legs—Set true; bent at stifles; short from hocks to feet; hocks turning neither in nor out; thighs strong and well muscled.

Feet—Round, small and compact and turned neither in nor out; toes well arched.

Gait—The gait of the Boston Terrier is that of a sure-footed, straight-gaited dog, forelegs and hind legs moving straight ahead in line with perfect rhythm, each step indicating grace with power.

Tail—Set-on low; short, fine and tapering; straight; or screw; devoid of fringe or coarse hair, and not carried above horizontal.

Ideal Color — Brindle with white markings. The brindle to be evenly distributed and distinct. Black with white markings permissible but brindle with white markings preferred.

Ideal Markings—White muzzle, even white blaze over head, collar, breast, part of whole of forelegs, and hind legs below hocks.

Coat—Short, smooth, bright and fine in texture.

Weight—Not exceeding 25 pounds, divided by classes as follows: lightweight, under 15 pounds; middleweight, 15 and under 20 pounds; heavyweight, 20 and not exceeding 25 pounds.

Disqualifications

Solid black; black and tan; liver or mouse colors. Dudley nose. Docked tail or any artificial means used to deceive the judge.

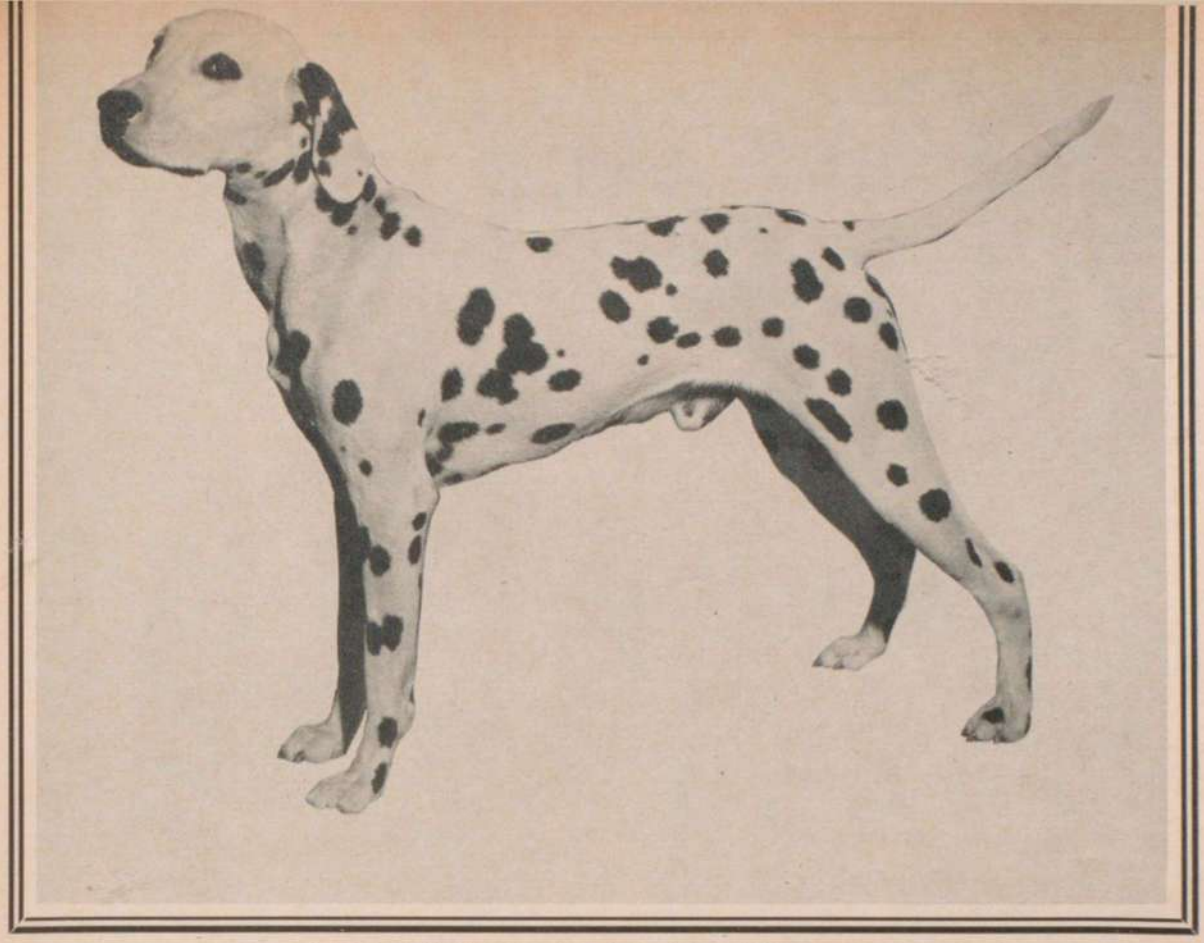

CH. (CAN. AM.) KAMEL ELECTRIC TRICK (whelped Dec. 8/58), by Ch. (Eng.) Broadford Foden Esquire ex Ro-Heath Miss Haggis McBiff. Show Record: Canada—12 BB. 11 Group placings — 2 1st, 2 2nd, 5 3rd, 2 4th. United States—4 Group placements, 5 BB, 5 BW, 8 WD. Breeder, Reg. P. Sparkes. Puppies occasionally. Owned by Mr. and Mrs. R. E. McCutcheon, Kennebec Kennels Reg'd., 147 Elmhurst Ave., Willowdale, Ont.

BULLDOG

Gait—Style, carriage peculiar, gait loose-joined, shuffling, sidewise motion, giving characteristic 'roll.' Action unrestrained, free vigorous.
Proportion, Symmetry — "points" well distributed, bear good relation one to other.
Influence of Sex—Due allowance should be made in favor of females, which do not bear characteristics of the breed to same degree of perfection and grandeur as do dogs.
Size—Dogs, about 50 pounds; females, about 40 pounds.
Coat—Straight, short, flat, close, fine texture, smooth, glossy.
Color of Coat—Uniform, pure of its kind, brilliant. Various colors preferred in the following order: (1) Red Brindle, (2) all other brindles, (3) solid white, (4) solid red, fawn or fallow, (5) piebald, (6) inferior qualities of all the foregoing. **Note:** A perfect piebald preferable to a muddy brindle or defective solid color. Solid black undesirable, not so objectionable if occurring to moderate degree in piebald patches. Brindles to be perfect have a fine, even, equal distribution of the composite colors. In brindles and solid colors small white patch on chest not considered detrimental. In piebalds color patches well defined, of pure color and symmetrically distributed.
Skin—Soft, loose, especially at head, neck, shoulders.
Wrinkles and Dewlap—Head and face covered with heavy wrinkles, at throat, from jaw to chest, two loose pendulous folds, forming dewlap.
Skull—Very large, in circumference, in front of ears, should measure at least height of the dog at shoulders. Viewed from front, very high from corner of lower jaw to apex of skull, very broad, square. Viewed at side, head very high, very short from point of nose to occiput. Forehead flat (not rounded or domed), neither too prominent nor overhanging face.
Cheeks—Cheeks well rounded, protruding sideways and outward beyond eyes.
Stop—Temples or frontal bones very well defined, broad, square, high, causing a hollow or groove between eyes. This indentation, or stop, broad, deep and extend up middle of forehead, dividing head vertically, being traceable to the top of skull.
Eyes, Eyelids — Eyes, seen from front, situated low down in skull, as far from ears as possible, their corners in a straight line at right angles with stop. Quite in front of head, as wide apart as possible, provided their outer corners are within outline of cheeks when viewed from front. Quite round in form, moderate size, neither sunken nor bulging, very dark. Lids cover white of eyeball, when dog looking directly forward, lids should show no "haw."
Ears—Set high in head, front inner edge of each ear joining outline of skull at top back corner of skull, so as to place them as wide apart, and as high, and as far from eyes as possible. Small and thin. Shape termed "rose ear" is most desirable. Rose ear folds inward at back lower edge, upper front edge curving over, outward and backwards, showing part of inside of burr.
Face—Measured from front of cheekbone to tip of nose, extremely short, muzzle being very short broad, turned upwards, very deep

more on page 12

CH. WILLOWMOUNT WINALOT (whelped Oct. 7/61), by Ch. (Can. Am.) Greenstarr's Enterprise ex Ch. Willowmount Canadian Coquette. Show record (all made before one year old) — 1 BCBP in Show; Group wins: 1 1st, 2 4th, 1 BCB, 3 BCBP; 4 BB; 2 BOS. Breeder, Kay Robinson. Stud service, puppies usually available. Owned and handled by Mr. and Mrs. M. P. Dewar, Penbaro Kennels, 26 Fairbairn Ave., Ottawa, Ont.

Head—Fair length, skull flat, rather broad between ears, moderately well defined at temple, **i.e.** exhibiting a moderate amount of stop, not in one straight line from nose to occiput bone. Entirely free from wrinkle.

Muzzle — Long, powerful; lips clean, fitting jaws moderately close.

Eyes—Set moderately well apart, medium size, round, bright, sparkling, an intelligent expression, color greatly depending on markings of the dog. In the black-spotted variety eyes dark (black or brown); in liver-spotted variety light (yellow or light brown). Walleyes permissible. Rim around eyes in the black-spotted variety black; in the liver-spotted variety, brown.

Ears—Set on rather high, of moderate size, rather wide at base, gradually tapering to a rounded point. Carried close to head, thin and fine in texture, always spotted, the more profusely the better.

Nose—In the black-spotted variety always black; in the liver-spotted variety, always brown.

Neck and Shoulders—Neck fairly long, nicely arched, light and tapering, entirely free from throatiness. Shoulders moderately oblique, clean and muscular, denoting speed.

Body, Back, Chest and Loins—The chest not too wide, very deep and capacious, ribs moderately well sprung, back powerful; loin strong, muscular, slightly arched.

Legs and Feet—Of great importance. Forelegs perfectly straight, strong and heavy in bone; elbows close to body; feet compact, well-arched toes, tough, elastic pads. Hind legs the muscles clean, though well defined; hocks well let down.

Nails—In the black-spotted variety, black and white; in the liver-spotted variety, brown and white.

Gait—Length of stride in proportion to size of dog; steady in rhythm of 1-2-3-4, as in the cadence count in military drill. Front legs should not paddle, nor should there be a straddling appearance. Hind legs neither cross nor weave. Drive and reach most desirable.

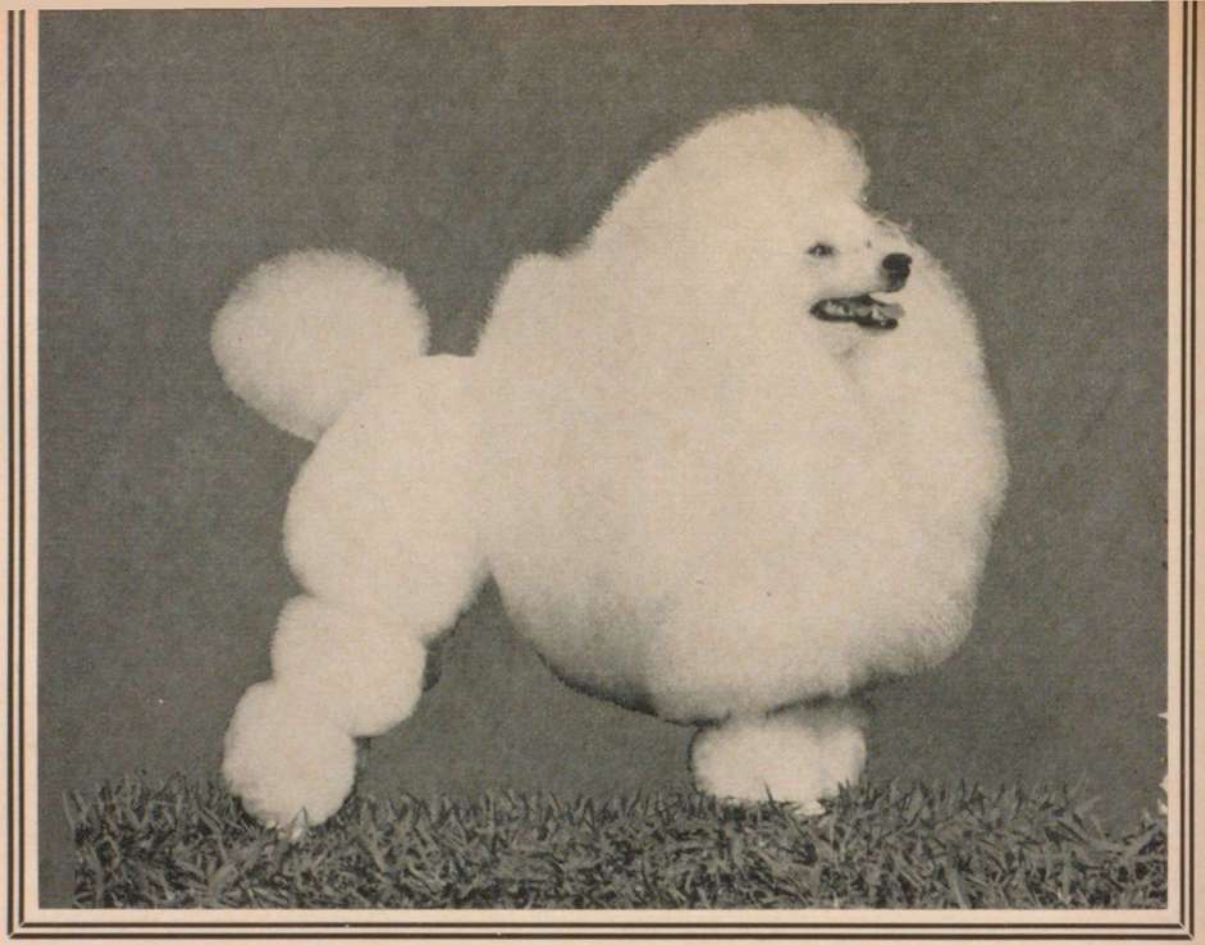

Tail—Not too long, strong at insertion, gradually tapering toward end, free from coarseness. Not inserted too low down, but carried with a slight curve upwards, never curled. Spotted, the more profusely the better.

Coat—Short, hard, dense, fine, sleek, glossy, neither woolly nor silky.

Color and Markings—These are most important points. The ground color in both varieties pure white, very decided, not inter-mixed. Color of spots in the black-spotted variety black, the deeper and richer the black the better; in the liver-spotted variety brown. Spots should not intermingle, but be as round and well defined as possible, more distinct the better; in size, from that of a dime to a half dollar. Spots on face, head, ears, legs, tail and extremities smaller than those on body.

Size—Height of dogs and females between 19 and 23", weight, between 35 and 50 pounds.

General Appearance—The Dalmatian should represent a strong, muscular and active dog, symmetrical in outline and free from coarseness and lumber, capable of great endurance, combined with a fair amount of speed.

CH. (CAN. AM.) ROTHARA THE WHITE VIVANDIER (whelped Sept. 19/59), by Rothara Piccoli Merry Quip ex Rothara the Gaiety Girl. In Canada: 7 BIS; Group wins—14 1st, 3 2nd, 2 3rd; 20 BB. United States: 4 BOS. Bermuda: 4 shows, 4 Group 1st. Breeder, Mrs. J. Salisbury, England. Handler, Mrs. Pat Tripp. Ch. Rothara The White Dragoon at Stud. Owned by Mr. and Mrs. Robert A. Osborne, 3095 Pt. Grey Rd., Vancouver, B.C.

POODLE (MINIATURE)

Skull—Slightly full, moderately peaked, slight stop. Cheekbones, muscles flat. Eyes set far enough apart to indicate ample brain capacity.

Muzzle—Long, straight, fine, strong without lippiness. Chin definite enough to preclude snipiness. Teeth white, strong, level. Nose sharp, well-defined nostrils.

Eyes—Oval shape, very dark, full of fire, intelligence.

Ears—Set low, hanging close to head. Leather long, wide, heavily feathered—when drawn forward almost reaches nose.

Neck—Well proportioned, strong, long enough to admit of head being carried high, with dignity. Skin snug at throat.

Shoulders—Strong, muscular, angulated at point of shoulder, elbow joint sloping well back.

Body—Chest deep, moderately wide. Ribs well sprung, braced up. Back short, strong, very slightly hollowed, loins broad, muscular. (Females may be slightly longer in back than dogs.)

Tail—Set on rather high, docked, carried gaily.

Legs—Forelegs straight from shoulders, plenty of bone, muscle. Hind legs very muscular, stifles well bent, hocks well let down, Hindquarters well developed, second thigh showing width, muscle.

Feet—Rather small, oval shape. Toes well arched, close, pads thick, hard.

Coat, (a) Quality—Curly Poodles. Very profuse, harsh texture, even length, frizzy or curly, not at all open. Corded Poodles. Very thick, hanging in tight, even cords. **(b) Clip**—"Continental" or "English Saddle" style correct. Continental, hindquarters are shaved, with pompons on hips (optional), in English Saddle clip hindquarters covered with short blanket of hair. In both clips rest of body left in full coat. Face, feet, legs, tail shaved, leaving bracelets on all legs, and pompon at end of tail. Topknot and feather on ears long, profuse. A dog under a year old may be shown with coat long except face, feet, base of tail, which should be shaved. Any Poodle clipped in any style other than above mentioned shall be disqualified from show ring.

Color—Any solid color. All but browns have black noses, lips and eyelids. Browns and apricots may have liver noses and dark amber eyes. In all colors toenails either black or the same color as the dog. Gray Poodles, whose coats have not cleared to even, solid color, may be shown up to age of 18 months. Degree of clearing shall only count in judging two or more gray Poodles under age of 18 months when all other points equal, in which case more completely cleared dog shall be judged superior.

Gait—Straightforward trot, light springy action. Head, tail carried high.

Disqualifications—Parti-colors. Unorthodox clip. Any size over or under the limit specified.

Size—Miniature under 15" at withers. Minimum height in excess of 10". Any Poodle which is 15" or over or 10" or under at withers shall be disqualified from competition as a Miniature Poodle. Toy is 10" or under at withers. Any Poodle which is more than 10" at withers shall be disqualified from competition as a Toy Poodle.

CH. (CAN. AM.) PETHMELYS TISON OF BIBELOT, CD (CAN. AM.) (whelped Oct. 10/60), by Eng. Ch. Pinetung Shantung Tatters ex Pethmelys Celia of Heronsgate. Finished Canadian Championship with several Group placements as Junior Puppy; American Championship at 4 Poodle Specialties. BV, Poodle Club of S. E. Michigan 1962 and Greater Cincinatti Poodle Club 1963 Specialty. Breeder, E. Skwiercyzaska. Owned and handled by Susan Radley, Bibelot Poodles, Toronto, Ont. (Poodle Studio, 2109½ Yonge St., Toronto 7, Ont.).

Skull—Slightly full, moderately peaked, slight stop. Cheekbones, muscles flat. Eyes set far enough apart to indicate ample brain capacity.

Muzzle—Long, straight, fine, strong without lippiness. Chin definite enough to preclude snipiness. Teeth white, strong, level. Nose sharp, well-defined nostrils.

Eyes—Oval shape, very dark, full of fire, intelligence.

Ears—Set low, hanging close to head. Leather long, wide, heavily feathered—when drawn forward almost reaches nose.

Neck—Well proportioned, strong, long enough to admit of head being carried high, with dignity. Skin snug at throat.

Shoulders—Strong, muscular, angulated at point of shoulder, elbow joint sloping well back.

Body—Chest deep, moderately wide. Ribs well sprung, braced up. Back short, strong, very slightly hollowed, loins broad, muscular. (Females may be slightly longer in back than dogs.)

Tail—Set on rather high, docked, carried gaily.

Legs — Forelegs straight from shoulders, plenty of bone, muscle. Hind legs very muscular, stifles well bent, hocks well let down, Hindquarters well developed, second thigh showing width, muscle.

Feet—Rather small, oval shape. Toes well arched, close, pads thick, hard.

Coat, (a) Quality—Curly Poodles. Very profuse, harsh texture, even length, frizzy or curly, not at all open. Corded Poodles. Very thick, hanging in tight, even cords. **(b) Clip**—"Continental" or "English Saddle" style correct. Continental, hindquarters are shaved with pompons on hips (optional), in English Saddle clip hindquarters covered with short blanket of hair. In both clips rest of body left in full coat. Face, feet, legs, tail shaved, leaving bracelets on all legs, and pompon at end of tail. Topknot and feather on ears long, profuse. A dog under a year old may be shown with coat long except face, feet, base of tail, which should be shaved. Any Poodle clipped in any style other than above mentioned shall be disqualified from show ring.

Color—Any solid color. All but browns have black noses, lips and eyelids. Browns and apricots may have liver noses and dark amber eyes. In all colors toenails either black or the same color as the dog. Gray Poodles, whose coats have not cleared to even, solid color, may be shown up to age of 18 months. Degree of clearing shall only count in judging two or more gray Poodles under age of 18 months when all other points equal, in which case more completely cleared dog shall be judged superior.

Gait—Straightforward trot, light springy action. Head, tail carried high.

Disqualifications—Parti-colors. Unorthodox clip. Any size over or under the limit specified.

Size—Standard 15" or over at withers. Any Poodle less than 15" in height shall be disqualified from competition as a Standard Poodle.

CH. DEL-DOREL'S ELEGANTE, by Am. Ch. Del-Dorel's Stardom ex Am. Ch. Del-Dorel's Ballerina. Group wins — 1 1st (coming up from classes), 1 2nd, 2 3rd, 1 4th. 6 points towards American Championship. Breeder, Doris L. Lasser. Handler, Hazel Slaughter. Stud service. Puppies occasionally. Owned by Gerald L. McNally, Geraura Schipperkes Reg'd., 62 Fourth Ave. S., Roxboro, Que.

SCHIPPERKE

Appearance and General Characteristics—Excellent and faithful little watchdog, suspicious of strangers. Active, agile, indefatigable, continually occupied with what is going on around him, careful of things that are given him to guard, very kind with children, knows the ways of the household; always curious to know what is going on behind closed doors or about any object that has been moved, betraying his impressions by his sharp bark and upstanding ruff, seeking the company of horses, a hunter of moles and other vermin; can be used to hunt, a good rabbit dog.

Color—Any solid color other than white.

Head—Foxlike, fairly wide, narrowing at the eyes, seen in profile flat skull, tapering muzzle not too elongated nor too blunt, not too much stop.

Nose—Small and black.

Eyes—Very dark brown, small, oval, rather than round, neither sunken nor prominent.

Expression—Should have a questioning expression, sharp and lively, not mean or wild.

Ears—Very erect, small, triangular placed high, strong enough not to be capable of being lowered except in line with the body.

Teeth—Meeting evenly. A tight scissors bite is acceptable.

Neck—Strong and full, slightly arched, rather short.

Shoulders—Muscular and sloping.

Chest—Broad and deep in brisket.

Body—Short, thick-set and cobby. Broad behind the shoulders, seeming higher in front because of ruff. Back strong, short, straight and level or slightly sloping down toward rump. Ribs well sprung.

Loins—Muscular and well drawn up from the brisket but not to such an extent as to cause a weak and leggy appearance of the hindquarters.

Forelegs—Straight under body, with bone in proportion, but not coarse.

Hindquarters — Somewhat lighter than the foreparts, but muscular, powerful, with rump well rounded, tail docked to no more than 1" in length.

Feet—Small, round, and tight, (not splayed), nails straight, strong and short.

Coat—Abundant and slightly harsh to the touch, short on the ears and on the front of legs and on the hocks, fairly short on the body, but longer around neck beginning back of the ears, and forming a ruff and a cape; a jabot extending down between the front legs, also longer on rear where it forms a culotte the points turning inward. Undercoat dense and short on body, very dense around neck making ruff stand out. Culotte should be as long as the ruff.

Weight—12 to 18 pounds.

Faults—Light eyes, large round prominent eyes, ears too long or too rounded, narrow head and elongated muzzle, too blunt muzzle, domed skull, smooth short coat with short ruff and culotte, lack of undercoat, curly or silky coat, body coat more than three (3) inches long, slight overshot or undershot, sway back. Bull Terrier shaped head, straight hocks. Straight stifles and shoulders, cow hocks, feet turning in or out, legs not straight when viewed from front. Lack of distinction between length of coat, ruff and culotte.

Disqualifications

Drop or semi-erect ears. Badly overshot or undershot. Dudley nose.

CH. SATTERLEIGH TODI (whelped May 13/61), by Taiji of Satterleigh (imp) ex Ch. Yo-Yo of Clarebrand (imp). Top winning Shih Tzu in Canada, 1962. Six Group placings. 13 pound, silver and white dog. Stud service. Puppies for sale. Owned by Mrs. George W. Esary, Wynn-Hollow Kennels Reg., 1930 Nelson Ave., West Vancouver, B.C.

General Appearance—Very active, lively and alert, with a distinctly arrogant carriage. The Shih Tzu is not a toy dog.
Head and Skull — Head broad, round and wide between the eyes, shock headed, with hair falling well over the eyes; good beard and whiskers; the hair growing upwards on the nose gives a distinctly chrysanthemum-like effect. Muzzle square, short, but not wrinkled like a Pekingese, flat and hairy.
Eyes—Large, dark and round but not prominent.
Ears—Large and carried drooping; so heavily coated that they appear to blend with the hair of the neck.
Mouth — Level or slightly underhung—overshot jaws undesirable.
Forequarters—Legs short straight and muscular. The legs should look massive on account of the wealth of hair.
Body—Body between withers and root of tail should be considerably longer than the height of withers; well ribbed up.
Hindquarters—Legs short, straight and muscular. The legs should look massive on account of the wealth of hair.
Feet—Should be big with hair between the pads. The feet should look massive on account of the wealth of hair.
Tail—Heavily coated and curled well over back; set on high.
Coat—Long and dense, but not curly; looks harsher than it feels to the touch.
Color — All colors; but a white blaze on the forehead and white tip to tail are highly prized. Dogs with liver markings may have liver noses and lighter eyes.
Weight and Size—About 11" at the withers, but considerable variation from this standard is permissible, provided other proportions are correct and true to type.

general facts

Little or nothing is known of the origin and development of the Shih Tzus (pronounced Chite Soo). There are some indications that it originated in Western China. Recognized by The Canadian Kennel Club in August, 1952, the breed has not yet gained recognition in the United States. Recently a parent club, known as the Shih Tzus Club of America, was formed in the United States, which would suggest that some consideration will be given to inclusion of the breed in the American Kennel Club stud books.

There is no record of the breed winning Best in Show in Canada but this honor has been achieved on different occasions in England, where the appealing little companion dog has many devoted fanciers.

The first dog of the breed registered in Canada was King Chan of Clarebrand, owned by Mrs. Joseph Kersch of Montreal, bred by Mrs. P. Murray-Kerr, and registered in 1958.

Authorities concede that the promotion of a breed is best accomplished in the show ring, where the general public can see and admire the breeds which are otherwise seldom seen. To do this, exhibitors must strive to get enough good dogs before the judges so that they, too, will be familiar with the good and bad points of the breed. Breeders and exhibitors who assume responsibility for showing these dogs to the public are to be commended for their endeavors. There is no doubt that the Shih Tzus, because of its attractive appearance and engaging personality will, in the future, gain an important place in the dog fancy.

CHOW CHOW

General Appearance—A massive, cobby, powerful dog, active and alert, with strong, muscular development, and perfect balance. Body squares with height of leg at shoulder; head, broad and flat, with short, broad, and deep muzzle, accentuated by a ruff; the whole supported by straight, strong legs. Clothed in a shining, offstanding coat, the Chow is a masterpiece of beauty, dignity, and untouched naturalness.

Head—Large, massive in proportion to size of dog, broad, flat skull; well filled under eyes; moderate stop; proudly carried.

Expression—Essentially dignified, lordly, scowling, discerning, sober, snobbish — one of independence.

Muzzle—Short in comparison to length of skull; broad from eyes to end of nose, of equal depth. Lips somewhat full overhanging.

Teeth—Strong, level, scissors bite.

Nose—Large, broad, black in color.

Tongue—Blue-black. Tissues of mouth should approximate black.

Eyes—Dark, deep-set, moderate size, almond-shaped.

Ears—Small, slightly rounded at tip, stiffly carried. Placed wide apart, on top of skull, and set with a slight, forward tilt.

Body—Short, compact, with well-sprung ribs, and let down in flank.

Neck—Strong, full, set well on shoulders.

Shoulders—Muscular, slightly sloping.

Chest—Broad, deep, muscular.

Back—Short, straight, strong.

Loins—Broad, deep, powerful.

Tail—Set well up, carried closely to back, following line of spine at start.

Forelegs—Perfectly straight, with heavy bone, upright pasterns.

Hind Legs—Straight-hocked, muscular, heavy boned.

Feet—Compact, round, catlike, with thick pads.

Gait—Completely individual. Short, stilted because of straight hocks.

Coat—Abundant, dense, straight, offstanding; rather coarse in texture with a soft, woolly undercoat. Any clear color, solid throughout, with lighter shadings on ruff, tail, breechings.

Disqualifications

Nose spotted or distinctly other color than black, except in blue Chows, which may have solid blue or slate noses. Tongue red, pink or obviously spotted with red or pink. Drop ear or ears.

FRENCH BULLDOG

General Appearance—The French Bulldog should have the appearance of an active, intelligent, muscular dog, of heavy bone, smooth coat, compactly built, and of medium or small structure.

Proportion and Symmetry—The points should be well distributed and bear good relation one to the other, no feature being in such prominence from either excess or lack of quality that the animal appears deformed or poorly proportioned.

Influence of Sex—In comparison of specimens of different sex, due allowance should be made in favor of the females, which do not bear the characteristics of the breed to the same marked degree as do the dogs.

Weight—A lightweight class under 22 pounds; heavyweight class, 22 pounds, and not over 28 pounds.

Head—Large, square. Top of skull flat between ears; forehead should not be flat but slightly rounded. Stop well defined, causing a hollow or groove between eyes. Muzzle broad, deep, well laid back; muscles of cheeks well developed. Nose extremely short; nostrils broad with well defined line between them. Nose and flews black, except in case of lighter-colored dogs, where a lighter color nose is acceptable. Flews thick, broad, hanging over lower jaw at sides, meeting underlip in front, covering teeth which should not be seen when mouth is closed. Underjaw deep, square, broad, undershot, well turned up.

Eyes—Wide apart, set low down in skull, as far from ears as possible, round, moderate size, neither sunken nor bulging, color dark. No haw and no white of eye showing when looking forward.

Neck—Thick, well arched, with loose skin at throat.

Ears—Known as bat ear, broad at base, elongated, with round top, set high in head, but not too close together, carried erect with orifice to the front. Leather of ear, fine, soft.

Body — Short, well rounded. Chest, broad, deep, full, well ribbed with belly tucked up. A roach back, with a slight fall close behind shoulders, strong, short, broad at shoulders, narrowing at loins.

Legs—Short, stout, straight, muscular, set wide apart. Hind legs strong, muscular, longer than forelegs, to elevate loins above shoulders. Hocks well let down.

Feet—Moderate in size, compact, firmly set. Toes compact, well split up, with high knuckles and short, stubby nails; hind feet slightly longer than forefeet.

Tail—Either straight or screwed (but not curly), short, hung low, thick root, fine tip; carried low in repose.

Color, Skin and Coat — All brindle, fawn, white, brindle and white, and any color except those which constitute disqualification. Skin soft and loose, especially at head and shoulders, forming wrinkles. Coat moderately fine, brilliant, short, smooth.

Disqualifications

Other than bat ears; black and white, black and tan, liver, mouse or solid black (black means black without any trace of brindle) eyes of different color; nose other than black except in the case of the lighter-colored dogs, where a lighter color nose is acceptable; hare lip; any mutilation; over 28 pounds in weight.

KEESHONDEN

General Appearance and Conformation—A handsome dog, of well-balanced, short-coupled body, attracting attention not only by his alert carriage and intelligent expression, but also by his luxurious coat, his richly plumed tail, well curled over his back, and by his foxlike face and head with small pointed ears. His coat is very thick round the neck, fore part of the shoulders and chest, forming a lionlike mane. His rump and hind legs, down to the hocks, are also thickly coated forming the characteristic "trousers." His head, ears and lower legs are covered with thick short hair.

The ideal height of fully matured dogs (over 2 years old), measured from top of withers to the ground, is: for males, 18"; females, 17". However, size consideration should not outweigh that of type. When dogs are judged equal in type, the dog nearest the ideal height is to be preferred. Length of back from withers to rump should equal height as measured above.

Expression—Is largely dependent on distinctive characteristic called "spectacles"—a delicately penciled line slanting slightly upward from outer corner of each eye to lower corner of ear, coupled with distinct markings and shadings forming short but expressive eyebrows. Markings (or shadings) on face and head must present a pleasing appearance, imparting to the dog an alert and intelligent expression.

Skull—Head well proportioned to body, wedge-shaped when viewed from above. Not only in muzzle, but whole head should give this impression when ears are drawn back by covering nape of neck and ears with one hand. In profile a definite stop.

Muzzle — Dark in color, of medium length, neither coarse nor snipey, well proportioned to skull.

Mouth—Neither overshot nor undershot. Lips black, closely meeting, not thick, coarse or sagging; no wrinkle at corner of mouth.

Teeth—White, sound, strong (but discoloration from distemper not to penalize severely); upper teeth just overlap lower teeth.

Eyes—Dark brown, medium size, rather oblique in shape, not set too wide apart.

Ears—Small, triangular, mounted high on head, carried erect; dark, covered with thick, velvety, short hair. Size proportionate to head—length approximating distance from outer corner of eye to the nearest edge of ear.

Neck and Shoulders—Neck moderately long, well shaped, well set on shoulders; covered with a profuse mane, sweeping from under jaw, covering whole of front part of shoulders and chest, as well as top part shoulders.

Chest, Back and Loin—Body compact, with a short straight back sloping slightly downward toward hindquarters; well ribbed, barrel well rounded, belly moderately tucked up, deep and strong of chest.

Legs—Forelegs should be straight seen from any angle, and well feathered. Hind legs should be profusely feathered down to the hocks—not below, with hocks only slightly bent. Legs must be of good bone and cream in color.

Feet—The feet should be compact, well rounded, catlike, and cream in color. Toes are nicely arched, with black nails.

Tail—The tail should be set on high, moderately long, and well feathered, tightly curled over back. It should lie flat and close to the body with a very light gray plume on top where curled, but the tip of the tail should be black. The tail should form a part of the "silhouette" of the dog's body, rather than give the appearance of an appendage.

Action—Dogs should show boldly and keep tails curled over the back. They should move cleanly and briskly; and the movement should be straight and sharp (not lope like a German Shepherd).

Coat—The body should be abundantly covered with long, straight, harsh hair; standing out from a thick, downy undercoat. Hair on legs smooth, short, except for a feathering on front legs and "trousers," as previously described, on hind legs. Hair on tail profuse, forming a rich plume. Head, including muzzle, skull and ears, covered with smooth, soft, short hair—velvety in texture on ears. Coat must not part down back.

Color and Markings—A mixture of gray and black. Undercoat very pale gray or cream (not tawny). Hair of outer coat is black tipped, length of black tips producing the characistic

shading of color. Color may vary from light to dark, but any pronounced deviation from gray color is not permissible. Plume of tail should be very light gray when curled on back, tip of tail black. Legs and feet cream. Ears very dark—almost black. Shoulder line markings (light gray) well defined. Color of ruff and "trousers" is generally lighter than that of body. "Spectacles" and shadings, as previously described, are characteristic of the breed and must be present to some degree. There should be no pronounced white markings.

BULLDOG

from page 116

from corner of eye to corner of mouth.

Nose—Large, broad, black, tip being set back deeply between eyes distance from bottom of stop, between eyes, to tip of nose as short as possible, not exceed length from tip of nose to edge of under lip. Nostrils wide, large, black, well-defined line between them.

Chops — Thick, broad, pendant, very deep, completely overhanging lower jaw at each side. They join the under lip in front and almost or quite cover teeth, which should be scarcely noticeable when mouth closed.

Jaws—Massive, very broad, square, "undershot," lower jaw projecting considerably in front of upper jaw, turning up.

Teeth—Large, strong, canine teeth or tusks wide apart, 6 small teeth in front, between canines, in even, level row.

Neck—Short, very thick, deep, strong, well arched at back.

Shoulders—Muscular, very heavy, wide-spread, slanting outward, giving stability, great power.

Chest—Broad, deep, full.

Brisket and Body—Very capacious, with full sides, well-rounded ribs, very deep from shoulders down to its lowest part, where it joins chest. Well let down between shoulders and forelegs, giving dog a broad, low, short-legged appearance. Body well ribbed up behind with belly tucked up and not rotund.

Back—Short, strong, very broad at shoulders, comparatively narrow at loins. Slight fall in back, close behind shoulders (its lowest part), whence spine should rise to loins (top of which higher than top of shoulders), thence curving again more suddenly to tail forming an arch (very distinctive feature of breed), termed "roach back" or, more correctly, "wheel-back."

Forelegs — Short, very stout, straight, muscular, set wide apart, well developed calves, presenting a bowed outline, bones of legs not curved or bandy, nor feet brought too close together.

Elbows—Low, stand well out, loose from body.

Hind Legs — Strong, muscular, longer than forelegs, so as to elevate loins above shoulders. Hocks slightly bent, well let down, to give length and strength from loins to hock. Lower leg short, straight, strong, with stifles turned slightly outward and away from body. Hocks are thereby made to approach each other, and hind feet to turn outward.

Feet—Moderate in size, compact, firmly set. Toes compact, well split up, high knuckles, short stubby nails. The front feet may be straight or slightly out-turned, but hind feet pointed well outward.

Tail—May be either straight or "screwed" (but never curved or curly), short, hung low, decided downward carriage, thick root, fine tip. If straight, tail cylindrical of uniform taper. If "screwed" bends or kinks well defined, may be abrupt, even knotty, but no portion of the member elevated above base or root.

Disqualifications

Dudley or flesh-colored nose.

general facts

The Non-Sporting Group is comprised of breeds of dogs that have either become a companion dog or were developed for this purpose. There have been frequent movements started to rename this group "Companion Dogs".

The Boston Terrier was purposely developed as a companion dog and at one time was one of the most popular of breeds in both urban and suburban areas.

The Bulldog was once listed in the Sporting Group for it excelled in the very old sport of bull-baiting, a cruel game that has fortunately been outlawed in almost every country. Another breed that might have been classed in Group I is the Chow. They were used in their native China, to some extent, as hunting dogs.

The well known "coach dog", the Dalmatian, would have been listed with the Working dogs had the breeds been divided into Groups in the days of the "Coach and Four". While the French Bulldog is conceded to have been developed as a companion dog, he could have been used for guard work and if so, he would also have been listed in Group III.

The Keeshond undoubtedly would have been listed as a working dog for this breed was, and still is, used on the barges of Holland.

Poodles were originally in the Sporting Group. They were excellent Retrievers and are still splendid workers when trained. The water work he was called upon to perform led to the pattern of trimming in evidence today. Despite the amount of work involved in keeping a Poodle in top condition, he is one of the most popular breeds in Canada, England and the United States.

Another barge dog, the Schipperke, is used extensively today on the rivers and canals of Belgium and could well have been found in Group II, III or IV. They were excellent hunters on rabbit and excel as ratters.

Group VI is the smallest of the six Groups insofar as the number of breeds listed. It contains two sizes of Poodles, one of the top breeds in popularity in almost every country. Because of the popularity of the Bulldog and Boston Terrier this Group is generally one of the largest in entries at many shows. And although small in number, the Group contains a great variety of dogs in size and coat.

Bostons, Schipperkes and Poodles are excellent breeds for obedience work, requiring very little training and usually gaining many of the high score awards. Chows and Dalmatians also excel in this phase of the dog fancy but because of their relatively few numbers at the present time they are seldom seen in competition.

Little is known of the Shih Tzus, one of the latest additions to the Group. This long haired dog, however, with its pleasing personality, will certainly fill a vacant corner in many homes.

Although these breeds are not listed as having any specific purpose, a companion dog fills a much needed role. Many humans would be deprived of deep happiness if they did not have some pet on which to lavish their affection. It is not necessary to tramp the countryside to enjoy the companionship of a dog. The variety of sizes and coats of breeds in Group VI provides a wide choice for the prospective owner.

origin of the dog

In the search for facts explaining the origin of the dog, numerous stories and theories have developed. None have been resolved to a satisfactory conclusion. Theories, such as the one which states that the mastiff came from the hyena (and it is felt that this could have been possible) or that the Bengal Tiger contributed to another breed, are somewhat fantastic. Authorities claim that the dog is a direct descendent of the wolf but when one considers the vast difference in the size of some of the Toy breeds and the very large giant breeds, this too, would seem to be impossible. Recorded history takes us back to 3,000 or 4,000 B.C. and yet no one can prove when the companionship of man and dog commenced. Geologists claim that there was a close relationship between these two animals during the Stone Age, 50,000 years ago. Restoration of skeletons are the basis for such conclusions. It is believed that the first dogs which existed in North America were of two distinct types—the Daphaenus, about the size of a coyote with a massive head and an exceedingly long tail, and the Cynodictis, which was a much smaller, more slender animal. Perhaps from these your dog came into being.

DICTIONARY OF DOG TERMS

A

ACTION: The movement of a dog in harmony with its conformation and purpose. A dog lacking this quality is known as a bad mover.
ALBINO: An animal or bird having insufficient pigmentation. Blue or gray eyes, white or white and mottled coats, flesh-colored noses are among the characterizations in dogs.
ALMOND EYE: The eye is set on a slant, oval, and pointed at the ends, as in the case of a Bull Terrier.
ANGULATION: The angle made by two bones of the leg or shoulder.
APPLE-HEADED: The skull is domed or rounded. Look for this characteristic in the Chihuahua, English Toy Spaniel.
APRON: The hair is longer below the neck and on the chest. The Collie is an example.
ASCOB: The initials stand for "any solid color other than black". Reference is to this variety division of the Cocker Spaniel.

B

BANDY-LEGGED: The front legs are sprung outward, or the hind legs are too wide spread at the hocks.
BAT EARS: A requisite of the French Bulldog. The ear stands erect, broader at the base, rounded at the top. The orifice is directly at the front.
BEARD: Thick, bushy underjaw whiskers.
BEEFY: The hindquarters are fat and thick, or too heavily muscled.
BELTON: Designation of color, as in the English Setter, The coat coloration consists of a white background with many flecks of a darker color such as black, gray, orange-tan or lemon. In a Blue Belton the coat is flecked with blue-gray. An Orange Belton has orange-tan flecks.
BEST OF WINNERS: The male or female which is placed first when the Winners Dog and Winners Female compete.
BISCUIT: Biscuit-like in color; pale fawn.
BITCHY DOG: Term applied to a male dog whose over-refined appearance gives an impression of femininity.
BITE: The way the teeth meet. See reference to overshot, undershot, even bite, scissors bite, pincer bite.
BLANKET: A dark marking in the coat, which extends over the back and sides from the shoulders to the base of the tail.
BLAZE: Often seen in Boxers — a white mark up the centre of the face, between the eyes.
BLOOM: The sheen achieved when a dog's coat is in good condition.
BOBTAIL: Affectionate name given the Old English Sheepdog; a tail docked very short.
BOSSY: Term for over-developed shoulder muscles.
BRACE: Two dogs of the same breed, owned by the same person.
BRACELETS: Sections of long hair circling the lower legs of Poodles clipped in show trim.
BRED BY EXHIBITOR CLASS: In this dog show class entries must be owned and handled by the person who bred them. Champions are not eligible.
BREECH BIRTH: Instead of the head the puppy's hind feet appear first.
BREECHING:
1. Long, profuse hair on the thighs.
2. Reference to the tan markings on the inside and back of the hind legs.

BREEDER: The individual or kennels owning or leasing the dog's dam at the time of mating.
BRINDLE: A coat with a mixture of dark and light hairs.
BRISKET: The forepart of the body — the section in front of the chest and between the forelegs.
BROKEN COLOR: Indicating a self color coat with shades of one color broken by stripes, patches or spots of another.
BROKEN-UP FACE: No fracture, but a foreface with a receding nose, deep stop, wrinkle and undershot jaw. The Pekingese and Bulldog are examples.
BROOD BITCH: A female useful for breeding purposes. A brood matron.
BRUSH: A bushy tail like that of the fox.
BURR: The irregular formation of the inside of the ear, visible within the cup.
BUTTERFLY NOSE: Black or dark brown nose spotted with pink.
BUTTON EARS: The ear flap folds forward with the tip lying close to the head and pointing toward the eye, as in the Fox Terrier.

C

CAMEL BACK: The back shows roach or hump to the point of appearing crippled.
CANINE TEETH: Sometimes called fangs. Corresponding to the eye teeth of humans, they are long, strong and pointed, placed just behind the incisors.
CASTRATE: To remove the testicles of the male dog.
CAT FOOT: The foot is short, round and compact like that of a cat, with similar high knuckles. The English Foxhound is an example.
CHAMOIS EAR: Soft and thin.
CHEEK: As in humans — the fleshy section of the side of the head, below the eyes above and behind the mouth.
CHEEKY: Cheeks are thick and protruding, prominently rounded, as in the Bulldog.
CHEST: The area of the body between the shoulder blades, behind the brisket and in front of the abdomen.
CHINA EYE: Clear or light blue eye.
CHISELED: Clean-cut, delicately modeled head, particularly beneath the eyes.
CHOPS: Jowls; pendulous flesh of the lips and jaw. Bulldog and Bloodhound are examples.
CHOREA: A frequent result of distemper in which muscles twitch and jerk.
CLIPPER BURN: Chafed or sore area, after dog has been clipped.
CLODDY: Comparatively heavy; low, thickset.
CLOSE ACTION: A gait in which the hocks move close together in a walk or trot.
CLOSE-COUPLED: Body short between last rib and hip.
COBBY: Short-backed, compact, muscular.
COMPANION DOG (CD); COMPANION DOG EXCELLENT (CDX): Obedience degrees.
CONDITION: State of health as indicated by appearance of coat, clear eye and liveliness.
CONFORMATION: Bone and muscle structure arranged in conformance with the breed Standard.
CONGENITAL CHARACTERISTICS: Those which exist at birth having been acquired during pregnancy but which are not hereditary.
CORKY: Often used describing Terriers — lively, alert, bouncing.
COUPLINGS: Area of body between fore and hindquarters. Expressing comparative length: "Long in the couplings", "short-coupled".
COW-HOCKED: The hocks turn inward.
COWLICK: A portion of hair growing directly opposite to the lay of the balance of the coat.
CRANK TAIL: The tail actually looks like a crank — curving downward and then away from the body.
CREST: The upper arch of the neck in convex form.
CROPPING: Cutting or trimming the ears to make them stand erect.
CROSSBRED: Progeny of two purebred dogs of different breeds.
CROUP: The area of the dog's back in front of the root of the tail.
CROWN: Highest portion of a dog's head.
CRYPTORCHID: Male dog whose testicles are not in the scrotum.
CULOTTE: Referring to the long bushy hair on the upper parts of the hind legs.
CUSHION: Full or thick upper lips or foreface.

D

DAM: The mother.
DAPPLED: A coat showing irregular rings of different colors, none predominating.
DEPTH OF THIGH: Referring to thigh's width and thickness.
DERBY: In which young novice sporting dogs compete, usually between one and two years of age.
DEWCLAWS: An extra claw on the inside of the leg just above the foot.
DEWLAP: Loose skin hanging under the throat.
DIMPLE: Slight depression on each side of forechest; a feature of the Dachshund.
DISH-FACED: Face with a scooped out appearance caused by a turned up nose.
DISQUALIFYING FAULT: A fault so serious, according to the breed Standard, that it cannot compete in the show ring.
DISTEMPER TEETH: In which the teeth are pitted or discolored.
DOCK: To abbreviate the tail by cutting.
DOG: Sometimes reference to a male dog only; or generally to designate both male and female. i.e. "Winners Dog" — dog winning in male class.
DOME: Rounded portion of topskull.
DOMINANT CHARACTERISTIC: A characteristic inherited from one parent to the exclusion of any others contributed by the other parent.
DOUBLE COAT: Top coat is coarse and profuse while the undercoat is soft, dense and furry. Some of the working dogs such as Collies and Old English Sheepdogs have this weather advantage.
DOWNFACED: The nasal bone dips toward the tip of the nose as in the Bull Terrier.
DOWN IN PASTERN: The pastern (joint of foreleg above foot) slopes back from foot to meet the foreleg at an angle. In most breeds regarded as indicating faulty structure or poor condition.
DROP EARS: The leather is long and hangs straight down.
DRY: Without loose skin.
DUDLEY NOSE: A flesh-colored nose.
DYSPLASIA: A condition in which the femur (upper leg bone) does not fit into the hip socket.

E

ECLAMPSIA: Sometimes called "nursing fits" — convulsions which occasionally occur while the mother is still nursing.
ELBOWS: The joint between the upper arm and the forearm.
ENTERITIS: Inflammation of the bowels.
EVEN BITE: The pincer bite — in which the front teeth meet evenly.

EWE NECK: Concave arch from the back of the skull to the withers.
EXHIBITOR: The owner of the dog being shown.
EXPRESSION: It is important that a dog have the expression typical of his breed in addition to showing alertness and intelligence.

F

FEATHERING: Longer fringes of hair on the abdomen, legs, ears, tail.
FIDDLE FRONT: Crooked or bandy legs.
FLAG: Fringed or bushy tail, as in the Setters.
FLANK: Side of the body from hip to smallest rib.
FLAT-SIDED: Insufficient curving through the rib cage.
FLEWS: Pendulous upper lips, particularly at inner corners, as in the Bloodhound.
FLY EARS: Drop or semi-prick ears that stand up or are carried askew.
FLYER: A young dog showing exceptional promise.
FOREFACE: Muzzle.
FURROW: A slight depression running down the center of the skull to the stop.

G

GAIT: Manner of walking, running, trotting.
GAY TAIL: Carried higher than back or straight up.

H

HARD-MOUTHED: In which the retriever bites, marks or mauls the game he carries.
HAREFOOT: Long, narrow foot; toes are deep knuckled and held tightly together like a rabbit's.
HARLEQUIN: Coloring seen in Great Danes — usually smaller irregular black patches on white coat.
HAUNCHES: The port of the dog's body on which it sits.
HAW: A third eyelid composed of red membrane inside the lower eyelid.
HEAT: Same as "in season" — seasonal period of the female.
HEIGHT: Measurement from withers to the ground. Also referred to as shoulder height.
HIGH-STATIONED: Long legs, showing a great deal of daylight under the body.
HOCKS: Joint between the Second thigh and the metatarsals — the dogs real heel.
HUCKLEBONES: Top of the hip bones.
HUMERUS: Upper arm — long bone between shoulder blade and elbow.

I

INBREEDING: Mating of closely related dogs, i.e. female to litter brother; male to his own daughter.
INCISORS: Upper and lower "biting off" teeth at the front of the jaws.
IN WHELP: Pregnant.

K

KINK TAIL: Short, sharply bent tail, like that of the Bulldog.
KNUCKLED OVER: Due to improper knitting of the pastern joint, the front legs bend forward at the knee.

L

LACTATION: Period in which the mother is providing milk.
LANDSEER: Newfoundland coloring other than solid black. Usually white with black or bronze.
LAYBACK: Combination of receding nose and undershot jaw; referring to shoulder it is the angle of the bone running from breastbone to backbone.
LEATHER: Ear flap.
LINE BREEDING: Mating of related dogs of same breed, i.e. male to granddaughter; male to granddam, female to grandsire.
LIPPY: Lips are too thick or pendulous.
LOADED SHOULDERS: In which muscular overdevelopment shoves shoulder blades out from the body.
LOIN: Section of body on either side of the spine between the last rib and the hindquarters.
LOW-SET EARS: Ears stemming more from the side than the top of the head.

M

MANE: Long hair on the neck.
MASK: Dark coloration of the muzzle.
MERLE: (blue) a marbled mixture of gray and blue shot with black, as in some Collies and Shelties.
MONORCHID: Only one visible testicle.
MUZZLE: The head before the eyes — including nasal bone, nostrils and jaws.
MUTANT: A dog whose conformation does not closely resemble that of his immediate predecessors, and yet can transmit the differences to its offspring.
MUTTON-SHOULDERED. See "Loaded".

N

NASOLABIAL LINE: The slim groove running down between the nostrils from the upper lip to the edge.

O

OCCIPUT: Knob of bone at the top of the skull toward the back.
OESTRUM: Period of time in which the female will accept the male for breeding.
OTTER TAIL: A tail thick at the root and tapering, resembling that of the Otter, and seen mainly in Labrador Retrievers.
OUT AT ELBOW: Instead of being held close, the elbows turn out from the body.
OUTCROSSING: While the two dogs are of the same breed, they are from unrelated families.
OVERSHOT: The upper front teeth protrude beyond the lower teeth.

P

PAD: Sole of the dog's foot.
PADDLER: Term for swinging-out motion of the forefeet.
PAPER FOOT: Thin, flat foot.
PARTI-COLOR: In which the coat is comprised of two or more distinct colors.
PARTURITION: Whelping.
PASTERN: Region of the leg between the knee or carpus and the toes in the foreleg and in the hind leg between the hock and foot.
PENCILING: Thin black "pencil" lines against a tan background. Seen running up each toe in Manchester Terriers.
PIG-JAW: Same as overshot only exaggerated.
PIGMENTATION: Coloration due to the presence of pigment in the tissue.
PILE: Refers to dense, soft undercoat in two-coated dogs.
PINCER BITE: Level bite.
POINT RATING: The schedule of points toward a championship set by The Canadian Kennel Club which are awarded to the Winner's Male and Winner's Female in each breed at a dog show. Points awarded are based on the actual number of males or females competing in that breed.
PRICK EARS: Standing stiffly erect, usually pointed. The West Highland White Terrier is an example.
PROVEN BITCH OR PROVEN STUD: Has produced.

R

RACY: Having a lean, long-legged, speedy appearance.
RAM'S NOSE: The muzzle is slightly arched.
RAT TAIL: Although the root is thick and covered with soft curls, the end has no hair. The Irish Water Spaniel is an example.
REACH OF NECK: Refers to the muscle formation and length of neck.
RECESSIVE CHARACTERISTICS: Characteristics which are hereditary but do not appear in the progeny when only carried by one parent.
RESERVE WINNER: The dog which placed second in the Winners Class.
RIBBED UP: Having the essential rounded rib cage.
ROACHBACK: Usually not desirable, except in a few breeds such as the Bedlington Terrier — a convex curvature of the back from withers to base of tail.
ROMAN NOSE: Having a high bridge. A ram's nose.
ROSE EAR: In which the ear folds backward to reveal the burr, or inner ear.

S

SABLE: Dark brown hairs over a lighter shade of coat.
SADDLE: Solid black marking over the back, as in the Beagle. (2) In a Poodle trim (English Saddle style), the two closely trimmed crescent shapes back of the ruff.
SCAPULA: Shoulder blade.
SCISSORS BITE: Meeting of the front teeth in which the upper teeth slightly overlap the lower front teeth.
SCREW TAIL: Resembling a corkscrew.
SCROTUM: The pouch of a male dog containing the testicles.
SELF COLOR: One solid color or entire color except for lighter shadings.
SEMI-PRICK EARS: In which tips of upright ears are carried slightly forward and downward. The Collie is an example.
SEPTUM: The vertical line or bone between the nostrils.
SHORT COUPLED: Short, compact body.
SKULLY: Obviously thick and coarse in skull.
SLOPING SHOULDER: The shoulder lies obliquely; is "laid back".
SNIPEY: The muzzle is narrow, shallow, or too pointed.
SOUNDNESS: In which the dog is healthy physically and mentally, and all organs, bone structure and muscles functioning well in relation to each other.
SPREAD: Accentuated width between forelegs. (Bulldog).
SPRING OF RIB: Roundness of rib cage.
SQUIRREL TAIL: A short tail curving up and forward.
STIFLE: The joint between the thigh and second thigh of the hind leg; the knee.
STOP: Indentation at the juncture of the foreface and forehead where the nasal bone and skull meet.
STRAIGHT BEHIND: A fault in most breeds, the hind legs show insufficient bend at the stifle and hock joints. Also straight-hocked.

STRAIGHT IN SHOULDER: Instead of sloping or slanting, the shoulder blades are more straight up and down.

T

TERRIER FRONT: Front is noticeable for its square appearance by way of straight pasterns and forelegs and upright shoulders.
THROATY: Showing an excessive area of loose skin under the throat.
THROWBACK: A dog whose appearance or characteristics, rather than resembling his litter mates or parents, shows an inheritance from earlier ancestors.
TIED-IN ELBOWS: Where the closeness of elbows to body prevents proper movement.
TIMBER: Usually refers to leg bones.
TOPKNOT: Tuft of longer hair atop the head.
TOPLINE: As seen in profile from top of skull to base of tail.
TRACE: The strip of darker hair running down the back of a solid-colored dog, as in the Pug.
TUCK-UP: Sharp rise of the underline of the body back of ribs to loin.
TULIP EARS: Ears are carried erect with a slight forward curvature.
TYPEY: True to type in conformation and expression required of the breed.

U

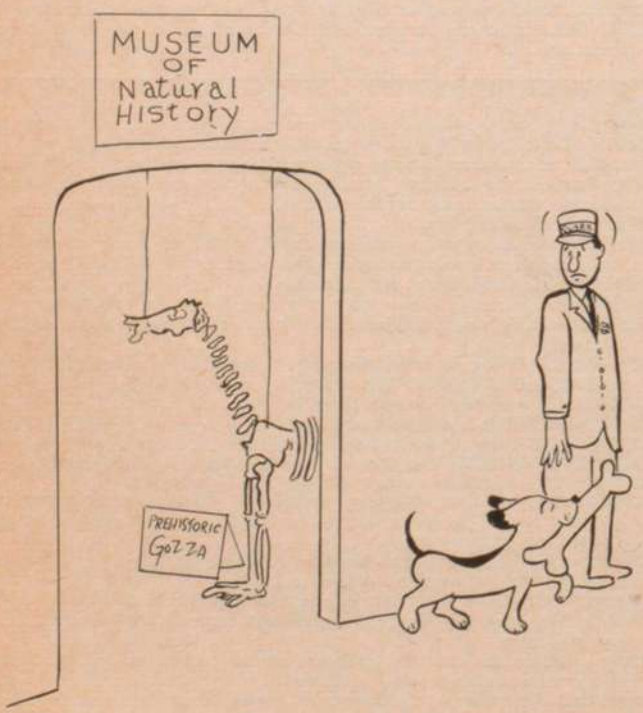

UNDERSHOT: Opposite of overshot.
UPRIGHT IN SHOULDER: Same as straight in shoulder.

V

VENT: (1) Anal opening or rectum. (2) Patch of light color hair below the tail.

W

WALLEYE: The eye may be blue or the iris patched with brown or black; pearl eye.
WEAVING: Where the front feet cross when in motion.
WELL LET DOWN: Angulation of stifle and hock joints is to a desirable degree.
WELL SPRUNG: Rib section is well rounded.
WHEATEN: Fawn, color of wheat.
WHELPING: Giving birth to puppies.
WHIPTAIL: Typical of the Pointer, whose tail is long, slim, tapering, carried stiffly out.
WINNERS BITCH: The female placed first in the class of first prize winners of the regular official class for females.
WINNERS DOG: Opposite to the above.
WITHERS: Where the top of the shoulder blades joins the neck. Peak of the first of the dorsal vertebrae.
WRINKLE: The loose folds of skin on the head and sides of the face. Desirable in the Bloodhound, St. Bernard and Bulldog and a few other breeds.
WRY MOUTH: Lower jaw does not line up with the upper and is tilted to one side or the other.

CKC BREED CLASSIFICATIONS

GROUP 1—SPORTING DOGS

Griffons (Wire-haired Pointing).
Pointers.
Pointers (German Long-haired).
Pointers (German Short-haired).
Pointers (German Wire-haired).
Pudelpointers
Retrievers (Chesapeake Bay).
Retrievers (Curly-coated).
Retrievers (Flat-coated).
Retrievers (Golden).
Retrievers (Labrador).
Retrievers (Nova Scotia Duck Tolling).

(By Dandy Boy de la Fontaine ex Ch. Snowfall de la Fontaine).

UTILITY DOGS (U.D.)

GROUP 6

POODLES (MINIATURE)
Pine Island's Amedee (388348),
(By Ch. Cartlane Gobelin ex Barbara Deus Ma Bro).

CORRECTIONS

At the championship show held by the Kiwanis Club of Kerrisdale on April 19th, 1963 the German Shepherd Dog, CATHAY'S CYRI was shown as being entered for Specials Only. Actually this dog was absent.

At the championship show held by the Kent Kennel Club on April 13th, 1963 in the Boxers Females the awards read as follows:

Bambie Of Haviland (B) Mrs. M.E. Bowden...1.C
Just For Fun (B) Mr. & Mrs. S. Whitmore...1.O-W
Terid Don's Hi Stevie (B) T. & R. Smith...2.O-RW

Actually this should have read as follows:

Bambie Of Haviland (B) Mrs. M.E. Bowden...1.C-W
Just For Fun (B) Mr. & Mrs. S. Whitmore...1.O-RW
Terid Don's Hi Stevie (B) T. & R. Smith...2.O

CANCELLATIONS

The award of Best Canadian Bred in the Breed made by the Basset Hound, BUSY LITTLE LADY (536899) at the championship show held by the Kiwanis Club of Kerrisdale on April 19th, 1963 has been cancelled on the grounds that this dog was not eligible for Best Canadian Bred as it was already defeated by the winners female which was a canadian bred dog.

The awards of 1st in the Novice Class, Winners and Best of Opposite Sex made by the Airedale Terrier, KENYA RIDGE ROSS' TONTAYS (471031) at the championship show held by the Kiwanis Club of Kerrisdale on April 20th, 1963 have been cancelled because this dog was not eligible for the Novice Class as it has won a first in the Senior Puppy Class and a first in the Open Class.

The awards of 1st in the Novice Class, Winners, Best of Winners, Best of Breed and Best Canadian Bred in the Breed made by the Airedale Terrier, KENYA RIDGE ROSS' TONTAYS (471031) at the championship show held by the Kiwanis Club of Kerrisdale on April 19th, 1963 have been cancelled because this dog was not eligible for the Novice Class as it has won a first in the Senior Puppy Class and a first in the Open Class.

The awards of 1st in the Senior Puppy Class, Reserve Winners, Best Canadian Bred in the Breed and Best Canadian Bred Puppy in the Breed made by the Dachshund (Standard Smooth), LADY REGAL OF SPITZIE (551393) at the championship show held by the Calgary Kennel & Obedience Club on April 28th, 1963 have been cancelled as this dog was one year of age on the day of the show.

The award of Best Canadian Bred in the Breed made by the Scottish Terrier, GAYWYN CASANOVA (535075) at the championship show held by the Forest City Kennel Club on May 11th, 1963 has been cancelled on the grounds that this dog is not a Canadian-bred dog according to our present Dog Show Rules.

MEETING OF THE BOARD OF DIRECTORS

(Continued from June issue)

SUBJECT: Mr. Anderson:
(1) pointed out that, by referendum ballot, the members had approved of a recommendation of the Board that amendments to the Field Trial Rules & Regulations be not dealt with by way of referendum ballot, but instead be handled by the Board of Directors, following the procedure which is presently incorporated in the Field Trial Rules & Regulations;
(2) recommended that the Board consider consulting the membership on whether the By-laws should be amended in order that amendments to the Dog Show Rules and the Obedience Trial Regulations & Standards would be dealt with by the Board rather than by way of referendum ballot.

MOTION #150-63
Moved by Mr. Anderson, seconded by Mr. MacKillop:
"THAT, the Secretary prepare a proposed amendment to the By-laws that will eliminate the necessity of referendum ballot in dealing with amendments to the Dog Show Rules and Obedience Trial Regulations, this proposed amendment to be considered at the semi-annual meeting."
FOR THE MOTION: Mr. Anderson, Mr. Wells, Mrs. Anderson, Mr. Dawson, Mrs. Joel, Mr. Little, Mrs. Mack, Mr. MacKillop, Mr. McDerment.
AGAINST THE MOTION: Mr. Blyth, Mr. Brown, Mr. Duff.
Motion carried.

SUBJECT: Mr. Anderson:
(1) pointed out the problem which the Board at this meeting, was faced with in view of a provision of the Club's By-laws which requires that the President or one of the Vice-Presidents be Chairman of the Registration Committee;
(2) recommended that the Board consider placing on the next referendum ballot a proposed amendment to the By-laws which would remove the necessity of an officer of the Club being Chairman of the Registration Committee.

MOTION #151-63
Moved by Mr. Anderson, seconded by Mr. MacKillop:
"THAT, the Secretary draft a proposed amendment, for consideration at the semi-annual meeting, to amend Article XIII, Section 1 of the Club's By-laws, eliminating the necessity of an officer of the Club being Chairman of the Registration Committee."
Motion carried unanimously.

SUBJECT: Mr. Anderson suggested that, prior to the Board's semi-annual meeting in August, the Board give consideration to the possibility of making arrangements for the Annual General Meeting of the Club to be held periodically in other cities in Canada in order that members in other areas may participate in such meetings.

9 A 39. IMPLEMENTATION OF BOARD DECISIONS

SUBJECT: The Secretary sought the customary authorization to proceed with implementation of decisions reached at this meeting.

MOTION #152-63
Moved by Mr. Anderson, seconded by Mrs. Joel:
"THAT, the Secretary be and is hereby authorized to implement as soon as practicable, decisions reached at this meeting."
Motion carried unanimously.

-----The President expressed his appreciation for the co-operation of members of the Board and the harmonious atmosphere which had prevailed throughout this meeting, and expressed the hope that the same co-operation and harmony would prevail throughout this Board's term of office.

MOTION #153-63
Moved by Mr. Brown, seconded by Mr. Little:
"THAT, we compliment the President on the efficient and impartial way in which he has conducted these annual meetings."
Motion carried unanimously.

ADJOURNMENT

At 1:30 p.m. this meeting adjourned.

****

[SECRETARY'S NOTE: Where, in the minutes of this meeting, the words "Motion carried unanimously" follow a motion, said words mean that all of the following members of the Board voted in favour of the motion: R. L. Blyth, Walter Brown, Mrs. Edna Joel, Mrs. Pamela B. Mack, Wm. McDerment, George Mehlenbacher.]

MAY 23, 1963

A regular meeting of the Board of Directors of The Canadian Kennel Club was held in the Club's offices, 1173 Bay Street, Toronto, Ont. on Thursday, May 23, 1963, commencing at 10:00 a.m. with the President, V. W. Williams, in the Chair, and the following members of the Board present: R. L. Blyth, Walter Brown, Mrs. Edna Joel, Mrs. Pamela B. Mack, Wm. McDerment, George Mehlenbacher.

MINUTES

3 M 45. MINUTES OF THE ANNUAL MEETING OF THE BOARD

SUBJECT: The Secretary presented his draft of the minutes of the annual meeting of the Board, and read a letter from the President suggesting a correction on Page #4 of the minutes of the session of March 16th.
CORRECTIONS: Following discussion the following corrections were ordered:
March 13th Session:
1. Page 8: Before last paragraph on Page 8 insert heading as follows: "10 MM 2. APPLICATIONS FOR MEMBERSHIP".
2. Page 12: Insert a second heading, reading as follows, before the first subject on this page: "5 F 6. POLICIES".
March 16th Session:
3. Page 4: Under File #9 A 16 delete the words "ACTION: No action was taken." and substitute the following: "ACTION: No action was taken to alter the present practice of the Secretary accepting collect long distance telephone calls and collect telegrams from members of the Board."
4. Page 19: In the last paragraph numbered 2 immediately preceding resolution #97-63 insert the words "it was suggested" before the words "in these circumstances".

MOTION #154-63
Moved by Mr. Brown, seconded by Mr. McDerment:
"THAT, the minutes of the annual meeting of the Board, as corrected, be adopted."
Motion carried unanimously.

FINANCIAL MATTERS

5 F 4. INVESTMENTS

SUBJECT: The Secretary:
(1) pointed out that in 1950 the Club had purchased 3% bonds having a par value of $19,000.00;
(2) pointed out that the income annually from these investments is low compared with prevailing interest rates, but it had been considered undesirable to sell these bonds because of their depreciated market value during recent years;
(3) expressed the view that the two main factors in handling the Club's investments are safety of investment and maximum yield; and
(4) sought the Board's reaction to the possibility of the Investments Committee so adjusting the Club's portfolio of investments in order that there would be little or no overall capital loss on bonds sold and purchases made with a view to increasing annual income.
DISCUSSION: During a discussion which followed it was agreed that the Investments Committee has the power to make adjustments along lines cited by the Secretary.

MOTION #155-63
Moved by Mr. Brown, seconded by Mr. McDerment:
"THAT, this matter be left in the hands of the Investments Committee."
Motion carried unanimously.

5 F 34. FINANCIAL STATEMENTS FOR FIRST QUARTER

SUBJECT: The Secretary presented the financial statements received from the Club's auditors for the three months period ending March 31, 1963.

MOTION #156-63
Moved by Mr. Brown, seconded by Mrs. Mack:
"THAT, the statements be received."
Motion carried unanimously.

5 F 35. MONEY ORDERS

REPORT: The Secretary reported that:
(1) through a money order service provided by an express company it had been possible for the staff to quickly remit to the Live Stock Records office renewal of membership fees, registration fees, etc. erroneously received at the Club's head office, and to make small refunds of excess funds received in payment of nose-printing and other supplied ordered by breeders;
(2) the express company had decided to discontinue this service.
DISCUSSION: During a discussion which followed it was agreed that:
(1) the usual practice of issuing cheques, requiring the signature of both President and Secretary, was impractical for the purposes outlined by the Secretary;
(2) an alternative arrangement would be to set up a separate bank account, with a stated maximum on deposit, on which the Secretary could draw cheques requiring only his signature.

MOTION #157-63
Moved by Mrs. Joel, seconded by Mrs. Mack:
"THAT, the Secretary be and is hereby authorized to set up a special account, not to exceed a current balance of $300.00, on which he alone may draw cheques where necessary to expedite transfer of funds or make small refunds."
Motion carried unanimously.

INTERNATIONAL MATTERS

6 IM 3. DOGS CROSSING CANADIAN-AMERICAN BORDER

SUBJECT: The Secretary read a letter from Mr. E. Chevrier, Winnipeg, urging that all possible steps be taken, including individual representations by members of the Club to their respective Members of Parliament, to encourage the Canadian government to initiate steps which would result in the abolition of all tariffs, duties, deposits, etc. on dogs crossing the Canadian-American border.
ACTION: The letter was ordered referred to the special committee appointed by the Board to pursue this question.

GOOD AND WELFARE

14 G 2. DOG FOODS

SUBJECT: Mr. Mehlenbacher suggested that steps should be taken to approach the new federal government with a view to obtaining the elimination of the federal sales tax on dog food and a regulation requiring that an analysis be included on the label or outside wrapping of dog foods marketed in Canada.

MOTION #158-63
Moved by Mr. Brown, seconded by Mr. Blyth:

"THAT, Mr. Mehlenbacher (Chairman), Mr. McDerment, and the Secretary be and are hereby appointed a special committee to make representations intended to obtain the elimination of the federal sales tax on dog food, or alternatively an analysis on all marketed dog food, or both."
Motion carried unanimously.

REGISTRATION, STUD BOOKS AND RELATED MATTERS

7 R 10. BOOKS OF BREED STANDARDS

REPORT: The Secretary reported that:
(1) all physical arrangements had been completed for the printing of copies of the Book of Breed Standards to be mailed to 1962-63 members of the Club;
(2) each member now entitled to a free copy of the Book had been asked whether he wished another copy of the book or a refund of the $3.00 which he had paid for a copy mailed to him earlier in the year;
(3) to issue a cheque for each refund to be made would involve considerable accounting, and recommended that the Board authorize the issuing of a money order for each refund to be made.

MOTION #159-63
Moved by Mr. Blyth, seconded by Mr. Mehlenbacher:
"THAT, the Secretary be authorized to make appropriate refunds by money order."
Motion carried unanimously.

SUBJECT: Mrs. Mack suggested that all American judges officiating in Canada be informed about the availability of the Club's Book of Breed Standards.

7 R 24. KENNEL NAMES

SUBJECT: The Secretary:
(1) pointed out that when, at its annual meeting in March, the Board had discussed with Dr. F. J. Leslie, the Chief Registration Officer of the Department of Agriculture, the Club's application for Ministerial approval of a new Article XXV (Kennel Names) in the Club's By-laws, the Chief Registration Officer had made it clear that Ministerial approval could not be expected on any amendment authorizing the Board to delegate to a Kennel Names Committee its powers to deal with all questions relating to kennel names;
(2) pointed out that because of the checks which must be made on applications for registration of kennel names, and the time which must elapse due to publication of notice in the official magazine of applications received, and the waiting period which must elapse during which objections to applications published may be received, approximately 2-1/2 to 3 months usually elapses after receipt of an application, before a decision is reached on the application;
(3) pointed out that if, in addition, decisions reached by the Kennel Names Committee must be held over for endorsation, or other action, at the next succeeding meeting of the Board, this will only further delay applicants being informed of the decisions reached on their applications to register kennel names;
(4) recommended that the following policy be established:
(a) following a meeting of the Kennel Names Committee a report on the Committee's decisions, in the form of recommendations, be despatched to all members of the Board;
(b) any member of the Board disagreeing with any recommendation of the Committee may submit an objection to the Committee's recommendation but any objection must be submitted so as to be received by the Secretary within the ten day period following the mailing of the Committee's report to the Board;
(c) if, after the expiration of ten days, no objection is received to any recommendation of the Committee, the Secretary will implement the Committee's recommendation;
(d) where an objection is received from any member of the Board to any particular recommendation of the Committee, the Committee's recommendation will be held over for consideration at the next following meeting of the Board;
(e) a report on Committee's recommendations be submitted to the next following meeting of the Board for inclusion in the minutes of the meeting.

MOTION #160-63
Moved by Mrs. Joel, seconded by Mr. Brown:
"THAT, recommendations of the Kennel Names Committee on applications for registration of kennel names, or objections thereto, be mailed to the entire Board, and if, within ten days after mailing, the Secretary does not receive from any member of the Board an objection to any particular Committee recommendation or recommendations, the Secretary is then authorized to proceed to implement the Committee's recommendations."
Motion carried unanimously.

REPORTS: The Secretary pointed out that in a report to the Board dated April 10th the Committee had recommended that:
(1) the application for registration of "888" as a kennel name be not approved on the grounds that numerals should not be permitted as a kennel name;
(2) the application for registration of FILIGREE be not approved as it is a kennel name registered with The Kennel Club;
(3) objections to the following applications for registration of kennel names be sustained: SHADOW CREEK, KURTZHAAR, DORMAR;
(4) an objection to the following kennel name be not sustained: MYRA LEE.

The Secretary pointed out that in report to the Board dated May 6th the Committee had recommended that:
(1) objections to the following applications for registration of kennel names be sustained: PENARAGON, PENHAVEN, WIL-MAR;
(2) the applicant who had given LOCKVIEW as his first choice be considered the first of the two applications which had been received at the Records Office on the same date (the other applicant had given LOCKVIEW as his second choice);
(3) the anticipated application of Mr. Ed O'Brien for the registration of EDLYN as a kennel name be processed in the regular way.

The Secretary pointed out that at its meeting on May 21st the Committee had decided to submit the following recommendations to the Board:
(1) that a "stop card" be inserted in the files at the Records Office prohibiting the use of RAVENSLEA as a kennel name (objection received from breeder, in the same breed, who had registered the kennel name RAVENSGLEN);
(2) that an objection to CAREYDON be not sustained, and an objection to JONDOR be sustained;
(3) that accents be not permitted on kennel names on the grounds that when a dog is registered in the Club's records its name is shown in capital letters, and there is no equipment in the Records Office available to insert accents in other places on certificates.

MOTION #161-63
Moved by Mr. Brown, seconded by Mr. Blyth:
"THAT, we receive and approve the recommendations of the Kennel Names Committee as set forth in reports dated April 10th and May 6th and also the recommendations arising out of their meeting on May 21st."
Motion carried unanimously.

REPORT: The Secretary reported that:
(1) following the annual meeting of the Board he had written Mr. H.W. Herwig, N. Surrey, B.C. and Mrs. Catherine Gardiner, Orono, Ont. with regard to the kennel names TERRYCROFT and KERRYCROFT;
(2) on May 13th he had informed Mr. Herwig that in the event he wished to select another kennel name his selection of FALCONMOOR was now available.

REPORT: The Secretary read:
(1) his letter (dated March 25th) to the Club's solicitor with regard to the objection of Mr. Albert Farrell to the inclusion of the kennel name NUGGET in the name of the Miniature Pinscher registered as AIRLANE'S GOLDEN NUGGET (521815);
(2) the letter (dated April 11th) which was received from the Club's solicitor setting forth his opinions on the questions raised by the Secretary and the opinion that no action at all should be taken to alter the name of the dog registered as AIRLANE'S GOLDEN NUGGET;
(3) a letter (dated April 22nd) from Mr. Wells, to whom the Board had referred this matter for consideration when the opinion of the Club's solicitor had been received, who recommended that no further action be taken.

MOTION #162-63
Moved by Mr. Mehlenbacher, seconded by Mrs. Mack:
"THAT, no further action be taken at this time."
Motion carried unanimously.

REPORT: The Secretary:
(1) pointed out that Ministerial approval is expected on an entirely new Article XXV (Kennel Names) in the Club's By-laws, this new By-law empowering the Board to "declare policy, prescribe regulations, make interpretations and enforce its decisions and orders, with respect to kennel names, their registration and use";
(2) pointed out that while the previous Article XXV included definitive policies governing kennel names, these would no longer be operative after the new By-law receives Ministerial approval;
(3) stated that arrangements would be made for the Board, at its semi-annual meeting in August, to "declare policy, prescribe regulations, and make interpretations", but in the meantime it is imperative that the Records Office and the staff at the Club's head office have policies to guide them until such policies, regulations, etc. are prescribed by the Board;
(4) recommended that the definitive policies outlined in the former Article XXV and in standing resolutions still in effect remain in effect until the semi-annual meeting of the Board.

MOTION #163-63
Moved by Mr. Blyth, seconded by Mr. Brown:
"THAT, the Canadian National Live Stock Records and the Club's head office shall be governed by the policies set forth in Article XXV as included in the last printed By-laws until the semi-annual meeting of the Board."
Motion carried unanimously.

7 R 25. REGISTRATION COMMITTEE

REPORT: The Secretary reported that in a memorandum (dated February 13, 1963) forwarded to all members of the Board the 1962 Registration Committee had reported those decisions which it had given since its last detailed report to the Board, the memorandum in question reporting that the Registration Committee had:
(1) authorized the registration of a litter of Beagles born March 13, 1962; whelped the property of Murray Long, Ancaster, Ont.; sire: FREBRUS FALLA (367530); dam: LONGS GLADDIE GIRL (504387); (RC-39)
(2) authorized the registration of a litter of Beagles whelped October 9, 1960 the property of Murray Long, Ancaster, Ont.; sire: FREBRUS FALLA (367530); dam: LONGS GLADDIE GIRL (504387); (RC-39)
(3) authorized the registration of a litter of Beagles born April 10, 1960 the property of Charles P. Lewis, Bright, Ont. by HILLDALE VAGABOND PRINCE (473606) out of LADY BLENHEIM (377884); (RC-41)
(4) authorized the registration of a litter of Beagles whelped the property of Charles P. Lewis, Bright, Ont. on April 26, 1960, by HILLDALE VAGABOND PRINCE (473606), out of HICKORY HILL SPAN (364015); (RC-41)
(5) authorized the individual registration of the Beagle HILLDALE SLIM'S LADY out of the litter whelped on April 10, 1960 by HILLDALE VAGABOND PRINCE (473606) out of LADY BLENHEIM (377884), and the recording of transfer of ownership of this dog to the name of Mr. W. T. Wilkins, Preston, Ont.; date of transfer, August 22, 1960; (RC-41)
(6) authorized the registration of the Pointer HARWOOD KAHLI born July 14, 1960 (litter #114-61), bred by Robert Lennox (now deceased), and the recording of transfer of ownership of this dog as of November 16, 1960 to Col. & Mrs. John Collings, St. Lazare de Vaudreuil, P.Q.; (RC-42)
(7) authorized the registration of the Boxer RATHGAEL'S MISTER SHANE born June 7, 1957, bred by G. K. Robinson, Toronto, Ont. and the recording of transfer of ownership of this dog from the name of G. K. Robinson to the name of Thos. E. Sweeting, Toronto Ont.; date of transfer, March 10, 1958; (RC-43)

(8) authorized the recording of transfer of ownership of the Boxer PRINCE ALEXANDRA DE-BLAIR (508695) from the name of Mr. & Mrs. S. Szalay, Edmonton, Alta. to the name of Lt. Col. H. Goodfellow, Edmonton, Alta.; date of transfer, July 27, 1962; (RC-44)

(9) authorized the registration of the Retriever (Nova Scotia Duck Tolling) MAJOUR OF SCHUBENDORF owned by E. R. Pace, Shubenacadie, N.S., under Article XXVIII, Section 1 (d) of the Club's By-laws; (RC-45)

(10) authorized the recording of transfer of ownership of the Welsh Corgi (Pembroke) PET RANCH'S ZORENA DE MIKLOS (454789) from the name of Mrs. S. Gillespie, Scarborough, Ont. to the name of Miss Glenda MacMillan, Dalkeith, Ont.; date of transfer, May 18, 1962; (RC-46)

(11) authorized the registration of the Australian Terrier Aust. Ch. WONGA RHON WELL WISHER registered with the Australian National Kennel Council, imported to Canada by Mrs. C. N. Iverson, Victoria, B.C.; (RC-50)

(12) authorized the correction of sex (from male to female) of the Scottish Terrier BLACK MAGIC OF HARRIS-SHIRE (510879) on the certificate of registration of this dog in the records of the Club; (RC-51)

(13) authorized the registration of a litter of German Shepherd Dogs whelped on October 1, 1962 the property of Ralph J. Vallee, Morinville, Alta.; sire: CHIEF ALEXANDER (525572); dam: TARA V WALDE (523726); (RC-52)

(14) authorized the issuance of a certificate of registration for the Samoyed BELYANKA PRINCE NICKOLAI (424882); and the recording of transfer of ownership of this dog from the name of Sandra Farrell, Oshawa, Ont. to the name of Alan Norman Buss, Pickering, Ont.; date of transfer, January 25, 1962; (RC-53)

(15) authorized the recording of transfer of ownership of the Labrador Retriever BEECHKNOLL BLACK SUSAN (507842) from the name of Bruce Syer, Toronto, Ont. to the name of John A. McKay, Scarborough, Ont.; date of transfer, August 1, 1962; (RC-56)

(16) declined to authorize registration of a "Mexican Hairless" imported from the United States by Mr. Harold Cunningham, having decided that it would not accept as a basis for registration, documents issued by "The American Hairless Dog Club"; (RC-57)

(17) declined to authorize registration of two Poodles imported from Jamaica by Mrs. H. A. Fairfield, Preston, Ont. until documents required by Article XXX, Section 2 (d) of the Club's By-laws are provided by the importer; (RC-58)

(18) declined to authorize the registration of the Golden Retriever SCAUREND SIMON imported to Canada from England by Lt. Cdr. P. C. Berry on the grounds that the Export Certificate issued by The Kennel Club, England, failed to show a full three-generation pedigree, as required by Article XXX, Section 2 (d) of the Club's By-laws; (RC-59)

(19) declined to authorize the registration of a Poodle COQUETTE, imported from Mexico into the United States and subsequently imported to Canada, until the dog is registered individually in the records of The American Kennel Club; (RC-63)

(20) authorized the issuance of a duplicate certificate of registration for the Chihuahua MIKALA OF NORFOLK HOUSE (507547), and the recording of transfer of ownership of this dog from the name of Mrs. John Ross, Brampton, Ont. to the name of Mrs. Stella Siekierzycki, Cheltenham, Ont.; date of transfer, August 22, 1961; (RC-64)

(21) decided that the Dachshund LUTTE VOM RAUKENWOHLD imported to Canada from Germany by G.V. Richthofen of Ponoka, Alta. is not eligible for registration in the Club's records on the grounds that the three-generation certificate issued by the German Dachshund Club indicates cross-breeding by coat; (RC-66)

(22) declined to authorize the registration of two Dachshunds imported from Germany by Dr. H. Zuege, Edmonton, Alta. on the grounds that the certificates of registration issued by the German Dachshund Club indicate cross-breeding by coat; (RC-68)

(23) authorized the registration of a litter of Dachshunds born July 16, 1962 the property of Mrs. Pauline Schofield, Kingston, N.S.; sire: VON KRALC'S WEE JET SMOKEY (437171); dam: LITTLE DANS KANDI STYCK (475149), the litter to be identified according to the By-laws of the Club; the litter registration certificate to show that the litter consisted of two Smooth males, two Smooth females, and one Long-haired male; (RC-72 & RC-73)

(24) authorized the recording of transfer of ownership of the following dogs from the name of Mr. & Mrs. Walter Ormond, Port Credit, Ont. to the name of Mrs. Elizabeth Momont, Cooksville, Ont.; date of transfer, November 12, 1962: (Chow Chows) DAN-DEE CHEE OF YAN-KEE (345789) and BAS-IL-DEL of YAN-KEE (484986) (RC-71)

(25) authorized the registration of the Chow Chows TOOT-SEE OF YAN-KEE and TSE-MEE OF YAN-KEE born December 28, 1958 the property of Mr. & Mrs. Walter Ormond, Cooksville, Ont.; and the recording of transfer of ownership of these dogs to the name of Mrs. Elizabeth Momont, Cooksville, Ont.; date of transfer, November 12, 1962; (RC-71)

(26) authorized the registration of the Chow Chows NAN-CEE-DEE OF YAN-KEE, HAN-SEE-LEE OF YAN-KEE, and BOI-ZEE OF YAN-KEE, all born September 11, 1961, whelped the property of Mr. & Mrs. Walter Ormond, Port Credit, Ont.; and the recording of transfer of ownership of these dogs to the name of Mrs. Elizabeth Momont, Cooksville, Ont.; date of transfer, November 12, 1962; (RC-71)

(27) authorized the issuance of a duplicate certificate of registration for the Cairn Terrier DUNVEGAN'S MICKY BOY; (RC-74)

(28) Decided that it could not assist Mr. Bruno F. Riemer of Saskatoon, Sask in connection with his desire to obtain a certificate of registration for a Brittany Spaniel which he reported having purchased in February of 1955 from Mr. R. L. Hamilton until such time as Mr. Hamilton is located and particulars regarding date of birth, ancestry, etc. are established for the dog in question; (RC-79)

(29) decided that it could not assist Mr. D.B. Welsh in connection with the registration in the Club's records of a Poodle imported from England, on the grounds that information furnished by The Kennel Club indicated that the dam of the dog in question had not been registered in their records and The Kennel Club was unable to confirm the particulars of the breeding of the dam or the name and address of her breeder; (RC-91)

(30) declined to authorize the recording of transfer of ownership of the Boxer LADY GINGER OF BAY (447993) from the name of Mr. & Mrs. Gerard J. Violette to Mrs. Gerard J. Violette until the completed application for transfer of ownership was signed by Mr. Violette. (RC-92)

REPORT: The Secretary pointed out that it is the custom of the Board, at its first meeting in the calendar year, to appoint the Registration Committee but as the Board's first meeting was not held until its annual meeting in March, the President, upon taking office on January 1st and for the purpose of expediting the work of the Committee, had appointed a pro tem Committee composed of himself as Chairman, Mrs. Edna Joel, Mr. Walter Brown, and Mr. Wm. McDerment, as the Committee, pending the appointment of the Committee by the Board at its annual meeting in March.

REPORT: The Secretary reported that in a memorandum (dated February 13, 1963) the pro tem Registration Committee had reported that it had:

(1) authorized the registration, under Article XXVIII, Section 1 (d) of the Club's By-laws, of the following Poodles born the property of Mrs. Audrey Berg, Winnipeg, Man.: ASCHENPUTTAL I (born December 15, 1958), and WEYBOURNE LOUIS (born July 8, 1959); (RC-69)

(2) authorized the registration under Article XXVIII, Section 1 (d) of the Club's By-laws, of the following Lhasa Apsos: TEAKO OF ABBOTSFORD, RANGI OF ABBOTSFORD, OPI OF ABBOTSFORD, LANA OF ABBOTSFORD; (RC-76)

(3) authorized the Canadian National Live Stock Records to record the transfer of ownership of the Bulldog NIAGARA DUCHESS (519507) from the name of Thomas Fittante, Niagara Falls, N.Y. to the name of A.J. Langham, Rexdale, Ont.; date of transfer, August 10, 1962; (RC-83)

(4) authorized the registration of the Pomeranian KRACHER'S SNOWBALL OF FIRE (A.K.C. T-736840) owned by Glenna C. Kracher, Spokane, Wash. This dog died within two weeks after its return to the United States from competition in Canada and its owner was unable to identify it by tattoo markings or nose prints - registration authorized by the Committee in order that a Companion Dog certificate could be issued to its owner. (RC-85)

MOTION #164-63

Moved by Mr. Blyth, seconded by Mr. Mehlenbacher:

"THAT, we receive and record in the minutes of this meeting the two reports of Registration Committee decisions as communicated to the national Board in reports dated February 13th 1963, and we endorse the action of the President in appointing a pro tem Registration Committee pending the appointment of that Committee at the annual meeting of the Board."

Motion carried unanimously.

REPORT: The Secretary reported that at meetings of the Committee since the annual meeting of the Board the Registration Committee had:

(1) authorized the recording of transfer of ownership of the Pomeranian SUNNYVALE'S LITTLE MICKI (483331) from the name of Mary P. Matheson, Cobble Hill, B.C. to the name of Mrs. Joan Zavaglia, Vernon, B.C; date of transfer, January 24, 1963; (RC-80)

(2) declined to authorize the registration and transfer of a Boxer which Mrs. Mabel F. Williams, Oromocto, N.B. had acquired from a Humane Society; (RC-89 & RC-116)

(3) declined to consider registration of an English Springer Spaniel owned by James G. Hilker, Kitchener, Ont.; both sire and dam of which are not registered individually in the Club's records; (RC-90)

(4) authorized the registration of the Poodle TEENA OF ORCHARD-HOUSE, registered with The Kennel Club under number 30060/59, imported to Canada by Mrs. M.V. Mosley, Pickering, Ont.; (RC-93)

(5) authorized the recording of transfer of ownership of the Dachshund (Standard Smooth) ACKERBLADE'S PERRI (440492) from the name of Mrs. Pat Van Bruggen, Perth, Ont. to the name of Charles J. Foy, Moisie, P.Q.; date of transfer, October 30, 1959; (RC-97)

(6) declined to authorize the registration of a Dachshund which Kenneth McEwen, Sudbury, Ont. claimed to have purchased from a Mr. Dekker; (RC-98 & CC-1027)

(7) authorized the Records Office to put a "stop card" on the name SILVAN, being used to name Collies, on the grounds of similarity to the registered kennel name SULLIVAN'S; (RC-102)

(8) declined to authorize the registration of the Chihuahua VICTORIA REGINA, owned by Major Howard D. Stiles, Bermuda, until the usual requirements (litter registration, etc.) are complied with; (RC-105)

(9) ruled that a litter of Dachshunds, the result of a mating of a Miniature to a Standard, is not eligible for registration on the grounds that these are two distinct breeds; (RC-107)

(10) authorized the recording of transfer of ownership of the Chihuahua THE MAYAN LADY ELIDA (477365) from the name of Joe Garbutt, Toronto, to the name of Wm. Bender, Toronto, Ont.; date of transfer, January 5, 1963; (RC-109)

(11) authorized the recording of transfer of ownership of the Chihuahua THE GARBUTT'S SENORITA LUCINA (515434) from the name of Mrs. Joe Garbutt, Toronto to the name of Wm. Bender, Toronto, Ont.; date of transfer, January 5, 1963; (RC-109)

(12) authorized the recording of transfer of ownership of the Chihuahua THE MAYAN COUNT DON PABLO 2nd (492549) from the name of Mrs. Joe Garbutt, Toronto, Ont. to the name of Wm. Bender, Toronto, Ont.; date of transfer, January 5, 1963; (RC-109)

(13) declined to consider registration of Mexican Hairless dogs imported by John Laviolette, Toronto, Ont. on the grounds that acceptable certificates of registration issued in the United States are now available; (RC-110)

(14) authorized the recording of transfer of ownership of the Pug HAZELWOOD'S BEAR CAT (513265) from the name of John Zalay, Toronto, Ont. to the name of David Cohen, Toronto, Ont.; date of transfer, November 17, 1962; (RC-111)

(15) authorized the recording of transfer of ownership of the German Shepherd Dog MINX OF CELLINA from the name of Mrs. Virginia Peake, Gem, Alta. to the name of R.R. Kepp, Brooks, Alta.; date of transfer, November 5, 1962; (RC-112)

(16) authorized the issuance of a duplicate certificate of registration for the German Shepherd Dog CRESTVIEW'S REBECCA (450578) and the recording of transfer of ownership to the name of G.F. Thomas, Prince Albert, Sask. from the name of Larry Paquette, Whitecourt, Alta.; (RC-113)

(17) declined to take any action with regard to registration of a litter whelped by a female in the care of Mrs. Audrie M. Code, said female recorded as the property of Roger A. Twisleton, Peterborough, Ont.; (RC-114)

(18) authorized the recording of transfer of ownership of the Weimaraner SUNAWAGOLD'S CAESAR (381808) from the name of R. J. Roberge, Calgary, to the name of George F. Foster, Ladysmith, B. C.; date of transfer, June 15, 1961 (RC-115)
(19) declined to authorize the registration of an American Cocker Spaniel brought to the United States by Mrs. Bertha Rivero when she moved to the United States from Cuba; (RC-120).

MOTION #165-63
Moved by Mr. Brown, seconded by Mrs. Joel:
"THAT, we receive and record in the minutes of this meeting decisions reached by the Registration Committee since the annual meeting of the Board."
Motion carried unanimously.

SUBJECT: Mrs. Mack enquired of the progress on a number of applications for registration (under Article XXVIII, Section 1 (d) of the By-laws) submitted by Mrs. James M. E. Tildesley, Rosemere, P. Q.
DISCUSSION: During a discussion which followed the Secretary reported on the various checks being made by the Registration Committee on the applications submitted by Mrs. Tildesley, the file (#RC-67) having required correspondence with The Kennel Club (England) and The American Kennel Club because of suspected cross-breeding in the pedigrees of the dogs for which registration is sought.

MOTION #166-63
Moved by Mr. Brown, seconded by Mr. Blyth:
"THAT, this matter be referred back to the Registration Committee."
Motion carried unanimously.

-----After a luncheon recess the meeting resumed with Dr. F. J. Leslie, Chief Registration Officer of the Department of Agriculture, in attendance.

INTERNAL AND ADMINISTRATION

9 A 7. AMENDMENTS TO BY-LAWS

REPORT: Dr. Leslie delivered to the Secretary a 'Certificate' (dated May 6, 1963) certifying that the approval of the Minister of Agriculture for Canada had been given to the following amendments to the Club's By-laws:
(1) an amendment to Article XXV (Kennel Names) - approved on the last referendum ballot (amendment #5);
(2) an amendment to Article XII (Elections) - approved on the last referendum ballot (amendment #18).
Dr. Leslie reported that these two amendments, as approved by the Minister, included the changes requested by the Board (see resolutions #12-63 and #11-63), and reported that Ministerial approval had not been granted amendment #8 which had to do with the non-registration (or cancellation of registration) of dogs found to have hip displasia, cryptorchidism or monorchidism.
DISCUSSION: The Secretary reviewed the discussion which preceded the adoption of resolution #163-63, and Dr. Leslie agreed that it would be quite permissible for the Live Stock Records office and the Club to carry on with the policies outlined in Article XXV of the By-laws as in effect prior to Ministerial approval of the new Article XXV.

-----Dr. Leslie left the meeting.

7 R 25. REGISTRATION COMMITTEE

REPORT: The Secretary reported that as a result of discussions at recent meetings of the Registration Committee and on the instruction of the President he had sought the opinion of the Club's solicitor on certain questions with regard to the functioning of the Committee, and read his letter (dated May 16th) to Mr. A. J. Stone (Mr. Peter Wright being overseas) and Mr. Stone's reply dated May 21st in which Mr. Stone expressed the following opinions:
(1) The Committee may meet without the President, or a Vice-President presiding.
(2) At a Committee meeting the Committee should select a Chairman when the meeting cannot be chaired by the President or a Vice-President.
(3) Decisions reached by the Committee at a meeting need not be signed by the President, but could be signed by "Chairman of meeting of Registration Committee".
DISCUSSION: During a discussion which followed it was agreed that:
(1) the Secretary should be in a position to promptly implement decisions reached by the Committee;
(2) a temporary policy, based on the opinions rendered by Mr. Stone, should apply to the functioning of the Committee until the matter could be reviewed by the Board at its semi-annual meeting.

MOTION #167-63
Moved by Mr. Brown, seconded by Mrs. Mack:
"THAT, pending consideration of this question at the Board's semi-annual meeting, any decision reached by unanimous agreement at a meeting of the Registration Committee be implemented immediately; but when the Committee members present are not unanimous the file must be referred to the President for opinion and further consideration at a succeeding meeting of the Committee."
Motion carried unanimously.

7 R 41. IDENTIFICATION

SUBJECT: The Secretary:
(1) pointed out that at the annual meeting of the Board Mr. Wells had outlined the steps which he takes to ensure satisfactory tattoo markings when tattooing dogs;
(2) reported that he had obtained from Mr. Wells his written step-by-step procedure, with the thought in mind that a booklet could be issued detailing the best means to ensure satisfactory tattoo markings or nose-prints;
(3) suggested that consideration be given to extending the booklet to cover all aspects of registration.
ACTION: It was agreed that the Secretary would develop his proposal and present a detailed report to the Board for its consideration.

COMPLAINTS, CHARGES & PROTESTS

8 C 10. SPECIFIC CASES

REPORT: The Secretary reported on several other complaints and after discussion the Board took appropriate action.

INTERNAL AND ADMINISTRATION

9 A 13. BUILDING FUND

SUBJECT: The Secretary:
(1) pointed out that at the Club's Annual General Meeting held at Montreal in 1961 the Club had received cheques from The Ladies' Kennel Club of Canada and Mrs. Ruth Common, these cheques being intended as donations towards what was then termed a "Building Fund";
(2) pointed out that at its semi-annual meeting in 1962 the Board had decided that it would not establish a Building Fund;
(3) read a letter from Mrs. Joan B. Lagimodiere, President of The Ladies' Kennel Club of Canada, advising that at a meeting of The Ladies' Kennel Club of Canada there had been a consideration of the disposition to be made of the donations made by that Club and by Mrs. Common, one of its members, and since the Board had decided that it would not establish a Building Fund the Ladies' Kennel Club of Canada and Mrs. Common desired that their donations be used to purchase a suitable item for the Club's new offices.

MOTION #177-63
Moved by Mr. Blyth, seconded by Mr. Mehlenbacher:
"THAT, this be left in the hands of the Secretary-Treasurer and The Ladies' Kennel Club of Canada and Mrs. Ruth Common be thanked."
Motion carried unanimously.

9 A 31. BOARD MEETINGS

SUBJECT: The Secretary sought an instruction with regard to the calling of the next regular meeting of the Board.

MOTION #178-63
Moved by Mr. Brown, seconded by Mrs. Mack:
"THAT, we dispense with a regular meeting of the Board in June and hold a regular meeting of the Board on July 17, 1963 as scheduled."
Motion carried unanimously.

9 A 60. BERMUDA KENNEL CLUB

SUBJECT: The Secretary:
(1) reported that, pursuant to resolution #65-63 he had written the Bermuda Kennel Club setting forth the Board's views on the text of proposed Articles of Affiliation between the Bermuda Kennel Club and The Kennel Club (England);
(2) read a further letter from the Bermuda Kennel Club seeking further advice on this question;
(3) read his draft of a proposed letter to the Bermuda Kennel Club suggesting that the Bermuda Kennel Club consider discussing with officials of The Kennel Club the possibility of a simple agreement between the Bermuda Kennel Club and The Kennel Club to the effect that these Clubs become affiliated for the purpose of advancing the interests of pure-bred dogs, both Clubs being prepared to co-operate with each other to the extent that their respective By-laws, policies and procedures permit, and to the extent that the Committee of The Kennel Club and the Board of Directors of the Bermuda Kennel Club consider it mutually advantageous to do so.

MOTION #179-63
Moved by Mr. Brown, seconded by Mr. Blyth:
"THAT, the Secretary write the Bermuda Kennel Club along the lines suggested."
Motion carried unanimously.

9 A 103. APPOINTMENTS FOR 1963

SUBJECT: The Secretary read a letter from Mr. George Tabner, Komoka, Ontario, tendering his resignation as Ontario Field Trial Representative for Spaniels.

MOTION #180-63
Moved by Mr. Brown, seconded by Mr. Mehlenbacher:
"THAT, the resignation be accepted and the Board's appreciation of his past services be communicated to Mr. Tabner; the matter of appointment of a new Representative to be left in the hands of Mr. Blyth, Chairman of the Field Trial Council for Spaniels, for report and recommendation to the Board."
Motion carried unanimously.

SUBJECT: Mr. Mehlenbacher, Chairman of the Obedience Council, pointed out that the Board has not as yet appointed an Obedience Representative for Saskatchewan.
ACTION: The Secretary was instructed to take this matter up with Mr. Dawson and secure his recommendation.

MEMBERSHIP MATTERS

10 MM 2. APPLICATIONS FOR MEMBERSHIP

REPORT: The Secretary reported that the Complaints Committee recommended that two applications for associate membership reported on list No. 8, and two additional applications for associate membership since received, be held in abeyance pending a report of the Director for Alberta on two complaints against one of the applicants to be referred to the Alberta Director for investigation and report to the Board.

MOTION #181-63
Moved by Mrs. Joel, seconded by Mr. Blyth:
"THAT, these three applications for associate membership be held in abeyance pending a report on the two complaints against one of the applicants.
Motion carried unanimously.

SUBJECT: The Secretary sought confirmation of the approval given other applicants for membership listed on lists No. 7 to No. 11 inclusive, copies of these lists having been forwarded to all members of the Board.

MOTION #182-63
Moved by Mr. Mehlenbacher, seconded by Mr. McDerment:
"THAT, with the exception of the applications referred to in Motion #181-63, the remaining applicants for membership listed on lists No. 7 to No. 11 inclusive be admitted to membership."
Motion carried unanimously.

REPORT: The Secretary reported that, pursuant to instructions given by the Board at its annual meeting, he had referred to Director Mrs. Anderson the application for ordinary membership submitted by a certain individual and reported that, following inquiry into the matter which had prompted the Board's instruction, Mrs. Anderson had recommended approval of the application.

MOTION #183-63
Moved by Mr. Brown, seconded by Mr. McDerment:
"THAT, the recommendation of Mrs. Anderson be approved and implemented."
Motion carried unanimously.

REPORT: The Secretary reported that a certain individual had submitted an application for ordinary membership but his application indicated that he did not keep private breeding and identification records. The Secretary reported on correspondence with the applicant in this connection.

MOTION #184-63
Moved by Mr. Blyth, seconded by Mrs. Joel:
"THAT, we do not approve the application for ordinary membership but will consider same when he supplies evidence of adequate private breeding and identification records."
Motion carried unanimously.

DOG SHOWS

11 D 1. JUDGES

REPORT: The Secretary reported that Mr. Peter Wright, the Club's solicitor, is presently overseas and while in London he had taken from "The Times" of May 11th, a newspaper report on a libel action against members of the Committee of The Kennel Club arising out of their non-approval of a particular person to judge at a particular show, Mr. Wright having suggested that The Canadian Kennel Club obtain information from The Kennel Club about the case in question.
ACTION: The Secretary was instructed to communicate with Mr. Wright and request that he visit the offices of The Kennel Club and discuss the matter with Mr. Buckley, the Secretary of The Kennel Club, obtaining such information as The Kennel Club may be prepared to furnish.
(to be continued)

NOTICE

SUBJECT: Long Service Buttons

Any person who has been a continuous member of The Canadian Kennel Club for 20 years or has been a member for 25 years not continuously, is invited to communicate with the Secretary of The Canadian Kennel Club if he or she has not already been supplied with a Long Service Button.

NOTICE

SUBJECT: Amendments to the By-laws of The Canadian Kennel Club

Notice is hereby given that the following amendments to the By-laws of The Canadian Kennel Club have been approved by the Minister of Agriculture for Canada and became effective as indicated hereunder.

The following amendments to the By-laws of The Canadian Kennel Club received the approval of the Minister of Agriculture for Canada on February 6, 1963 and became effective on that date:

Article X, MEETINGS OF BOARD, be amended by the deletion of the following in Section 2:

"The first meeting of the Board shall be held at the call of the President or of any three members of the Board."
and the following be substituted therefor:
"The First meeting of the Board shall be held on the Saturday following the 3rd of January. When the Secretary informs elected candidates of their election to the Board he shall draw to their attention this provision in the By-laws."

Article XII, ELECTIONS, be amended by the addition of the following to Section 5:

"In the case of a partnership membership only the authorized representative may be a candidate for office on the Board, or may be appointed to fill a vacancy on the Board."

Article XII, ELECTIONS, Section 5, be amended by the addition of the following:

"If, before the election ballots are printed, the Election Commission is authoritatively notified of the death of a member who has been nominated in the regular way for an office on the Board where only ONE candidate is to be elected, arrangements shall be made for a write-in ballot in the manner provided in parts (b) to (e) inclusive of Section 16. Such write-in ballot shall be provided regardless of whether there was any other nomination (or nominations) for the office concerned with such death.
"If, before the election ballots are printed, the Election Commission is authoritatively notified of the death of a member who has been nominated in the regular way for Director for Ontario, the nomination of such deceased member shall be considered null and void, and the election of Directors for Ontario shall proceed as if such nomination has not been received."

Article XII, ELECTIONS, Section 13, be amended by the addition of the following:

"If, after the ballots are printed, the Election Commission is authoritatively notified of the death of a candidate for an office on the Board where only ONE candidate is to be elected, the Election Commission, when submitting its report, shall regard the election for that office as null and void, and shall report the office concerned as "vacant". The vacancy shall be filled by the Board at its first regular meeting following receipt of the Election Commission's report.
"If, after the ballots are printed, the Election Commission is authoritatively notified of the death of a candidate for the office of Director for Ontario, the Election Commission, when submitting its report, shall report the election of the required number of Directors for Ontario after disregarding any votes cast for the deceased candidate."

Article VI, PRIVILEGES, be amended by the deletion of Section 4 in its entirety, and the following be substituted therefor:

"4. Except as otherwise provided in section 6, sub-section 5, of The Live Stock Pedigree Act, 1949, no member, person, partnership, club, association, company, or corporation who has been expelled from the Club, is suspended by the Club, or is deprived of the privileges of the Club shall be entitled to any of the rights and privileges set forth above unless reinstated."

Article XXXVII, INTERPRETATIONS, of the Club's By-laws, be amended by deleting Section 2 in its entirety, and the following be substituted therefor:

"2. The interpretation of any By-law, rule, or regulation, as agreed on by the Board, shall be final and binding but such interpretation shall not contravene the provisions of The Live Stock Pedigree Act."

Article XXXVII, INTERPRETATIONS, be amended by the addition of a new Section reading as follows:

"4. The Secretary is authorized to edit the By-laws and all rules and regulations of the Club to ensure there is uniformity and a logical sequence of numbering and lettering of sections, subsections, paragraphs, and sub-paragraphs."

Article IX, BOARD, be amended by the addition of a new section reading as follows:

"6. In the event a situation develops where there remains less than a quorum of the Board in office the Chief Registration Officer and the Election Commission shall have the power to take the necessary steps to ensure normal continuity of the Club."

The following amendments to the By-laws of The Canadian Kennel Club received the approval of the Minister of Agriculture for Canada on May 6, 1963, and became effective on that date:

Article XXV, KENNEL NAMES, be deleted in its entirety and the following substituted therefor:

ARTICLE XXV. KENNEL NAMES

1. The Board shall have the power
(a) to regulate and protect kennel names;
(b) to continue or discontinue any existing system of kennel name registration from time to time and to institute and maintain any system of kennel name registration;
(c) to declare policy, prescribe regulations, make interpretations and enforce its decisions and orders, with respect to kennel names, their registration and use.

2. Registration of a kennel name confers no property right in the kennel name registered.

3. Unless the Board shall otherwise direct, no one may register a dog born in Canada, using a registered kennel name as any part of the registered name of the dog except the person entitled to use the kennel name under this Article.

4. Notwithstanding anything to the contrary in these By-laws, the Board, in its absolute discretion may, by the simple adoption of a resolution, cancel the registration of a kennel name if, in the opinion of the Board, the person, partners or company to whom it was originally given:
(a) has violated a By-law of the Club, relating to eligibility for registration, establishment of production credentials or payment of fees; or
(b) has violated section sixteen or section seventeen of The Livestock Pedigree Act; or
(c) has violated any provision of the Animal Contagious Diseases Act or the regulations thereunder relating to the identification, marking or testing of pure-bred dogs; or
(d) is under suspension or expulsion by The Canadian Kennel Club; or
(e) has been deprived of the privileges of this Club as provided in Article XV; or
(f) is engaged in the breeding, buying or selling of dogs which are not pure-bred.

Article XII, ELECTIONS, be amended as follows:

Section 1. (1) The President, Vice-President, Second Vice-President and all other Directors shall be elected biennially all in the manner hereinafter provided.

(2) The President, Vice-President, and Second Vice-President shall be elected on the vote of the ordinary members at large and other Directors shall be elected by each electoral zone.

(3) "Election year" shall be a year ending with an odd digit, i.e. 1963, 1965, 1967, 1969, 1971, etc.

(4) For the purposes of an election, only those ordinary members entitled to vote and in good standing as of June 30th in the election year (with the exception of any person in receipt of salary, wages, commission, bonus or any other form of emolument from the Club; reimbursement of travelling and other expenses incurred by elected officials or other authorized persons on the business of the Club excepted), shall be eligible to move or second a nomination, be nominated, vote, stand for election and/or be elected as an Officer or other Director.
Section 3. Insert the word "election" before the word "year".

Section 5. Insert the words "in the election year" immediately after the words "the first day of November".
Section 7. Insert the words "in the election year" immediately after the words "November 15th."
Section 9. Insert the words "in the election year" immediately after the words "November 20th".
Section 13. Insert the words "in each election year" immediately after the word "possible".
Section 17. Is amended to read as follows: "The Officers and other Directors elected in each biennial election shall take office on January 1st immediately following their election."

NOTICE

SUBJECT: Proposed Amendment to By-laws of The Canadian Kennel Club

Notice is hereby given that the proposed amendment to the Club's By-laws as outlined hereunder was submitted for the approval of the Minister of Agriculture for Canada but such amendment did not receive Ministerial approval and is therefore not effective.

Article XXVIII, RULES OF ELIGIBILITY, be amended by the addition of a new Section reading as follows:

"4. Notwithstanding any other provisions of these By-laws, a dog shall not be eligible for registration in the Club's records and registration will be denied, or cancelled, if dog has or is found to have hip displasia, cryptorchidism, or monorchidism, authenticated by certificates from two veterinarians legally licensed to practice veterinary medicine in Canada.

Where, contrary to this By-law, a dog is registered individually in the Club's records, the Board shall have the power to order the cancellation of the registration of said dog and to recall its certificate of registration. It shall also have the power to cancel the registration of and recall certificates of registration issued for any dogs descended from any dog whose registration has been cancelled pursuant to this By-law if, in the opinion of a competent authority (viz. the Ontario Veterinary College) this condition is declared to be an hereditary characteristic."

NOTICE

SUBJECT: Proposed New Rules for Tracking Tests

It has been proposed that The Canadian Kennel Club publish a separate booklet setting forth its rules, this publication to follow the possible adoption by The Canadian Kennel Club of suggested alterations in the present tracking test and provision for a new type of tracking test.

On the following six pages there are published proposed new rules for tracking tests and all persons and clubs having an interest in tracking tests are invited to submit their comments with regard to the material which follows on the next six pages. All such comments must reach the Secretary of The Canadian Kennel Club, 1173 Bay Street, Toronto 5, Ontario, not later than August 5th. It is requested that comments on any parts of the material which follows should be identified by chapter, section and subsection number wherever possible.

Tracking Tests

Chapter 1

SECTION 1 — INTERPRETATIONS

SUBSECTION 1. The word "dog" whenever used in these regulations, includes both sexes.

SUBSECTION 2. "Board of Directors" means the Board of Directors of the Canadian Kennel Club.

SUBSECTION 3. "Club", except as otherwise indicated, means a club, organization or association formed for the purpose of promoting pure-bred dogs of all breeds. A specialty club may apply for permission to hold a Tracking Test, but must permit pure-bred dogs of all breeds to enter such tests.

SUBSECTION 4. "Competitor" means the owner, agent or handler.

SUBSECTION 5. "Test", when referred to in these regulations means Tracking Test as further outlined and detailed under Chapter 2 of these rules and regulations.

SECTION 2 — TEST DATES

SUBSECTION 1. A club may make application for permission to hold a Tracking Test on a date or dates which shall be clearly specified in the application. The application must be made on forms made available by the Canadian Kennel Club, and such application must reach the Canadian Kennel Club at least one month prior to the date of the proposed Test. A fee of ten dollars ($10.00) must accompany the application. Only a club whose president or secretary or tracking test superintendent is a member in good standing with the Canadian Kennel Club may make application for a Test date or dates. The number of tests granted to one Club for one day, or in any one year shall be left to the discretion of the C.K.C. Board.

SUBSECTION 2. Approval of an application for permission to hold a Tracking Test, if given, shall be subject to the subsequent approval of the prize list, schedule, and selected judges. Approval of any application may be withheld by the Board of Directors.

SUBSECTION 3. The Board of Directors shall have power to grant or withhold dates and if the Board shall disapprove of an application for dates the fee of ten dollars ($10.00) will be returned to the Club or association whose application has not been granted.

SUBSECTION 4. In the event of the test not being held or failure of the test-giving Club or Association to comply with the requirements of the rules as set forth herein, the Board of Directors may declare the date fee forfeited and shall cancel the date or dates granted to the show-giving club. In the event such action is taken, the test-giving club shall have no claim against The Canadian Kennel Club.

SUBSECTION 5. A test-giving club must not advertise or publish the date of any test which it proposes holding until that date has been approved by The Canadian Kennel Club.

SUBSECTION 6. The same dates or any part of them shall not be granted to more than one club if in the opinion of the Board of Directors such test is likely to clash with any test to be held on the same date or dates and in the same vicinity.

SUBSECTION 7. Approval of dates shall be subject to the subsequent endorsement of the premium list and the list of selected judges. In the event a premium list is not approved, the date as granted is automatically revoked and the date fee automatically forfeited.

SECTION 3 — OFFICIALS AND DUTIES

SUBSECTION 1. Only those persons in good standing with the Canadian Kennel Club may act in any official capacity at a Tracking Test.

SUBSECTION 2. Any club holding a Tracking Test shall appoint a Tracking Test Committee and a Tracking Test Superintendent.

SUBSECTION 3. The decisions of the Tracking Test Superintendent shall be conclusive in all matters arising at the Test and shall bind all parties, subject, however, to the rules of the Canadian Kennel Club.

SUBSECTION 4. Any person or persons acting in any official capacity, paid or unpaid, including that of judge, secretary, superintendent, steward, clerk of a test or as an officer or member of a test committee of any club holding a test in the Dominion of Canada under any rules other than those of The Canadian Kennel Club shall be subject to disciplinary action at the discretion of The Board of Directors of The Canadian Kennel Club.

SUBSECTION 5. The duties and powers of all test officials shall be such as are prescribed by the Board of Directors.

SUBSECTION 6. Test committees and superintendents of tests held under these rules shall be held responsible for the enforcement of all rules and regulations related to tests and must be supplied with a complete copy of The Canadian Kennel Club rules and regulations for reference.

SUBSECTION 7. The Board of Directors of the Canadian Kennel Club shall appoint a special Tracking Test Committee, composed of not more than five (5) members, one of whom shall be appointed as Chairman. The duties of this committee shall be as laid down by the Board of Directors and shall include the formulating and suggesting of matters of policy pertaining to all phases of the organization and operation of Tracking Tests, and the supervision of "Procedure Relating to the Processing of Application to Establish Eligibility to Judge Tracking Tests" as approved by the Board of Directors.

SECTION 4 — PARTICIPATION

SUBSECTION 1. The participation in any manner, shape or form and in any capacity at a competitive event held under these Rules shall be considered a privilege accorded any person by the Club, and such privilege may be extended and withdrawn by the Board of Directors.

SUBSECTION 2. Any person availing himself of the privilege of participating in any manner, shape or form and in any capacity, including that of a spectator, at a competitive event held under these Rules shall, by such participation be deemed to have agreed to the authority of the Club and its Board of Directors.

SUBSECTION 3. No person who has been expelled from the Club, is suspended by the Club, is deprived of the privileges of the Club, or is debarred by the Club, may compete, exhibit, judge, act as an agent or handler for any competitor, or take a dog into any competition, or be connected in any capacity with competitive events held under the rules of the Club.

SUBSECTION 4. In this Section the following interpretations shall apply:

(a) "person" shall include member, person, partnership, club, association, company, or corporation;
(b) the definitions of "expulsion", "suspension", "deprivation of privileges" and "debarment", as set forth in section 10 of Article XV of the By-laws of the Club shall apply in connection with the words "expelled", "suspended", "deprived of the privileges", and "debarred";
(c) "the Club" means The Canadian Kennel Club.

SUBSECTION 5. In cases where the tracking test is to take place in a fenced area and it is intended to have restricted admittance, the committee of the test-giving club shall provide free passes, one pass per dog entered.

SECTION 5 — JUDGES

SUBSECTION 1. After a club has been granted permission by the Canadian Kennel Club to hold a Tracking Test, it must send to the Canadian Kennel Club at least one month before the Test, for the approval of the Board of Directors, the names and addresses of the judges which it has selected to judge the Tracking Test. If the said Board of Directors approves, the Secretary of the Canadian Kennel Club will inform the club that the list of proposed judges has been approved.

SUBSECTION 2. Should the Board of Directors not approve of either or both judges, the club shall be advised and given the name or names of persons that the Board of Directors would approve to judge this Test.

SUBSECTION 3. The Board of Directors may prescribe such regulations and/or enquiries as it deems advisable in order to determine and/or test the qualifications of a person applying for approval to judge Tracking Tests and any person already approved to judge Tracking Tests

under these Regulations and Standards.

Approval to judge Tracking Tests shall be withheld on an already approved judge in the event that one or more members of the special Tracking Test Committee, within a period of two (2) years reports infractions of these Tracking Test Rules by the said judge when judging at a Tracking Test held under these Rules. On receipt by the Secretary of the Canadian Kennel Club of the second of these two (2) reports recording infractions of these Rules by the said judge, the Secretary shall notify said judge that he is no longer eligible for approval to judge Tracking Tests held under these Rules until such time as he requalifies for approval to judge Tracking Tests. Requalification to judge shall require that said person must submit an application for approval to judge, pass the examinations, and serve as an apprentice. On being notified by the Secretary to this effect, such judge may submit an appeal to the Board of Directors of the Canadian Kennel Club, by registered mail, within thirty (30) days of the Secretary's notification. In the event such appeal is sustained by the Board of Directors, said person need not requalify in order to be eligible to gain approval to judge Tracking Tests.

SUBSECTION 4. There must be two (2) judges officiating at Tracking Tests, one of which may be designated as "junior judge". A junior judge is a person who has made application for approval to judge Tracking Tests and has successfully passed the written and oral examinations as required and has served as an apprentice at one (1) Test and been reported upon favorably by the officiating judges. When a junior judge is employed as the second judge at a Tracking Test, the senior judge is required to submit to the Canadian Kennel Club a report on the ability of the junior judge.

SUBSECTION 5. If an advertised judge is prevented from fulfilling his engagement for either the whole or part of the Test, the Tracking Test Superintendent shall appoint any person he or she considers capable to act in the capacity of "junior judge" for the whole or part of this Test.

SUBSECTION 6. Judges are instructed to withhold prizes and awards if dogs competing do not show sufficient merit to warrant a prize or award. A judge's decision shall be final in all cases affecting the merits of the dogs.

SUBSECTION 7. A judge's decision as marked on the tracking test charts cannot be changed by him after the closing of the tracking tests.

SUBSECTION 8. No person may approach a judge to favor his or her entries either directly or indirectly, orally or in writing, and disciplinary action will be taken against any person who violates this rule, or against any judge who fails to report to the CKC within two weeks of the act, any contravention of this rule.

SUBSECTION 9. A judge officiating at a test held under these Rules shall not be subjected to indignities of any kind during the progress of the test, and it shall be the duty and obligation of the club holding the test to see that this Rule is effectively carried out. The Test Superintendent shall promptly report to The Canadian Kennel Club any infringement of this Rule, and the Board of Directors shall have the power to take such action as it deems fit on receipt of a report indicating that this Rule has been violated. A copy of this Rule shall be prominently placed in every premium list and catalogue.

SUBSECTION 10. A judge officiating at a tracking test must report to the secretary or the sponsoring club's agent on the grounds, at the advertised hour he is to judge.

SUBSECTION 11. All judges are expected to co-operate in every way possible with any apprentice judges approved to attend the tracking test by the CKC in an apprentice's capacity.

SUBSECTION 12. No more than two (2) apprentice judges shall be permitted to apprentice at any one Tracking Test.

SUBSECTION 13. The Board of Directors may at their discretion limit the number of tests any one judge may judge in any one specified district in any specified period of time.

SECTION 6 — TESTS

SUBSECTION 1. There shall be two (2) separate and distinct Tracking Tests and degrees. These Tests must be competed for in numerical order.

SUBSECTION 2. Tracking Tests shall be known as:

(a) Tracking Test No. 1 and the degree known as Tracking Dog (TD).
(b) Tracking Test No. 2 and the degree known as Tracking Dog Excellent (TDX).

SECTION 7 — ENTRIES

SUBSECTION 1. Only dogs eligible for or already registered in the Stud Book of the Canadian Kennel Club may be entered in and compete in Tracking Tests held under these Regulations and Standards.

SUBSECTION 2. The entry form for a dog entered at a Tracking Test must disclose the name of the dog entered, the name and address of its owner, name of breeder, date and place of birth, names of sire and dam, and Test entered. The entry of a dog shall be accompanied by a recording fee of fifty cents (50c) and all recording fees shall be remitted by the club holding the Tracking Test to the Canadian Kennel Club within ten days after the Test.

The Board shall have the power to advise a person entering a dog at a tracking test held under the Club's regulations and standards that he may no longer include in the name of a dog any name which, in the opinion of the Board, infringes on the rights of any person, partnership or company whose kennel name has been registered by the Club, or where, in the opinion of the Board, such name is considered to be similar to a kennel name registered with any other national kennel club with whom the Club has working arrangements with regard to mutual protection of registered kennel names.

If, where a person has been advised that he may no longer include a particular name in the name of a dog and said person continues to enter a dog at tracking tests held under the Club's rules with such name included, then the Board shall have the power to cancel all awards, scores, and prizes earned by said dog at tracking tests held after the original advice was communicated to the owner of said dog.

SUBSECTION 3. If a dog is not registered individually in the Canadian Kennel Club Stud Book, it may be entered at a Tracking Test, held under these Regulations, as a "listed" dog, provided:

(a) if born in Canada, that the litter of which it is a part or the whole has actually been registered in accordance with the provisions of Article XXIX of the Club's By-Laws;

(b) if not born in Canada, that it is eligible for individual registration in accordance with the provisions of Article XXVIII of the Club's By-Laws.

The entry of a "listed" dog at a Tracking Test held under these Regulations (sanctioned tracking matches excluded) must be accompanied by a listing fee of $1.00, and all listing fees must be remitted, by the club or association holding the Test, to the Canadian Kennel Club within ten days after the Test.

The Canadian Kennel Club shall have the right, at any time, to require the owner of a "listed" dog to submit proof of the dog's eligibility for registration in the Club's Stud Book, and if the Board of Directors is satisfied that the dog is not eligible for registration in the Club's Stud Book, it shall have the right to order the cancellation of all awards and prizes earned by the dog at Tests held under these Regulations. By failing to comply with the Board's order to return ribbons and/or prizes to the clubs or associations concerned, the owner of the dog automatically renders himself ineligible to enter any dog in any competition approved by the Club.

SUBSECTION 4. No dog belonging wholly or in part to any judge or to any member of the immediate family or household of any judge shall be entered or exhibited in any Tracking Test at which such person is a judge.

SUBSECTION 5. No entry shall be made at any Tracking Test under a judge of any dog which the judge, or any member of his immediate family, or household, has owned, sold, held under lease, boarded, exhibited, trained or instructed regularly, within six months prior to the date of the Test. This includes judges who train professionally or as amateurs, and applies equally to judges who train individual dogs and those who train dogs in classes with or through their handlers.

SUBSECTION 6. Every dog must be the bona-fide property of the person making such entry on day of closing of entries, and must not be less than six months old.

SUBSECTION 7. Any club or association holding a Tracking Test may decline to accept entries for just cause, and no one shall have any claim or recourse against the club or association holding the Test, or any official

connected therewith, but said club must file its reason for so doing with the Canadian Kennel Club within ten days of the date upon which the Test was held.

SUBSECTION 8. No dog may be entered at a Tracking Test held under these Regulations and Standards if it has distemper or other communicable disease, or has had distemper or other communicable disease unless it has been fully recovered for thirty days, or is known to have been in contact with distemper or other communicable disease within thirty days of the Test, or has been kenneled on premises on which there has existed within thirty days of the Test, distemper or other communicable disease, or has been inoculated with distemper virus not less than thirty days previous, or is known to have been in contact with an animal which has been inoculated with distemper virus, such contact to have taken place within the period of thirty days before the Test. Any infraction of any part of this subsection shall subject any competitor to disciplinary action by the Board of Directors.

SUBSECTION 9. Any dog entered and received at a Tracking Test must compete in the Test in which it is entered, unless expelled by the Judge or excused by an official Veterinarian. The excuse by the Veterinarian must be in writing and attached to the Test report sent to the Canadian Kennel Club by the Test Superintendent. If a dog is expelled by a judge, the reason shall be stated by the judge on said dog's tracking chart.

SUBSECTION 10. The decision as to the permitting of bitches in season to compete in a Tracking Test shall be left to the discretion of the Tracking Test Superintendent and the officiating judges, having due regard for the actual operation on the Tracking Test and whether the tracks are so situated that there would be no interference to the competing dogs. Also, whether it would be feasible to leave bitches in season to the end of the Test, having permitted them to be late arriving at the Test area and kept separate from all other dogs competing.

SUBSECTION 11. Unless otherwise advertised all entries must be in and entries closed not less than 1 hour before the tests are scheduled to commence.

SUBSECTION 12. No entry shall be received from any person who is not in good standing with The Canadian Kennel Club on the day of the closing of entries nor may an entry be accepted from any person who has failed to pay any fine levied under these Rules. A list of persons not in good standing with The Canadian Kennel Club or who has failed to pay any fine levied under these Rules, shall be supplied to each test-giving club by the Secretary of The Canadian Kennel Club.

SUBSECTION 13. If clerical errors or omissions be made in entering a dog at a test such as the incorrect name of the dog, the registration number of the dog, the name of the breeder, place of birth, or the sire or dam of the dog, or of its date of birth, the exhibitor shall be advised of his or her mistake, and if he or she shall again offend after being so advised, a fine of one dollar ($1.00) shall be imposed for each such offence. Failure to pay any fine levied by The Canadian Kennel Club shall automatically debar said person from entering or exhibiting dogs at subsequent tests held under these rules until the fine has been paid to The Canadian Kennel Club. Owners are responsible for errors in making out entry forms whoever may make such errors.

SUBSECTION 14. If the name of a dog which has been listed with the Canadian Kennel Club and which shall have won a prize at any test subsequenfly shall be changed, the former name as well as the new name shall be given on the entry form for any subsequent tests and shall be published in the catalogue of such subsequent tests until such time as said dog shall have been awarded a prize on one of the regular official classes of The Canadian Kennel Club under its new name whereupon its former name may be dropped.

SUBSECTION 15. No entry may be made under a kennel name unless the kennel name has been registered with The Canadian Kennel Club. All entries made under a kennel name must be signed by the kennel name followed by the word "registered". An "exhibitor" or "entrant" is the individual, or if a partnership, all the members of the partnership exhibiting or entering in a dog show.

SUBSECTION 16. The show giving club shall immediately upon receipt of entries notify by mail the person making the entries that such entries have been received—accepted or rejected. If not accepted the fee shall be returned with the reason for non-acceptance.

SECTION 8 — VETERINARY INSPECTION

SUBSECTION 1. Every tracking test shall have one or more qualified veterinarians, one of whom must be on hand before the tests begin, and within easy call during the entire progress of the tests. Every dog must be examined by the veterinarian before it is admitted to the trial testing grounds. The exhibitor shall be subject to disciplinary action if his dog enters the area of the tests without veterinary inspection.

Where, in the opinion of the official veterinarian inspecting dogs, a dog has distemper, other communicable disease, or any condition which is considered, by him, to be prejudicial to the health of other dogs, he shall reject the entry and report such rejection to the test superintendent. The person presenting the dog, when advised by the official veterinarian that the dog has been rejected, shall at once remove the dog from the test premises or grounds. No claim may be made against the official veterinarian, the club giving the test, or any club official, for such rejection, nor may entry fees be refunded.

SUBSECTION 2. No person (other than veterinarians in attendance) may participate in any capacity at a test, if, within thirty days prior to the test, they have been exposed to any dogs suffering from any contagious disease.

SUBSECTION 3. The veterinarian shall sign every identification card after examining the dog or dogs covered by the identification card. Veterinarians also shall be furnished with a handy receptacle containing a proper disinfectant for use after handling each dog.

A veterinarian who desires a dog's mouth to be opened shall request the owner or person in charge to open it.

SECTION 9 — BENCHING

There will be no provision for benching at any tracking test.

SECTION 10 — TRACKING TEST GROUNDS

Tracking test grounds will be determined by Tracking Test Committee, with individual testing areas being set aside for each dog entered.

SECTION 11 — PRIZES

SUBSECTION 1. Before a club holding a Track Test distributes information as to the classes in which entries may be made or the list of prizes to be offered, it must send to The Canadian Kennel Club for approval the list of prizes to be offered and the list of classes for which entries are to be accepted. Only when one copy has been approved by The Canadian Kennel Club may such information be distributed. Such information must also indicate the date on which and the place at which the tracking test is to be held, and include names of judges approved by the Board of Directors.

SUBSECTION 2. Prizes and trophies at a Tracking Test must be offered to be won outright and to be awarded automatically to dogs competing at the test.

SUBSECTION 3. All special prizes which may be offered shall be accurately described. If money prizes are offered a fixed amount for each prize shall be stated. All prize money must be paid and awarded to the person working the dog.

SUBSECTION 4. The person handling the dog in the test shall be recognized as the agent or the owner of the dog, and delivery of any prize won, to the handler of the winning dog shall constitute full delivery of the prize to the rightful owner except if the prize given does not correspond to the prize offered in the premium list.

SECTION 12 — PROGRAMME OF JUDGING

SUBSECTION 1. A club or association holding a tracking test must prepare, after the entries have closed and not before, a program showing the time scheduled for the judging of the various tests.

If indications point to a probable entry in any or all tests in excess of the club's facilities, it may limit entries in any or all classes by prominent announcement on the title cover page of its premium list that entries will close automatically when a certain limit, determined as above, for each class, even if the official closing date for entries has not arrived.

SECTION 13 — RIBBONS

SUBSECTION 1. A ribbon shall be provided only for a dog which "Passed" at a tracking test held under these Rules. Each ribbon must identify the club holding the test, its color must be blue, it must carry the crest of the CKC and it must bear the word "Passed".

SUBSECTION 2. Test-giving clubs shall be held responsible for the providing of the required ribbons for all awards. Failure to do so shall subject all officials of the

offending club to disciplinary action by the Board of Directors.

SECTION 14 – TITLES AND CERTIFICATES

SUBSECTION 1. The Canadian Kennel Club will permit the use of the title "Tracking Dog" (TD) to be used in connection with each dog which shall be certified by two judges to have passed Tracking Test No. 1, provided said dog is registered individually in the records of the Canadian Kennel Club. The owner, who must be recorded as owner in the records of the Canadian Kennel Club, shall be entitled to a certificate issued by the Canadian Kennel Club certifying that the title has been won at a licensed Tracking Test held under the Club's rules.

SUBSECTION 2. The Canadian Kennel Club will permit the use of the title "Tracking Dog Excellent" (T.D.X.) to be used in connection with each dog having already been certified as Tracking Dog and which has been certified by two judges to have passed Tracking Test No. 2, provided the owner is recorded as the owner in the records of the Canadian Kennel Club, and the owner shall be entitled to a certificate issued by the Canadian Kennel Club certifying that the title has been won at a licnsed Tracking Test held under the Club's rules.

SUBSECTION 3. Dogs having gained degrees both in obedience trial competition and tracking tests shall be entitled to show the gained tracking degree after their obedience degree. In the case of a dog having gained its Utility degree and a tracking degree, this dog may be shown as U.D.T. or U.D.T.X. respectively.

SECTION 15 – EQUIPMENT, FACILITIES, ETC.

SUBSECTION 1. Except where otherwise prescribed in these tracking test regulations, all equipment required for the proper conduct of a tracking test under these regulations and standards shall be provided by the Club holding the test. The club shall also be responsible for adequate location and area for the tracks.

SUBSECTION 2. Any club or association holding a Test must provide standard arm bands with easily distinguishable number, and shall see that every person exhibiting a dog wears, when in the test, an arm band containing thereon the catalogue number of the dog being exhibited; but no badges, coats with kennel names thereon or ribbon prizes shall be worn or displayed.

SUBSECTION 3. Adequate sanitary facilities must be provided for the exhibitors. If outdoors, not more than 100 yards from the venue of the test.

SUBSECTION 4. The test-giving club must take adequate steps to ensure orderliness and cleanliness during the test. Exhibitors must co-operate and the test-giving club is asked to report those who fail to do so.

SUBSECTION 5. A test-giving club must have available, through their test committee one complete copy of The Tracking Test Rules of The Canadian Kennel Club.

SUBSECTION 6. The tracking test club shall be responsible to see that all necessary judging charts are on hand at the time of the tests to fill required needs.

SUBSECTION 7. A T. T. giving club will be held responsible during the test for the conduct of exhibitors and spectators. Any person acting in an objectionable manner must be removed from the grounds on complaint to the Superintendent.

SECTION 16 – PROTESTS

SUBSECTION 1. A protest against a dog, its owner or handler may be made by any owner or handler of a dog entered and competing at a Tracking Test, or member of the club holding the Tracking Test. It must be in writing and be lodged with the Secretary of the club holding the Tracking Test within seven (7) days of the Test unless the same be made direct to the Canadian Kennel Club. No protest will be entertained unless accompanied by a deposit of five dollars ($5.00), which will be returned if the protest is sustained. This does not apply to protests by the Canadian Kennel Club.

SUBSECTION 2. An appeal to the Canadian Kennel Club from a decision of the club holding the Tracking Test where a dog has been protested may be taken and forwarded to the Canadian Kennel Club within seven (7) days of the date on which the decision of the club was received by the protestant with a deposit of ten dollars ($10.00). If the decision be sustained the deposit shall be forfeited, but if reversed, the deposit shall be returned.

SECTION 17 – DISCIPLINE

SUBSECTION 1. The Board of Directors may take disciplinary action against any club, person, company or partnership, or member of the Canadian Kennel Club for any act of omission or commission which violates any section, sections or subsections of the Tracking Test Regulations and/or Standards, such action to be taken as provided for in the By-Laws of the Canadian Kennel Club.

SUBSECTION 2. Any member, person, partnership, company or organization availing themselves of the privilege of participating in any manner, shape or form at a Tracking Test, shall by such participation be deemed to have agreed to the authority of the Canadian Kennel Club and its Board of Directors as conferred on the Club by its By-Laws and all other rules and regulations adopted by the Canadian Kennel Club.

SUBSECTION 3. For any act of omission or commission which violates any of the Tracking Test Regulations and/or Standards, the Board of Directors may impose such penalty or penalties as it deems fit.

SUBSECTION 4. The administration in any form of a drug or any substance whose action alters the nervous system by stimulation, sedation or tranquilization to a dog competing at a Tracking Test shall be considered as misleading the judge and will be considered misconduct in the opinion of the Board of Directors. The person or persons responsible will be subject to disciplinary action in accordance with this Section.

SECTION 18 – END OF THE TRACKING TEST

SUBSECTION 1. The Secretary or Tracking Test Secretary of the club holding a Tracking Test under these Regulations and Standards shall, within ten days after the last day of the Test(s), send the following to the Canadian Kennel Club:

(a) a catalogue marked with the grade attained by each dog and also all absentees;
(b) an unmarked catalogue;
(c) all entry forms;
(d) all judge's charts;
(e) the list, provided by the Canadian Kennel Club, of persons ineligible to participate in the Test;
(f) any other information or reports as may be required by the Canadian Kennel Club.

Where a Test-giving club does not publish a catalogue, substitute a list of every dog entered in the Test, which list shall include the following information: name of breed, name of dog, C.K.C. registration number (if any), date of birth, name of breeder, name of sire, name of dam, name and full address of owner.

SUBSECTION 2. The Canadian Kennel Club may require a test-giving club to provide a report of any matter or matters connected with its Tracking Test. This must be made within two weeks of the date on which the club received request for such report.

SUBSECTION 3. The test-giving club is responsible for the collection of all recording fees and listing fees, and all such fees shall be remitted to the Canadian Kennel Club within ten days after the closing of the Test.

SECTION 19 – NO LIABILITY

SUBSECTION 1. The Canadian Kennel Club shall not be responsible to any person, partnership, club or corporation for any loss or damage arising at or by reason of any tracking test held under any rules adopted by the Canadian Kennel Club.

SUBSECTION 2. The participation in any manner, shape or form and in any capacity at a tracking test held under these Rules shall be considered a privilege accorded any member, person, partnership or company by The Canadian Kennel Club, and such privileges may be extended to, and withdrawn from any person, member, partnership or company by the Board of Directors of The Canadian Kennel Club.

SUBSECTION 3. Any member, person, partnership, or company or organization availing themselves of the privileges of participating in any capacity, manner, shape or form at a test held under these Rules, shall, by such participation, be deemed to have agreed to the authority of The Canadian Kennel Club and its Board of Directors as conferred on the Club by its Constitution and Rules and By-laws and all other Rules and Regulations adopted by The Canadian Kennel Club.

SUBSECTION 4. No person under suspension or sentence of disqualification or expulsion with The Canadian Kennel Club, The American Kennel Club, or The Kennel Club (England) or any Kennel Club whose Stud Book is recognized by The Canadian Kennel Club, may exhibit, judge, act as agent or handler for any exhibitor, or take

a dog into the ring at any test, or be connected in any capacity with tests held under these Rules.

SECTION 20 – PREMIUM LISTS AND ENTRY FORMS

SUBSECTION 1. A standard premium list as authorized by the Board of Directors, must be published by all clubs holding tests under these Rules. A club or association which has been granted permission to hold a tracking test and has obtained the necessary approval, money prizes, special prizes, judges' list, superintendent, show secretary, and veterinarians, and has notified each judge as previously provided for, must next cause standard premium lists and entry forms as authorized by the Board of Directors, to be printed and sent to prospective exhibitors.

SUBSECTION 2. Before a premium list is distributed, two copies of the entire premium list (except advertising) must be sent to The Canadian Kennel Club for approval. The Secretary of The Canadian Kennel Club will return one of said copies stating that the same has been approved or with any necessary alterations that must be made. This endorsement or approval must appear at the head of the classification in the premium list, and no change other than those ordered by The Canadian Kennel Club, can be made after such official endorsement has been given without the written consent of The Canadian Kennel Club.

SUBSECTION 3. Premium lists and entry forms shall be of such size, in such form and contain such information as prescribed by the Canadian Kennel Club.

SUBSECTION 4. Two copies of the premium list and entry form, when printed, must be sent to The Canadian Kennel Club at the time of distribution to prospective exhibitors.

SUBSECTION 5. No specials may be accepted or offered by any show-giving club unless they have been published in the premium list of the test, nor may any be withdrawn or the conditions thereof changed after they have been published in the premium list.

SUBSECTION 6. Every premium list shall specify the date on which the entries for a test shall close.

SECTION 21 – THE CATALOGUE

SUBSECTION 1. Every club holding a Tracking Test must provide a standard catalogue which shall be in such form, of such size, and contain such information as may be ordered by the Board of Directors.

SUBSECTION 2. Every catalogue must state on its cover: "This test is held under The Canadian Kennel Club rules".

SUBSECTION 3. The time must be stated in catalogue when the judging will commence.

SECTION 22 – CANCELLATIONS

SUBSECTION 1. If a dog has been entered in a class for which it is ineligible, any awards received in that class shall be cancelled. If a dog is shown in the name of a person who is not recorded as the owner of the dog, all wins made by the dog when shown in the name of a person in whose name a dog is not recorded in the records of The Canadian Kennel Club shall be cancelled. Where any violation of any Tracking Test Rule has taken place in the opinion of the Board of Directors, the Board of Directors shall have the power to declare cancelled all awards earned by the dog at the test in connection with which such violation occurs. Where any protest is sustained by a test-giving club and/or the Board of Directors, the Board of Directors shall have the power to order cancelled any wins earned by the dog or dogs concerned with such protest. The cancellation of all wins and awards shall automatically include cancellation of all prizes received in connection with such awards.

SUBSECTION 2. If the win of a dog shall be cancelled by The Canadian Kennel Club the exhibitor or entrant of the dog shall return all money or special prizes which have been received for its win to the Secretary of the test-giving club within twenty-one (21) days of the receipt of notice from The Canadian Kennel Club of said cancellation. The test-giving club shall in each instance of failure to comply with this rule notify The Canadian Kennel Club and The Canadian Kennel Club upon receipt of notice shall forthwith suspend the exhibitor so in default from all privileges of The Canadian Kennel Club and notify the exhibitor so in default that it has done so and said suspension shall continue until The Canadian Kennel Club is notified that restitution has been made.

SUBSECTION 3. The disqualification of an owner shall apply to all dogs owned by him or her connected with the perpetration of a fraudulent act. The Board of Directors are, however, empowered to use such discretion in the enforcement of this penalty as shall protect innocent parties.

SECTION 23 – AMENDMENTS

SUBSECTION 1. These Regulations and Standards for the conduct and operation of Tracking Tests are subject to amendment as provided in Article XXXVIII of the By-Laws of the Canadian Kennel Club.

Chapter 2
TRACKING TEST #1

The requirements, the Test and the Conduct of the Test:

With each entry form of a dog which has not passed a Tracking Test, there must be filed a written statement by a person who is accredited by the Canadian Kennel Club to judge a Tracking Test, or by a person specifically approved by the Canadian Kennel Club, that the dog is considered by him to be ready for such a Test. Signed statements to that effect shall be valid for twelve months. It is permissible for one of the two judges approved to judge a Tracking Test, to test and issue (at least the day previous to the Tracking Test) certificates for dogs scheduled to be entered in the Test. A certificate to enable entry of a dog in a Tracking Test need not be issued in the same area as the Tracking Test is being held. A certificate may be issued by any qualified tracking test judge whether in the United States or Canada. Length of certification track is not a factor in the issuance of certification to enter a licensed tracking test; rather, the dog's willingness to work and evident knowledge of what he is to do are the important prerequisites to the issuance of such a certificate.

Handlers, trainers and kennel employees may compete. A competitor may enter more than one dog. The holding of titles, other than T.D.X., including T.D. shall not bar a dog from competition in this test. This test cannot be given indoors nor at a dog show. The duration of this test may be one day or more, within a fifteen-day period from the original date in the event of an unusually large entry, or other unforeseen emergency, provided that the change in date is satisfactory to the competitors affected.

This Test must be performed with the dog on leash, the length of the track to be not less than 440 yards nor more than 500 yards, the scent to be not less than one-half hour nor more than two hours old at the time of the dog commencing the track, and to be that of a stranger who will leave a leather glove, wallet, or any leather article satisfactory to the judges, at the end of the track. The tracklayer will follow the track (which has been staked out with flags a day or more earlier) collecting all the flags on the way with the exception of one flag at the start of the track, and one flag 30 yards from the start of the track to indicate the initial direction of the track; then drop the article at the end of the track, proceeding straight ahead for at least 50 feet and leave the course. The glove, wallet or other article is to be located by the dog. The dog shall work at the full length of the leash which may not be less than 10 feet in length, with no help from the handler, the judges or any other person. A dog may, at the handler's option, be given one and only one second chance to take the scent between the flags at the start, provided he (the dog) has not passed the second flag. The handler may encourage the dog or correct him verbally but any leading or guiding by the leash shall not be permitted.

Comments, the Operation, and Requirements for the Judges:

For obvious reasons these tests cannot be held at a dog show, and a judge, though he may be qualified to judge obedience trials is not necessarily capable of judging Tracking Tests. NO judge shall accept an appointment to judge any tracking test unless he is familiar with the various conditions that may exist when a dog is required to do nose work. (The only exception to the foregoing is as stated in Chapter 1, Section 5, Subsection 5 of these Regulations and Standards.) Scent conditions, weather, lay of the land, etc., must be taken into consideration, and a thorough knowledge of this work is necessary. One or both of the judges must personally lay out, or walk over each track after it has been laid out, a day or so before the Test, so as to be completely familiar with the location of the track, landmarks and ground conditions. At least two of the major turns shall be well out in the open country where there

are no fences or other boundaries to guide the dog. No major part of any track shall follow along any fence or boundary within 10 yards of such boundary. The track shall include at least two turns, each approximately a right angle. No conflicting tracks shall be laid. No track shall cross any body of water. The judges shall make sure that the track is no less than 440 yards and that the tracklayer is a stranger to the dog in each case. There is no time limit, provided the dog is working, but a dog that is off track and is clearly not working should not be given any minimum time just on the chance that it might pick up the track again. The handler may not be given any assistance by the judges or anyone else. In case of unforeseen circumstances, the judges may, in rare cases, at their own discretion, give a handler and his dog a second chance on a new track. A dog that is working too fast for the conditions may be restrained gently by the handler at the end of the leash, but any leading or guiding of the dog constitutes grounds for calling the dog and the handler off and marking the dog "failed". A track for each dog entered shall be plotted on the ground not less than one day before the test, the track being marked by flags which the tracklayer can follow readily on the day of the test. A chart of each track shall be made up in duplicate, showing the approximate length in yards of each leg, major landmarks and boundaries, if any. Two of these charts shall be marked, one by each judge at the time the dog is tracking, so as to show the approximate course followed by the dog. Upon completion of the meet, the judges shall forward the marked copies of each chart to the Canadian Kennel Club. The judges shall sign each chart forwarded, and show on each whether the dog "passed" or "failed", the time the tracklayer started, the time the dog started and finished tracking, a brief description of ground, wind, and weather conditions, the wind direction and a note of any steep hills or valleys. If a dog is not tracking, it shall not be marked "passed" even though it may have found the article.

TRACKING TEST #2

The Requirements, the Test and the Conduct of the Test.

This Test is open only to dogs which have won the title T.D., having passed Tracking Test No. 1. No certification as to the dog's readiness is required, as it is assumed that having passed Tracking Test No. 1 the dog's training has been kept up and improved.

Handlers, trainers and kennel employees may compete. A competitor may enter more than one dog. The holding of any other titles, including T.D.X., shall not bar a dog from Competition in this test. This test cannot be given indoors nor at a dog show. The duration of this test may be one day or more, within a fifteen-day period from the original date in the event of an unusually large entry or other unforeseen emergency, provided that the change in date is satisfactory to the competitors affected.

For this test, where possible, separate fields should be used for each track, but if this is not feasible, the largest fields obtainable should be utilized.

The Test must be performed with the dog on leash, the length of the track to be not less than 880 yards (½ mile) nor more than 1000 yards, the scent to be not less than four (4) hours nor more than six (6) hours old at the time that the dog commences the track, which is to be laid by a stranger to each dog competing. The tracklayer, prior to laying the track, will be provided with 3 leather articles (gloves, wallets or other leather articles deemed satisfactory by the officiating judges), which will be dropped along the track; the first article will be dropped within the first 100 yards of the track; the second article will be dropped approximately half way between the commencement of the track and the end of the track; the third article will be dropped at the point indicating "end of track". The tracklayer will follow the track (which has been staked out with flags a day or more earlier) collecting all the flags along the way with the exception of the first flag which will indicate the start of the track, dropping the articles at the designated points, and after dropping the last article to indicate "end of track" shall proceed straight ahead for at least 75 feet and then leave the course.

Not less than one (1) hour nor more than one and one half (1½) hours prior to the dog commencing to work the track, one of the judges shall lay a "cross track" which shall cross the track laid by the tracklayer at an approximate ninety degree angle, this "cross track" to cross the main track within three hundred (300) yards of the commencement flag. The three articles, as dropped, are to be found and picked up by the dog. (The mere finding or indicating the articles is not sufficient, since many dogs while tracking will indicate an object by a quick turn of the head or some slight sign, which, unless the handler is alert and watching the dog very closely may be missed, and therefore the dog must pick up the articles to prove that he associates the scent on each article with the scent he is following.) Should a dog not pick up at least one of the first two articles as well as the last article, he shall be failed, even though he has followed the actual scent left by the tracklayer. The dog shall work at the full length of the leash, which may not be less than ten (10) feet in length, with no help from the handler, the judges or anyone else. The handler may encourage the dog or correct him verbally, but any leading or guiding by the leash shall not be permitted.

Comments, the Operation and Requirements for the Judges:

This Tracking Test is considerably advanced from the requirements for Tracking Test No. 1, in that the dog is required to pick up three (3) different articles to show that he associates the scent on the articles with the scent that he is following, plus the supposed interference caused by the cross track. (The matter of a cross track is often of great concern to handlers, causing much needless worry. This point is proven in cases where the handler knows there is a cross track and is inclined to hesitate on turns for fear the dog may be going on to the cross track, thus imparting some of his uncertainty and nervous tension to the dog. However, the same handler and dog working a track that has a cross track or tracks on it without his knowledge, shows no hesitancy or uncertainty, and when later advised about the cross track is often of the opinion that there was none laid. Practice and confidence in the dog are all that are required.)

One or both Tracking Test Judges must personally lay out or walk over each track after it has been laid out a day or more before the Test, so as to be completely familiar with the location of the track, landmarks and ground conditions. The track shall include at least three turns, each approximating a right angle. No track shall cross any body of water. The judges shall make sure that the track is at least 880 yards and not more than 1000 yards and that the tracklayer is a stranger to each competing dog. There is no time limit, providing the dog is working, but a dog that is clearly off track should not be given any minimum time just on the chance that he may regain the scent. Should a dog enter on to the cross track and follow same for more than 25 yards he shall be called off and marked "failed". In cases of unforeseen circumstances, the judges may, in rare cases, at their own discretion, give a handler and his dog a second chance on a new track. The handler may not be given any assistance from the judges or anyone else. A dog that is working too fast for the conditions, may be restrained gently by the handler at the end of the leash, but any leading or guiding of the dog constitutes grounds for calling the handler and the dog off and marking the dog "failed". The dog must pick up at least one of the first two articles and also the last article or be marked "failed", even though he has followed the correct scent trail left by the tracklayer.

A track for each dog entered shall be plotted on the ground not less than one day before the Test, the track being marked by flags which the tracklayer can follow readily on the day of the Test. A chart of each track shall be made up in duplicate, showing the approximate length in yards of each leg, major landmarks and boundaries if any, and the point of the cross track with approximately 100 feet on each side of the main track in order that should the dog follow the cross track either forward or on a back track, the point where the dog realized it was on a cross track and corrected itself or the point where it was called off may be shown. Two of these charts shall be marked, one by each of the judges at the time the dog is tracking, so as to show the approximate course followed by the dog. Upon completion of the meet, the judges shall forward the marked copies of each chart to the Canadian Kennel Club. The judges shall sign each chart forwarded, and show on each whether the dog "passed" or "failed", the time the tracklayer started, the time the dog started and finished tracking, a brief description of ground, wind, and weather conditions, the wind direction and a note of any steep hills or valleys. If a dog is not tracking it shall not be marked "passed" even though it found and picked up all articles.

VETZYME (SPECIALLY PROCESSED VETERINARY YEAST)

WORLD FAMOUS CONDITIONER & FOOD SUPPLEMENT

(Manufactured by Phillips Yeast Products Ltd., England)

ABSOLUTELY SAFE FOR DOGS OF ALL AGES

- VETZYME ensures an **ABUNDANT** and **BALANCED** supply of the **B COMPLEX VITAMINS** essential for canine health.
- VETZYME also supplies, in easily digestible form, significant amounts of calcium, phosphorus and other minerals necessary for the formation of sound bones and good teeth.
- VETZYME contains over 40% of First Class Body Building Protein, a dietary factor often lacking due to over refinement of food.
- VETZYME is a specially processed natural product, containing no drugs, is absolutely non-toxic, and is completely safe even **WHEN ADMINSTERED IN MASSIVE DOSES.**

Failure to provide an adequate supply of the above indispensable nutrients will manifest itself by such signs as **LISTLESSNESS, UNDUE NERVOUSNESS, LOSS OF APPETITE, POOR AND FALLING COAT, INFLAMMATION OF SKIN, INTERDIGITAL CYSTS, etc.**

The regular administration of VETZYME will greatly assist prevention of such conditions and help to maintain the dog in vigorous health.

FOR QUICK RESULTS — USE VETZYME

ZEMOL

THE "CHLOROPHYLL PLUS" OINTMENT

By the Makers of VETZYME

FOR MINOR WOUNDS, CUTS, SCRATCHES, ABRASIONS (the skilled guidance of a veterinary surgeon should be sought in all cases of major injury), **ECZEMA AND ALLIED SKIN CONDITIONS. ZEMOL** is not "just another ointment" . . . it is something **ENTIRELY NEW**; a healing agent, safe in use and yet of remarkable power, perfected after long research coupled with extensive tests on animal subjects. The formula of **ZEMOL** shows not only the high percentage of active constituents employed, but in addition the presence of the remarkable healing agent **CHLOROPHYLL — IN WATER-SOLUBLE FORM.**

FOR RAPID HEALING AND RELIEF IN ABOVE SKIN CONDITIONS — TRY ZEMOL. SEND FOR POST-FREE BOOKLET "ZEMOL" giving full details of formula, uses and advantages of this **REMARKABLE NEW VETERINARY OINTMENT** with details of "the two-way treatment".

FOR QUICK RESULTS — USE ZEMOL

Prices:—**VETZYME:** trial size (60 tablets) **85c**; 120 tablets **$1.40**; 600 tablets **$5.00**; 2,000 tablets **$12.00**; 5,000 tablets **$22.00.** All tablets 10 grain. Also in powder form.
ZEMOL:—Trial size (1 oz.) **85c**; 4 oz. jar **$2.25.** All prices postage paid.

Whether purchased at a store or direct from above address, all trial sizes are sold on a money-back guarantee — If **YOU** are not satisfied that **VETZYME** or **ZEMOL** has been of benefit to your dog, simply return bottle and your purchase price will be refunded in full.

FOR CATS, USE "KITZYME" **FOR ALL CAGE BIRDS, USE "P.Y.M."**
